Case 1: Is the screening canceled?

A cropped clip in the group chat seems to cancel the crew's screening, so you check the original documents and write an update.

On your own Read What happened. Underline the sentence that worries the crew. About 4 minutes.

Your role: You're the one who reads the full transcript before Gia posts. **New skill:** Find the original source.

Gia and Mateo read the message about tonight's screening.

What happened

It is Friday afternoon at the Common Room, a shared event space inside a bookshop in Fort Greene, Brooklyn. Mateo, 22, booked the room for tonight's 6 p.m. screening, the crew's first in the neighborhood. He has been moving tables and chairs all afternoon.

Gia, 21, is helping between her class and her shift at a café. Jordy is testing the projector and captions. Sami is on her way from the print shop.

At 4:52 p.m., someone forwards a seven-second clip to the group chat. The clip comes from a meeting about the room. Its caption asks whether the screening is canceled.

Gia wants to warn people before they leave home. Mateo hopes the post is wrong. Gia has about ten minutes before she has to leave for work.

Your question: Is the screening really canceled, and what should the crew tell people?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 4 minutes.

Claim A claim is a statement that something is true. You can check a claim with evidence.

En español: afirmación

In this case: The caption “Screening canceled?” is a claim. It ends with a question mark, and no document confirms it.

Context Context is the information around an event or a quote that you need to understand what it means.

En español: contexto

In this case: The full transcript adds the words “through that reader tonight.” Those words show that only the broken side door is closing.

Framing Framing is choosing which parts of a situation a message brings forward.

En español: encuadre

In this case: The crop and the caption choose what viewers notice: “removing access,” not “through that reader.”

Holding statement A holding statement is a short update that says what is known, what is still being checked and when people will hear more.

En español: comunicado provisional

In this case: Jordy posts: “We’re checking the original. Hold your plans for a moment.”

Words to know

- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Context:** Context is the information around an event or a quote that you need to understand what it means.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.
- **Holding statement:** A holding statement is a short update that says what is known, what is still being checked and when people will hear more.

The story: A real clip with a false caption

By late Friday afternoon, the Common Room is almost ready. The event space, tucked inside a Fort Greene bookshop, has rows of folding chairs that Mateo has been arranging since lunch. Jordy is checking whether the projector's captions are readable from the back row. Gia has about ten minutes before she has to leave for a café shift. Sami, who uses a manual wheelchair and usually enters through the side door, is already on the train from the print shop.

At 4:52 p.m., a seven-second clip reaches the group chat. It comes from a meeting about the room. The coordinator says, "we are removing access," and the clip ends. The forwarded caption supplies the conclusion the video does not: "They're removing access tonight. Screening canceled?"

Nothing about the clip is fabricated. That is what makes it persuasive. The voice is real, the words are real and the meeting happened. Gia's instinct is protective. People are already asking whether to turn around, and she wants to save them a trip. Mateo's instinct is hopeful, and he says plainly that he wants the clip to be fake. Jordy's instinct comes from editing. A sentence that stops at "access" usually has more after it.

Your role in this case is specific. You are the one who reads the full transcript before Gia posts. Every reply the crew sends will be read by people making decisions on the move, so the order of the crew's next three steps matters.

❓ Stop and think. Why can a real clip mislead people more easily than a fake one?

Reading the record against the clip

The caption makes a **claim**, a statement that something is true that can be checked with evidence. Two documents test it. The coordinator’s 3:30 p.m. transcript reads: “The side-door reader is broken. We are removing access through that reader tonight. Existing room bookings remain in place. Use the staffed front entrance while we repair it.” Mateo’s booking email from Tuesday confirms Friday, 6 to 9 p.m., a step-free front entrance and staff at the desk from 5:30.

Set side by side, the documents show that the clip is accurate but incomplete. **Context**, the information around a quote that you need to understand what it means, narrows “removing access” to a single broken reader. The email adds something the transcript does not: the front entrance is step-free. It also leaves something out. It was sent before Friday’s meeting, so it says nothing about the side door.

The crew’s response follows the evidence in order. First, Jordy sends a **holding statement**, a short update that says what is known, what is still being checked and when people will hear more: “We’re checking the original. Hold your plans for a moment.” Notice what it avoids. It does not repeat the word “canceled,” and it does not call the clip fake. Then Gia posts the correction in the same chat where the rumor spread, with the time, the entrance and the original update. Jordy captions it so it can be read without sound. Mateo keeps a link to the full transcript beside the cropped clip.

? **Stop and think.** The holding statement avoids the word “canceled.” What might happen if it repeated the word, even to deny it?

Selection, emphasis and who controls the story

Robert Entman’s research defines **framing** through two actions: selecting some aspects of a situation and making them more salient (Robert M. Entman, “Framing,” 1993). In plain terms, framing is choosing which parts of a situation a message brings forward. The seven-second crop is a frame built by subtraction. It selects “removing access” and removes the qualifier. Analyzing a frame does not require proving anyone’s motive. It requires showing what was selected and what was left out.

The pattern reaches far beyond one group chat. When Suzanne Collins announced a new Hunger Games novel, her publisher quoted her on propaganda and “the power of those who control the narrative” (Scholastic, June 6, 2024). In the 2012 film’s reaping scene, the Capitol stages an official ceremony, yet it cannot control how the crowd reacts when Katniss volunteers for Prim. In our reading, the scene and the clip raise the same question: whose version does the edit make easiest to see?

Research suggests the defense is teachable. A Stanford study found that most of 3,446 students judged posts by how they looked rather than by who made them (Stanford Graduate School of Education, November 18, 2019).

Selection, emphasis and who controls the story, continued

A district-wide field study in high school government classes found that teaching lateral reading measurably improved how students judged online claims (Wineburg et al., Journal of Educational Psychology, July 2022). News organizations hold themselves to a similar standard. The RTDNA code warns that “trending” or “going viral” may increase urgency, but these “only heighten the need for strict standards of accuracy” (RTDNA Code of Ethics, June 11, 2015). Finding the original source is the first skill in this series, and every later case builds on it.

 **Stop and think.** Entman says a frame works by selection and emphasis. What did the crew’s correction select and emphasize?

Notes

Key idea: framing

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 6 minutes.

The clip in the group chat is real, but that only tells you the video is authentic. A **claim** is a statement that something is true. You can check a claim with evidence. **Context** is the information around an event or a quote that you need to understand what it means. Here, the clip stops before the rest of the coordinator's sentence, so the clip alone cannot confirm the caption's claim.

Framing is choosing which parts of a situation a message brings forward. Media researcher Robert Entman uses this idea to study what messages select and emphasize. The crop makes "removing access" stand out and hides "through that reader," the words that limit the change to one broken side door. You do not have to prove that anyone meant to mislead people. You only need to show what the edit leaves out.

A **holding statement** is a short update that says what is known, what is still being checked and when people will hear more. It gives people a next step while the crew checks the documents. The correction that follows needs the time, the door and a contact for arrival help. People who are already traveling need those details before they arrive.

What happened

Anika, 16, and Dec, 17, are at the study table twenty minutes before theater rehearsal. They are building a light circuit for a school set. Dec can explain out loud how the current travels through the circuit. On the written practice sheet, he loses his place in the instructions.

The sheet has six dense paragraphs and one small diagram. Anika's first idea is to run the same timed practice sheet again. Then she draws a larger sketch, and Dec traces the whole circuit correctly.

Mari, 19, is on her break from the bookshop. She does not assume she knows why Dec is stuck. Dec wants help with this task, but he does not want a diagnosis from the group chat.

Your question: Does the practice sheet show what Dec knows, and what should Dec ask his teacher?

- **Eligibility:** Eligibility is meeting the requirements for a particular service or program.
- **Context:** Context is the information around an event or a quote that you need to understand what it means.

The story: What the study table shows

Twenty minutes before rehearsal, the study table looks like a small workshop. Anika, a high school junior who helps build theater sets, and Dec, a senior who pulls the curtain at every show, are wiring a light circuit for a school set. Dec can narrate the path of the current without hesitating: out of the battery, through the switch and the LED, and back. The written practice sheet stops him. It asks students to read six dense paragraphs, use one small diagram and answer four questions in complete sentences. Partway through, Dec loses track of which line the question wants him to follow.

Each friend responds according to habit. Anika, who likes to solve a problem herself, suggests running the timed sheet again. Later she notices her own mistake. She kept pointing at the answer instead of at how the question was built. When she redraws the circuit at a larger size, Dec traces it correctly from start to finish. Mari, who is dyslexic and moves between print and audiobooks, does not claim to know what is happening for Dec. She asks him to explain it to her first, then compare that with the worksheet.

Dec sets the terms. He wants help with this assignment, and he wants his friends to describe what happened rather than announce what is wrong with him. Your role is to read the goal line before anyone decides what Dec knows.

❓ Stop and think. Anika wants to avoid doing the thinking for Dec. How can a clearer format still test the learning goal?

Measuring the goal, not the format

Case 1 taught a habit that transfers directly: go back to the original source. Here that source is the practice brief. Its goal is to “explain how a simple circuit works.” It sets no time limit. A **learning goal** is the knowledge or skill that a task is meant to show, and naming it changes the question. The issue is no longer whether Dec can finish the sheet. It is whether the sheet measures the goal or something next to it, such as reading dense text under pressure.

The evidence is uneven, and that is useful. The study-table notes record two observations on the same afternoon. Spoken, with a larger sketch, Dec’s explanation was correct. Written, he skipped a line and answered a different question. Neither observation explains why. Case 1’s term **context** applies here. A written answer is real evidence, but like a cropped clip it shows one frame of a larger picture.

Anika’s revised plan is modest. She wants one clear diagram and one instruction at a time, followed by Dec explaining why the circuit works. She does not want to do the thinking for him. That last condition matters. A new format is only a fair test if it still requires Dec to show the learning goal.

? **Stop and think.** The notes record what happened but not why. Why is it important to keep those two things separate?

The limits of a study session

Schools have a formal process for questions the crew cannot answer. An **evaluation** is a school’s formal process for learning about a student’s needs, using more than one measure. **Eligibility** is meeting the requirements for a particular service or program. The federal IDEA regulations require a public school to use a variety of assessment tools and forbid using any single measure as the sole basis for an eligibility decision (U.S. Department of Education, IDEA regulations, 34 CFR 300.304). As the law turned fifty, K-12 Dive traced where IDEA, evaluations and individualized education programs came from (K-12 Dive, December 3, 2025).

The same logic appears in design and in civil rights guidance. CAST’s guidelines encourage giving learners more than one way to take in information and show what they know (CAST, Universal Design for Learning Guidelines 3.0, 2024). A systematic review and meta-analysis examined how well that approach works in practice (Almeqdad et al., Cogent Education, May 29, 2023). The Department of Justice says testing accommodations should let a test measure skill rather than disability (ADA.gov, February 28, 2020).

Professional ethics adds a privacy boundary. The NEA code says educators “shall not disclose information about students obtained in the course of professional service” without a compelling professional purpose or a legal requirement (National Education Association, Code of Ethics, 1975). Friends are not bound by that code, but the crew follows its spirit. Dec decides what Ms. R hears, and a study session stays a study session.

The limits of a study session, continued

The skill you practiced here, checking what a task is meant to measure, returns in later cases. You will ask it of a pay statement, a sample ballot and a school budget.

 **Stop and think.** IDEA forbids using a single measure as the only basis for eligibility. What risk is that rule designed to prevent?

What it leaves out

What is still missing from the evidence?

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Key idea: learning goals

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 6 minutes.

Dec's written answer and his spoken explanation give the crew different information. A **learning goal** is the knowledge or skill that a task is meant to show. The practice brief names one goal: explain how a simple circuit works. It does not list speed, and it does not list reading six dense paragraphs. So the next question is what the sheet was meant to measure and what got in the way.

CAST's Universal Design for Learning Guidelines encourage giving learners more than one way to take in information and show what they know. For Dec, a larger diagram is a practice option to test. It is not a diagnosis, and it does not change an official test. Ask Dec what helped, and check that he can still explain the circuit.

An **evaluation** is a school's formal process for learning about a student's needs, using more than one measure. Under IDEA, a federal law, a public school must use varied tools in an evaluation. No single measure can be the only basis for deciding **eligibility**. Eligibility is meeting the requirements for a particular service or program. A study session is not an evaluation, so Dec decides whether to ask his school how that process starts.

A student's first draft

Hi Ms. R, Dec failed the circuit sheet again and we think the test is unfair to him. He obviously knows the material because he explained it to us perfectly. At the study table he went through the whole thing out loud with no mistakes. ① We think he might have a learning disability and should get an IEP so he can get extra time. My cousin has one and it helped her a lot. ② Can you give him an easier version? We really think this would help him pass. Thanks, Anika and Mari.

Case 3: What should a group do after a public mistake?

The crew's recap caption blamed younger neighbors for a late start, but the event log shows the projector failed.

On your own Read What happened. Underline the caption and the time the projector failed. About 4 minutes.

Your role: You're the one who checks the log's times before the correction goes up. **New skill:** Correct a public mistake.

Gia and Jordy sit at a table with a laptop and a printed page.

What happened

It is Sunday at the edit desk. Caio, 24, edited a short recap of Friday's screening. The crew posted it on Saturday morning. Gia's caption, "Great night, once the younger crowd finally got organized," sounded believable, because a few people did arrive late.

Then Jordy checks the setup log. The projector failed at 5:40 p.m. The replacement was not running until 6:20, twenty minutes after everyone was seated. The log also says Anika and Dec helped carry chairs before the doors opened.

Anika sends the group a voice note asking why she and Dec are the problem in the post. Gia wants to take responsibility. Her first draft of a correction is mostly about how bad she feels, and the recap caption is still up.

Your question: What should the correction say, and what will the crew do differently next time?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 4 minutes.

Claim A claim is a statement that something is true. You can check a claim with evidence.

In this case: The caption claims the late start happened because “the younger crowd” was not organized. Jordy’s setup log checks that claim.

Correction A correction is a public statement that replaces wrong information with accurate information.

En español: corrección

Accountability Accountability is owning a mistake and doing what you said you would do to fix it.

- **Correction:** A correction is a public statement that replaces wrong information with accurate information.
- **Accountability:** Accountability is owning a mistake and doing what you said you would do to fix it.

The story: The log nobody opened

The crew's first neighborhood screening, the one saved from a cropped clip in Case 1, went ahead on Friday. On Saturday at 11:08 a.m., the crew posted a recap. Caio, 24, had edited the video. Gia, 21, wrote the caption: "Great night, once the younger crowd finally got organized." It seemed accurate to her in the loose way captions often do. A few people had arrived late, and the evening had started late, so the two facts fused into a cause.

On Sunday at the edit desk, Jordy opens the setup log. At 5:40 p.m., a projector failure was reported. At 6:00, attendees were seated. At 6:20, a replacement was connected, twenty minutes after the audience sat down. The final line notes that Anika and Dec, the two youngest people involved, carried chairs before the doors opened. Jordy writes in the chat that no one opened the log before posting, Jordy included.

Anika's voice note lands next: "We were helping you set up. Why are we the problem in this post?" Gia had already drafted a response, which was never posted: "Sorry if this came across wrong. We love our younger neighbors and would never want anyone to feel excluded." Rereading it, she recognizes the conditional "if" as a dodge. The draft also never mentions the projector.

❓ Stop and think. How did two true facts, a late start and some late arrivals, combine into a false claim?

Two jobs in one caption

The caption did two jobs at once. It explained the late start, and it assigned blame for it to a group of people. The first job is a **claim**, a statement that something is true that can be checked with evidence.

Two jobs in one caption, continued

Case 1 gave you the method: find the original source. The log is that source, and it replaces the caption's explanation with a mechanical one.

A **correction** is a public statement that replaces wrong information with accurate information. A strong correction here has a clear order. It names the wrong claim, states what the log shows and places the fix where the original audience will see it. Caio's rule, fix the same post instead of burying it under a new one, follows from that last requirement.

Accountability is owning a mistake and doing what you said you would do to fix it. In practice, accountability becomes a list of named owners. Gia corrects the post. Caio keeps a visible correction note with the edit. Jordy adds a source check before publication. Each owner is a named person rather than the crew in general, so anyone can check later whether the work was done. Just as important is what accountability does not require. Anika should not have to comfort Gia or approve the correction in public. Jordy suggests offering Anika a private way to respond and then letting her decide what she thinks. Jordy also proposes a test of success that ignores view counts. Ask a few people who saw the first post why the screening started late. If they still say "the younger crowd," the fix failed.

 **Stop and think.** Why does accountability include limits on what the crew asks of Anika and Dec?

What research and professional codes add

A 2016 study of apologies found that acknowledging responsibility and offering repair mattered most among six elements (Lewicki et al., *Negotiation and Conflict Management Research*, April 6, 2016). Research on misinformation points the same way. A meta-analysis of 65 studies found that corrections work better when they explain what is true rather than simply denying the false claim (Walter and Murphy, *Communication Monographs*, May 15, 2018). Gia's draft offered neither an explanation nor a repair.

