AP Seminar

AP Seminar classes practicing research, argument and team presentation skills.

20 cases

Case 1: Is the screening canceled? AP Seminar student edition

Look at the evidence

On your own Read each document. For each one, write what it shows and what it leaves out. About 15 minutes.

Evidence A | Group-chat post, Friday 4:52 p.m.

The post

They're removing access tonight. Screening canceled? A seven-second clip is attached. In it, the coordinator says "we are removing access," and the clip ends there.

Look closely: Which word in the caption goes further than the clip itself?

What it shows	What it leaves out
➤ A real clip, and a caption that turns "removing access" into a cancellation.	➤ The next words of the sentence, who cropped the clip and when the meeting took place.

Evidence B | Coordinator's meeting transcript, Friday 3:30 p.m.

The full update

"The side-door reader is broken. We are removing access through that reader tonight. Existing room bookings remain in place. Use the staffed front entrance while we repair it."

Look closely: Which four words narrow what "access" means? Underline them.

What it shows	What it leaves out
➤ "Through that reader" narrows "access" to one door. Existing bookings stay in place.	➤ Whether every visitor can use the temporary entrance, and how long the repair will take.

Case 1 | Look at the evidence | AP Seminar educator edition

Pacing

Full chapter: 15 min.
 ⌂ Short on time: 15 min.

Say this

"Put your finger on the last word of the clip. What would you need to hear next?" — Wait for someone to find "through that reader" in Evidence B.

Watch for

Misconception: Students call the clip fake. **Listen for:** "It's fake news." **Then:** Ask which word in the clip is wrong. None is. The clip is real; the context is missing.

Support

- Give each document on its own half-page with the key sentence enlarged.
- Read the transcript aloud and offer a recording for replay.
- Cognates:** context (contexto), evidence (evidencia), original (original), correction (corrección), confirm (confirmar), cancel (cancelar), access (acceso), transcript (transcripción).

Stretch

- Ask which document proves the time and which proves the door, and why the email cannot say anything about the side door.

Heat check

■□□ Low.

1. The student page, reduced, with the same page number as in the student edition.
2. Sample answers are blue, italic and start with a key symbol.
3. The educator column names the case, the page and this edition.
4. Blocks for this page, always in the same order.

How to use this educator edition

Each sheet shows one student page on the left and notes for you on the right. Student pages keep their page numbers in this book. Each case starts with a Case plan sheet.

The educator column

- Pacing** Minutes for the full chapter, and what to cut when you have one period.
- Say this** Prompts to read aloud, with a note on how to use each one.
- Stop and think** On reading passage pages: the passage questions and where each one falls.
- Watch for** A likely misconception, what it sounds like and what to do next.
- Support** Scaffolds, sentence frames and English and Spanish cognates.
- Stretch** A harder question or extension for students who are ready.
- Heat check** How likely the page is to start a hard conversation, and how to cool it down.
- Standards** The standards the task practices, on the task page.
- Answer key** Answers that are not printed on the student page.

Answers

➤ **A sample answer** Each answer is a complete response a strong student could write. Your students' wording will differ.

Heat check

- **Low:** most students can discuss this without personal stakes.
- **Medium:** the talk can turn personal. Use the cool-down.
- **High:** plan the cool-down before class.

Case	Task	Students make	Full chapter, min	One period, min	Code of ethics
1 Is the screening canceled?	Team inquiry: “How do communities decide what’s true when updates move through group chats?” Each member writes a short research report through one lens: journalism ethics, psychology of sharing, platform design or local institutions. Then the team presents one update protocol for a school or club.	Individual research report (800—1,000 words) plus 8-minute team multimedia presentation	330	300	SPJ Code of Ethics
2 Does the worksheet show what Dec knows?	Write an individual argument responding to a stimulus packet on the question “Do standardized formats measure what students know?”	Individual written argument, 1,200—1,500 words	274	250	CEC Ethical Principles and Practice Standards
3 What should a group do after a public mistake?	Team multimedia presentation: “What does an organization owe people it misrepresents?” The team examines PR ethics, journalism standards, sociology of stereotypes and the view of the people affected, then presents a repair standard to a student club.	10-minute team presentation plus individual oral defense	330	300	PRSA Code of Ethics
4 Who gets a say when a shared room changes?	Team inquiry: “Who should pay for shared community space?” Members research one lens each (nonprofit finance, disability access, urban planning, neighbor relations), write individual reports, then present a recommendation to the Common Room board.	Individual research report (800—1,000 words) plus 8-minute team presentation	330	300	ASPA Code of Ethics

5 Why is my deposit smaller than what I earned?	Team inquiry: “How should societies share the risks of old age, disability and illness?” Members research economics, history of Social Security, ethics and one other country’s social insurance, then present to classmates starting first jobs.	Individual research report (800—1,000 words) plus 8-minute team presentation	350	300	PayrollOrg Code of Ethics
6 What can your family see in your college records?	Individual written argument on “How much should families know about a young adult’s life?”, using a stimulus packet.	Individual written argument, 1,200—1,500 words	295	250	AACRAO Ethics and Practice
7 Did one complaint get the novel banned?	Team inquiry: “Who should decide what’s in a school library?” Members research librarians’ professional standards, parental rights views, state law trends and student perspectives, then present a model process.	Individual research report (800—1,000 words) plus 8-minute team presentation	350	300	ALA Code of Ethics
8 Is it a recommendation or an ad?	Team inquiry: “Should influencer disclosure rules change?” Members research consumer psychology, FTC policy, creator economics and teen media use, then present recommendations.	Individual research report (800—1,000 words) plus 8-minute team presentation	334	300	FTC Endorsement Guides (16 CFR Part 255)
9 What is on your ballot, and where do you check?	Team inquiry: “Why do young people vote less in local elections, and what would change that?” Members research turnout data, registration rules, civic education and youth-led efforts, then present to student council.	Individual research report (800—1,000 words) plus 8-minute team presentation	334	300	SPJ Code of Ethics

Standards in this edition

Common Core codes come from our standards map for this grade band. Each code links to its official page.

RI.11-12.1 Back up an analysis with the strongest evidence from the text, including where the text leaves things uncertain. **Cases 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20**

RI.11-12.7 Combine and evaluate sources in different media to answer a question or solve a problem. **Cases 1, 2, 3 and 4**

SL.11-12.1.c Keep a discussion moving with questions that probe reasoning and evidence, and make sure the full range of views is heard. **Cases 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20**

SL.11-12.1.d Respond to different views, pull together what each side says, resolve conflicts where possible and name what still needs research. **Cases 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20**

W.11-12.1 Write arguments that analyze substantial topics or texts, using valid reasoning and enough relevant evidence. **Cases 13, 14, 17 and 19**

W.11-12.1.a Introduce a precise, informed claim, show why it matters, distinguish it from opposing claims and organize the argument logically. **Cases 1, 2, 3 and 4**

W.11-12.1.b Develop claims and counterclaims fairly and fully, with the best evidence for each, keeping the audience's knowledge, values and possible biases in mind. **Cases 1, 2, 3 and 4**

W.11-12.2 Write an explanatory text that conveys complex ideas clearly and accurately. **Cases 5, 6, 7, 8, 9, 10, 11, 12, 15, 16, 18 and 20**

W.11-12.5 Strengthen writing by planning, revising, editing or rewriting, focusing on what matters most for the purpose and audience. **Cases 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20**

Evaluate Multiple Perspectives AP Seminar. Big Idea 3: compare perspectives on an issue and weigh their biases, assumptions and relevance. **Cases 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 and 20**

Question and Explore AP Seminar. Big Idea 1: develop a focused question about an issue and explore many perspectives on it, checking their credibility. **Cases 1, 4, 5, 7, 8, 9, 12, 14, 17, 18 and 19**

Synthesize Ideas AP Seminar. Big Idea 4: combine what you have learned into your own argument with a clear line of reasoning and chosen evidence. **Cases 2, 3, 6, 10, 11, 13, 15, 16 and 20**

Team, Transform, and Transmit AP Seminar. Big Idea 5: work with a team, reflect on the process and communicate an argument to a specific audience. **Cases 1, 3, 4, 5, 7, 8, 9, 12, 14, 17, 18 and 19**

Understand and Analyze AP Seminar. Big Idea 2: summarize an author's perspective and analyze its reasoning, evidence and purpose. **Cases 2, 6, 10, 11, 13, 15, 16 and 20**

Professional standards in this edition

A code of ethics is a standard a profession sets for its own members. Codes for journalists and public relations are voluntary. The rules of professional conduct for lawyers are adopted in each state and can lead to discipline. The FTC guides are law-related guidance, not ethics codes.

SPJ Code of Ethics, Society of Professional Journalists (SPJ). Professional code.

Revised September 6, 2014, at SPJ's National Convention in Nashville, Tennessee.

Who it binds: No one is legally bound. SPJ calls the code “not a set of rules” and says it is not legally enforceable under the First Amendment. SPJ encourages its use “by all people in all media.”

Seek Truth and Report It: Cases 1, 9, 18 and 20

Minimize Harm: Case 19

spj.org/spj-code-of-ethics

RTDNA Code of Ethics, Radio Television Digital News Association (RTDNA). Professional code.

Revised code adopted June 11, 2015.

Who it binds: Journalists in broadcast and digital news, as guidance. RTDNA says the code “does not dictate what journalists should do in every ethical predicament.” It is not a law.

Truth and accuracy above all: Cases 1 and 20

Independence and transparency: Cases 3 and 14

Opening statement (before the guiding principles): Case 9

Professional standards in this edition, continued

PRSSA Ethical Principles for PR Students & Professionals (professional values and member pledge), Public Relations Student Society of America (PRSSA), the student organization of PRSA. Professional code.

No date shown on the page.

Who it binds: PRSSA student members. PRSSA asks members to follow its Code of Ethics and Conduct and encourages chapters to have members sign the pledge when they join. PRSSA lists the same six professional values as PRSA and says it “models its ethics guidelines after those of its parent organization, PRSA.” It does not say it adopts the PRSA Code word for word. The pledge says members who violate it may be barred from PRSA membership.

PRSSA Code of Ethics and Conduct (member pledge): Case 1

prsa.org/prssa/about-prssa/ethical-principles

CEC Ethical Principles and Practice Standards, Council for Exceptional Children (CEC). Professional code.

No adoption date shown on the page.

Who it binds: Special education professionals, who CEC says “are guided by” these principles and standards. It is not a law; IDEA and Section 504 are the laws.

Special Education Standards for Professional Practice: Teaching and Assessment: Case 2

Special Education Professional Ethical Principles: Case 2

Code of Ethics of the Education Profession, National Education Association (NEA). Professional code.

Adopted by the 1975 NEA Representative Assembly. NEA's web page, titled "Code of Ethics for Educators," was published September 14, 2020.

Who it binds: Educators, including education support professionals. NEA says the code states "the aspiration of all educators" and that only NEA and its affiliates set remedies for violations. It is not a state licensing rule or a law.

PRSA Code of Ethics, Public Relations Society of America (PRSA). Professional code.

First developed in 1950. The current code was adopted by PRSA members in October 2000, according to PRSA's Board of Ethics and Professional Standards handbook. The page shows no later revision date.

Who it binds: PRSA members. PRSA says the code "applies to PRSA members." It is voluntary: PRSA says it has no legislative or government power to enforce it, though its board can bar or expel members sanctioned by a government agency or convicted in court for conduct that breaks the code.

Free Flow of Information: Cases 3 and 8

Disclosure of Information: Cases 12 and 20

Credo for Ethical Communication, National Communication Association (NCA). Professional code.

Approved by the NCA Legislative Council in 1999; reaffirmed in 2011; reaffirmed with edits in 2017 and 2024.

Who it binds: NCA members, who “endorse and are committed to practicing” its nine principles. It is a statement of values with no enforcement process.

“We accept responsibility for the short- and long-term consequences of our own communication...” (one of nine unnumbered principles): Case 3

“We advocate sharing information, opinions, and feelings...” (one of nine unnumbered principles): Cases 6 and 9

“We strive to understand and respect other communicators' intent...” (one of nine unnumbered principles): Cases 7 and 16

“We advocate truthfulness, accuracy, honesty, and reason...” (one of nine unnumbered principles): Case 18

“We endorse freedom of expression, diversity of perspective, and acknowledgement of dissent...” (one of nine unnumbered principles): Case 19

ASPA Code of Ethics, American Society for Public Administration (ASPA). Professional code.

Revised 2013. ASPA has promoted ethical standards for public servants since 1984.

Who it binds: ASPA members, who “may be sanctioned” for failing to uphold it. ASPA also aims to raise awareness among “all those who work in public service in all sectors.”

5. Fully Inform and Advise.: Cases 4 and 18

3. Promote democratic participation.: Cases 4, 10 and 19

4. Strengthen social equity.: Case 17

AACRAO Ethics and Practice, American Association of Collegiate Registrars and Admissions Officers (AACRAO). Professional code.

Adopted by the AACRAO Board on December 3, 2009; amended March 31, 2010; ratified by members April 23, 2010; reviewed without changes in 2016 and 2019.

Who it binds: AACRAO members, such as college registrars and admissions officers. It is not a law; FERPA is the federal law on education records.

Standards of professional practice: Case 6

Principles of professional ethics: Case 6

aacrao.org/resource/ethics-and-practice

FTC Endorsement Guides (16 CFR Part 255), Federal Trade Commission (FTC). Law or regulation.

Current text as revised July 26, 2023 (88 FR 48102), read on the eCFR.

Who it binds: Advertisers, endorsers (including influencers and reviewers) and intermediaries such as PR firms, under Section 5 of the FTC Act. The Guides are the FTC's “administrative interpretations” of that law. They are law-related guidance, not an ethics code.

NPPA Code of Ethics for Visual Journalists,
National Press Photographers Association (NPPA).
Professional code.

No revision date shown on the page.

Who it binds: Visual journalists (news photographers and video journalists) and the people who manage visual news. The code says they “are accountable for upholding” its ten standards. It is not a law.

Code of Ethics, standard 3: Case 10

nppa.org/resources/code-ethics

ABA Model Rules of Professional Conduct, American Bar Association (ABA), Center for Professional Responsibility. Professional code.

Adopted by the ABA House of Delegates in 1983 and amended since.

Who it binds: Lawyers. The ABA writes the Model Rules as a model. Each state adopts its own rules of professional conduct, most based on this model, and those rules bind the lawyers it licenses. Lawyers can be disciplined for breaking them. The rules do not bind people who are not lawyers.

Rule 3.1 Meritorious Claims and Contentions: Cases 10 and 16

Rule 2.1 Advisor: Case 12

Rule 4.1 Truthfulness in Statements to Others: Case 15

Access, language and discussion

Supports in this edition

- **Vocabulary:** Keep the five big ideas visible and name which one each work session practices.
- **Read aloud:** Offer recordings or read-alouds of dense stimulus sources.
- **Bilingual planning:** Allow research in any language with sources documented, and allow planning in any language. Never ask a student to disclose a disability, immigration status, family finances or private records to take part.
- **Oral rehearsal:** Run a practice oral defense with peer questioners before the graded presentation.
- **Other ways to respond:** Allow visual research maps and recorded rehearsals as process evidence.

Cognates

The terms and evidence sheets list English and Spanish cognates in the Support block, such as context (contexto). Point them out before reading. A fluent Spanish reader checks every list before release.

Heat check

Every sheet rates how likely the page is to start a hard conversation.

■□□ **Low:** most students can discuss it without personal stakes.

■■□ **Medium:** use the cool-down if talk turns personal.

■■■ **High:** plan the cool-down before class.

No one has to share

No student needs to share private experiences, create a social media account or post publicly. Students can answer every question with the evidence on the page.

How this book works

Each case is a short chapter. The pages follow the same order in every case, so you learn the layout once.

- | | |
|--|---|
|  What happened Read the story and the question you will answer. |  Key terms Learn the words the case needs, each with its Spanish word. |
|  Reading passage Read a longer passage about the case. Stop and think at each question. |  Look at the evidence Read each document. Write what it shows and what it leaves out. |
|  Key idea and In the news Read the idea behind the case, a code of ethics and two real news stories. |  Sort the evidence Decide which evidence supports each claim and whose view is missing. |
|  Practice Choose the best response and fix two phrases in a student's draft. |  Your task Follow the numbered steps, plan in the boxes and write your draft. |
|  Check your work Answer yes-or-no questions and mark your level in the rubric. |  Questions to discuss Write short answers, then finish My take. |
|  Talk about this case at home Take home a page of questions for your family. | |

Labels on the page

Evidence A | Group-chat post

A document from the case. Read it closely and compare it with the other documents.

Real source | Publisher | Date

A real news story, code or study. Scan its code to read the original.

Directions on each page

On your own A short direction under a heading tells you what to do if you work without a teacher, and about how long it takes.

When a page continues

Some sections run onto a second page. Its heading says “continued,” and it keeps the next page number.

Filling in this book

- Fill it in on paper or in a PDF app. Save a copy before you type.
- What you type stays on your device. Nothing is sent to us.
- Do not write private information about yourself or other people.

Say this

“Every case in this book follows the same order, so you learn the layout once.” — Point to the list of sections as you say it.

“An “Evidence” label marks a document from the case. A “Real source” label names its publisher and date.” — Ask two students to find one of each in Case 1.

Watch for

Misconception: Every document in a chapter comes from the news. **Listen for:** “Where was this group chat published?” **Then:** Point to the labels. Evidence documents belong to the case; a real source always names its publisher and date.

Support

- Read the page aloud with the class.
- Show the “On your own” strip on one case page before students work alone.
- Repeat the rule: do not write private information about yourself or other people.

Content note

The optional film clip from *The Hunger Games* (2012) shows coercion and danger to young people. Preview it before class, or skip it, because students need only the evidence in the story.

Overview

Students read a short story about a neighborhood screening. A cropped seven-second clip in the crew’s group chat seems to say the event is canceled. Students compare the post with two documents, the coordinator’s meeting transcript and a booking email, and decide what the evidence supports. They then write a short group-chat update that corrects the claim and says which entrance to use.

Before this case

Students should already be able to:

- write a focused research question
- judge a source’s credibility from its author, date and purpose
- work in a team with assigned roles

Objectives

Students will be able to:

- frame a focused research question from the case

Objectives, continued

- investigate the question through one disciplinary lens
- evaluate outside sources for credibility
- synthesize the team’s lenses into one update protocol and name its limits

Materials

- This chapter, one copy per student
- The lens assignment sheet and the source-credibility tracker
- Two or three educator-approved outside sources per student
- Slides or poster paper for an 8-minute team presentation

The task in this edition

Task: Team inquiry: “How do communities decide what’s true when updates move through group chats?” Each member writes a short research report through one lens: journalism ethics, psychology of sharing, platform design or local institutions. Then the team presents one update protocol for a school or club.

Try it at your school

Find out how your school sends urgent updates.

- Ask a teacher or front-office staff which channel carries official changes (email, app, website)
- Save the official channel so you can check it before reposting
- Next time a screenshot circulates, post “still checking” instead of a verdict
- Suggest to your student council that urgent updates include the original link

Who to ask: Front-office staff, a teacher, the student council advisor or a school librarian

Safety: Don’t share other people’s names or messages from a private chat. Check any official source with a trusted adult if it asks for personal information.

Case 1: Is the screening canceled?

A cropped clip in the group chat seems to cancel the crew's screening, so you check the original documents and write an update.

On your own Read What happened. Underline the sentence that worries the crew. About 10 minutes.

Your role: You're the one who reads the full transcript before Gia posts. **New skill:** Find the original source.

Gia and Mateo read the message about tonight's screening.

What happened

It is Friday afternoon at the Common Room, a shared event space inside a bookshop in Fort Greene, Brooklyn. Mateo, 22, booked the room for tonight's 6 p.m. screening, the crew's first in the neighborhood. He has been moving tables and chairs all afternoon.

Gia, 21, is helping between her class and her shift at a café. Jordy is testing the projector and captions. Sami is on her way from the print shop.

At 4:52 p.m., someone forwards a seven-second clip to the group chat. The clip comes from a meeting about the room. Its caption asks whether the screening is canceled.

Gia wants to warn people before they leave home. Mateo hopes the post is wrong. Gia has about ten minutes before she has to leave for work.

Your question: Is the screening really canceled, and what should the crew tell people?