Journalists write the prominence rule into their ethics. The RTDNA code says ethical journalism requires "owning errors, correcting them promptly and giving corrections as much prominence as the error itself had" (RTDNA Code of Ethics, June 11, 2015). NPR's public editor describes naming the error, fixing it on the story and keeping a public list (NPR, October 21, 2022).

The film connection sharpens the stakes. In *Zootopia* (2016), Judy tells a press conference that a set of incidents has a biological explanation tied to one group, and Nick's reaction shows a personal cost her official answer overlooks. In our reading, good intentions do not erase the effect of an unsupported claim about a group. The animal groups in the film are not a scientific model of human race. The crew's caption is far smaller, but it made the same kind of move. Your job is to check the log's times before the correction goes up.

What happened

It is the Friday after the crew’s first screening, and the board meeting is coming up. A small neighborhood nonprofit runs the Common Room alongside the bookshop. The nonprofit’s board is considering paid rentals on two evenings a week to help cover staffing. No vote has happened yet.

Mari, 19, works the bookshop counter and closes the shop. She knows that “just keep it free” does not pay the evening staff. Sami runs a print workshop in the room after her afternoon shift. It is one of the few step-free rooms nearby.

Caio, 24, runs the crew’s Tuesday film night. Tuesday is one of the evenings Option B would rent out. Mateo already has a headline for a petition. The crew agrees the room matters, but they do not agree on the best schedule.

- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.

The story: The meeting nobody can attend

The Common Room’s board meets Wednesday at 6:30 p.m. The small nonprofit that runs the room alongside the bookshop is weighing paid evening rentals to help cover staffing. The agenda item is marked “for discussion,” and no vote has been taken. By Friday, the crew’s group chat has split along predictable lines. Mateo, who likes turning “we should” into a plan, has drafted a petition headline. Others are less sure a petition is the right tool.

Mari holds both sides of the problem in one job. She is paid to lock up the bookshop and then stays for zine night with her friends. She wants the free time protected, but she knows the bookshop has costs, and she proposes asking which hours earn money and testing a different arrangement. Sami raises a procedural objection. The crew keeps speaking for evening users without asking them. For her own part, she wants three things from the meeting: the actual proposal, a way to give input without speaking on the spot and a clear answer about what that input can change.

Caio, 24, runs the crew’s Tuesday film night, one of the evenings Option B would rent out. Dec rehearses on Thursdays. The proposed meeting time overlaps several people’s shifts. The people most affected by the decision are among those least able to attend it.

❓ Stop and think. Sami wants to know what her input can change. Why does that question matter before anyone speaks?

Reading an agenda like an analyst

The documents lay out the choice. Option A keeps the current free evenings and leaves the funding gap. Option B replaces Tuesday and Thursday evenings with paid rentals. Option C pilots one rental evening for six weeks while seeking additional funding. Each is a **proposal**, a change that someone suggests and that has not been approved yet. The budget note puts evening staffing and utilities at \$600 a week against \$400 in grants and donations. Each rental is projected to add \$120 after costs, so two would cover the \$200 gap and one would leave \$80. The note adds a caution the headline would never carry: demand is uncertain.

A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Every option has one. Option A protects the evenings and leaves the deficit. Option B closes the deficit on paper and ends two free nights. Option C limits the loss and leaves a smaller gap. It also leaves open what the board will do if the pilot falls short.

The policy scholar Carol Bacchi offers a sharper tool. Her approach asks what a proposed solution assumes the problem is (Carol Bacchi, “What’s the problem represented to be?”, November 1, 2017). Option B represents the problem as a \$200 gap and treats two free evenings as the price. That representation is a form of **framing**, the Case 1 idea of choosing which parts of a situation a message brings forward. It brings the budget forward and pushes Sami, Dec, Mari and Caio into the background. Bacchi’s question applies to the crew’s own preferences too. A petition to “keep it free” represents the problem as a threat to free space and leaves the staffing cost out of view.

 **Stop and think.** Apply Bacchi’s question to Option C. What does it assume the problem is?

Decision-makers and public participation

A **decision-maker** is the person or group with the power to make a particular choice. The board controls its own schedule, so a strong comment names the proposal, explains one effect with evidence and asks for something the board can decide. Public agencies follow different rules. New York’s community boards, for example, have advisory authority (NYC.gov, Brooklyn Community Board 13, no date listed).

New York’s libraries show how funding decisions reach ordinary schedules. City budget cuts ended Sunday hours at every branch that still had them, and Brooklyn’s last Sunday was December 17, 2023 (NY1, November 17, 2023). Restored funding, part of a \$58.3 million investment, brought Sunday service back starting July 14, 2024 (NYC Mayor’s Office, July 1, 2024). Council members thanked residents who called and wrote (New York City Council, July 14, 2024).

Professional codes speak to the board’s side of the table. The American Society for Public Administration asks public servants to “inform the public and encourage active engagement in governance” (ASPA Code of Ethics, 2013). The crew’s plan puts that into practice.

Decision-makers and public participation, continued

It sends the board a joint question that leaves room for disagreement. Mari checks the figures, Sami proposes a way to send written feedback and Mateo rewrites the petition as a request the board can answer. Your role is to check the budget figures before the crew speaks to the board.

?

Stop and think. A petition to keep the room free is also a frame. What does it bring forward, and what does it leave out?

On your own Read each document. For each one, write what it shows and what it leaves out. About 8 minutes.

Evidence A | Board agenda, Wednesday 6:30 p.m. meeting

The proposal

Evening rentals, for discussion. Option A: keep the current free evenings; the funding gap remains. Option B: replace Tuesday and Thursday evenings with paid rentals. Option C: pilot one rental evening for six weeks while seeking additional funding. No vote has been taken.

Evidence B | Weekly budget note for the board

The budget note

Evening staffing and utilities: \$600. Current grants and donations: \$400. Each paid rental is projected to add \$120 after its extra costs. Two bookings would add \$240; one would add \$120. Demand is uncertain.

Key idea: trade-offs

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 6 minutes.

The board is weighing a **proposal** about the free evenings. A proposal is a change that someone suggests and that has not been approved yet. Option B would help close the \$200 weekly gap, but it would end the free Tuesday and Thursday evenings. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Every option on the agenda has one, including the one you prefer.

Carol Bacchi's policy-analysis approach asks what a proposed solution assumes the problem is. Option B treats the \$200 gap as the problem and two free evenings as the price. That leaves two questions open: who loses those evenings, and what happens if bookings come in lower than projected? Ask the same questions about your own favorite option.

A **decision-maker** is the person or group with the power to make a particular choice. Here, the nonprofit's board controls its own schedule. A community board or a city agency would follow other rules. A strong comment names the proposal, explains one effect with evidence and asks for a decision the board can make. The board can still choose an option the crew did not ask for.

Practice: choose a response

On your own Choose what the crew should ask for first and explain why. Then fix the two marked lines. About 6 minutes.

What should the crew ask the board for first?

- ☐ **A** Post that the board is taking away the free nights.
- ☐ **B** Ask for the budget assumptions, who uses each evening and a way to comment without attending.
- ☐ **C** Support whichever option brings in the most money.

1 The board should not take away our free nights. The Common Room is important to the community and a lot of people use it. I have been coming here for movie nights since it opened and it's one of the only places we can all hang out without paying. Renting it out just shows **2** the board cares more about money than people. Sami and Dec would lose their spot and that is not fair. Please keep it free for everyone. Thank you for listening.

Case 5: Why is my deposit smaller than what I earned?

Gia's bank deposit is smaller than the pay she worked out, so she reads her pay statement line by line before asking payroll.

On your own Read What happened and underline the two hour totals that do not match. About 4 minutes.

Gia holds a small card and talks beside a phone on a tripod. Jordy holds Voz, one of the crew's companions, on an open hand.

Your role: You're the one who adds up Gia's hours before she writes to payroll. **New skill:** Read a pay statement line by line.

What happened

It is Thursday evening, and it is payday for Gia. She works café shifts around her college classes. She checks her bank account and sees a deposit that is smaller than the pay she worked out. Gia keeps a shift log in her notes app. The log says 18 hours, but her pay statement says 15.

Jordy works event shifts, and their deposit looks different too. Jordy's shifts fall on different dates and hours, so their pay cannot explain Gia's. Jordy asks Gia to name the line that worries her instead of posting her whole statement.

Gia's pay statement lists her hours, her hourly rate and four tax lines. She expected the lines for Social Security and Medicare. She does not understand the line for federal income tax. Before she writes to payroll, she wants to know what her own records show.

Your question: Why is Gia's deposit smaller than her own count, and what should she ask payroll?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 4 minutes.

Gross pay Gross pay is the money you earn before any taxes or other deductions are taken out.

En español: salario bruto

In this case: Gia's statement pays 15 hours at \$17.00 an hour, so her gross pay is \$255.00.

Net pay Net pay is the money left after taxes and other deductions, often called take-home pay.

En español: salario neto

In this case: The \$220.99 that reached Gia's bank account is her net pay, not the amount she earned.

FICA FICA is the federal payroll tax that funds Social Security and Medicare.

En español: FICA (Seguro Social y Medicare)

In this case: On Gia's statement, FICA appears as two lines: Social Security tax, \$15.81, and Medicare tax, \$3.70.

Withholding Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.

En español: retención

In this case: Federal income tax withheld, \$8.40, is a separate line from FICA. The IRS says its amount depends partly on the W-4.

Jordy

Reading the document behind the deposit

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Gross pay:** Gross pay is the money you earn before any taxes or other deductions are taken out.
- **Net pay:** Net pay is the money left after taxes and other deductions, often called take-home pay.
- **FICA:** FICA is the federal payroll tax that funds Social Security and Medicare.
- **Withholding:** Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.

The story: Eighteen hours or fifteen

Gia works café shifts around her college classes, and like many students with jobs, she checks her pay the way most people check the weather: quickly, on her phone, expecting nothing unusual. On this Thursday, the deposit is smaller than the number in her head. She does not guess. She opens the shift log she keeps in her notes app. Five shifts, 18 hours. Then she opens her pay statement. Fifteen hours.

She posts in the group chat that her deposit is much lower than expected. Jordy, who works event shifts, notices their own deposit looks different too, and then immediately sees why that comparison is useless. Their shifts fall on different dates and hours. Two deposits cannot explain each other. Jordy's next message sets a boundary that protects them both. Gia should not post her whole statement. She should name the line that worries her. Jordy also does not want Gia mentioning their pay to her payroll office. It proves nothing about Gia's pay and puts Jordy's pay in front of Gia's payroll office.

Your role is to add up Gia's hours before she writes to payroll. That sounds simple. It is also the step most people skip.

❓ Stop and think. Why does Jordy not want Gia to mention Jordy's pay in her message?

A statement is an argument you can check

Gia's working theory is that payroll shorted her.

A statement is an argument you can check, continued

That is a **claim**, a statement that something is true that can be checked with evidence. Case 1 taught you to test a claim against the original source, and Case 4 taught you to read dollar figures carefully, as Mari did with the board's budget note. A pay statement combines both skills. It is the employer's account of how it got from your work to your deposit, and each line can be checked.

The statement covers the pay period ending Friday the 12th, paid the following Thursday. It lists 15 hours at \$17.00, for \$255.00 in **gross pay**, the money you earn before any taxes or other deductions are taken out. Gia's log explains the difference in hours. Her shifts on the 8th, 10th, 11th and 12th total 15 hours. Her 3-hour Saturday shift on the 13th fell after the period closed. The likely answer is that those hours will appear on the next statement. A likely answer is not a confirmed one, so Gia still plans to ask.

The rest of the gap is taxes. Social Security tax of \$15.81 and Medicare tax of \$3.70 together form **FICA**, the federal payroll tax that funds Social Security and Medicare. Federal income tax withheld, \$8.40, is a separate line, as is state and local income tax, \$6.10. **Withholding** is money an employer takes out of each paycheck to pay taxes or other costs for the worker. The total left, \$220.99, is Gia's **net pay**, the money left after taxes and other deductions, often called take-home pay.

 **Stop and think.** What is the difference between a likely answer and a confirmed one, and why does Gia still write to payroll?

The system behind the lines

The IRS explains that the federal taxes an employer withholds include income tax, Social Security and Medicare. It says income-tax withholding depends partly on the worker's Form W-4 (Internal Revenue Service, updated May 1, 2026). Federal income tax taken from each paycheck counts toward what a worker owes for the whole year, so one paycheck cannot show that yearly total. The IRS Tax Withholding Estimator is the official tool for checking whether withholding is on track (Internal Revenue Service, updated June 27, 2026). The IRS has also written directly to teens starting a first job, explaining withholding and the W-4 (IRS Tax Tip 2019-62, May 20, 2019).

FICA can feel abstract until you ask what it funds. The Peter G. Peterson Foundation explains where the Social Security and Medicare money taken from a paycheck goes (Peter G. Peterson Foundation, May 26, 2026). NPR's The Indicator devoted an episode to the Social Security portion and why it comes out of nearly every check (NPR, June 6, 2018).

Gross pay has its own rules. Many states set a minimum wage above the federal one, and 19 states raised theirs in January 2026 (Money, January 1, 2026). Payroll professionals hold themselves to a standard, too. The PayrollOrg code asks members "to strive for perfect compliance, accuracy, and timeliness of all payroll activities" (PayrollOrg Code of Ethics, no date listed).

The system behind the lines, continued

A worker who can read the statement is the best check on that promise.

 **Stop and think.** Why can one paycheck not show how much federal income tax a worker will owe for the year?

Key idea: gross pay and net pay

On your own Read the key idea and the code of ethics, then answer the question in the box. About 6 minutes.

A bank deposit shows how much money arrived, but the pay statement shows how the employer figured it. **Gross pay** is the money you earn before any taxes or other deductions are taken out. For an hourly worker, gross pay is the hours worked times the hourly rate, plus any other earnings. **Net pay** is the money left after taxes and other deductions, often called take-home pay. Gia's deposit is her net pay.

Deductions are the lines between those two totals. **FICA** is the federal payroll tax that funds Social Security and Medicare. On Gia's statement, FICA appears as two lines: Social Security tax and Medicare tax.

Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker. Federal income-tax withholding is a separate line from FICA, and the IRS says its amount depends partly on the worker's Form W-4.

A statement can also list other deductions, such as benefit contributions, so read each line's name before you decide it is income tax. The federal income tax taken from each paycheck counts toward the tax a worker owes for the whole year. One paycheck cannot show what that yearly total will be. This explanation covers employees in the United States. Self-employed workers follow a different tax process.

On your own Read What happened and underline what Rafa's dad asks for in the family chat. About 4 minutes.

Rafa and Caio sit on a sofa and look at Rafa's phone. Caio explains something with an open hand.

Your role: You're the one who reads each box on the form before Rafa signs. **New skill:** Read a form section by section before you sign.

What happened

Rafa, 18, has just started college, and his parents help pay his tuition bill. He commutes from the next block and helps at his family's shop after class. At the end of August, the college mailed Rafa a family-access form, but he has not opened the envelope yet.

On Sunday night, his parents ask about the form in the family group chat. His dad wants Rafa's login so the family can handle everything. Rafa is glad to share the bill, but he wants to read the rest of the form first.

Caio, an older friend who rents a room on the block, reads the form with Rafa, not for him. The form has separate sections for billing and for grades. Rafa wants to check the billing box. He wants to talk with his family before he decides about grades.

Your question: What will this form let Rafa's parents see, and what should he ask before he signs?

The story: Family support and a sealed envelope

Rafa, 18, is in his first weeks of college. He commutes from the next block and works at his family's shop after class. His parents help with tuition, and they want to keep helping. At the end of August, the college mailed him a parent and family access form. He has not opened it.

On Sunday night, his parents bring it up in the family group chat. His mom asks whether the tuition form arrived so they can help with the bill. His dad proposes the simplest route from a parent's point of view: send the login, and the family will take care of everything. Rafa answers that he can share the bill part and wants to read the rest first. His reply is honest and a little uncomfortable. It says yes to one kind of help and asks for time on another.

Caio, 24, the oldest in the crew, rents a room on the block and offers to sit with Rafa while he reads the form. He is careful about the limits of that help. Being the older friend does not make this his decision. When the conversation turns to exceptions in the law, Caio pushes for precision. Which exception, and does it even fit Rafa? Just saying "privacy law" will not answer his dad.

Your role in this case is to read each box on the form before Rafa signs.

- ❓ **Stop and think.** Rafa says yes to one kind of help and asks for time on another. Why might that be harder than saying yes to everything?