The story: A real clip with a false caption

By late Friday afternoon, the Common Room is almost ready. The event space, tucked inside a Fort Greene bookshop, has rows of folding chairs that Mateo has been arranging since lunch. Jordy is checking whether the projector's captions are readable from the back row. Gia has about ten minutes before she has to leave for a café shift. Sami, who uses a manual wheelchair and usually enters through the side door, is already on the train from the print shop.

At 4:52 p.m., a seven-second clip reaches the group chat. It comes from a meeting about the room. The coordinator says, "we are removing access," and the clip ends. The forwarded caption supplies the conclusion the video does not: "They're removing access tonight. Screening canceled?"

Nothing about the clip is fabricated. That is what makes it persuasive. The voice is real, the words are real and the meeting happened. Gia's instinct is protective. People are already asking whether to turn around, and she wants to save them a trip. Mateo's instinct is hopeful, and he says plainly that he wants the clip to be fake. Jordy's instinct comes from editing. A sentence that stops at "access" usually has more after it.

Your role in this case is specific. You are the one who reads the full transcript before Gia posts. Every reply the crew sends will be read by people making decisions on the move, so the order of the crew's next three steps matters.

Stop and think. Why can a real clip mislead people more easily than a fake one?

⌚ Pacing

Reading: about 6 min (775 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: A real clip with a false caption":** Why can a real clip mislead people more easily than a fake one?
2. **After "Reading the record against the clip":** The holding statement avoids the word "canceled." What might happen if it repeated the word, even to deny it?
3. **After "Selection, emphasis and who controls the story":** Entman says a frame works by selection and emphasis. What did the crew's correction select and emphasize?

Reading the record against the clip

The caption makes a **claim**, a statement that something is true that can be checked with evidence. Two documents test it. The coordinator's 3:30 p.m. transcript reads: "The side-door reader is broken. We are removing access through that reader tonight. Existing room bookings remain in place. Use the staffed front entrance while we repair it." Mateo's booking email from Tuesday confirms Friday, 6 to 9 p.m., a step-free front entrance and staff at the desk from 5:30.

Set side by side, the documents show that the clip is accurate but incomplete. **Context**, the information around a quote that you need to understand what it means, narrows "removing access" to a single broken reader. The email adds something the transcript does not: the front entrance is step-free. It also leaves something out. It was sent before Friday's meeting, so it says nothing about the side door.

The crew's response follows the evidence in order. First, Jordy sends a **holding statement**, a short update that says what is known, what is still being checked and when people will hear more: "We're checking the original. Hold your plans for a moment." Notice what it avoids. It does not repeat the word "canceled," and it does not call the clip fake. Then Gia posts the correction in the same chat where the rumor spread, with the time, the entrance and the original update. Jordy captions it so it can be read without sound. Mateo keeps a link to the full transcript beside the cropped clip.

 **Stop and think.** The holding statement avoids the word "canceled." What might happen if it repeated the word, even to deny it?

Selection, emphasis and who controls the story

Robert Entman's research defines **framing** through two actions: selecting some aspects of a situation and making them more salient (Robert M. Entman, "Framing," 1993). In plain terms, framing is choosing which parts of a situation a message brings forward. The seven-second crop is a frame built by subtraction. It selects "removing access" and removes the qualifier. Analyzing a frame does not require proving anyone's motive. It requires showing what was selected and what was left out.

The pattern reaches far beyond one group chat. When Suzanne Collins announced a new Hunger Games novel, her publisher quoted her on propaganda and "the power of those who control the narrative" (Scholastic, June 6, 2024). In the 2012 film's reaping scene, the Capitol stages an official ceremony, yet it cannot control how the crowd reacts when Katniss volunteers for Prim. In our reading, the scene and the clip raise the same question: whose version does the edit make easiest to see?

Research suggests the defense is teachable. A Stanford study found that most of 3,446 students judged posts by how they looked rather than by who made them (Stanford Graduate School of Education, November 18, 2019).

This page continues page 6. The notes for both pages are on the sheet for page 6.

Selection, emphasis and who controls the story, continued

A district-wide field study in high school government classes found that teaching lateral reading measurably improved how students judged online claims (Wineburg et al., Journal of Educational Psychology, July 2022). News organizations hold themselves to a similar standard. The RTDNA code warns that “trending” or “going viral” may increase urgency, but these “only heighten the need for strict standards of accuracy” (RTDNA Code of Ethics, June 11, 2015). Finding the original source is the first skill in this series, and every later case builds on it.

? **Stop and think.** Entman says a frame works by selection and emphasis. What did the crew’s correction select and emphasize?

The post

They're removing access tonight. Screening canceled?" A seven-second clip is attached. In it, the coordinator says "we are removing access," and the clip ends there.

Look closely: Which word in the caption goes further than the clip itself?

What it shows

➤ A real clip, and a caption that turns "removing access" into a cancellation.

What it leaves out

➤ The next words of the sentence, who cropped the clip and when the meeting took place.

Evidence B | Coordinator's meeting transcript, Friday 3:30 p.m.

What it shows

➤ A separate record of the booking that agrees with the transcript on the entrance.

What it leaves out

➤ The broken reader. It was sent on Tuesday, three days before the Friday meeting.

What is still missing from the evidence?

Key idea: framing

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 20 minutes.

The clip in the group chat is real, but that only tells you the video is authentic. A **claim** is a statement that something is true. You can check a claim with evidence. **Context** is the information around an event or a quote that you need to understand what it means. Here, the clip stops before the rest of the coordinator's sentence, so the clip alone cannot confirm the caption's claim.

Framing is choosing which parts of a situation a message brings forward. Media researcher Robert Entman uses this idea to study what messages select and emphasize. The crop makes “removing access” stand out and hides “through that reader,” the words that limit the change to one broken side door. You do not have to prove that anyone meant to mislead people. You only need to show what the edit leaves out.

A **holding statement** is a short update that says what is known, what is still being checked and when people will hear more. It gives people a next step while the crew checks the documents. The correction that follows needs the time, the door and a contact for arrival help. People who are already traveling need those details before they arrive.

The full update from the coordinator says the side-door card reader is broken, so that door is closed tonight, but existing bookings are still in place. Please use the staffed front entrance, which is step-free. Staff will be at the desk from 5:30. I checked the coordinator's transcript and Mateo's booking email. My research question

🔹 What can a journalism code teach a club about posting urgent updates from group chats?

Case evidence my lens can explain

✶ The SPJ code says, “Use original sources whenever possible.” The crew’s original was the coordinator’s full transcript.

A point that complicates our protocol

- The SPJ code is written for journalists, and a club is not a newsroom, so some of its standards may not fit.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

This page continues page 15.

Key Answer key

A strong response:

- Research question is focused and answerable
- Each report represents its lens accurately
- Presentation synthesizes lenses into one protocol
- Team names limitations and next steps

Your draft

On your own Write your draft in the boxes. Use your planner from the page before. About 160 minutes.

Your report's opening paragraph

At 4:52 p.m., a seven-second clip reached the crew's group chat with a caption that asked whether the screening was canceled. The full transcript showed that only a broken side-door reader was losing access. This report asks what a journalism code can teach a club about posting urgent updates. The SPJ Code of Ethics tells journalists, "Verify information before releasing it. Use original sources whenever possible." No one is legally bound by the code, but its habits fit a club that posts updates for its members.

Our team's protocol, first draft

1. Before anyone posts about a change, one person finds the original update. 2. The first post says what we are checking and when we will post again. 3. The correction gives the time, the place and a link to the original.

Say this

"Before you write the report, bring your team the source that makes your protocol harder to defend." — Check each student's complicating source before drafting starts.

Watch for

Misconception: Teams present four reports in a row. **Listen for:** "Next, I'll talk about my lens." **Then:** Ask where the lenses agree and disagree. Build the protocol from that.

Answer key

What to notice in the sample:

1. States the research question in the opening paragraph.
2. Names a limit of the source before using it.

Check your work

On your own Answer the Check your work questions and mark your level in each rubric row. Then write one change you made. About 20 minutes.

Is your research question focused and answerable?	☒ Yes ☐ No
Does your report represent your lens accurately?	☒ Yes ☐ No
Did you bring one source that complicates the team's protocol?	☒ Yes ☐ No
Does the presentation name the protocol's limits and next steps?	☒ Yes ☐ No

How your work is scored

Mark one box in each row.

Skill	Beginning	Developing	Proficient	Advanced
Evidence	☐ Repeats the screenshot's claim or ignores the documents.	☐ Mentions a source but not the detail that changes the meaning.	☐ Uses the transcript or email to correct the claim accurately.	☐ Uses both documents and names what they still cannot confirm.
Reasoning	☐ Treats the clip as fake or as final.	☐ Corrects the claim but adds a guess about motive.	☐ Explains the difference between an entrance change and a cancellation.	☐ Explains how the crop produced the wrong conclusion and avoids inventing motive.
Audience & purpose	☐ Message would not help someone decide whether to leave.	☐ Gives the verdict but leaves out time or entrance.	☐ Gives time, entrance and a contact.	☐ Anticipates access needs and people who saw only the original post.

Answer key

How to assess: Reports and the team presentation are scored with educator-adapted rubrics modeled on the published Performance Task 1 components; this is practice, not a submitted performance task.

Proficient looks like:

- Evidence:** Uses the transcript or email to correct the claim accurately.
- Reasoning:** Explains the difference between an entrance change and a cancellation.
- Audience & purpose:** Gives time, entrance and a contact.
- Revision:** Adds a missing fact or removes an unsupported claim.

How your work is scored, continued

Skill	Beginning	Developing	Proficient	Advanced
Revision	☐ No change after feedback.	☐ Surface edits only.	☐ Adds a missing fact or removes an unsupported claim.	☐ Explains why each edit makes the update more usable.

One limit of our protocol

Our protocol does not ____.

- Our protocol does not reach people who left the chat before the correction.

One change I made after feedback

I changed ___ because ___.

➤ I narrowed my question from “social media” to “urgent updates from group chats,” because my sources could not answer the bigger question.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

This page continues page 18. The notes for both pages are on the sheet for page 18.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 20 minutes.

1 The clip is real. How did it lead people to the wrong conclusion?

➤ The crop selected the words about removing access, and the caption made cancellation the most noticeable idea. No word in the clip was false.