A form is a set of separate decisions

The new skill in this case builds on Case 5. There, you read a pay statement line by line and matched each line to a record. Here, you read a form section by section and decide each part on its own. Section 1 would let a named person view account statements and make payments. Section 2 would let that person receive information about grades, enrollment and academic standing. Section 3 says the authorization lasts until Rafa changes or withdraws it in writing. The first two sections each carry a separate yes-or-no box.

The college's annual notice adds the legal frame. Students have the right to inspect their education records, to request corrections and to consent to disclosures, except where the law allows disclosure without consent. The notice does not say which exceptions this college uses, and neither document says where Rafa sends a written change.

Two earlier terms sharpen the analysis. A **decision-maker** (Case 4) is the person or group with the power to make a particular choice, and on this form that person is Rafa. A trade-off (also Case 4) exists in each section separately. Sharing billing costs little and gives his parents what they asked for. Sharing grades may strengthen family trust, or it may shift a conversation Rafa would rather have in person first. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, it is written and specifies which record, to whom and for what purpose. A shared login is the opposite of specific.

❓ **Stop and think.** The notice lists rights and exceptions but not which exceptions this college uses. What should Rafa ask to fill that gap?

The federal rule and its exceptions

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. An **education record** is a record directly about a student that a school or college keeps. Under the general rule, FERPA rights transfer from parents to the student at 18 or when the student enters college at any age, and the law calls that student an “eligible student” (U.S. Department of Education, Student Privacy Policy Office, no date listed). Paying tuition does not, by itself, return those rights to a parent.

The exceptions are real and narrow. A college may disclose records to parents if the student is a dependent for federal tax purposes, and it may disclose in a health or safety emergency. The Department of Education stresses that these disclosures are permitted, not required (U.S. Department of Education, Student Privacy Policy Office, no date listed). That is why the practical step is a question to the records office, not an argument from the law alone. American University's parent-access guide shows how one institution handles it, and it is one university's process, not a national rule (American University, June 30, 2025).

The federal rule and its exceptions, continued

Records management is also a data security problem. A breach at PowerSchool exposed millions of student records (Education Week, January 9, 2025). The Markup has reported on how school software companies gain access to student data, and where FERPA’s protections run out (The Markup, January 15, 2022). Registrars’ own professional code asks them to “protect the legitimate privacy interests of all individuals” (AACRAO Ethics and Practice, 2010).

 **Stop and think.** Why does Caio insist on naming the exact exception instead of saying “privacy law”?

Key idea: education records

On your own Read the key idea and the code of ethics, then answer the question in the box. About 6 minutes.

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. It gives parents, and later students, rights over those records. An **education record** is a record directly about a student that a school or college keeps. Grades, transcripts and schedules can be education records, on paper or stored digitally. Under the general rule, the rights transfer to the student at age 18 or when the student starts college, at any age. The law calls that student an “eligible student.”

Helping pay tuition does not, by itself, give those rights back to a parent. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, consent is written and says which record, to whom and for what purpose. Rafa’s form asks about billing and about grades in separate sections. He can say yes to one section and no to the other. He can also change his choice later in writing.

FERPA also has exceptions, which are situations in which a college may share records without the student’s consent. A college may share records with parents if the student is a dependent for federal tax purposes. It may also share them in a health or safety emergency. The U.S. Department of Education says this sharing is allowed, not required, so Rafa should ask his records office what his college does.

Your role: You're the one who reads the library notice before anyone replies "banned." **New skill:** Find what stage a process has reached.

Gia, Mari and Sami talk around a table on a rooftop terrace at sunset.

What happened

On Thursday night, a message about a novel in the library at Anika's high school appears in a group chat. The message says one parent complained, so the novel is now banned and gone from the library. Gia replies that this is censorship.

On Friday, the school library posts a notice about the novel. Mari reads it and compares it with the group chat. Gia deletes her first reply, because she had not read the notice or the novel.

Mari works the counter at the neighborhood bookshop. She switches between print and audio, and she is halfway through the novel on audio. Gia is planning a discussion at the bookshop. First, both of them want to know what stage the library's process has reached.

Your question: Is the novel really banned, and what can people who care about it do next?

Challenge A challenge is a formal request to remove or restrict a book or other library material.

Reconsideration policy A reconsideration policy is a library's written process for reviewing a challenge to a book.

En español: política de reconsideración

In this case: The library's notice follows district policy: a committee review, the selection criteria, written input by the 15th and an appeal.

Selection criteria Selection criteria are the written standards a library uses to decide which materials to include.

The story: Two messages, two days

On Thursday night, a claim about a novel in the library at Anika's high school moves through a group chat. One parent complained, it says, so the novel has been banned and removed. Gia answers with the certainty of someone who cares about the freedom to read: "censorship, full stop." The reply fits her values. It does not fit the evidence, because there is no evidence in the chat yet.

The evidence arrives Friday, when the school library posts a notice. Mari, who works the bookshop counter, reads it against the chat. She is dyslexic and moves between print and audiobooks, and she is halfway through this novel on audio. She points out the contradiction plainly. The chat says the book is gone. The notice says it remains available during the review. Both cannot be true.

Gia deletes her first reply. She had not read the notice or the book. She is now organizing a discussion at the bookshop and wants it to be useful, which means getting people to the input form before the 15th with something to say. She also sets a boundary that many online arguments skip. Nobody goes after the parent who asked for the review, because that parent used the process too.

Your role is to read the library notice before anyone replies "banned."

? Stop and think. The chat collapsed a complaint, a temporary change and a final decision into one word. Why is that collapse so common?

Stages, not verdicts

The new skill in this case is finding what stage a process has reached. It depends on two earlier ones. From Case 1, you go to the original source, here the library's notice. From Case 3, you know that a **correction** replaces wrong information with accurate information where people saw the mistake.

The notice describes a sequence. A request for reconsideration has been received. The title remains available during the review. A committee will read the full work and evaluate it against the district's selection criteria. Written input is due by the 15th. The committee's decision may be appealed. A **challenge** is a formal request to remove or restrict a book or other library material. It opens that sequence, but it does not end it. A **reconsideration policy** is a library's written process for reviewing a challenge to a book, and **selection criteria** are the written standards a library uses to decide which materials to include.

With the sequence in view, the chat's **claim** can be judged precisely. It collapses three different events into one: a complaint, a possible temporary change and a final decision. Only the first has happened. The notice also has gaps. It does not name the novel, list the committee members or quote the criteria, so a careful reply should not fill those in.

Mari's approach to the input form shows how to join the process rather than just comment on it. The form asks whether you have read the entire work and which criteria your input addresses, with a 300-word limit. She is finishing the book first. Her experience with books like this explains why she cares, but it is not the policy, so she plans to connect the two.

 **Stop and think.** What should a careful correction leave out, given what the notice does not say?

Professional guidance, state law and the courts

The American Library Association recommends that libraries adopt a formal reconsideration policy, and its model process has a committee read the whole work (American Library Association, updated January 2018). Its separate guidance on selection criteria explains how libraries evaluate resources (American Library Association, updated January 2018). That guidance is professional advice. Districts adopt their own policies, and states write their own laws. Colorado legislators advanced a bill to require clear reconsideration policies (Chalkbeat Colorado, February 10, 2025). In Tennessee, reporters found that a revised state law changed the review steps and that some books quietly left shelves (Chalkbeat Tennessee, September 17, 2024).

The constitutional question remains unsettled. A law-firm analysis explains that the Fifth Circuit treated public library book removals as government speech, creating a split with the Eighth Circuit (Cahill Gordon and Reindel, September 22, 2025). The answer to whether a removal is legal can depend on where you live.

Professional guidance, state law and the courts, continued

Professional codes sit on both sides of Gia’s evolving view. The ALA code says, “We uphold the principles of intellectual freedom and resist all efforts to censor library resources” (ALA Code of Ethics, 2021). The NCA credo asks communicators to “understand and respect other communicators’ intent before evaluating and responding to their messages” (NCA Credo for Ethical Communication, 2024). Holding both is the discipline this case asks for.

 **Stop and think.** How can someone oppose removing a book and still respect the parent who filed the challenge?

Key idea: book challenges

On your own Read the key idea and the code of ethics, then answer the question in the box. About 6 minutes.

A **challenge** is a formal request to remove or restrict a book or other library material. A challenge starts a review. On its own, it does not remove a book. A complaint, a temporary change and a final decision can happen at different times. Check which stage a process has reached before you repeat a claim.

A **reconsideration policy** is a library's written process for reviewing a challenge to a book. The American Library Association (ALA) recommends that libraries adopt one, and its example has a committee read the whole work. **Selection criteria** are the written standards a library uses to decide which materials to include. ALA's guidance is a professional recommendation, not a law. Each district's adopted policy and the applicable law govern its own process.

Whether removing a book breaks the law is a harder question. Federal courts disagree about how the First Amendment applies when a library removes a book. The answer can depend on where you live. Right now, the notice at Anika's school describes a review, and the novel is still available.

Case 8: Is it a recommendation or an ad?

Gia loves a novel that a publisher sent her for free, and her video review does not mention the free copy yet.

On your own Read What happened. Underline what the publisher sent Gia and what it asked for. About 4 minutes.

Gia, Caio and Mari set up a camera in a bright studio.

Your role: You're the viewer with the sound off who checks the first three seconds. **New skill:** Spot and disclose a material connection.

What happened

At 1:30 p.m. on Saturday, Caio finishes editing Gia's short video review of a new novel. Gia made the review for BookTok, where people recommend books on TikTok. She stayed up until 2 a.m. to finish the novel, and she loves it.

Two weeks ago, the book's publisher emailed Gia. The publicity team offered her a free copy of its spring novel for review. The email said she did not have to post, but it asked for a tag if she did. In the first cut, Gia never says the book was free. The only sign of the publisher is a tag in the caption below the video.

Caio wants to watch the cut the way a stranger would, on a phone with the sound off. He wants to know whether the first three seconds say the book was free. Gia wants to keep her honest opinion in the video. She also wants viewers to know how she got the book.

Your question: Do Gia's viewers need to know the book was free, and how should she tell them?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 4 minutes.

Material connection A material connection is a relationship with a brand, like payment or a free product, that viewers might not expect.

En español: conexión material

In this case: The publisher sent Gia a free copy of its spring novel for review. That free copy is a material connection.

Disclosure A disclosure is a clear statement that tells people about a relationship or fact they would want to know.

En español: divulgación

In this case: Gia's first cut has no disclosure. The tag in the caption names the publisher but never says the book was free.

Endorsement An endorsement is a message that shares someone's opinion or experience of a product to promote it.

En español: respaldo

In this case: Gia's video review promotes the novel with her own opinion: she stayed up until 2 a.m. to finish it.

Words to know

- **Disclosure:** A disclosure is a clear statement that tells people about a relationship or fact they would want to know.
- **Endorsement:** An endorsement is a message that shares someone's opinion or experience of a product to promote it.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.

The story: The edit that is almost done

Gia's review is sincere. She stayed up until 2 a.m. finishing the novel, and her video for BookTok, TikTok's book-recommending community, captures that. Caio, who edits video and has a habit of checking before posting anything that involves someone else, finishes the cut at 1:30 p.m. on Saturday. Gia is ready to publish.

Caio asks for one more pass, done the way most viewers would watch: once, on a phone, with the sound off. He is looking at the first three seconds. The question he wants answered is whether a stranger could tell that the book was free.

It was. Two weeks earlier, the publisher's publicity team emailed Gia to offer a free copy of its spring novel for review. The email said there was no obligation to post but asked for a tag if she did. The first cut opens with Gia saying she literally could not put the book down. There is no on-screen text, and the only trace of the publisher is "@publisher #booktok" in the caption below the video.

Gia's first defense is the tag. Caio's edit notes reply in four words: tag equals brand name, not relationship. Your role in this case is to be the viewer with the sound off who checks the first three seconds.

Stop and think. Why does the case insist that the free copy does not make Gia's opinion false?

Separating the opinion from the relationship

Three terms keep the analysis clean. An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. Gia's review is an honest endorsement with an undisclosed material connection. The connection does not make her opinion false. It changes what a viewer needs to know to weigh it.

This is a framing problem, in the Case 1 sense of **framing**: choosing which parts of a situation a message brings forward. The first cut brings forward enthusiasm and leaves the relationship in a caption that many viewers never open. Caio's fix reorders the frame without deleting anything true. The video opens with a three-second line, "Quick heads-up, the publisher sent me this free," spoken and on screen, followed by Gia's hook.

The case also asks what a disclosure does not do. Gia had considered calling the novel the best book of the year and then asks herself, out of the ones she happened to read? She replaces the superlative with what she can support: two nights, could not put it down. A disclosure answers how she got the book. It does not make every claim in a review accurate.

Finally, the case tests the fix on an audience. Caio will show the cut to someone who did not help make it and ask whether the book was free. If they hesitate, the disclosure is not clear yet. A comment on another creator's review shows the cost of late discovery: "wait was this sponsored?? kind of feels like an ad now." The comment is about someone else, and nobody knows whether that review was sponsored, which is the point.

 **Stop and think.** Apply the FTC's "clear and conspicuous" definition to the caption tag. Does the tag meet it?

Rules, enforcement and evidence

The Federal Trade Commission's Endorsement Guides explain how federal law against deceptive practices applies to endorsements. The current text says material connections "can include monetary payment or the provision of free or discounted products ... to an endorser, regardless of whether the advertiser requires an endorsement in return" (16 CFR Part 255, as revised 2023). The same guides define "clear and conspicuous" as "difficult to miss (i.e., easily noticeable) and easily understandable by ordinary consumers." FTC staff guidance for video says the disclosure belongs in the video itself, ideally both spoken and on screen (Federal Trade Commission, updated December 3, 2024).

Enforcement has followed. In November 2023, the FTC warned two trade associations and a dozen influencers about posts promoting aspartame or sugar, stressing that disclosures belong in the video, not a caption (Federal Trade Commission, November 14, 2023).

Rules, enforcement and evidence, continued

Trade coverage noted that sponsors share responsibility for clear disclosures (Food Dive, November 27, 2023).

Research on adolescents supports the rule's purpose. A study of 3,149 high school students in Taiwan found that full sponsorship disclosure helped teens recognize a post as an ad (Lin et al., PLOS One, May 27, 2026). Earlier work examined whether disclosures help younger and older teens notice when an influencer is paid (van Reijmersdal and van Dam, Journal of Youth and Adolescence, January 18, 2020).

 **Stop and think.** Who should make sure disclosures are clear: creators, brands or platforms?

Key idea: material connections

On your own Read the key idea and the FTC guide. Then answer the question in the box. About 8 minutes.

An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. Gia's video review is an endorsement, and her opinion in it is honest. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. The free copy from the publisher is a material connection. Knowing about it gives viewers context, but it does not prove that Gia's opinion is false.

The Federal Trade Commission (FTC) is a federal agency. Its Endorsement Guides explain how a federal law against deceptive practices applies to endorsements. A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. For a video, the FTC says the disclosure belongs in the video itself, ideally both spoken and on screen. A tag in the caption only names the brand, and it sits below the video.

A disclosure answers one question: how did Gia get the book? Viewers can still ask what supports her claims about the book itself. A clear disclosure does not make every claim in a review accurate. Do not accuse a real creator of hiding a sponsorship based on a guess.

Mateo and Gia work in a notebook at a café table.

What happened

It is Sunday at the library desk. Dec turns 18 in October, before the general election on November 3, 2026. His feed is full of posts about one big race. Mateo and Gia are helping him find out what else is on his ballot.

They look at a sample ballot for the November election. The front shows the big race from Dec's feed. The second page has more: a school board race, a city council seat and Measure T, a transit bond. Mateo notices that nobody is posting about Measure T.

A creator's voter guide is also going around. It says registration closes "the 14th," but it never names a state. It also tells people how to vote on the school board race and Measure T. Gia is writing a reminder for the group chat.

Mateo has his own problem. He may still be registered at his mom's address in New Bedford, Massachusetts. Dec says he does not need anyone to pick for him. He needs to know what is on his ballot and whether he is registered in time.

The story: One race in the feed, five on the ballot

Dec, a high school senior who drums on weekends and helps build theater sets, turns 18 in October. The general election is November 3, 2026. His social feed treats it as a single contest, one big race covered from every angle. On Sunday, at the library desk, Mateo and Gia help him find out what the feed leaves out.

The sample ballot for November is organized by level of government. Federal: U.S. Representative. State: State Senator and a Superior Court judge up for retention. Local: two seats on the Board of Education in District 3 and a City Council seat in Ward 5. And one measure: Measure T, a transit improvements bond. Mateo notices that the lower half of the ballot has almost no online presence. Nobody is posting about Measure T.

What is circulating instead is a creator's voter guide. It promises "all you need for November," announces that registration closes "the 14th" and tells readers to vote for Candidate B for school board and "yes, obviously" on Measure T. Dec's response sets the terms for the case. He does not need anyone picking for him. He needs to know what is on his ballot and whether he is registered in time.

Mateo has a problem of his own. He moved from New Bedford, Massachusetts, for college and may still be registered at his mom's address there. Different state, different ballot, different deadline. Your role is to find Dec's official sample ballot before anyone tells him how to vote.

❓ **Stop and think.** Why does the lower half of a ballot get so little attention online?

Separating information from advocacy

A **sample ballot** is a preview of the contests and measures that will appear on your ballot. A **voter guide** is a document that explains or recommends choices in an election. The distinction matters because the two serve different purposes. The sample ballot tells you what you will decide. A guide tells you what someone thinks you should decide, and sometimes also what the choices mean.

The new skill here builds on two earlier ones. From Case 1, you go to the original source and treat each statement as a **claim** that can be checked. The guide's deadline is a claim with no jurisdiction attached, so it cannot be verified and should not be repeated. From Case 8, you ask about a **material connection**, a relationship with a brand, like payment or a free product, that viewers might not expect. Here, the guide leaves out who wrote and who funds it. That missing information does not make its picks wrong. It does mean they should be read as advocacy from an unnamed source.

A **jurisdiction** is the place or area where a particular government or rule has authority. Your address determines which contests appear on your ballot, which is why Mateo cannot assume his ballot matches Dec's. Jurisdiction also shapes research. A school board and a city council have different powers, so a voter who cares about buses should learn which body runs them before comparing candidates. Mateo starts Measure T with two questions: what it would pay for, and who runs the buses.

Registration is signing up with your election office so that you are on the list of people who can vote. Because rules and deadlines vary by state, Gia's group-chat reminder deliberately contains no deadline. It sends everyone to Vote.gov for their own registration and sample ballot, and it asks people not to post their addresses.

❓ **Stop and think.** The guide's picks are not labeled as advocacy. How would labeling them change how Dec reads the guide?

The constitutional floor and the state rules

The Twenty-Sixth Amendment protects the right of citizens 18 and older to vote (National Constitution Center, no date listed). The National WWII Museum traces its origins to the wartime argument that people old enough to fight were old enough to vote (The National WWII Museum, October 27, 2020). Above that floor, states set the details. Most allow preregistration before 18, and some let 17-year-olds vote in primaries if they will be 18 by the general election (Ballotpedia News, September 26, 2025). NPR has reported on state efforts to raise youth registration, including preregistration (NPR, August 6, 2023).

Turnout data show both engagement and variation. CIRCLE estimates that about 47 percent of 18- to 29-year-olds voted in 2024, with large differences by state (CIRCLE, April 14, 2025).

The constitutional floor and the state rules, continued

Journalism codes draw the same line the case draws. The SPJ code tells journalists to “label advocacy and commentary” (SPJ Code of Ethics, September 6, 2014). The RTDNA code says journalism “empowers viewers, listeners and readers to make more informed decisions for themselves; it does not tell people what to believe or how to feel” (RTDNA Code of Ethics, June 11, 2015). A nonpartisan guide for Dec should meet that second standard.

 **Stop and think.** Anika is 16. How can she take part in this election before she can vote?

A **voter guide** is a document that explains or recommends choices in an election. The two have different purposes. Start with the ballot for your address, and then check a guide's facts apart from its picks.

Your address decides which contests appear on your ballot. A **jurisdiction** is the place or area where a particular government or rule has authority. A friend two districts over may see different local races. A school board and a city council have different jobs, so each one makes different decisions. Before you research candidates, find out which office has power over the issue you care about.

Registration is signing up with your election office so that you are on the list of people who can vote. Rules and deadlines vary by state, so do not copy a friend's deadline. The Twenty-Sixth Amendment protects the right to vote for citizens 18 and older. Most states let people preregister before they turn 18. Several states let 17-year-olds vote in a primary if they will be 18 by the general election.

A student's first draft

Guys the election is coming up and it's a big one!! **1** Registration closes on the 14th so do it now. Here's the voter guide I use, it tells you exactly who to vote for so you don't have to research. Also **2** drop your addresses and I'll check if you're registered for you. Only the big race really matters anyway, the rest is small stuff. My cousin in another state said the same deadline works for her too, so just use mine. Let's go vote!!

Your task

On your own Read the steps. Fill in the planner boxes before you start your draft. About 10 minutes.

Rhetorically analyze a voter guide aimed at young people.

Use: A teacher-selected nonpartisan or advocacy guide.

You'll make: Analysis, about 500 words

Time: 50 minutes

- 1 Choose your text: the creator's guide in Evidence B or the guide your teacher gives you.
- 2 Fill in the rhetorical situation grid: author, audience, purpose and context.
- 3 Mark the exact point where the guide stops informing and starts persuading.
- 4 Write a thesis on how the guide builds trust with first-time voters.
- 5 Draft your thesis and one body paragraph on the Your draft page.
- 6 Answer the view that busy first-time voters are better served by a guide with picks.
- 7 Finish the analysis of about 500 words in the online workspace or on paper.

Case 10: Whose job is it to fix the blocked route?

A construction detour sends Sami toward stairs on her way to a city workshop, and her bus comes in 12 minutes.

On your own Read What happened. Underline where the detour sign points. About 4 minutes.

Your role: You're the one who writes down the corner, the time and the sign before Mateo posts. **New skill:** Report a problem to the office responsible.

Sami, Jordy and Mateo plan with picture cards on a whiteboard.

What happened

It is Tuesday, 4:05 p.m., at the corner of Elm Street and 4th Avenue. Sami is on her way to a free community workshop run by the city's parks department. It starts at 5. Sami uses a manual wheelchair, and her bus comes in 12 minutes. Mateo is with her.

The curb ramp on the northeast corner is blocked by construction fencing. A sign reads "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR." Its arrow points to a path that begins with a flight of stairs. That detour does not work for Sami.

Mateo already has the sign on video, and his first idea is to post it. Sami asks whether the video gets her on the bus. It does not, so Mateo puts the camera down. He checks the other corners for a ramp while Sami looks up the next bus stop.

Later, they want to report the corner to the city. Mateo wonders whether the city is breaking the Americans with Disabilities Act (ADA). First, they need to know what one video can show and which office is responsible.

Your question: Whose job is it to fix the blocked route, and what should Sami and Mateo tell the city?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 4 minutes.

Program access Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities.

En español: acceso a los programas

In this case: The city runs the workshop. Program access asks whether Sami can reach and join the workshop, not only whether one ramp is open.

Barrier A barrier is something that blocks or limits a person from taking part.

En español: barrera

In this case: Fencing blocks the curb ramp at Elm Street and 4th Avenue, and the detour points to stairs. The flyer gives no way to request access.

ADA coordinator An ADA coordinator is the staff member a government names to handle disability access questions and complaints.

En español: coordinador de la ADA

In this case: Mateo plans to send the city's ADA coordinator the corner, the time, the sign and one question, if Sami agrees.

Who is involved

Sami

Trying to catch her bus to the workshop

"The sign says detour. The detour starts with stairs. So, no. Twelve minutes."

Mateo

Filmed the detour sign

"I had the sign on video before I even thought about it. Sami asked if that gets her on the bus. Fair. Camera down."

Before you look at the evidence, whose job do you think it is to fix Sami's route?

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 6 minutes.

Words to know

- **Program access:** Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities.
- **Barrier:** A barrier is something that blocks or limits a person from taking part.
- **ADA coordinator:** An ADA coordinator is the staff member a government names to handle disability access questions and complaints.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Jurisdiction:** A jurisdiction is the place or area where a particular government or rule has authority.

The story: The next twelve minutes

Sami studies design and photographs things most people walk past. She also uses a manual wheelchair and wants access planned before an event, not offered as an apology afterward. At 4:05 p.m. on a Tuesday, at the corner of Elm Street and 4th Avenue, she is on her way to a free parks department workshop that starts at 5. Her bus comes in 12 minutes.

The northeast curb ramp is fenced off for construction. The posted detour, "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR," points to a path that begins with stairs. Sami says it without drama. The sign says detour, the detour starts with stairs, so no.

Mateo is with Sami, and his reflex is a filmmaker's. He has the sign on video before he has thought about what the video is for. When he offers to post it, Sami asks whether that gets her on the bus. It does not. Mateo puts the camera down and checks the other corners for a ramp while Sami looks up the next stop. The order of priorities is the first lesson of the case. The person facing the barrier decides what the moment needs and what gets said about her. The report can wait an hour.

Your role is to write down the corner, the time and the sign before anyone posts, so that the later report rests on a clean record.

 **Stop and think.** Why does the case put Sami's bus ahead of Mateo's video?

Evidence, barriers and program access

Mateo's next question is whether the city is violating the Americans with Disabilities Act. That is a **claim**, a statement that something is true that can be checked with evidence, and Case 1 taught you to match a claim to what the evidence can support. Mateo draws the limit himself. His video shows one fenced ramp and one sign at 4:05. It cannot show whether another way around exists, so he cannot call the whole route illegal.

The route map widens the frame. Sami's trip has five stages: home to the corner, the northeast ramp, the bus stop, the ride to the parks department building and the workshop entrance and room. The last stage has not been checked. The flyer adds a different kind of gap. It invites everyone, lists a front desk number and says nothing about accessible entrances or how to request access.

A **barrier** is something that blocks or limits a person from taking part. The fenced ramp is a physical barrier. The flyer's silence may be an informational one. **Program access** is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. The standard applies to the program, not to each building separately. It generally does not require every older building to be accessible, and a city can relocate a service to an accessible place. Existing buildings and new construction have different requirements. Access still covers the whole visit: finding the information, getting there, going in, taking part and leaving.

The last question is who can fix it. Case 9's term **jurisdiction**, the place or area where a particular government or rule has authority, points to the city, which both runs the workshop and manages the street. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. Mateo's planned report is short: the corner, the time, the sign and one question. Is there an accessible detour, and how long will the ramp be blocked? It goes out only if Sami agrees.

? **Stop and think.** Program access applies to the program as a whole. How does that change what a report should ask?

The law's origins and its limits

The Justice Department's guide for cities explains that Title II of the ADA covers state and local programs, including keeping curb ramps usable during street work (U.S. Department of Justice, updated February 24, 2020). The law's history explains its focus on steps and routes. On March 12, 1990, activists climbed the Capitol steps to show what stairs do to access, and the ADA was signed that July (HISTORY, July 24, 2020). Minnesota's disability council notes that the protest involved ADAPT, which began as Americans Disabled for Accessible Public Transit (Minnesota Governor's Council on Developmental Disabilities, March 1, 2015).

The law's origins and its limits, continued

Enforcement is uneven. In New York, a North Bronx subway station is set to get elevators nearly a decade after an ADA lawsuit (THE CITY, October 3, 2025). Federal auditors found gaps in checking whether paratransit services for disabled riders actually work (GAO, November 15, 2012).

Professional codes speak to both people at the corner. The ASPA code asks public servants to “respect and assist all persons in their dealings with public organizations” (ASPA Code of Ethics, 2013). The NPPA code asks visual journalists to “be complete and provide context when photographing or recording subjects” (NPPA Code of Ethics, no date listed).

 **Stop and think.** What is the difference between recording a barrier and making Sami the content?

The detour sign

The sign reads “SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR.” Its arrow points to a path that begins with a flight of stairs. The sign went up on Monday. Mateo recorded it on Tuesday at 4:05 p.m.

What is still missing from the evidence?

Key idea: program access

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 6 minutes.

Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. The U.S. Department of Justice explains that Title II of the ADA covers state and local government programs and services. Program access generally does not require every older building to be accessible. For example, a city can relocate a service to an accessible place. Existing buildings and new construction have different requirements.

Access covers the whole visit: finding the information, getting there, going in, taking part and leaving. A **barrier** is something that blocks or limits a person from taking part. Sami meets one barrier at the curb ramp. The workshop flyer could be another, because it gives no way to request access. The Justice Department's guide for cities also covers curb ramps during street work.

One video of one corner cannot show whether a city is following the law. It can show what happened, where and when. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. That office can say whether an accessible detour exists. Before you report a barrier someone else faces, ask them what they want said.

“respect and assist all persons in their dealings with public organizations”

In plain words: ASPA members in public service agree to help every person use public programs and services.

Question: The parks flyer says “All welcome!” with no access information. What should it add so Sami can request access?

Your answer

The flyer should add ____, so that ____.

A throwback to March 12, 1990, when activists climbed the Capitol steps to show what stairs do to access. The ADA was signed that July.

A lawsuit pushed a transit agency to add elevators, showing how the ADA makes access a public duty.

Sort the evidence

On your own Mark whether each piece of evidence supports or narrows each claim. Then write whose view is missing. About 5 minutes.

Sort what the evidence supports. Which claim can you make today, which one needs more facts, and who can supply them?

Evidence	Claim 1 The city is breaking the ADA.	Claim 2 On Tuesday, the posted detour did not work for a wheelchair user.
1 Photo: the northeast curb ramp blocked by fencing on Tuesday at 4:05 p.m.		
2 Detour sign points to a path that starts with stairs		
3 DOJ: Title II requires program access, not every facility to be accessible		

Still open

- Is there another accessible route to the bus and the workshop? Ask the ADA coordinator.

Whose perspective is missing?

Whose view is missing from these documents? What would you ask them?

The view that is missing is _____. I would ask _____.

Practice: choose a response

On your own Choose what Mateo should do and explain why. Then fix the two marked phrases. About 8 minutes.

Mateo wants people to know about the blocked corner. What should he do?

- ☐ **B** Send the ADA coordinator the corner, the time, the detour sign and one question, if Sami agrees.
- ☐ **C** Skip the report if Sami finds another bus stop that works today.

Case 11: Why are Jordy and Gia paid different rates?

Jordy and Gia worked the same Saturday event, but Gia's pay rate is \$1.50 an hour higher, and Jordy wants to know why.

On your own Read What happened. Underline the two pay rates and the job title on the schedule. About 4 minutes.

Mateo attaches an arrival notice at the Common Room entrance. Gia points to the doorway, and Jordy checks what a visitor will see.

Your role: You're the one who lines up both shifts side by side before Jordy writes to Dana. **New skill:** Compare two cases on the same terms.

What happened

Jordy and Gia work event shifts for the same company. They both worked a Saturday event from 3 to 11 p.m. Both helped with setup and closing, and Jordy also ran the caption and audio check.

They were paid the following Friday. On Sunday afternoon, Jordy and Gia compare pay statements. Jordy's lists eight hours at \$16.50 an hour. Gia's lists \$18.00 an hour for the same event.

The crew schedule lists Gia as "shift lead," but it does not say what that job includes. That day, Gia opened up and handled one guest issue. She does not know if that explains the \$1.50 difference. Gia is fine with Jordy knowing her rate. But she does not want her statement posted.

Jordy wants to ask Dana, the supervisor, how rates are set. Jordy will not post anything before Dana answers.

Your question: Why is Gia paid more than Jordy for the same event, and how should Jordy ask about it?

Key terms

On your own Read each key term and its example. Then write your first guess about the pay difference. About 4 minutes.

Compensation Compensation is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime.

En español: compensación

In this case: Jordy's statement shows eight hours at \$16.50 an hour, and Gia's shows \$18.00. The statements show the rates but not how they were set.

Equal Pay Act The Equal Pay Act is a federal law from 1963 that requires equal pay for men and women who do equal work.

En español: Ley de Igualdad Salarial

In this case: The Equal Pay Act covers pay differences based on sex, not every difference. Different job duties, such as a real shift-lead role, can be a lawful reason.

Title VII Title VII is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin.

The story: Two statements on a Sunday

Jordy is Black, nonbinary and hard of hearing, studies part time and works event shifts. Gia studies communication and works café shifts, and she also picks up event work for the same company as Jordy. On Saturday, they both worked a 3 to 11 p.m. event. The crew schedule shows the division of labor. Everyone did setup from 3 to 5 and closing from 10 to 11. Jordy ran the caption and audio check. Gia is listed as “shift lead,” with no description of what that means.

On Sunday, Jordy shares a pay statement with Gia: eight hours at \$16.50. Gia’s says \$18.00. Her first reaction is a guess, that the difference must be the shift lead title. Her second is honesty. She opened up and handled one guest issue, and she does not know whether that is why she is paid \$1.50 more. Gia only found out because Jordy showed her.

The friends agree on the facts and on a boundary. Gia is fine with Jordy knowing her rate but does not want her statement posted. Jordy will not post anything before asking Dana, the supervisor, how rates are set. Asked whether this is discrimination, Gia says she does not know yet. Maybe shift lead pays more. Ask Dana what it covers first.

Your role is to line up both shifts side by side before Jordy writes to Dana.

❓ Stop and think. Gia’s first guess and her honest answer differ. Why is the honest answer more useful to Jordy?

Comparing on the same terms

The skill in this case is comparing two situations on the same terms before calling a difference unfair. It builds on Case 5, where you read a pay statement line by line. Jordy's statement shows 8.0 hours at \$16.50 and **gross pay** of \$132.00, the money earned before any taxes or other deductions are taken out.