2 Should the crew say why they think the clip was posted? Why or why not?

➤ No. The sources cannot show motive, and the rubric treats a guess about motive as a reasoning gap. The crew can correct the claim without judging the person.

3 Jordy's holding message does not repeat the word "canceled." Why might that matter?

➤ Repeating the word would put the rumor in front of readers again. A message that names only what is being checked keeps the claim from spreading.

4 What rule could the Common Room adopt for urgent updates? What would the rule cost?

➤ Link the coordinator's original update in the first post about any change. The cost is a slower first message while some people are already traveling.

My take

My claim: ____.

➤ The crew should correct the claim with the time, the entrance and a link to the transcript, without guessing at motive.

⌚ Pacing

Full chapter: 20 min.

✂ Short on time: 17 min. Skip question 4. The team protocol answers it.

💬 Say this

"Answer with a detail from a document, not a feeling about the poster." — Post the question numbers and call on one student per question.

🔗 Stretch

- Map how the rumor would travel through three different chats and who would miss the correction.
- Going further: Ask who has already changed plans because of the post, and how the crew can reach them. Then write two truthful captions for the correction. What does each one make a reader notice first?
- Going further: Trace the clip back to the full meeting transcript. When you share the clip, keep the sentence before it and the words that come right after it.
- Going further: Make a 20-second correction video with readable captions and a link to the source.
- Going further: Ask a teacher or someone in the front office which channel carries official changes, such as email, an app or the school website. Save that channel so you can check it before you repost a screenshot.
- Write a one-paragraph policy for how the Common Room posts urgent updates

My take, continued

The best evidence is ____, because ____.

➤ The transcript, because it narrows “access” to one reader and keeps existing bookings in place.

Someone who disagrees might say ____.

➤ Speed matters more than accuracy when people are already on the train.

The limit of the evidence is ____.

➤ No document says whether every visitor can use the front entrance.

I would change my mind if ____.

➤ The coordinator reported a second problem with the room.

Case 2: Does the worksheet show what Dec knows?

Content note

This case discusses disability, evaluations and support plans. No student should share their own grades, diagnosis or support plan, so keep the discussion on Dec’s situation.

Overview

Students read about Dec, a high school senior who explains a circuit well out loud but loses his place on a dense practice sheet. They sort the evidence into what is observed, what might explain it and what is not established, using a summary of the IDEA evaluation rule. They then redesign the practice sheet or draft a support request that Dec could approve.

Before this case

Students should already be able to:

- annotate a set of sources for their arguments
- compare at least three perspectives on one question
- outline a line of reasoning before drafting

Objectives

Students will be able to:

- draw a focused research question from a stimulus packet
- evaluate student, teacher and research perspectives

Objectives, continued

- synthesize the sources into an original argument
- propose a feasible resolution and name its limits

Materials

- This chapter, one copy per student
- The stimulus packet: the case, the CAST UDL summary, one article on assessment validity and one teacher perspective on workload
- The perspective map and the line-of-reasoning outline
- Access to the online workspace for the full argument

Try it at your school

Learn your school’s route for asking about support.

- Find your school’s student handbook or website page on learning support
- Write one question you’d want answered, without naming a classmate
- Ask a counselor who handles support requests and how parents or students start one
- If a friend is struggling, ask them what they want before doing anything

Who to ask: School counselor, special-education coordinator or a teacher you trust

Safety: Don’t share anyone’s grades, diagnosis or support plan. A parent or guardian usually has to be part of a formal evaluation request for students under 18.

Case 2: Does the worksheet show what Dec knows?

Dec can explain a circuit out loud but gets lost on a crowded worksheet, so the crew asks what the task measures.

On your own Read What happened. Underline what Dec can do out loud and where he gets stuck. About 8 minutes.

Your role: You're the one who reads the goal line before anyone decides what Dec knows. **New skill:** Check what a task is meant to measure.

Dec points to a small light circuit on the table while Anika watches.

What happened

Anika, 16, and Dec, 17, are at the study table twenty minutes before theater rehearsal. They are building a light circuit for a school set. Dec can explain out loud how the current travels through the circuit. On the written practice sheet, he loses his place in the instructions.

The sheet has six dense paragraphs and one small diagram. Anika's first idea is to run the same timed practice sheet again. Then she draws a larger sketch, and Dec traces the whole circuit correctly.

Mari, 19, is on her break from the bookshop. She does not assume she knows why Dec is stuck. Dec wants help with this task, but he does not want a diagnosis from the group chat.

Your question: Does the practice sheet show what Dec knows, and what should Dec ask his teacher?

Evaluation An evaluation is a school's formal process for learning about a student's needs, using more than one measure.

The story: What the study table shows

Twenty minutes before rehearsal, the study table looks like a small workshop. Anika, a high school junior who helps build theater sets, and Dec, a senior who pulls the curtain at every show, are wiring a light circuit for a school set. Dec can narrate the path of the current without hesitating: out of the battery, through the switch and the LED, and back. The written practice sheet stops him. It asks students to read six dense paragraphs, use one small diagram and answer four questions in complete sentences. Partway through, Dec loses track of which line the question wants him to follow.

Each friend responds according to habit. Anika, who likes to solve a problem herself, suggests running the timed sheet again. Later she notices her own mistake. She kept pointing at the answer instead of at how the question was built. When she redraws the circuit at a larger size, Dec traces it correctly from start to finish. Mari, who is dyslexic and moves between print and audiobooks, does not claim to know what is happening for Dec. She asks him to explain it to her first, then compare that with the worksheet.

Dec sets the terms. He wants help with this assignment, and he wants his friends to describe what happened rather than announce what is wrong with him. Your role is to read the goal line before anyone decides what Dec knows.

Stop and think. Anika wants to avoid doing the thinking for Dec. How can a clearer format still test the learning goal?

⌚ Pacing

Reading: about 5 min (723 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: What the study table shows”:** Anika wants to avoid doing the thinking for Dec. How can a clearer format still test the learning goal?
2. **After “Measuring the goal, not the format”:** The notes record what happened but not why. Why is it important to keep those two things separate?
3. **After “The limits of a study session”:** IDEA forbids using a single measure as the only basis for eligibility. What risk is that rule designed to prevent?

Measuring the goal, not the format

Case 1 taught a habit that transfers directly: go back to the original source. Here that source is the practice brief. Its goal is to “explain how a simple circuit works.” It sets no time limit. A **learning goal** is the knowledge or skill that a task is meant to show, and naming it changes the question. The issue is no longer whether Dec can finish the sheet. It is whether the sheet measures the goal or something next to it, such as reading dense text under pressure.

The evidence is uneven, and that is useful. The study-table notes record two observations on the same afternoon. Spoken, with a larger sketch, Dec’s explanation was correct. Written, he skipped a line and answered a different question. Neither observation explains why. Case 1’s term **context** applies here. A written answer is real evidence, but like a cropped clip it shows one frame of a larger picture.

Anika’s revised plan is modest. She wants one clear diagram and one instruction at a time, followed by Dec explaining why the circuit works. She does not want to do the thinking for him. That last condition matters. A new format is only a fair test if it still requires Dec to show the learning goal.

? **Stop and think.** The notes record what happened but not why. Why is it important to keep those two things separate?

The limits of a study session

Schools have a formal process for questions the crew cannot answer. An **evaluation** is a school’s formal process for learning about a student’s needs, using more than one measure. **Eligibility** is meeting the requirements for a particular service or program. The federal IDEA regulations require a public school to use a variety of assessment tools and forbid using any single measure as the sole basis for an eligibility decision (U.S. Department of Education, IDEA regulations, 34 CFR 300.304). As the law turned fifty, K-12 Dive traced where IDEA, evaluations and individualized education programs came from (K-12 Dive, December 3, 2025).

The same logic appears in design and in civil rights guidance. CAST’s guidelines encourage giving learners more than one way to take in information and show what they know (CAST, Universal Design for Learning Guidelines 3.0, 2024). A systematic review and meta-analysis examined how well that approach works in practice (Almeqdad et al., Cogent Education, May 29, 2023). The Department of Justice says testing accommodations should let a test measure skill rather than disability (ADA.gov, February 28, 2020).

Professional ethics adds a privacy boundary. The NEA code says educators “shall not disclose information about students obtained in the course of professional service” without a compelling professional purpose or a legal requirement (National Education Association, Code of Ethics, 1975). Friends are not bound by that code, but the crew follows its spirit. Dec decides what Ms. R hears, and a study session stays a study session.

This page continues page 26. The notes for both pages are on the sheet for page 26.

The limits of a study session, continued

The skill you practiced here, checking what a task is meant to measure, returns in later cases. You will ask it of a pay statement, a sample ballot and a school budget.

? **Stop and think.** IDEA forbids using a single measure as the only basis for eligibility. What risk is that rule designed to prevent?

Look at the evidence

On your own Read each document. For each one, write what it shows and what it leaves out. About 15 minutes.

Evidence A | Practice brief, handed out Monday

The assignment

Goal: Explain how a simple circuit works. Read the six paragraphs below before you answer. Use the diagram to trace the path of the current from the battery through the switch and the LED and back. Answer questions 1–4 in complete sentences.

Look closely: Which skill does the goal line name, and which does it leave out?

What it shows

➤ One goal, explaining a circuit, but the page also demands reading six dense paragraphs.

What it leaves out

➤ How it is scored, and whether the reading load is part of what it means to test.

Evidence B | Study-table notes, Wednesday 3:40 p.m.

Dec's explanation

Out loud, with the larger sketch: traced the whole path, battery to switch to LED and back. Correct. Written sheet: skipped a line in the instructions and answered a different question from the one asked. Dec: the layout is hard to follow.

Look closely: What did Dec get right out loud that the sheet did not record?

What it shows

➤ A second observation: correct out loud, off track on paper, with Dec's own account.

What it leaves out

➤ Whether other students lose their place too, and what Dec wants to happen next.

⌚ Pacing

Full chapter: 15 min.

✂ Short on time: 15 min.

💬 Say this

“Put your finger on the goal line in Evidence A. Now find what Dec did out loud in Evidence B.” — Ask students to compare the two before anyone explains why.

👁 Watch for

Misconception: Students read the notes as proof of a disability. **Listen for:** “So he has a learning disability.” **Then:** Ask what the notes record: two observations and Dec's own words. They do not record a cause.