A fair comparison lists every dimension the evidence covers. Hours, setup and closing are identical. Jordy had a technical duty, the caption and audio check. Gia had a title and two tasks attached to it. The documents leave three things unknown: what "shift lead" formally includes, whether it carries a set rate and how rates are set in general. **Compensation** is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can lawfully explain a difference. So can a mistake. The comparison does not reveal which.

That is why the case turns on a question rather than a verdict. Case 10's skill, reporting to the office responsible, points to Dana, who sets rates. Jordy's message can state the observation, list what Jordy knows for sure and ask what shift lead includes and how rates are set. It does not need to name Gia's rate. Jordy keeps the next decision too. If the answer does not make sense, Jordy decides what to do.

 **Stop and think.** The judge and the players disagreed about what to compare. How would each approach apply to Jordy and Gia?

The legal frame and the soccer comparison

Two federal laws limit the reasons employers can use to set pay. The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. The EEOC enforces both. Its youth pages list the kinds of compensation the laws cover and the ban on retaliation (EEOC, no date listed). The NLRB adds that most private-sector workers may discuss pay with coworkers, with or without a union (NLRB, no date listed). That right does not make Gia's statement Jordy's to share.

The U.S. women's national soccer team's case shows how much depends on the comparison. In 2020, a federal judge dismissed their equal pay claim, pointing to differences in contract structure (NPR, May 2, 2020). The players appealed, arguing that he had not compared rates of pay. In February 2022, they settled for \$24 million with a promise of equal pay rates (NPR, February 22, 2022), and the new terms were later written into signed contracts (PBS NewsHour, September 6, 2022). The settlement was an agreement between the parties, not a court finding.

Policy is moving toward more visible pay. New salary transparency laws put pay ranges in job ads, which makes differences easier to notice and ask about (NPR, January 3, 2023). HR professionals have their own standard.

The legal frame and the soccer comparison, continued

The SHRM code asks members to “foster fair, consistent and equitable treatment for all” (SHRM Code of Ethics, April 24, 2023).

?

Stop and think. Why does the case treat Jordy’s choice to wait for Dana as belonging to Jordy alone?

- Gia: I'm fine with you knowing my rate. I just don't want my statement posted anywhere.
- Jordy: Got it. Did you do anything different as shift lead?
- Gia: I opened up and handled one guest issue. Honestly, I don't know if that's why. Let's ask Dana.

Look closely: What does Gia agree to share, and what does she ask Jordy not to do?

What it shows

What it leaves out

What is still missing from the evidence?

Key idea: equal pay

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 6 minutes.

Before you can say why Jordy is paid less, you need to know what each job included. **Compensation** is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can explain a pay difference. So can a mistake. The pay statements show the rates, but they do not show how the rates were set.

Federal laws limit the reasons an employer can use to set pay. The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. Both laws apply to covered employers, and the Equal Employment Opportunity Commission (EEOC) enforces them. A legitimate reason, such as different job duties, can lawfully explain a pay difference.

Talking about pay is protected too. The National Labor Relations Board (NLRB) says most private-sector workers have a right to discuss pay with coworkers. That right holds with or without a union. It does not make Gia's pay statement Jordy's to share. Jordy can ask Dana how rates are set without naming Gia's rate.

In plain words: HR professionals who belong to SHRM agree to use workplace policies that treat workers fairly and consistently.

Question: The schedule lists Gia as shift lead. What written policy would show whether that title explains the higher rate?

Your answer

The policy would need to state ____, so that ____.

A real 'same work, different pay' dispute that ended in a settlement and a promise of equal rates.

Why the claim was first dismissed: the judge compared how the contracts were structured. What you compare shapes the answer.

About 4 minutes.

Jordy's statement shows \$16.50 an hour. Gia's shows \$18.00 for the same Saturday event, and the schedule lists her as "shift lead." What should Jordy do first?

- ☐ **A** Tell the rest of the crew that Gia is paid more for the same work.
- ☐ **B** Compare what each of them did, find out what "shift lead" means and ask Dana how rates are set.
- ☐ **C** Let it go, because an employer can set any pay rate it chooses.

Case 12: When can a school limit what students say?

Anika's poster asks her school to keep the library open at lunch, and now someone in her group chat suggests a walkout.

On your own Read What happened. Underline each plan: the poster, wearing blue and the walkout. About 3 minutes.

Anika records a voice memo while Mateo listens beside a phone on a small tripod.

Your role: You're the one who compares Tinker with each action before anyone says "can't touch us."
New skill: Apply a precedent by comparing fact patterns.

What happened

Anika is a junior at a public high school. She wants the school library to stay open at lunch. On Tuesday afternoon, she prints a poster that says "KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday."

Mateo did the photo and layout. He put a photo of the school's sign and logo across the top. The poster does not name Anika or any student group. The student handbook says posters need approval from the main office and the name of the student or group responsible.

On Wednesday night, someone in the group chat suggests a walkout if the school takes the poster down. The message says a 1969 Supreme Court case, *Tinker v. Des Moines*, means the school "can't touch us." Anika never suggested a walkout.

Your question: How far does Tinker cover the poster, the wear-blue plan and the walkout, and what facts are missing?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 3 minutes.

Precedent A precedent is an earlier court decision that judges use as a guide in similar later cases.

En español: precedente

In this case: Tinker v. Des Moines (1969) guides Anika's case only as far as the facts match: quiet expression at a public school.

Fact pattern A fact pattern is the specific set of facts in a situation that a rule is applied to.

En español: conjunto de hechos

In this case: Anika lists each plan's action, place, timing and rule: the poster on a school board, wearing blue on Thursday and leaving class.

Substantial disruption Substantial disruption is the standard from Tinker v. Des Moines: a public school may limit speech that would seriously disrupt school activities.

En español: alteración sustancial

In this case: Wearing blue on Thursday is quiet, like the armbands. Leaving class is conduct under the attendance rule, which Tinker does not settle.

Who is involved

Anika

Made the poster

"My poster says keep the library open at lunch, and wear blue Thursday. Now the chat says we walk out. I never said walk out."

Mateo

Did the photo and layout

"I put the school sign across the top because it looked good. Now it reads like the school is announcing it. It isn't."

Before you look at the evidence, can the school do anything about the poster or the walkout?

This image shows a single sheet of white paper with horizontal blue lines, resembling notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Reading passage

Reasoning from precedent

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Precedent:** A precedent is an earlier court decision that judges use as a guide in similar later cases.
- **Fact pattern:** A fact pattern is the specific set of facts in a situation that a rule is applied to.
- **Substantial disruption:** Substantial disruption is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.

The story: Three actions, one slogan

Anika is a junior at a public high school who helps with theater sets and likes solving a problem herself before anyone jumps in. The problem she wants solved now is small and concrete. She wants the school library open at lunch. On Tuesday at 3:15 p.m., she prints a poster: “KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday.” Mateo designed it and, for visual impact, put a photo of the school’s sign and logo across the top. The poster names no student or group.

On Wednesday at 9:02 p.m., the group chat escalates. Someone writes, “If they take the poster down we walk out Thursday. Tinker says they can’t touch us.” Another person asks whether the plan is to wear blue and walk out. Anika answers that she never asked anyone to leave class.

Then both friends look at their own part. Anika checks page 14 of the handbook. Students may post on the boards outside the cafeteria and the library if the main office approves and the material shows the responsible student’s or group’s name. Her poster has no name, and she says that part is on her. Mateo realizes his photo changed the poster’s apparent author. With the school’s sign on top, it reads like an official announcement. Before reprinting, he plans to get office approval, add Anika’s name or her group’s and leave off the logo.

Your role is to compare Tinker with each action before anyone says “can’t touch us.”

? Stop and think. Why does a precedent’s reach depend on how closely the facts match?

From precedent to fact pattern

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. The chat's precedent is *Tinker v. Des Moines* (1969). Public-school students wore black armbands to protest the Vietnam War. They were suspended, and the Supreme Court ruled for them. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. The Court held that a mere fear of disruption was not enough.

Precedent works by analogy, so its reach depends on how closely a new situation matches. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. The skill here extends Case 11, where you compared two jobs on the same terms. Build a fact pattern for each action and set it beside *Tinker*'s. The wear-blue plan is silent, symbolic and done while attending class, which closely tracks the armbands. The walkout involves leaving class, so a separate attendance rule governs the conduct regardless of the message. The poster raises a question *Tinker* does not reach. With the school's logo and no student name, it may look like school speech, and schools have more control over speech that appears to come from the school.

Case 1's vocabulary sharpens the analysis. "*Tinker* says they can't touch us" is a **claim** that stretches a narrow holding into a blanket immunity. The logo is **framing**, choosing which parts of a situation a message brings forward, and it brings the institution forward as the speaker. Mateo's redesign corrects the frame.

 **Stop and think.** Build a fact pattern for the walkout. Which fact moves it furthest from *Tinker*?

Courts, classrooms and current events

The *Tinker* majority wrote that students do not "shed their constitutional rights to freedom of speech or expression at the schoolhouse gate" (Legal Information Institute, 1969). The federal judiciary's own teaching materials pair that holding with a walkout scenario, separating the message from the act of leaving class and noting the usual attendance consequences (U.S. Courts, no date listed).

The Court revisited student expression in *Mahanoy Area School District v. B. L.*, the case of a cheerleader's off-campus Snapchat post. The 8 to 1 decision protected the student but said schools may still regulate some off-campus speech, such as threats (Supreme Court of the United States, June 23, 2021). Analysts noted how one changed fact pattern changed the answer (EdSurge, June 23, 2021).

Recent walkouts show the attendance question in practice. In early 2026, students in Indiana and other states walked out to protest federal immigration enforcement. Some Indianapolis-area schools treated it as an unexcused absence, and one high school issued one-day suspensions (Chalkbeat Indiana, February 11, 2026). An Indiana public media guide separated speech rights, attendance rules and discipline in the same way this case does (WFYI, February 1, 2026).

Courts, classrooms and current events, continued

Designers carry a related duty. The AIGA standards ask designers to “represent messages in a clear manner” and to avoid “false, misleading and deceptive promotion” (AIGA Standards of Professional Practice, no date listed). Mateo’s logo was not a lie, but it misled about the speaker.

 **Stop and think.** Mateo’s logo did not state anything false. Why can it still mislead?

Key idea: precedent

On your own Read the key idea and the Professional standards card. Then answer the question in the box. About 8 minutes.

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. In *Tinker v. Des Moines* (1969), public-school students wore black armbands to protest the Vietnam War. The school suspended them, and the Supreme Court ruled for the students. The Court wrote that students do not “shed their constitutional rights to freedom of speech or expression at the schoolhouse gate.” It also said a mere fear of disruption was not enough to limit their expression.

A precedent guides a new case only as far as the facts match. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. Wearing blue on Thursday is quiet, like the armbands. A walkout is different, because students leave class. The school’s attendance rule covers that conduct, and *Tinker* does not settle it.

The poster raises another question. It shows the school’s sign and logo but no student name, so it may look like the school is speaking. Schools have more control over speech that looks like it comes from the school. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. Write a fact pattern for each action before you decide whether *Tinker* fits it.

Case 12: When can a school limit what students say?

In this case, a student's poster asks her school to keep the library open at lunch, and someone in a group chat suggests a walkout. Your student compared a 1969 Supreme Court case with each plan and wrote a short analysis.

Questions to talk about

Case 13: Can the crew cut waste before it reaches the bin?

The last Common Room screening used about 120 cups the city won't recycle, and a box of parts arrived half full of packaging.

On your own Read What happened. Underline the number of cups and what the city list says about them. About 3 minutes.

Anika, Dec and Sami react to a round of their tabletop game.

Your role: You're the one who counts the cups before and after the change. **New skill:** Count a starting point before you claim a change works.

What happened

It is Tuesday in the theater shop. Dec opens a box of replacement parts. Three separate orders of small LED connectors and switches, placed over one week, arrived together. About half of the box is plastic air pillows and foam.

The supply list from last Friday's screening at the Common Room shows a second problem. The crew used about 120 single-use cups. The cups are plastic-lined paper and labeled "recyclable." But the city's recycling list does not take plastic-lined paper cups.

Dec wants to fix how they order parts before anyone redoes the recycling sign. Anika tracks the parts and the budget. She agrees with Dec, but she wants numbers before anyone says a change saves money. Some people need a disposable cup or a straw, so any plan has to work for them too.

Your question: What could the crew change before the next screening, and how would they know it worked?

Source reduction Source reduction is preventing waste before it is created, for example by buying less packaging.

Before you look at the evidence, what is the best way for the crew to cut waste?

A claim as small as the evidence

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Source reduction:** Source reduction is preventing waste before it is created, for example by buying less packaging.
- **Reuse:** Reuse is using an item again instead of throwing it away after one use.
- **Local acceptance:** Local acceptance is the list of materials that your own city's recycling or compost program actually takes.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.

The story: Following waste upstream

Dec is a high school senior who drums, builds sets and is considering an electrical apprenticeship. He tends to follow a problem into the small places where it starts. On Tuesday, that place is the theater shop. Three orders of LED connectors and switches, placed separately over one week, have arrived together in one box. About half the box is plastic air pillows and foam.

Anika, a junior who tracks the crew's parts and budget, brings the second data point. The supply list from last Friday's screening at the Common Room shows about 120 single-use cups, plastic-lined paper and labeled "recyclable." The same list includes 80 paper plates, 150 printed flyers and 40 paper straws given out on request. The crew's first instinct might be a better recycling sign. Dec wants to start earlier, at the order form. Order parts together rather than each time one breaks, and ask the supplier about packaging.

Anika agrees and sets a standard. Nobody gets to say a change saves money without numbers, and right now the evidence is one box and a guess. She also sets a boundary. Some people need a disposable cup or a straw, so a plan that works only for most people does not work.

Your role is to count the cups before and after the change.

❓ Stop and think. Why is a claim about one counted screening more trustworthy than a claim about "saving money"?

Hierarchy, labels and baselines

Source reduction is preventing waste before it is created, for example by buying less packaging. **Reuse** is using an item again instead of throwing it away after one use. Both sit upstream of the bin. Dec's combined orders are source reduction, and borrowing the bookshop's washable cups is reuse.

The cup label raises a verification problem that Case 9 prepared you for. There, you learned to check the official source for your own area rather than a general claim. Here, the official source is the city's recycling list. It accepts metal cans, glass bottles and jars, rigid plastic bottles and containers and flattened cardboard. It excludes plastic-lined paper cups, plastic bags and film, foam and items labeled compostable. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. By that standard, the crew's "recyclable" cups are trash, and a switch to compostable cups would be too.

The new skill is counting a starting point before claiming a change works. The baseline is about 120 cups from one screening. The intervention is washable cups at the next one. The measurement includes cups used and left over, plus the costs reuse adds, water and someone's washing time. Case 4 supplies the frame for presenting the result. The plan is a **proposal**, a change that someone suggests and that has not been approved yet, and every option is a **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Anika's rule keeps the eventual claim honest. Whatever the crew reports should be as small as one counted screening.

 **Stop and think.** How does the Green Guides standard apply to the crew's cups?

Evidence from agencies, reporters and schools

The EPA's materials management hierarchy ranks source reduction and reuse first, followed by recycling and composting, energy recovery, and treatment and disposal. It also notes that no single approach suits every material or situation (EPA, updated December 19, 2025). For food, the EPA's Wasted Food Scale likewise ranks prevention above composting or recycling (EPA, updated September 16, 2026). An NPR investigation reported that less than 10 percent of plastic has ever been recycled (NPR, September 11, 2020).

Labels are regulated for a reason. The FTC's Green Guides say a product or package "should not be marketed as recyclable unless it can be collected, separated, or otherwise recovered from the waste stream through an established recycling program" (16 CFR Part 260, 2012).

Access belongs in the same analysis. When Starbucks announced its straw phase-out in 2018, it said a sippable lid could mean a billion fewer straws a year (NPR, July 9, 2018). Two days later, NPR reported that some people with disabilities need flexible plastic straws and that advocates saw little awareness of the exemption in Seattle's ban (NPR, July 11, 2018). Schools offer models that measure first.

Evidence from agencies, reporters and schools, continued

New Jersey schools have used waste audits, share tables and reusable trays to cut waste before it reaches the bin (New Jersey School Boards Association, October 15, 2025). Each of those programs starts the way Anika does, by counting what is thrown away now.

?

Stop and think. How does “add more bins” define the problem differently from “order less packaging”?

Notes

Key idea: source reduction

On your own Read the key idea and the Professional standards card. Then answer the question in the box. About 6 minutes.

Source reduction is preventing waste before it is created, for example by buying less packaging. The Environmental Protection Agency (EPA) ranks ways to handle waste. Source reduction and reuse come first. Recycling and composting come next, then energy recovery, then treatment and disposal. The EPA also notes that no single approach fits every item or situation.

Reuse is using an item again instead of throwing it away after one use. Borrowing washable cups from the bookshop is one example. Reuse has costs too. Washing takes water and someone's time, so a fair comparison counts those costs along with the cups.

A “recyclable” label does not tell you where an item will go. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. The crew's cups say “recyclable,” but their city's list does not take plastic-lined paper cups. The list does not take items labeled compostable either. So the crew has to check the list before choosing any new cup.

The last screening used about 120 single-use cups, and the city’s recycling list does not take that type. Which plan should the crew try for the next screening?

☐ **A** Compare a washable-cup option, washing time, cost, access and the city list, then test one change.

☐ **B** Buy a different cup labeled “recyclable” and put up a clearer recycling sign.

☐ **C** Stop offering disposable cups and straws, and ask everyone to bring their own.

A student’s first draft

We should make the screening zero waste. Everyone should bring their own cup and we’ll **1** ban all plastic. We can also put up posters that say “save the planet” so people remember to recycle. Recycling is the best thing you can do for the environment. This will be easy and **2** it will save money too. Last screening there were cups everywhere and the bins were overflowing by the end of the night. People will love it once they get used to it. Let’s start next week!

Case 13: Can the crew cut waste before it reaches the bin?

In this case, a group of friends learns that the cups from their movie night can't be recycled in their city. Your student planned one change to cut waste before the next event and a way to count whether it worked.

Questions to talk about

- 1 How could someone find out what their city or town recycles?
- 2 What is one item people often throw away after a party or event?
- 3 Why might a rule to cut waste need an exception for some people?

Nobody needs to share personal stories or private information to talk about this case.

Case 14: Does giving credit let the crew use the song?

Mateo wants to post the crew's film tonight and credit the song's artist, but Caio wants to check the license first.

On your own Read What happened and underline the two pieces of the film that the crew did not make. About 4 minutes.

Caio, Mateo and Rafa laugh as they look at photos on a small digital camera.

Your role: You're the one who fills in the rights log before the film goes up. **New skill:** Check permission, not just credit.

What happened

It is Friday night, and Caio, 24, is editing the crew's festival film. The film is a short recap made from crew footage and interviews. At 9:40 p.m., he saves a rough cut. For 20 seconds, a released song plays under the setup montage. Caio pitched the song up slightly, and the song sets the mood for the whole scene.

The cut borrows one more piece. From 1:40 to 1:46, it shows a six-second clip downloaded from a TikTok post. That post used Stitch, TikTok's remix tool. The crew did not make the song or the clip.

At 10:02 p.m., Mateo texts the crew chat: "We'll credit them in the caption. Post tonight?" He wants the film online tonight. Caio asks what the credit gets them, and Mateo does not have an answer. Caio wants to check the license before they post.

Your question: Does a credit give the crew permission to use the song, and what should they do before they post?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 4 minutes.

Attribution Attribution is naming the person who made a work, such as a song, a photo or a video.

En español: atribución

In this case: Mateo's plan, "We'll credit them in the caption," would name the artist. It answers who made the song, not whether the crew may use it.

License A license is permission from a rights holder to use a work under specific terms.

En español: licencia

In this case: The rights log says "permission unknown" for both borrowed pieces. A license from each owner would fill in that column.

Fair use Fair use is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors.

En español: uso justo

In this case: The crew would weigh the four factors for 20 seconds of a released song used as background mood. No number of seconds settles it.

Who is involved

Caio

"Twenty seconds of that song carries the whole montage. That's exactly why I can't just borrow it and hope."

Mateo

Wanted the film online tonight

- **License:** A license is permission from a rights holder to use a work under specific terms.
- **Fair use:** Fair use is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors.
- **Disclosure:** A disclosure is a clear statement that tells people about a relationship or fact they would want to know.

The story: Post tonight, or check first?

At 9:40 on a Friday night, Caio, 24, saves a rough cut of the crew's festival film. The recap mixes crew footage and interviews, and one choice makes it work. From 0:18 to 0:38, a released song, pitched up slightly, plays under the setup montage. A second borrowed element sits later in the timeline. From 1:40 to 1:46, the cut includes six seconds downloaded from a TikTok post that used Stitch, the app's remix tool. Neither piece belongs to the crew.

Mateo, who likes turning "we should" into a plan, wants the film online that night. At 10:02 p.m., he proposes a solution that feels responsible: credit the artists in the caption and post. Caio's answer is a single question. What does the credit get them? Mateo admits he does not know.

By the next day, Mateo has worked out why his instinct was wrong. He remembers when Universal Music Group's deal with TikTok ran out and videos went silent. Nobody had forgotten to credit Taylor Swift. He also rethinks the clip. He had figured Stitch covered it, but Stitch is for TikTok, and this is a festival film.

Your role is to fill in the rights log before the film goes up.

❓ Stop and think. Mateo's first plan felt responsible. What did it get right, and what did it miss?

Separating attribution, license and fair use

Attribution is naming the person who made a work, such as a song, a photo or a video. A **license** is permission from a rights holder to use a work under specific terms. The two answer different questions, “Who made this?” and “Did the owner say yes to this use?” A caption credit supplies the first and not the second. Case 8’s **disclosure**, a clear statement that tells people about a relationship or fact they would want to know, is a useful comparison. Like attribution, disclosure makes a post more honest. Neither one grants rights.

The rights log applies the Case 1 skill of tracing material to its source. For each element, it records who made it, where it came from, the permission or license and the date. Both current rows read “permission unknown.” The log also shows what the crew does not yet know, including what the TikTok creator agreed to when posting.

Without a license, the remaining path is **fair use**, a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The factors are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market. The analysis resembles Case 12’s reasoning from precedent: you set the facts of your use against a standard and weigh each factor, rather than looking for a single rule. For the song, the purpose is setting a mood in a recap, the original is a released creative recording, the amount is 20 seconds and the effect on the market is uncertain. Caio’s pitch change does not transform the purpose. No duration is automatically safe, and a short excerpt can weigh heavily if it is the most recognizable part.

Caio’s backup plans take the question off the table: a library track with clear terms, or a drum loop that Dec records and the crew owns. The film goes up Sunday instead of Friday.

 **Stop and think.** Apply the four fair-use factors to the six-second TikTok clip. Which factor is hardest to judge?

Licensing, courts and professional norms

The UMG and TikTok dispute showed how platform licenses work. When the deal expired in February 2024, videos using UMG artists’ songs went silent (NPR, February 1, 2024). Researchers later studied what the roughly three-month blackout meant for creators, artists and the platform (Harvard Business School Working Knowledge, March 5, 2025).

The Supreme Court’s 2023 decision in the Warhol case shows how the purpose factor works. The Court ruled against the Andy Warhol Foundation, finding that Warhol’s version of a photograph was not fair use when it served the same purpose as the original (NPR, May 18, 2023). The Copyright Office publishes a one-page summary of the facts and holding (U.S. Copyright Office, 2023). Its Fair Use Index stresses that fair use is decided case by case and that a use for education is not automatically fair (U.S. Copyright Office, updated July 2026).

Licensing, courts and professional norms, continued

News organizations treat the issue as an ethical one too. The RTDNA code states, “Using someone else’s work without attribution or permission is plagiarism” (RTDNA Code of Ethics, June 11, 2015).

 **Stop and think.** Why might a platform’s license for a clip not follow the clip to a festival screening?

Key idea: fair use

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

Credit and permission answer different questions. **Attribution** is naming the person who made a work, such as a song, a photo or a video. It answers the question “Who made this?” A **license** is permission from a rights holder to use a work under specific terms. It answers another question: “Did the owner say yes to this use?” Mateo’s caption would give attribution. It would not give the crew a license.

Without a license, the crew could ask whether the use is fair use. **Fair use** is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The U.S. Copyright Office names the four factors. They are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market. No number of seconds is automatically safe. Even a short part can count against fair use if it is the most recognizable part of the song.

Platform tools come with their own limits. Stitch lets people remix another person’s video inside TikTok. That permission does not automatically cover a downloaded clip in a film shown somewhere else. Using music the crew records, or a track with a clear license, can avoid the fair-use question. Caio’s two backup plans follow this idea: a library track with clear terms, or a drum loop that Dec records.

Case 15: Is Rafa's unpaid internship really a job?

A studio offers Rafa an unpaid summer internship running its customer inbox and says college credit makes it legal.

On your own Read What happened and underline what Rafa would do all summer. About 4 minutes.

Nexo, one of the crew's companions, points to where a meeting and a work shift overlap on a calendar. Rafa's internship would take time from his shifts at the family shop.

Your role: You're the one who checks each factor of the test before Rafa says yes. **New skill:** Apply a legal test factor by factor.

What happened

Rafa, 18, is a first-year college student who commutes to class and helps at his family's shop. In April, a studio posted a listing on the campus job board for a "Summer Editing Intern." The internship is unpaid. The listing says the intern will run the customer inbox all summer. Rafa reads it twice, looking for the editing.

On Tuesday at 11:20 a.m., the studio answers Rafa's message. The email says college credit makes it "totally legal" not to pay him. It also asks him to start right after finals.

At lunch, Rafa talks it over with Gia, who fits café shifts around her classes. Gia asks whether the studio paid someone to run the inbox last year. Rafa says the studio's assistant ran it. Taking the internship would also cost Rafa paid shifts at the shop. He has not said yes yet.

Your question: Is the internship mainly training for Rafa or unpaid work for the studio, and what should he ask before he decides?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 4 minutes.

Primary beneficiary test The primary beneficiary test is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee.

En español: prueba del beneficiario principal

In this case: The studio gets its customer inbox answered all summer. Rafa asks what he would learn and who would train him.

Fair Labor Standards Act The Fair Labor Standards Act is a federal law that sets minimum wage and overtime rules for most workers.

En español: Ley de Normas Justas de Trabajo

In this case: If Rafa counts as an employee under this law, the studio must pay him at least the minimum wage.

Academic credit Academic credit is credit toward a degree that a school gives for approved work, such as an internship.

En español: créditos académicos

In this case: The studio says credit makes the unpaid role “totally legal.” Credit is one factor out of seven.

- **Primary beneficiary test:** The primary beneficiary test is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee.
- **Fair Labor Standards Act:** The Fair Labor Standards Act is a federal law that sets minimum wage and overtime rules for most workers.
- **Academic credit:** Academic credit is credit toward a degree that a school gives for approved work, such as an internship.
- **Compensation:** Compensation is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime.

The story: Totally legal?

Rafa is 18, a first-year college student who commutes and helps at his family's shop. In April, a studio lists a "Summer Editing Intern (unpaid)" position on the campus job board. The copy is upbeat: a fast-paced studio, great exposure to the industry, college credit available. The duties are narrower. The intern will run the customer inbox all summer and help with client files. Rafa reads the listing twice, looking for the editing, and does not find it.

When he writes to ask, the studio's reply on Tuesday at 11:20 a.m. offers a legal conclusion. Since interns get college credit, it says, it is "totally legal" not to pay him. It also asks him to start right after finals.

Rafa does what the crew has learned to do. He checks. On the train, he finds that college credit is one factor among seven. At lunch with Gia, the facts get sharper. Gia asks whether the studio paid someone to do the inbox last year, and Rafa confirms that its assistant did. Gia counts the cost: shifts at the shop, the commute and a summer without pay. She also catches herself. She almost told him to take it because it would look good, and she realizes that is easy to say when she is not the one giving up the summer. When Rafa asks whether she can tell him it is illegal, she says no. She does not know that. She can tell him which questions the studio has not answered yet.

Your role is to check each factor of the test before Rafa says yes.

❓ **Stop and think.** Gia says she cannot tell Rafa the internship is illegal. Why is that the more accurate answer?

Reasoning with a multi-factor test

The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. An intern who is an employee must be paid under the **Fair Labor Standards Act**, a federal law that sets minimum wage and overtime rules for most workers. The seven factors include training, links to coursework or **academic credit**, the academic calendar and the length of the learning period. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor is whether the intern's work complements paid employees' work or displaces it.

The new skill is applying a legal test factor by factor. It extends Case 12, where you compared fact patterns to a precedent, and Case 11, where you compared two situations on the same terms. Gia's question about last year is a Case 11 comparison. The inbox used to be a paid job. That fact bears directly on displacement.

Laid out factor by factor, the evidence is uneven. Displacement: a paid assistant did this work last year. Academic credit: listed as available, but Rafa's school has not confirmed it. Training and supervision: no information. Calendar and duration: the studio wants him to start after finals and stay all summer, but gives no hours. A careful reader concludes that the studio's claim is unsupported, not that the internship is illegal. The test is flexible, no single factor decides it and the facts that would decide it are missing. The test also has limits. It applies to for-profit employers, and state rules may differ.

Case 11's term **compensation**, all the pay and benefits a worker receives, completes the picture. The offer pays nothing and costs Rafa paid shifts. His email will ask for the missing facts in writing, politely: who trains him, what a normal week looks like, the weekly hours and whether this is the assistant's old job.

❓ **Stop and think.** Which factor has the strongest evidence, and which has none? What does that imbalance mean?

The courts, the data and the profession

The primary beneficiary test grew out of litigation. Two unpaid interns on the 2010 film *Black Swan* sued Fox Searchlight. The appeals court opinion lists their tasks, which included answering phones, taking lunch orders, making coffee, photocopying and filing (U.S. Court of Appeals for the Second Circuit, 2016). In 2015, the court held that the question is who is the primary beneficiary, and that is the test the Labor Department uses now (LAist, July 2, 2015; U.S.

The courts, the data and the profession, continued

Department of Labor, Fact Sheet #71, updated January 2018).

The stakes are about access as well as law. PBS NewsHour reported that nearly half of U.S. interns were unpaid in 2022 (PBS NewsHour, August 26, 2023). NACE survey data show inequity in who gets paid internships (National Association of Colleges and Employers, August 8, 2023). NACE’s own ethics principles ask members to comply with “local, state, and federal” laws (NACE Principles for Ethical Professional Practice, 2025).

?

Stop and think. If Rafa’s school grants credit, does that settle whether the studio should pay him? Why or why not?

Notes

Key idea: the primary beneficiary test

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

A job title does not show how the work is arranged. The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. An intern who counts as an employee must be paid under the **Fair Labor Standards Act**. The Fair Labor Standards Act is a federal law that sets minimum wage and overtime rules for most workers.

The Department of Labor's Fact Sheet #71 lists seven factors. They include training, links to coursework or **academic credit**, the school calendar and how long the learning lasts. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor is whether the intern's work adds to paid employees' work or replaces it. The test is flexible, and no single factor decides it.

So the studio's email does not settle the question. Calling a job an internship does not decide it. Neither does college credit, or an intern agreeing to work for no pay. The test also has limits. It applies to for-profit employers, and state rules may differ. To apply the test, you need facts about the duties, training, supervision and hours.

Case 16: Who wrote the new building rule?

An unsigned notice says the building's only step-free door locks at 8 p.m., and Sami's workshop runs later.

On your own Read What happened and underline the two changes the notice announces. About 4 minutes.

Mari hands a yellow sheet to Sami across a white table while Caio listens. This scene comes from Case 4.

Your role: You're the one who photographs the notice and writes down when and where it was found.
New skill: Find who has the authority to make a rule.

What happened

It is Monday morning in Sami's apartment building. A new notice is posted beside the common-room door. It says the rear door will be locked at 8:00 p.m. every night. It also says the common room is "for resident social use only," with "NO BUSINESS USE" in capital letters. The notice has no name, no date and no contact.

That rear door matters to Sami, who lives in apartment 3B and uses a manual wheelchair. It is the building's only step-free entrance. The front entrance has four steps and no ramp. Sami also runs a workshop in the common room, and it goes past 8 p.m.

Caio reads last year's house rules beside the notice. Those rules let residents reserve the common room for classes and resident-run workshops. The new notice does not say whether it replaces them. Before anyone starts arguing, Sami photographs the notice and writes down when and where she found it.

Your question: Who has the authority behind this notice, and what should Sami ask the building manager?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 4 minutes.

Authority Authority is the power a person or group has to make or change a particular rule or decision.

En español: autoridad

In this case: The notice uses bold type and capital letters but names no issuer. Sami has to find out who has the power to make this rule.

Reasonable accommodation A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place.

En español: acomodo razonable

In this case: Sami could ask the building for a key fob for the rear door, so she can get in after 8 p.m.

Documentation Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when.

The story: An anonymous notice

Sami, 23, lives in apartment 3B, studies design and uses a manual wheelchair. On Monday morning, she finds a new notice beside her building's common-room door. It announces two changes "effective immediately." The rear door will be locked at 8:00 p.m. nightly, and the common room is for resident social use only, with "NO BUSINESS USE" in capitals. The notice carries no name, no date and no contact.