📖 Support

- Give Evidence A with the goal line enlarged and the paragraphs numbered.
- Read Evidence B aloud.
- **Cognates:** evaluation (evaluación), eligibility (elegibilidad), circuit (circuito), diagram (diagrama), observation (observación), format (formato), instructions (instrucciones), diagnosis (diagnóstico).

🔥 Heat check

■□□ Low.

Look at the evidence, continued

What is still missing from the evidence?

○ Whether Dec wants formal support at all, how the sheet is scored, whether other students lose their place in the same layout, and what the teacher meant the six paragraphs to test.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

This page continues page 29. The notes for both pages are on the sheet for page 29.

Key idea: learning goals

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 15 minutes.

Dec's written answer and his spoken explanation give the crew different information. A **learning goal** is the knowledge or skill that a task is meant to show. The practice brief names one goal: explain how a simple circuit works. It does not list speed, and it does not list reading six dense paragraphs. So the next question is what the sheet was meant to measure and what got in the way.

CAST's Universal Design for Learning Guidelines encourage giving learners more than one way to take in information and show what they know. For Dec, a larger diagram is a practice option to test. It is not a diagnosis, and it does not change an official test. Ask Dec what helped, and check that he can still explain the circuit.

An **evaluation** is a school's formal process for learning about a student's needs, using more than one measure. Under IDEA, a federal law, a public school must use varied tools in an evaluation. No single measure can be the only basis for deciding **eligibility**. Eligibility is meeting the requirements for a particular service or program. A study session is not an evaluation, so Dec decides whether to ask his school how that process starts.

Besides its goal, the sheet measures ____, which means ____.

➤ Besides its goal, the sheet measures reading six dense paragraphs and keeping track of instructions. So a wrong answer may not show a gap in circuit knowledge.

IDEA at 50: How the landmark law changed education

Explains where IDEA, evaluations and IEPs came from and why schools must plan around each student's needs.

Sort the evidence

On your own Read each decision in the diagram. Write who decides it in each blank box. About 10 minutes.

Sort who can decide each question. Which decision belongs to the teacher, which to a formal school process, and which only to Dec?

Try a clearer practice format for the circuit goal

Who decides

The teacher, who sets the practice format and the learning goal

Under which rule

Who lives with it

Dec, who decides what to share and whether to ask

Your way in

Start a formal IDEA evaluation or a Section 504 conversation

Who decides

The school's evaluation process, with a parent or guardian for a student under 18

Under which rule

IDEA evaluation rule: varied tools, no single measure as the sole basis

Who lives with it

Your way in

 A counselor or special-education coordinator explains how a request starts

Pacing

Full chapter: 10 min.

 Short on time: 8 min. Do the sort as a whole class.

Say this

“Each decision in the diagram has a different decider. Which decision belongs only to Dec?” — Model the teacher row together.

Watch for

Misconception: Students give the friends a decider role.

Listen for: “Anika and Mari should ask for the IEP.” **Then:** Point to the diagram. The school's process decides evaluations, and Dec decides what he shares.

Support

- Let students write T (teacher), S (school process) or D (Dec) before writing sentences.

Heat check

 **Medium.** The missing-perspective question can lead students to talk about their own support plans.

Cool-down: Keep it about Dec and Ms. R. Restate the norm, then return to what the diagram says each person decides.

Whose view is missing from these documents? What would you ask them?

The view that is missing is _____. I would ask _____.

Other students who use the same sheet. I would ask whether they also lose their place in this layout, without asking anyone about grades.

Notes

This page continues page 33. The notes for both pages are on the sheet for page 33.

Practice: choose a response

On your own Choose what the crew should try and explain why. Then fix the two marked lines. About 8 minutes.

What should the crew try at the study table?

- ☐ A Run the same timed sheet again so Dec gets more practice.
- ☒ B Let Dec explain with a larger diagram, then compare his reasoning with the sheet.
- ☐ C Tell Dec he probably needs an IEP.

Why I chose it

➤ B. Only B changes the format while it keeps the learning goal, so the crew learns what the sheet measures. C claims an eligibility decision no study session can make.

Improve a draft

A student's first draft

Hi Ms. R, Dec failed the circuit sheet again and we think the test is unfair to him. He obviously knows the material because he explained it to us perfectly. At the study table he went through the whole thing out loud with no mistakes. ① We think he might have a learning disability and should get an IEP so he can get extra time. My cousin has one and it helped her a lot. ② Can you give him an easier version? We really think this would help him pass. Thanks, Anika and Mari.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ He traced the circuit aloud but skipped a line on paper. We can't say why.

Rewrite phrase 2

➤ Could the same four questions be tried with a larger diagram?

⌚ Pacing

Full chapter: 8 min.

✂ Short on time: skip this page.

💬 Say this

“Dec has twenty minutes before rehearsal. What should the crew try right now?” — Take a vote before any discussion.

👁 Watch for

Misconception: Students choose C because it sounds caring. **Listen for:** “He needs help, so tell him about an IEP.” **Then:** Ask who can decide eligibility. Only the school’s evaluation process can.

🔥 Heat check

■ ■ □ **Medium.** Option C can prompt stories about classmates’ IEPs.

Cool-down: Say that no student’s plan is discussed here. Ask what the evidence shows about Dec, then go back to the options.

➤ Answer key

A revised version: Hi Ms. R, I’m working on the circuit practice sheet. The goal says we should explain how a simple circuit works. When I talked it through with a larger diagram, I could trace the whole route. On the written sheet, I lost my place in the paragraphs and answered a different question. Could we talk about how the sheet checks the goal and what support options might help me show my reasoning? I can bring both attempts. Anika and Mari helped me write this, and I asked them to. Thanks, Dec

AP Seminar

Your task

On your own Read the steps. Fill in the planner boxes before you start your draft. About 30 minutes.

Write an individual argument responding to a stimulus packet on the question “Do standardized formats measure what students know?”

Use: Teacher-built stimulus packet: the case, the CAST UDL Guidelines excerpt, one article on assessment validity and one teacher perspective on workload.

You'll make: Individual written argument, 1,200—1,500 words

Time: 250 minutes

- 1 Annotate each stimulus source for its main claim.
- 2 Write a research question that grows out of the stimulus.
- 3 Map at least three perspectives: student, teacher, researcher or policymaker.
- 4 Outline your line of reasoning on the Your draft page.
- 5 Write your opening paragraph on the Your draft page.
- 6 Write the full argument, 1,200 to 1,500 words, in the online workspace.
- 7 Finish with a resolution that respects the learning goal and the teacher's constraints.

Prefer typing? Scan to open the online workspace.

My research question

➤ When a practice format adds a reading load the goal does not name, what does the score measure?

Case 2 | Your task | AP Seminar educator edition

⌚ Pacing

✂ Short on time: 30 min.

💬 Say this

“Your question has to come out of the packet. Which source surprised you, and what question does it raise?” — Take three answers and write each one as a question.

👁 Watch for

Misconception: The research question is too broad. **Listen for:** “Are standardized tests bad?” **Then:** Ask which students, which format and which goal. Narrow it to what the packet can answer.

📄 Support

- Stimulus annotation guide
- Perspective map: student, teacher, policymaker, researcher
- Line-of-reasoning outline
- Frame: “When ___, what does ___ measure?”

Student perspective

Dec: correct aloud, off track on the written layout.

Teacher perspective

- One format for a full class saves planning and scoring time.

Research perspective

- UDL encourages more than one way to take in information and show what you know.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

This page continues page 36.

Key Answer key

A strong response:

- Research question emerges from the stimulus
- Evaluates at least three perspectives
- Synthesizes sources into an original argument
- Proposes a feasible resolution with limitations

Your draft

On your own Write your draft in the boxes. Use your planner from the page before. About 150 minutes.

Line of reasoning

1. A format can measure more than its stated goal. 2. The case shows this: one goal, but a heavy reading load. 3. Teachers need a format that works for a full class. 4. UDL offers a way to keep the goal while offering more than one way in. 5. Resolution: keep the questions, change the layout for everyone and check whether scores still track the goal.

Your opening paragraph

A practice sheet about circuits names one goal: explain how a simple circuit works. Yet the page asks students to read six dense paragraphs before they reach the questions. Dec, a student in the case, traced the whole circuit correctly out loud and then answered a different question on paper. His two results raise a broader question. When a standard format adds demands its goal does not name, what does the score measure? This argument weighs a student's experience, a teacher's workload and research on design. It proposes a resolution that keeps the learning goal fixed while changing the layout.

Case 2 | Your draft | AP Seminar educator edition

Pacing

Full chapter: 150 min.

 Short on time: 150 min.

Say this

“Before you draft, check your outline. Does each step lead to the next?” — Confer with students whose outline is a list of topics.

Watch for

Misconception: The resolution ignores the teacher's constraints. **Listen for:** “Just give every student a different test.” **Then:** Ask what the resolution costs a teacher with a full class. Name that limit.

Answer key

What to notice in the sample:

1. The research question grows out of the stimulus.
2. Previews three perspectives.
3. Previews a feasible resolution.

Check your work

On your own Answer the Check your work questions and mark your level in each rubric row. Then write one change you made. About 15 minutes.

Does your research question grow out of the stimulus?	☒ Yes ☐ No
Do you evaluate at least three perspectives?	☒ Yes ☐ No
Do you synthesize the sources into your own argument?	☒ Yes ☐ No
Does your resolution name its limits?	☒ Yes ☐ No

How your work is scored

Mark one box in each row.

Skill	Beginning	Developing	Proficient	Advanced
Evidence	☐ Mentions only the score.	☐ Describes Dec's explanation vaguely.	☐ Cites the goal and two specific observations.	☐ Uses observations and notes what they cannot show.
Reasoning	☐ Concludes Dec has a disability or the test is illegal.	☐ Suggests easier content without linking to the goal.	☐ Connects a possible format barrier to the learning goal.	☐ Distinguishes classroom support from IDEA evaluation accurately.
Audience & purpose	☐ Message speaks for Dec without his input.	☐ Mentions Dec but ignores his voice.	☐ Written in Dec's voice with his permission.	☐ Respects Dec's control and gives the teacher a clear next step.

Pacing

Full chapter: 15 min.

 Short on time: 12 min. Skip the rubric boxes. Use your teacher-adapted rubric instead.