Each change touches her directly. The building's entrance plan lists a front entrance with four steps and no ramp, a side door for service use only and a rear door that is step-free and opens to the elevator hallway. After 8 p.m., the notice would lock the only door she can use. It would also cloud the future of the workshop she runs in the common room, which goes past 8.

Sami does not start with outrage. She photographs the notice and writes down when and where she found it, before anybody starts arguing about what it said. Caio, the oldest in the crew, brings last year's house rules, handed out at lease signing. He reads the notice the way an editor reads copy. All caps, bold, no name, no date. Somebody made it look official, and he still does not know who.

Your role is to help Sami keep a clean record of the notice before anyone starts arguing.

 **Stop and think.** Why does formatting signal authority without proving it?

Authority, sources and missing definitions

Authority is the power a person or group has to make or change a particular rule or decision. The case separates the look of authority from its substance. Formatting signals power but does not prove it. An unsigned notice is not automatically invalid, but its force depends on who issued it and what it claims to change.

The new skill is finding who has the authority to make a rule. It draws on three earlier skills. From Case 1, you compare the notice with an original document, last year's house rules, which let residents reserve the room for "gatherings, classes and resident-run workshops" through the building office. From Case 7, you ask what stage the rule is at. From Case 10, you take the question to the office that can answer it, here the building manager. Case 4's **decision-maker**, the person or group with the power to make a particular choice, names what Sami is looking for.

Caio's comparison finds a definitional gap. The old rules explicitly allow resident-run workshops. The new notice bans "business use" without defining it, so nobody can yet say whether Sami's workshop is affected. The notice also does not say whether it replaces the old rules or adds to them.

Case 10's **barrier**, something that blocks or limits a person from taking part, describes the locked rear door. A **reasonable accommodation** is a change to a rule or practice that gives a person with a disability equal use of a place, such as a key fob for the rear door. **Documentation** is a record, such as a photo, a note or an email, that shows what was said or done and when. Sami's photo and note will matter if the facts are disputed later. She keeps her two questions apart: who has the authority, and how she gets in after 8. Neither friend calls the notice illegal, because they do not yet know who wrote it or how the building handles access requests.

 **Stop and think.** How does the undefined phrase "business use" change what Sami can conclude?

The law, the process and a Brooklyn example

A landlord's policy and the law are different sources of rules. HUD says the Fair Housing Act bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability, and covers most housing with some exceptions (HUD, no date listed). Guidance can change even when the law does not. In 2025, HUD withdrew several fair housing guidance documents, but the Act itself stayed the same (National Association of Realtors, October 7, 2025). Enforcement continues. In 2026, the Justice Department announced a \$750,000 settlement with a property management company in a disability discrimination case (U.S. Department of Justice, April 30, 2026).

Process can give tenants leverage. At Atlantic Plaza Towers in Brownsville, Brooklyn, the landlord applied to install a facial-recognition entry system. Tenants say they learned about it from the state housing agency, not the landlord.

The law, the process and a Brooklyn example, continued

Because the change needed that agency's permission, they filed opposition (Legal Services NYC, May 1, 2019), and in November 2019 the landlord withdrew the application (Gothamist, November 21, 2019). That case turned on New York's rent-stabilization rules, which may not apply to Sami's building.

The NCA credo describes the posture Sami takes: "We strive to understand and respect other communicators' intent before evaluating and responding to their messages" (NCA Credo for Ethical Communication, 2024).

? **Stop and think.** Why might the Atlantic Plaza Towers example not apply directly to Sami's building?

A building rule should name who made it, give a date and list a contact. This notice has none of them.

Authority is the power a person or group has to make or change a particular rule or decision. Bold type and capital letters do not show who has that power. An unsigned notice is not automatically invalid, either. Sami has to find out who issued it and which document it claims to change.

A landlord's policy and the law are different sources of rules. The Fair Housing Act is a federal law. HUD, the federal housing department, says it bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability. It covers most housing, with some exceptions. Under the Act, a person with a disability can ask a building for a **reasonable accommodation**. A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place. For Sami, that could be a key fob for the rear door.

Sami cannot yet say the notice breaks the law. She does not know who wrote it, whether it replaces the house rules or how the building handles access requests. Whether a building grants an accommodation also depends on the facts. **Documentation** helps her keep those facts straight. Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when. Her photo of the notice, with the date and place she found it, is documentation.

The notice says the rear door, the building's only step-free entrance, locks at 8 p.m. It also bans "business use" of the common room. It has no name, no date and no contact. What should Sami do first?

- ☐ **A** Ignore it until someone signs it, since an unsigned notice may not be official.
- ☐ **B** Photograph it, compare it with last year's house rules and ask the manager who issued it and how residents get in after 8.
- ☐ **C** Post online that the building is breaking disability law.

Thirty people want ten free workshop seats, and the crew must choose a fair way to decide who gets them.

On your own Read What happened and underline the sentence that tells how many people want a seat. About 4 minutes.

Duda holds up a phone and points at a blank card on a bulletin board.

Your role: You're the one who writes down the rule before the crew picks the ten names. **New skill:** Set fair criteria before choosing.

What happened

The crew has ten free seats for a workshop, and thirty people want one. The crew opened a sign-up sheet on Monday at 9 a.m. Twenty-two names were on it before 10 a.m. By Wednesday, the sheet has thirty names.

The sheet says only “How seats will be chosen: to be announced.” The crew has argued about the rule since dinner on Sunday. Gia is running the sign-up. She wants to give the seats to the first ten names, because that is simple and fast. Mateo suggests a lottery instead.

Anika, 16, is at rehearsal most days, and she checks her phone after rehearsal ends. Under first-come, she would see the message after the seats were gone. A third option on the crew’s whiteboard would give seats to people who cannot afford the paid version of the workshop. That option would ask people for personal information.

Every method seats exactly ten people. The crew has to decide which ten, and then explain the rule to all thirty.

Your question: How should the crew choose who gets the ten seats, and how should they explain the choice to all thirty people?

Words to know

- **Criteria:** Criteria are the standards or reasons a group uses to make a decision.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.
- **Equity:** Equity is a way of sharing that adjusts for different needs so everyone gets a fair chance.
- **Consent:** Consent is permission a person gives for something specific, such as sharing a record with a named person.

The story: Thirty names, no rule

Ten free workshop seats should be good news. For the crew, it is a problem. The sign-up sheet opened Monday at 9 a.m., and 22 names arrived before 10. By Wednesday, 30 people have signed up, and the sheet still says the selection method is “to be announced.” The crew has argued since Sunday dinner.

Gia is running the sign-up, and her preference is practical. First ten to reply get a seat. It is simple, she can post it tonight and she has a shift at seven. Mateo proposes a lottery, and Gia counts its costs: a sign-up window and someone to run the drawing. The whiteboard lists a third choice, a needs-based rubric for people who cannot afford the paid workshop. It would require personal information and someone to judge it.

Anika, 16, is at rehearsal most days and checks her phone only afterward. Under first-come, she would find out after the seats were gone. Her request is precise. She does not need a seat. She wants the crew to say how it is picking, and not to pretend nobody loses out, because she would. When someone asks whether she wants the plan to revolve around her, she says no. Admit the cost, and then maybe they can fix that part.

Gia’s honesty moves the conversation too. She admits she mostly wanted the task off her list. What would change her mind is evidence that the people the crew most wants in the room are the ones who would see the message last. She would rather ask them than guess.

Your role is to write down the rule before the crew picks the ten names.

❓ **Stop and think.** Anika and Gia each admit something about their own position. How does that honesty change the decision?

Criteria first, then choice

Criteria are the standards or reasons a group uses to make a decision. The new skill is setting fair criteria before choosing and stating who each rule leaves out. It builds on Case 4, where you learned that a **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Here every option seats ten and excludes twenty, so the real decision is which cost the crew is willing to defend.

Each option distributes that cost differently. First-come rewards attention and availability, which disadvantages people with rehearsals, shifts or less phone time. A lottery gives equal odds but ignores need. A needs-based rubric pursues **equity**, a way of sharing that adjusts for different needs so everyone gets a fair chance. It also imposes an entry cost. Applicants must disclose personal information, and Case 6's concept of **consent**, permission a person gives for something specific, applies. The crew would need to ask for only what it needs, get clear consent and decide who sees the answers.

Timing is itself an ethical variable. The sheet shows most sign-ups arrived before any rule existed. Choosing a rule after seeing the names invites suspicion that the rule was picked to favor someone. A rule announced in advance can earn acceptance even from those who lose. That is why the crew's decision note should state the method, its main objection and one change that reduces the cost for people who miss out.

Anika offers a structure for comparing options, and it maps onto two classic ethical approaches. One asks which option helps the most people, a consequences question. The other asks whether the way of choosing is fair to everyone, a fairness question.

❓ **Stop and think.** Which of Belmont's five principles does each whiteboard option rely on?

Lenses and real allocation debates

The Markkula Center's framework offers several lenses: consequences, rights, fairness, the common good, character and care. These lenses can reveal different concerns rather than producing an automatic score (Markkula Center for Applied Ethics, revised November 5, 2021). The Belmont Report, a foundational federal statement on research ethics, lists five widely accepted ways to share benefits and burdens: an equal share, individual need, individual effort, societal contribution and merit (Belmont Report, April 18, 1979).

Scarcity decisions happen at every scale. During the COVID-19 pandemic, a bioethicist explained how leaders chose who received vaccines first (NPR, December 20, 2020).

Lenses and real allocation debates, continued

Medical experts argued against first-come, first-served for scarce resources and proposed explicit criteria instead (Emanuel et al., New England Journal of Medicine, May 21, 2020). In New York City, families disagree over lotteries versus grades for high school admissions (Chalkbeat New York, August 9, 2023). In each debate, people agree that there is not enough to go around. They disagree about which rule should decide who gets a share, and that is the crew’s question too.

?

Stop and think. Why does choosing a rule after seeing the names damage trust even if the rule is reasonable?

Notes

Key idea: fair criteria

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

Any way of giving out ten seats to thirty people leaves twenty people without one. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. First-come is fast, but it favors people who see the message first. A lottery gives everyone the same chance, but it does not consider need. A needs-based rubric aims at equity by helping people who cannot afford the paid version, but applicants must share personal information. Each option has a cost, so the crew has to choose which cost to accept.

Criteria are the standards or reasons a group uses to make a decision. When the crew states its criteria early, everyone knows the rule before anyone is chosen. Even people who do not get a seat may accept the result if the rule was clear in advance. If the crew picks a rule after seeing the names, people may wonder whether it was chosen to favor someone.

The Markkula Center for Applied Ethics at Santa Clara University suggests looking at a decision through several ethical lenses. They include consequences, rights, fairness, the common good, character and care. The lenses can point toward different options, and they do not add up to one automatic score. A strong decision explains which concern matters most in this case, who carries the cost and what could reduce it.

We should do first come first served because ① it’s the most fair. Everyone has the same chance to sign up and if you really want it you’ll sign up fast. It’s simple and ② nobody can complain because they had the same opportunity as everyone else. Also it’s way less work for us than reading thirty applications or doing some random drawing. The people who don’t get in can just come to the next workshop whenever we have one. This is obviously the best way.

Case 17: How should the crew give out ten free seats?

In this case, a group of friends has ten free workshop seats and thirty people who want one. Your student compared three ways to choose and wrote a note that explains the choice and who carries its cost.

Questions to talk about

- 1 When something is limited, like tickets or seats, what makes a way of choosing feel fair?
- 2 Why might it help to announce a rule before anyone signs up?
- 3 What is one kind way to tell people they were not picked?

Nobody needs to share personal stories or private information to talk about this case.

Case 18: Why is the theater curtain still falling apart?

The district's proposed budget is \$48 million, the school theater curtain won't close, and Dec wants to ask the school board about it.

On your own Read What happened and underline the three dollar amounts. About 4 minutes.

Anika, Dec and Mari test a small light circuit in a theater workshop, with Pauta beside them.

Your role: You're the one who works out the per-student number before anyone repeats the post. **New skill:** Compare numbers on the same scale.

What happened

The curtain in the school theater is torn, and it no longer closes all the way. Dec, 17, pulls that curtain at every show. He and Anika, 16, are on the theater crew. The facilities office gave the theater advisor a quote to replace the curtain: \$6,800.

Mari, 19, is helping them prepare a question for the school board. They find the district's proposed budget for next school year. The total is \$48 million for a projected 3,200 students. One line sets aside \$310,000 for building repairs at all schools. A note says the figures may change before the board adopts the budget.

On Tuesday at 6:10 p.m., a post starts going around. It compares the district's \$48 million with another district, Westbrook, at \$21,000 per student. "And they can't fix ONE curtain??" it asks. Dec has a photo of the torn curtain. He wants to be the one who asks the board about it.

Your question: What can the \$48 million total tell Dec about the curtain, and what should he ask the school board?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 3 minutes.

Revenue Revenue is money that comes into a government or an organization, such as taxes and grants.

En español: ingresos

In this case: NCES reports that public schools get revenue from federal, state and local sources. That national data cannot show what Dec's district spends on a curtain.

Expenditure An expenditure is money that a government or an organization spends.

En español: gasto

In this case: The \$48 million is a proposed plan for next school year. It lists planned expenditures, but none of that money has been spent yet.

Per-pupil amount A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.

En español: monto por estudiante

In this case: $\$48,000,000 \div 3,200 \text{ students} = \$15,000 \text{ per student}$. Westbrook's \$21,000 is already per student, but its year and stage are unknown.

Reading a budget before reacting to it

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Revenue:** Revenue is money that comes into a government or an organization, such as taxes and grants.
- **Expenditure:** An expenditure is money that a government or an organization spends.
- **Per-pupil amount:** A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: Where is the money going?

Dec, 17, a senior on the theater crew, pulls the stage curtain at every show. It is torn and no longer closes all the way. The facilities office has already priced a flame-retardant replacement, removal and installation included, at \$6,800. Dec has a photo of the tear. He wants to take the problem to the school board, and he wants to be the one who asks.

Mari, 19, is helping him and Anika, 16, prepare. The district's proposed budget for next school year is posted online. The headline figure is \$48,000,000, with projected enrollment of 3,200 students. A facilities line provides \$310,000 for building repairs across all schools. A note warns that the figures are proposed and may change before adoption.

On Tuesday at 6:10 p.m., a post begins circulating. It sets the district's \$48 million beside Westbrook's \$21,000 per student and asks why the district cannot fix one curtain. The post has the emotional logic of a good question. It also has the arithmetic of a bad one. Mari's instinct is to ask where the numbers are from.

Your role is to work out the per-student number before anyone repeats the post.

❓ Stop and think. The post "has the emotional logic of a good question." What makes it feel convincing?

Putting numbers on the same scale

Budget numbers carry three labels that must match before a comparison means anything: year, stage and unit. The post mismatches all three. It pairs a proposed district total for next year with a per-student figure of unknown year and stage.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. The new skill in this case is comparing numbers on the same scale. It extends Case 11's habit of comparing like with like. Dividing \$48,000,000 by 3,200 gives \$15,000 per student. The recalculation changes the post's implied story, but it does not settle it. Westbrook's year and stage are still unknown, and a per-pupil figure cannot show whether either district's funding matches its students' needs.

The vocabulary of public finance keeps other distinctions straight. **Revenue** is money that comes into a government or an organization, such as taxes and grants. An **expenditure** is money that a government or an organization spends. This document is a **proposal**, the Case 4 term for a change that someone suggests and that has not been approved yet. A proposed budget, the adopted budget and actual spending are three different records.

The crew's method draws on earlier cases. Mari reads the budget line by line, the skill from Case 5, looking for the line that could plausibly cover a stage curtain. She is not sure a curtain counts as a building repair, and she wants to find out. Dec follows Case 13's rule of keeping a claim as small as the evidence. His photo proves the tear and nothing about where money went, so he brings the photo, the quote and a question rather than an accusation. Case 4's **decision-maker**, the person or group with the power to make a particular choice, points to the school board, which adopts the budget within state and federal rules. His question should name one budget line, one need and the board's next chance to hear requests.

 **Stop and think.** Why can't a per-pupil figure show whether a district has enough money?

Funding, spending and outcomes

National data give context but not local answers. NCES reports that public-school revenue comes from federal, state and local sources, with a mix that varies by state (NCES, May 2024). Its state-by-state table for 2022–23 includes per-pupil amounts (NCES Digest table 235.20, March 2026). Reliance on local property taxes produces large differences between districts (NPR, April 18, 2016).

Budgets also change over time. When temporary federal pandemic relief ran out, districts faced what reporters called a funding cliff (Chalkbeat, September 13, 2023). In 2026, many districts made cuts and layoffs tied to inflation and enrollment declines (Chalkbeat, May 28, 2026). Spending levels matter for students.

Funding, spending and outcomes, continued

A major study of school finance reforms found that more per-pupil spending raised graduation rates and adult earnings, especially for low-income students (Jackson, Johnson and Persico, Quarterly Journal of Economics, October 1, 2015).

The SPJ code offers a rule for anyone writing about budgets: “Provide context. Take special care not to misrepresent or oversimplify in promoting, previewing or summarizing a story” (SPJ Code of Ethics, September 6, 2014). The viral post fails that test, and Dec’s question passes it.

❓ Stop and think. What would Dec need to know to show that the curtain belongs in the building repairs line?

Notes

Key idea: per-pupil amounts

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

Before you compare two budget numbers, check three labels: the year, the stage and the unit. An **expenditure** is money that a government or an organization spends. A proposed budget is a plan for expenditures. An adopted budget is the plan the board approves. Actual spending is what the district really spent. The \$48 million is a proposed total for the whole district. The Westbrook figure is an amount per student.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. Dec's district proposes \$48,000,000 for a projected 3,200 students. That works out to \$15,000 per student. The comparison is still not complete, because Westbrook's budget year and stage are unknown. A per-pupil figure also cannot show whether either district has enough for its students' needs.

Revenue is money that comes into a government or an organization, such as taxes and grants. The National Center for Education Statistics (NCES) reports that public schools get revenue from federal, state and local sources. The mix differs from state to state. National data like this gives context, but it cannot say what one district spends on a curtain. In most states, an elected local school board adopts the budget within state and federal rules. That is why Dec's question should name one budget line, one need and the board's next chance to hear requests.

About 5 minutes.

A post compares the district's \$48 million total with Westbrook's \$21,000 per student. Someone reposts it and adds "we get way less." What should the crew do first?

- ☐ A Share it. Both figures are in dollars, and the curtain really is torn.
- ☐ B Check that both figures use the same year, budget stage and units before comparing them.
- ☐ C Divide \$48 million by 3,200 students, and post that the district is underfunded.

Our district has a ① \$48 million budget but our theater curtain is ripped and gross. That's so much money and they can't even fix one curtain? It has been like this since before any of us joined the crew and it keeps getting worse every show. Where is all the money going? Other districts get way more. I saw a post that said so. - 2 Why can it be misleading to compare a total with an amount per person?
- 3 Who would you ask if something at school needed fixing?

Nobody needs to share personal stories or private information to talk about this case.

Case 19: What should Gia say in her two-minute comment?

Gia has two minutes to speak to the parks committee about the court lights, but her draft is three pages long.

On your own Read What happened and underline the sentence that says what item 4 proposes. About 3 minutes.

Gia and Mateo sit on a front stoop, each holding pages of notes.

Your role: You're the one holding the timer and listening for the request. **New skill:** Fit a request to the body's remit and time limit.

What happened

It is Tuesday, 5:40 p.m. The parks committee meets at 6. Item 4 on its agenda is a proposal to turn off the park's court lights at 8 p.m. The reason given is complaints about evening noise from nearby residents.

Gia, 21, wants to speak against item 4. It is her first time speaking at a public meeting. Each speaker gets two minutes. On Monday night, Gia wrote a three-page draft. When she reads page one out loud, it takes two minutes and forty seconds.

Mateo, 22, is timing her from a bench. He follows every word, but he cannot tell what she wants the committee to do. The draft also mentions a friend's private situation, and page two is about the bus. Everything Gia says will become part of the public record, along with her name.

Your question: What should Gia keep in her two-minute comment, and what should she cut?

Key terms

Agenda item An agenda item is one topic listed on a meeting's official schedule of business.

En español: punto del orden del día

In this case: Item 4, "Evening court hours," proposes turning off the court lights at 8:00 p.m. Its action is a committee recommendation to the full council.

Remit A remit is the set of matters that a committee or other body is responsible for and can act on.

En español: competencia

In this case: The parks committee can recommend court hours. It cannot change bus routes, so page two of Gia's draft belongs with a different body.

Public record A public record is information a government keeps that anyone can ask to see, such as meeting comments.

En español: registro público

In this case: Comments and speakers' names become part of the public record. That is why Gia leaves her friend's private situation out of her comment.

- **Public record:** A public record is information a government keeps that anyone can ask to see, such as meeting comments.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: The first time at the microphone

Gia, 21, has spent her life in Fort Greene, and the park is part of her week. On Tuesday, the parks committee meets at 6 p.m. Item 4 on its agenda proposes turning off the court lights and closing the lighted courts at 8 p.m., citing complaints about evening noise from nearby residents. The agenda lists the action as a committee recommendation to the full council. Gia wants to speak against it. She has never spoken at a public meeting before.

The rules give her two minutes. Speakers sign up by 5 p.m., written comments may be submitted in advance and comments and names become part of the public record. At 5:40, Gia reads her draft aloud on a bench while Mateo, 22, times her. The draft runs three pages, and page one alone takes two minutes and forty seconds. It also contains a friend's private situation and a page about the bus.

Mateo's feedback is precise without being a rewrite. He followed every word and still cannot say what she wants the committee to do. His question is the most useful editing tool in the case. If the committee remembers one sentence, what is it? That sentence goes first.

Your role is to hold the timer and listen for the request.

❓ Stop and think. Why does Mateo's one-sentence question work better than line edits?

Matching a request to a body

An **agenda item** is one topic listed on a meeting’s official schedule of business. A **remit** is the set of matters that a committee or other body is responsible for and can act on. The two concepts define what Gia can usefully ask. Item 4 concerns lighting and closing time. The committee’s remit includes recommending court hours. It does not include buses. Her draft’s central plea, “Please don’t close the park,” misstates the item, since no one has proposed closing the park.

The new skill is fitting a request to the body’s remit and time limit, and it assembles earlier skills. Case 4 introduced the **proposal**, a change that someone suggests and that has not been approved yet, and the **decision-maker**, the person or group with the power to make a particular choice. Here the chain has two links. The committee recommends, and the full council decides. Case 10 taught you to route a problem to the office responsible, which is why the bus page belongs with a transit office rather than this committee.

A strong two-minute comment does four jobs. It names the agenda item, reports an observation, explains why it matters and makes one request. Gia’s revised comment does exactly that. It names item 4. It reports that she counted twenty or thirty people on the courts between 8 and 9. It notes that many of them work late. And it asks for lights until 9 on weekdays this summer. The request also engages the resident who wrote that late noise carries into their apartment and that their kids have school in the morning. Asking for 9 rather than no change gives the committee a middle path that answers both concerns in part.

The final cut is ethical. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. Everything Gia says will be attached to her name and kept. Her friend’s situation belongs to her friend, so it comes out.

❓ **Stop and think.** How does asking for 9 p.m. instead of no change affect the committee’s choices?

Research and real practice

Rules differ by body. Seattle City Council accepts spoken comment in person or by phone and written comment by email, with up to two minutes per speaker (Seattle City Council, no date listed). That is one city’s process, not a rule for every council. Research raises a harder question about who shows up. A study of meeting minutes found that local commenters often do not reflect the whole community (Einstein, Palmer and Glick, *Perspectives on Politics*, October 14, 2018). Other peer-reviewed work examines whether and how public comment connects to policy outcomes (Sahn, *American Journal of Political Science*, August 31, 2024).

Young people are using the process well. Philadelphia students testified at board meetings about school closures, drawing on district data (Chalkbeat Philadelphia, April 3, 2026).

Research and real practice, continued

Journalists hold a related privacy standard. The SPJ code says “private people have a greater right to control information about themselves than public figures” (SPJ Code of Ethics, September 6, 2014). Gia applies that principle to her friend.

?

Stop and think. The research shows commenters often do not reflect the whole community. What does that suggest about who should speak?

An **agenda item** is one topic listed on a meeting's official schedule of business. Each committee, council or board sets its own rules for who can speak, when and for how long. Seattle City Council is one real example. Its public comment page describes speaking in person or by phone and signing up before the meeting. Each speaker gets up to two minutes, and written comments can be sent by email.

A short comment can do four jobs. It names the agenda item, shares something the speaker observed, says why it matters and ends with a clear request. Before adding personal details, check whether comments become public. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. At Gia's meeting, comments and speakers' names become part of the public record.

Talk about this case at home

Case 19: What should Gia say in her two-minute comment?

In this case, Gia gets two minutes at a parks committee meeting to speak about a plan to turn off the court lights. Your student helped cut her three-page draft into a short comment with one clear request.

Questions to talk about

- 1 Who makes decisions about parks and other public spaces in a town or city?
- 2 What makes a short request easy for a listener to remember?
- 3 Why might someone leave a friend's story out of a public comment?

Nobody needs to share personal stories or private information to talk about this case.

Case 20: Can the crew post this image as true?

A realistic image says the campus courtyard flooded today, and Jordy must decide what the six o'clock recap can say about it.

On your own Read What happened and underline the caption's claim. About 3 minutes.

Lupa holds a cropped photo of a courtyard next to the full photo pinned on a board. The full photo also shows a blue doorway.

Your role: You're the one who writes the verification note Jordy posts at six. **New skill:** Confirm an image with independent sources.

What happened

It is Wednesday, 3:10 p.m. For twenty minutes, an image has been going around the group chat. It looks like a photo of the campus courtyard, with water over the paving and benches. The caption says, "Courtyard flooded today, stay away." It showed up at 2:48 p.m. with no link, no date and no name.

Jordy is putting together the crew's recap, which goes out at six. Sami has zoomed in on a hand in the picture, and the fingers seem to merge at the knuckles. Someone ran the image through a free online detector. It reported "12% likely AI-generated."

A reply in the chat says the writer's roommate's friend saw water near the library. Jordy checks the campus facilities alerts page. It shows no active alerts, but its last update was Monday morning.

Your question: Did the courtyard flood today, and what should the recap say about the image?

Key terms

Provenance Provenance is information about where an image or a document came from and how it has been handled.

En español: procedencia

In this case: The courtyard image arrived at 2:48 p.m. with no link, no date and no named poster. Its provenance is unknown.

Corroboration Corroboration is support for a claim from an independent source.

En español: corroboración

In this case: A campus alert or someone's dated photo of the courtyard could corroborate the flood. A roommate's friend's report of water near the library cannot.

Verification note A verification note is a short record of what you checked, what you found and what is still unknown.

En español: nota de verificación

In this case: Instead of posting the image, the recap says what the crew checked, what it found and what is still unknown.

The story: A deadline and a picture

The crew's casebook began with a seven-second clip in a group chat. It ends with a single image. At 2:48 p.m. on a Wednesday, a photo-like picture of the campus courtyard appears in the chat, showing water over the paving and benches. Its caption reads, "Courtyard flooded today, stay away." It arrives with no link, no date on the image and no original poster named. A person in the foreground holds up a phone.

Jordy, who edits the crew's films and checks every cut before calling it finished, is assembling the six o'clock recap. Within twenty minutes, four pieces of evidence have arrived, and each points somewhere different. Sami posts a zoomed screenshot at 3:02 showing a foreground hand whose fingers seem to merge at the knuckles. A free online detector reports "12% likely AI-generated." A reply relays that the writer's roommate's friend saw water near the library. And at 3:10, Jordy checks the campus facilities alerts page: "No active alerts. Last update: Monday, 9:15 a.m."

Sami, a design student who notices details for a living, is the first to step back from them. The hand is weird, she agrees, but the more important question is who posted the image first, and when. Jordy states the dilemma plainly. They wanted a clean yes or no, and they do not have one.

Your role is to write the verification note Jordy posts at six.

❓ **Stop and think.** Why can a detector score answer the wrong question even if it is accurate?

Weighing evidence without overclaiming

Provenance is information about where an image or a document came from and how it has been handled. Checking provenance first is the Case 1 skill, finding the original source, applied to images. This image has none, so every other clue has to be weighed without an anchor.

Each clue has a specific weakness. The caption is a **claim**, a statement that something is true that can be checked with evidence. The hand is an anomaly, which justifies closer scrutiny and proves nothing, since generated images can look natural and real photos can look strange. The detector score is uninterpretable without knowing the tool's error rates. Sami's question, twelve percent of what, gets at that. It also answers a different question from the one that matters. Even a perfect detector could not say whether the courtyard flooded today. The secondhand report fails on two counts: it is not firsthand, and it concerns the library, not the courtyard.

Corroboration is support for a claim from an independent source. Case 9's skill, checking the official source for your area, points to the alerts page, but its last update on Monday limits what its silence can mean. A dated photo from someone at the courtyard would be stronger.

The new skill is confirming an image with independent sources, and publishing only what was checked. Jordy rejects the middle path of posting the image with a question mark, because the image travels regardless of the punctuation. The recap instead carries a **verification note**, a short record of what you checked, what you found and what is still unknown. It is a descendant of Case 1's **holding statement**, which says what is known, what is still being checked and when people will hear more. It also sets up Case 3's obligation. If new evidence arrives, a **correction** or update appears where the note did. "Unverified" is sometimes the most accurate conclusion available.

❓ **Stop and think.** Why does a question mark fail to stop an image from misleading people?

Detection, provenance and professional standards

NIST's overview of synthetic content describes provenance data, labeling, watermarking and detection, and it explains the technical limits of each (NIST, November 20, 2024). Real incidents show why no single signal suffices. The Hurricane Helene image of a crying girl with a puppy had no traceable photographer or outlet, and forensics researcher Hany Farid identified internal inconsistencies (UC Berkeley School of Information, October 4, 2024). The News Literacy Project's RumorGuard check on that image models a verification note, setting out what is known, what is not and why (RumorGuard, no date listed). In 2023, fake images of a Pentagon explosion were shared by verified accounts, showing that a trusted-looking sharer is not provenance (CNN, May 22, 2023).

Detection, provenance and professional standards, continued

Human perception is not a reliable safeguard. In a PNAS study, people could not reliably distinguish AI-synthesized faces from real ones (Nightingale and Farid, February 14, 2022).

Journalism codes frame Jordy's choice as a duty. The RTDNA code says journalism "verifies, provides relevant context, tells the rest of the story and acknowledges the absence of important additional information" (RTDNA Code of Ethics, June 11, 2015). The SPJ code asks journalists to "identify sources clearly" (SPJ Code of Ethics, September 6, 2014).

Key idea: provenance

On your own Read the key idea and the code of ethics, then answer the question in the box. About 6 minutes.

Provenance is information about where an image or a document came from and how it has been handled. Check it first when an image claims to show a news event. An image can look polished and still be generated, edited, old or shared with the wrong caption. The courtyard image arrived with no link, no date and no named poster, so its provenance is unknown.

A detail or a tool can give a clue, but it cannot settle the question. An odd-looking hand is a reason to look closer. A natural-looking hand does not prove that an image is real, either. The National Institute of Standards and Technology (NIST) describes several ways to track, label, watermark and detect synthetic content, such as AI-generated images. NIST explains that each approach has technical limits.

For a claim about a real event, look for the earliest post, its date and place, and corroboration.

Corroboration is support for a claim from an independent source. Here, that could be a campus alert or someone's dated photo of the courtyard. If you cannot confirm the claim, write a verification note. A **verification note** is a short record of what you checked, what you found and what is still unknown.

Professional standards

RTDNA Code of Ethics: Truth and accuracy above all

“Journalism verifies, provides relevant context, tells the rest of the story and acknowledges the absence of important additional information.”

In plain words: The RTDNA code asks news staff to say what they checked and to admit what they still do not know.

Question: The facilities page shows no active alerts but was last updated Monday. What should Jordy's note say is still unknown?

Practice: choose a response

On your own Choose what Jordy should do, explain why and fix the two marked phrases. About 6 minutes.

The recap goes out at six. What should Jordy do about the courtyard image?

- ☐ **A** Post the image with a question: “Is the courtyard flooded?”
- ☐ **B** Say the image is fake, because the hand looks wrong.
- ☐ **C** Leave the image out, report what the crew checked and say the flood is not confirmed.

Why I chose it

Improve a draft

A student's first draft

Heads up everyone!! **1** The courtyard flooded today so don't go over there. Some people are saying the picture is AI because the hand looks weird but I ran it through a detector and it said 12% AI so it's basically real. My roommate also said her friend saw water near the library earlier, so that pretty much confirms it. Stay safe and **2** tell your friends, we don't want anyone getting hurt or ruining their shoes lol. We'll post more if we hear anything else about it.

Analyze how the viral caption persuades, then write a verification note that uses the same brevity honestly.

Use: The caption, the image description and two reposts with added comments.

You'll make: Analysis (about 400 words) plus note

Time: 50 minutes

- 1 Fill in the rhetorical situation grid for the caption: speaker, audience, purpose and context.
- 2 Mark the imperative and the time word in the caption.
- 3 Write a thesis on how the caption persuades readers to act before checking.
- 4 Draft your thesis and first body paragraph on the Your draft page.
- 5 Write a verification note that keeps urgency without overclaiming.
- 6 Ask a peer to mark any overconfident word. Revise, and explain the change in one sentence.