Say this

“Would Dec agree to your work as written? Mark your level honestly. Then make one change.” — Circulate and ask for one removed guess or one added observation.

Watch for

Misconception: Students make surface edits only. **Listen for:** “I fixed the spelling.” **Then:** Point to the Revision row. Ask students to replace one diagnosis with an observation.

Heat check

 Low.

Answer key

How to assess: The argument is scored with an educator-adapted rubric modeled on the published Individual Written Argument expectations; it is practice, not a Performance Task 2 submission.

Proficient looks like:

- **Evidence:** Cites the goal and two specific observations.
- **Reasoning:** Connects a possible format barrier to the learning goal.
- **Audience & purpose:** Written in Dec's voice with his permission.
- **Revision:** Replaces the diagnosis with an observation.

How your work is scored, continued

Skill	Beginning	Developing	Proficient	Advanced
Revision	☐ No change.	☐ Removes one problem line.	☐ Replaces the diagnosis with an observation.	☐ Explains how each change protects Dec's privacy and agency.

One limit of my resolution

My resolution does not ____.

☛ My resolution does not show whether a clearer layout helps every student.

One change I made after feedback

I changed ___ because ___.

➤ I added the teacher's workload to my resolution, because my first draft treated the teacher as an obstacle.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. On the left side, there is a dark vertical band, likely representing the binding or edge of a notebook. The paper appears to be part of a bound volume, as suggested by the rounded corners and the presence of the binding edge.

This page continues page 39. The notes for both pages are on the sheet for page 39.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 15 minutes.

- 1 Is the practice sheet checking circuit understanding, reading speed or both?

➤ Officially it checks circuit understanding, and speed is not listed. In practice, the layout also measures sustained reading and tracking of instructions, so one score mixes two skills.

- 2 How would you know a new format shows Dec's learning more clearly instead of giving away the answer?

➤ Compare both formats against the goal line. If both still require an explanation of how the circuit works, the change removes a barrier, not the task.

- 3 What does the IDEA evaluation rule cover, and why does a study session fall outside it?

➤ It covers IDEA evaluations: varied tools, and no single measure as the only basis for eligibility. A study session is not an evaluation, so the rule does not apply to it.

My take

My claim: ____.

➤ The sheet mixes its stated goal with a reading load, so one score cannot show what Dec knows.

The best evidence is ____, because ____.

➤ The brief's goal line, because it names only the circuit and lists no time limit.

⌚ Pacing

✂ Short on time: 12 min. Skip question 3.

💬 Say this

“Answer with a detail from the brief or the notes, not a story about someone you know.” — Post the question numbers and call on one student per question.

➤ Stretch

- Design a universal design version of a real quiz from another class. Keep its learning goal the same.
- Going further: Write down your first guess about why Dec got stuck. Then compare the two observations in the evidence, and write what changed your mind.
- Going further: Design two practice sheets that keep the same learning goal: explaining how a simple circuit works. Ask a classmate which one makes the goal easier to show.
- Going further: Find the IDEA evaluation rule in its federal source, 34 CFR § 300.304. Quote the part about using more than one measure, and name where it comes from.
- Going further: Find your school's handbook or web page on learning support. Write one question you want answered, without naming a classmate. Then ask a counselor how students or parents start a request.
- Research how your state describes the timeline for an initial evaluation after a parent consents
- Design a UDL version of a real quiz from another class

My take, continued

Someone who disagrees might say ____.

➤ Every test involves reading, so the layout is a fair part of the task.

The limit of the evidence is ____.

- Two observations at one study table cannot show why Dec loses his place.

I would change my mind if ____.

Dec lost track the same way with numbered steps and a larger diagram.

Content note

The recap caption blames younger attendees for a late start. Keep the discussion on the event in the story, and do not ask students to describe times they were blamed or stereotyped.

Overview

Students read a short story in which the crew’s recap caption blames “the younger crowd” for a late start. They build a timeline from Jordy’s setup log, which shows that a projector failure caused the delay, and compare it with Gia’s first apology draft. They then write a correction that names the error and a repair step with an owner and a way to check it.

Before this case

Students should already be able to:

- find and evaluate a source for a team inquiry
- compare how two fields answer the same question
- answer questions about a source’s limits out loud

Objectives

Students will be able to:

- compare how PR ethics, journalism standards and the sociology of stereotypes answer one question

Objectives, continued

- represent the view of the people affected fairly
- build a repair standard the team can defend
- answer an oral-defense question about a source’s limits

Materials

- This chapter, one copy per student
- The PRSA and SPJ codes listed in the case page’s Sources
- One sociology source on stereotypes that you approve
- The presentation rubric preview and the oral-defense practice questions

The task in this edition

Task: Team multimedia presentation: “What does an organization owe people it misrepresents?” The team examines PR ethics, journalism standards, sociology of stereotypes and the view of the people affected, then presents a repair standard to a student club.

Try it at your school

Help a club you’re in write a corrections rule.

- Ask the editor or advisor of a school newsletter, club account or yearbook how they fix mistakes
- Suggest a three-step checklist: name the error, show the evidence, say what changes
- Offer to test it on an old post together
- Keep any real examples anonymous

Who to ask: School newspaper or yearbook advisor, club advisor, student council secretary

Safety: Don’t repost someone else’s mistake to criticize them. Talk to the club privately first.

Case 3: What should a group do after a public mistake?

The crew's recap caption blamed younger neighbors for a late start, but the event log shows the projector failed.

On your own Read What happened. Underline the caption and the time the projector failed. About 10 minutes.

Your role: You're the one who checks the log's times before the correction goes up. **New skill:** Correct a public mistake.

Gia and Jordy sit at a table with a laptop and a printed page.

What happened

It is Sunday at the edit desk. Caio, 24, edited a short recap of Friday's screening. The crew posted it on Saturday morning. Gia's caption, "Great night, once the younger crowd finally got organized," sounded believable, because a few people did arrive late.

Then Jordy checks the setup log. The projector failed at 5:40 p.m. The replacement was not running until 6:20, twenty minutes after everyone was seated. The log also says Anika and Dec helped carry chairs before the doors opened.

Anika sends the group a voice note asking why she and Dec are the problem in the post. Gia wants to take responsibility. Her first draft of a correction is mostly about how bad she feels, and the recap caption is still up.

Your question: What should the correction say, and what will the crew do differently next time?

⌚ Pacing

Claim A claim is a statement that something is true. You can check a claim with evidence.

In this case: The caption claims the late start happened because “the younger crowd” was not organized. Jordy’s setup log checks that claim.

Correction A correction is a public statement that replaces wrong information with accurate information.

En español: corrección

In this case: Gia edits the original caption, not just her story, so people who saw it learn what was wrong.

Accountability Accountability is owning a mistake and doing what you said you would do to fix it.

En español: rendición de cuentas

- **Accountability:** Accountability is owning a mistake and doing what you said you would do to fix it.

The story: The log nobody opened

The crew's first neighborhood screening, the one saved from a cropped clip in Case 1, went ahead on Friday. On Saturday at 11:08 a.m., the crew posted a recap. Caio, 24, had edited the video. Gia, 21, wrote the caption: "Great night, once the younger crowd finally got organized." It seemed accurate to her in the loose way captions often do. A few people had arrived late, and the evening had started late, so the two facts fused into a cause.

On Sunday at the edit desk, Jordy opens the setup log. At 5:40 p.m., a projector failure was reported. At 6:00, attendees were seated. At 6:20, a replacement was connected, twenty minutes after the audience sat down. The final line notes that Anika and Dec, the two youngest people involved, carried chairs before the doors opened. Jordy writes in the chat that no one opened the log before posting, Jordy included.

Anika's voice note lands next: "We were helping you set up. Why are we the problem in this post?" Gia had already drafted a response, which was never posted: "Sorry if this came across wrong. We love our younger neighbors and would never want anyone to feel excluded." Rereading it, she recognizes the conditional "if" as a dodge. The draft also never mentions the projector.

Stop and think. How did two true facts, a late start and some late arrivals, combine into a false claim?

Two jobs in one caption

The caption did two jobs at once. It explained the late start, and it assigned blame for it to a group of people. The first job is a **claim**, a statement that something is true that can be checked with evidence.

⌚ Pacing

Reading: about 5 min (715 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: The log nobody opened":** How did two true facts, a late start and some late arrivals, combine into a false claim?
2. **After "Two jobs in one caption":** Why does accountability include limits on what the crew asks of Anika and Dec?
3. **After "What research and professional codes add":** Walter and Murphy found that explanations beat bare denials. What explanation should the correction give?

Two jobs in one caption, continued

Case 1 gave you the method: find the original source. The log is that source, and it replaces the caption's explanation with a mechanical one.

A **correction** is a public statement that replaces wrong information with accurate information. A strong correction here has a clear order. It names the wrong claim, states what the log shows and places the fix where the original audience will see it. Caio's rule, fix the same post instead of burying it under a new one, follows from that last requirement.

Accountability is owning a mistake and doing what you said you would do to fix it. In practice, accountability becomes a list of named owners. Gia corrects the post. Caio keeps a visible correction note with the edit. Jordy adds a source check before publication. Each owner is a named person rather than the crew in general, so anyone can check later whether the work was done. Just as important is what accountability does not require. Anika should not have to comfort Gia or approve the correction in public. Jordy suggests offering Anika a private way to respond and then letting her decide what she thinks. Jordy also proposes a test of success that ignores view counts. Ask a few people who saw the first post why the screening started late. If they still say "the younger crowd," the fix failed.

? Stop and think. Why does accountability include limits on what the crew asks of Anika and Dec?

What research and professional codes add

A 2016 study of apologies found that acknowledging responsibility and offering repair mattered most among six elements (Lewicki et al., *Negotiation and Conflict Management Research*, April 6, 2016). Research on misinformation points the same way. A meta-analysis of 65 studies found that corrections work better when they explain what is true rather than simply denying the false claim (Walter and Murphy, *Communication Monographs*, May 15, 2018). Gia's draft offered neither an explanation nor a repair.

Journalists write the prominence rule into their ethics. The RTDNA code says ethical journalism requires "owning errors, correcting them promptly and giving corrections as much prominence as the error itself had" (RTDNA Code of Ethics, June 11, 2015). NPR's public editor describes naming the error, fixing it on the story and keeping a public list (NPR, October 21, 2022).

The film connection sharpens the stakes. In *Zootopia* (2016), Judy tells a press conference that a set of incidents has a biological explanation tied to one group, and Nick's reaction shows a personal cost her official answer overlooks. In our reading, good intentions do not erase the effect of an unsupported claim about a group. The animal groups in the film are not a scientific model of human race. The crew's caption is far smaller, but it made the same kind of move. Your job is to check the log's times before the correction goes up.

This page continues page 47. The notes for both pages are on the sheet for page 47.

❓ **Stop and think.** Walter and Murphy found that explanations beat bare denials. What explanation should the correction give?

Look at the evidence

On your own Read each document. For each one, write what it shows and what it leaves out. About 15 minutes.

Evidence A | Recap caption, posted Saturday 11:08 a.m.

The caption

Great night, once the younger crowd finally got organized.

Look closely: Which group does this caption ask readers to blame, and on what evidence?

What it shows

➤ A public claim about cause that names an age group and no evidence.

What it leaves out

➤ What the setup log recorded at the time.

Evidence B | Setup log, Friday evening

Jordy's event log

5:40 p.m. Projector failure reported. 6:00 p.m. Attendees seated. 6:20 p.m. Replacement projector connected. Note: Anika and Dec helped carry chairs before doors opened.

Look closely: What happened at 5:40 that the caption never mentions?

What it shows

➤ A same-night record: a 5:40 failure, a 6:20 fix, and Anika and Dec helping.

What it leaves out

➤ What each attendee experienced, and whether latecomers mattered.

⌚ Pacing

Full chapter: 15 min.

Evidence C | Voice note to the crew

Anika's message

"We were helping you set up. Why are we the problem in this post?"

Look closely: What fact does Anika add, and what is she asking the crew?

What it shows

➤ The person the caption blamed, correcting the record and naming the harm.

What it leaves out

➤ What response Anika wants, public or private.

Evidence D | Draft correction, Saturday 2:15 p.m., not posted

Gia's first correction

Sorry if this came across wrong. We love our younger neighbors and would never want anyone to feel excluded.

Look closely: What fact does this correct? Who does the word "if" put the problem on?

What it shows

➤ An apology about intent that uses "if" and corrects no fact.

What it leaves out

➤ The false cause, the real cause and any repair.

What is still missing from the evidence?

➤ What each attendee actually experienced, whether any latecomers affected the start at all, how far the recap was reshared, and whether Anika wants any public response.

Key idea: corrections

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 20 minutes.

Gia's caption did two jobs at once. It explained the late start, and it blamed a group of people for it. A **claim** is a statement that something is true. You can check a claim with evidence. Jordy's setup log checks the caption's claim and shows a projector failure instead.

A **correction** is a public statement that replaces wrong information with accurate information. It should appear where people saw the mistake, so the crew should edit the recap caption itself. A 2016 study of apologies found that taking responsibility and offering to repair the harm mattered most. Gia's first draft talks about loving younger neighbors, and it does neither.

Accountability is owning a mistake and doing what you said you would do to fix it. That means naming who corrects the caption, who contacts the people it blamed and who checks the next recap. Anika does not have to comfort Gia or approve the correction in public. The crew can offer her a private way to respond.

What should go first in the correction?

☐ A An explanation of how bad Gia feels about the caption.

☒ B The wrong claim, and what the event log shows.

☐ C Delete the post and stay quiet.

Why I chose it

➤ B. A correction has to replace the claim with the record. A offers regret without facts, and C removes the post but not the belief.

Improve a draft

A student's first draft

We want to apologize for our last post. We didn't mean to offend anyone and we love having younger people at our events. It was a really stressful night and ① things were hectic so we said something we shouldn't have. Honestly we were all tired and trying to get everything set up on time, and it's been a lot. We are sorry if anyone was hurt. ② We promise it won't happen again and we hope everyone keeps coming! Thank you all for your support and understanding, it means a lot to us.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ Our log shows a projector failure at 5:40 p.m. and a fix at 6:20.

Rewrite phrase 2

➤ Before each recap, Jordy checks every claim about a cause against the log.

💬 Say this

"Gia is ready to post. What goes first?" — Vote first.

👁 Watch for

Misconception: Students choose A because it sounds sincere. **Listen for:** "She should say how bad she feels." **Then:** Ask what A tells Anika about the delay.

🔥 Heat check

■□□ Low.

➤ Answer key

A revised version: Correction: our recap said the screening started late because younger attendees were disorganized. That was wrong. Jordy's event log shows the projector failed at 5:40 p.m. and the replacement was connected at 6:20. Anika and Dec actually helped carry chairs before doors opened. We have edited the original caption and messaged the people it blamed. Starting with the next event, Gia and Jordy will check any claim about causes against the event log before we post. We're sorry we blamed people who were helping us. If you see something we got wrong, message Jordy.

Other notes on the draft:

- "We didn't mean to offend anyone" Talks about intent. It still doesn't say what was wrong.
- "We are sorry if anyone was hurt" "If" puts the problem on readers. Name who was blamed.
- "we hope everyone keeps coming" Good goal, but a repair makes that more likely than a hope.

Your section of the team script

Public relations ethics gives a clear first answer. The PRSA Code of Ethics asks members to “act promptly to correct erroneous communications for which the practitioner is responsible.” The crew wrote the caption, so the crew is responsible for fixing it. Jordy’s setup log shows what the fix must say: the projector failed at 5:40 p.m., and younger attendees did not cause the delay. The code has limits. It applies to PRSA members, and the crew are not PR professionals. It also says nothing about the people the caption blamed. That is why our team pairs it with the view of the people affected.

Skill	Beginning	Developing	Proficient	Advanced
Evidence	☐ No evidence about the delay.	☐ Mentions "technical issues" vaguely.	☐ Cites the projector failure from the log.	☐ Cites specific times and corrects who actually helped.
Reasoning	☐ Apologizes for feelings only.	☐ Admits error but not what it was.	☐ Names the inaccurate claim and replaces it.	☐ Explains why the claim harmed a group and how the repair prevents a repeat.
Audience & purpose	☐ Does not consider who saw the post.	☐ Speaks to readers in general.	☐ Reaches the people who were blamed.	☐ Reaches the original audience and the blamed group through appropriate channels.

Answer key

How to assess: The presentation and defenses are scored with educator-adapted rubrics modeled on the published team presentation and defense criteria; this is practice, not a submitted performance task.

Proficient looks like:

- **Evidence:** Cites the projector failure from the log.
- **Reasoning:** Names the inaccurate claim and replaces it.
- **Audience & purpose:** Reaches the people who were blamed.
- **Revision:** Adds facts and a repair.

Skill	Beginning	Developing	Proficient	Advanced
Revision	☐ No change.	☐ Softens tone only.	☐ Adds facts and a repair.	☐ Adds facts, an owner, a check and removes shifting of blame.

🔍 Does the PRSA code apply to the crew? No. It applies to PRSA members, so we use it as a model, not a rule.

We changed ___ because ____.

☛ We added the view of the people affected, because every code we read was written for the organization.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is a margin at the top, and the bottom edge of the paper is slightly irregular, suggesting it might be a scan of a physical document. The overall appearance is that of a clean, unused piece of stationery or notebook paper.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 20 minutes.

- 1 The caption felt true to Gia because a few people came in late. Why was that not enough evidence?

➤ It was a believable story, not a record. The same-night log shows an equipment failure, and nothing links the latecomers to the delay.

- 2 What evidence would show that the repair happened?

➤ Ask viewers why the screening started late. If they name the projector, not “the younger crowd,” the correction reached them.

- 3 After the correction goes up, what is still up to Anika and Dec to decide?

➤ Whether to respond, in public or in private, and whether they trust the crew again. The repair work stays with the crew.

My take

My claim: ____.

➤ A correction must replace the false cause with the logged cause, in the same post.

The best evidence is ____, because ____.

➤ The setup log, because it was recorded at the time instead of remembered afterward.

Someone who disagrees might say ____.

➤ Deleting the post removes the harm faster than correcting it.

- Going further: Ask the people affected what the correction missed, without asking them to forgive anyone. Then decide where the corrected fact should go so the original audience sees it.
- Going further: Correct the record where people can see it. Keep enough of the original caption in a correction note to explain what changed.
- Going further: Write a caption correction and a short script for an accessible video. Use the same facts in both.
- Going further: Ask the editor or advisor of a school newsletter, club account or yearbook how they fix mistakes. Suggest three steps: name the error, show the evidence and say what changes.
- Draft how the crew would measure whether younger neighbors come back
- Compare a real published correction policy from a newsroom with the crew’s plan

My take, continued

The limit of the evidence is ____.

- The log does not show whether latecomers affected the start at all.

I would change my mind if ____.

- Attendees' accounts showed that latecomers delayed the start.

Overview

Students read a short story about the Common Room, where a nonprofit board is considering paid evening rentals. The rentals would help close a \$200 weekly budget gap. Students read the board agenda, a budget note and listening notes from evening users, then map who might miss the meeting. They write a note or a spoken comment with a budget question and an access question.

Before this case

- synthesize four lenses into one recommendation
- address both the budget gap and a missing voice
- acknowledge uncertainty in the recommendation

What happened

It is the Friday after the crew’s first screening, and the board meeting is coming up. A small neighborhood nonprofit runs the Common Room alongside the bookshop. The nonprofit’s board is considering paid rentals on two evenings a week to help cover staffing. No vote has happened yet.

Mari, 19, works the bookshop counter and closes the shop. She knows that “just keep it free” does not pay the evening staff. Sami runs a print workshop in the room after her afternoon shift. It is one of the few step-free rooms nearby.

Caio, 24, runs the crew’s Tuesday film night. Tuesday is one of the evenings Option B would rent out. Mateo already has a headline for a petition. The crew agrees the room matters, but they do not agree on the best schedule.

Your question: Which option should the crew support, and what should they ask the board?

Proposal A proposal is a change that someone suggests and that has not been approved yet.

In this case: Option B is a proposal on the board's agenda. No vote has been taken, so it is not a decision yet.

Trade-off A trade-off is a choice where getting one benefit means accepting a cost or giving something up.

En español: compensación entre opciones

In this case: Paid rentals help close the \$200 weekly gap but take away free evenings Sami and Dec use.

Decision-maker A decision-maker is the person or group with the power to make a particular choice.

En español: quien toma la decisión

In this case: The nonprofit board decides, not a city community board and not the crew.

🔑 Answer key

Any first guess is fine. Students return to it on the My take page.

Before you look at the evidence, what do you think the crew should ask the board for?

➤ My first guess is renting two evenings, because the room needs to pay its evening staff.

- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: The meeting nobody can attend

The Common Room’s board meets Wednesday at 6:30 p.m. The small nonprofit that runs the room alongside the bookshop is weighing paid evening rentals to help cover staffing. The agenda item is marked “for discussion,” and no vote has been taken. By Friday, the crew’s group chat has split along predictable lines. Mateo, who likes turning “we should” into a plan, has drafted a petition headline. Others are less sure a petition is the right tool.

Mari holds both sides of the problem in one job. She is paid to lock up the bookshop and then stays for zine night with her friends. She wants the free time protected, but she knows the bookshop has costs, and she proposes asking which hours earn money and testing a different arrangement. Sami raises a procedural objection. The crew keeps speaking for evening users without asking them. For her own part, she wants three things from the meeting: the actual proposal, a way to give input without speaking on the spot and a clear answer about what that input can change.

Caio, 24, runs the crew’s Tuesday film night, one of the evenings Option B would rent out. Dec rehearses on Thursdays. The proposed meeting time overlaps several people’s shifts. The people most affected by the decision are among those least able to attend it.

- ❓ **Stop and think.** Sami wants to know what her input can change. Why does that question matter before anyone speaks?

⌚ Pacing

Reading: about 5 min (741 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: The meeting nobody can attend”:** Sami wants to know what her input can change. Why does that question matter before anyone speaks?
2. **After “Reading an agenda like an analyst”:** Apply Bacchi’s question to Option C. What does it assume the problem is?
3. **After “Decision-makers and public participation”:** A petition to keep the room free is also a frame. What does it bring forward, and what does it leave out?

Reading an agenda like an analyst

The documents lay out the choice. Option A keeps the current free evenings and leaves the funding gap. Option B replaces Tuesday and Thursday evenings with paid rentals. Option C pilots one rental evening for six weeks while seeking additional funding. Each is a **proposal**, a change that someone suggests and that has not been approved yet. The budget note puts evening staffing and utilities at \$600 a week against \$400 in grants and donations. Each rental is projected to add \$120 after costs, so two would cover the \$200 gap and one would leave \$80. The note adds a caution the headline would never carry: demand is uncertain.

A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Every option has one. Option A protects the evenings and leaves the deficit. Option B closes the deficit on paper and ends two free nights. Option C limits the loss and leaves a smaller gap. It also leaves open what the board will do if the pilot falls short.

The policy scholar Carol Bacchi offers a sharper tool. Her approach asks what a proposed solution assumes the problem is (Carol Bacchi, “What’s the problem represented to be?”, November 1, 2017). Option B represents the problem as a \$200 gap and treats two free evenings as the price. That representation is a form of **framing**, the Case 1 idea of choosing which parts of a situation a message brings forward. It brings the budget forward and pushes Sami, Dec, Mari and Caio into the background. Bacchi’s question applies to the crew’s own preferences too. A petition to “keep it free” represents the problem as a threat to free space and leaves the staffing cost out of view.

 **Stop and think.** Apply Bacchi’s question to Option C. What does it assume the problem is?

Decision-makers and public participation

A **decision-maker** is the person or group with the power to make a particular choice. The board controls its own schedule, so a strong comment names the proposal, explains one effect with evidence and asks for something the board can decide. Public agencies follow different rules. New York’s community boards, for example, have advisory authority (NYC.gov, Brooklyn Community Board 13, no date listed).

New York’s libraries show how funding decisions reach ordinary schedules. City budget cuts ended Sunday hours at every branch that still had them, and Brooklyn’s last Sunday was December 17, 2023 (NY1, November 17, 2023). Restored funding, part of a \$58.3 million investment, brought Sunday service back starting July 14, 2024 (NYC Mayor’s Office, July 1, 2024). Council members thanked residents who called and wrote (New York City Council, July 14, 2024).

Professional codes speak to the board’s side of the table. The American Society for Public Administration asks public servants to “inform the public and encourage active engagement in governance” (ASPA Code of Ethics, 2013). The crew’s plan puts that into practice.

This page continues page 68. The notes for both pages are on the sheet for page 68.

Decision-makers and public participation, continued

It sends the board a joint question that leaves room for disagreement. Mari checks the figures, Sami proposes a way to send written feedback and Mateo rewrites the petition as a request the board can answer. Your role is to check the budget figures before the crew speaks to the board.

? Stop and think. A petition to keep the room free is also a frame. What does it bring forward, and what does it leave out?

Evidence A | Board agenda, Wednesday 6:30 p.m. meeting

The proposal

Evening rentals, for discussion. Option A: keep the current free evenings; the funding gap remains. Option B: replace Tuesday and Thursday evenings with paid rentals. Option C: pilot one rental evening for six weeks while seeking additional funding. No vote has been taken.

Look closely: Is this a vote or a discussion? Which words tell you?

What it shows

➤ A proposal stage: three options, each with a cost, and no vote.

What it leaves out

➤ Who uses each evening, and the board's plan if the pilot falls short.

Evidence B | Weekly budget note for the board

The budget note

Evening staffing and utilities: \$600. Current grants and donations: \$400. Each paid rental is projected to add \$120 after its extra costs. Two bookings would add \$240; one would add \$120. Demand is uncertain.

Look closely: Which number is a guess, and what could change it?

What it shows

➤ A \$200 gap, and a \$120 per-rental projection the note calls uncertain.

What it leaves out

➤ The basis for the projection, and any other way to close the gap.

Key idea: trade-offs

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 20 minutes.

The board is weighing a **proposal** about the free evenings. A proposal is a change that someone suggests and that has not been approved yet. Option B would help close the \$200 weekly gap, but it would end the free Tuesday and Thursday evenings. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Every option on the agenda has one, including the one you prefer.

Carol Bacchi's policy-analysis approach asks what a proposed solution assumes the problem is. Option B treats the \$200 gap as the problem and two free evenings as the price. That leaves two questions open: who loses those evenings, and what happens if bookings come in lower than projected? Ask the same questions about your own favorite option.

A **decision-maker** is the person or group with the power to make a particular choice. Here, the nonprofit's board controls its own schedule. A community board or a city agency would follow other rules. A strong comment names the proposal, explains one effect with evidence and asks for a decision the board can make. The board can still choose an option the crew did not ask for.

➤ Answer key

A revised version: I use the Common Room on weeknights, and I'm commenting on the rental options. Option B would replace both Tuesday and Thursday free evenings. Sami meets clients after her print-shop shift, and Dec rehearses Thursdays, so losing both nights hits people with the least flexible schedules. I understand the \$200 weekly gap is real. Option C's one-night pilot could cut it to about \$80 if bookings hold. I'm asking the board to choose the pilot, collect written input from evening users who can't attend, and review the results with them after six weeks.

Other notes on the draft:

- "Sami and Dec would lose their spot" Good affected perspectives. Say which evenings and why they matter.
- "Please keep it free for everyone" Clear position, but the board needs a plan for the gap. What could it do?

- 2 Mari is paid to close the shop and also uses the room at night. How does that shape what she asks for?

➤ Her two roles make her weigh the costs, so she asks for tested options and written costs, not a simple yes or no.

- 3 How is the Common Room's board different from the City Council that helped restore library Sundays?

➤ The board governs one small nonprofit's room. The City Council negotiates the city budget with the mayor, which is how the \$58.3 million was restored.

Overview

Students read a short story in which Gia’s bank deposit is smaller than she expected after 18 hours of café shifts. They read her pay statement and shift log, label gross pay, FICA, withholding and net pay, and find out why three hours are missing. They then write a private question to payroll about any line they cannot explain.

- write a focused research question
- evaluate a source’s credibility and point of view
- divide a task among team members and meet deadlines

Objectives

Students will be able to:

- frame a research question about how societies share risk
- research one lens and compare it with teammates’ lenses
- synthesize the team’s findings into one conclusion

Objectives, continued

- translate the research into one accurate takeaway for first-time workers

Materials

- This chapter, one copy per student
- Evidence A and B
- Educator-approved sources, including the Social Security Administration overview
- Lens assignment cards and an annotated bibliography template

The task in this edition

Task: Team inquiry: “How should societies share the risks of old age, disability and illness?” Members research economics, history of Social Security, ethics and one other country’s social insurance, then present to classmates starting first jobs.

Students make: Individual research report (800—1,000 words) plus 8-minute team presentation

Pacing

Standards

Question and Explore Big Idea 1: develop a focused question about an issue and explore many perspectives on it, checking their credibility. In this case: Students frame a question about sharing risk.

Evaluate Multiple Perspectives Big Idea 3: compare perspectives on an issue and weigh their biases, assumptions and relevance. In this case: Economic, historical, ethical and international lenses are compared.

Team, Transform, and Transmit Big Idea 5: work with a team, reflect on the process and communicate an argument to a specific audience. In this case: The team transmits findings to first-time workers.

RI.11-12.1 Back up an analysis with the strongest evidence from the text, including where the text leaves things uncertain.

W.11-12.2 Write an explanatory text that conveys complex ideas clearly and accurately.

W.11-12.5 Strengthen writing by planning, revising, editing or rewriting, focusing on what matters most for the purpose and audience.

SL.11-12.1.c Keep a discussion moving with questions that probe reasoning and evidence, and make sure the full range of views is heard.

Case 5: Why is my deposit smaller than what I earned?

Gia's bank deposit is smaller than the pay she worked out, so she reads her pay statement line by line before asking payroll.

On your own Read What happened and underline the two hour totals that do not match. About 5 minutes.

Gia holds a small card and talks beside a phone on a tripod. Jordy holds Voz, one of the crew's companions, on an open hand.

Your role: You're the one who adds up Gia's hours before she writes to payroll. **New skill:** Read a pay statement line by line.

What happened

It is Thursday evening, and it is payday for Gia. She works café shifts around her college classes. She checks her bank account and sees a deposit that is smaller than the pay she worked out. Gia keeps a shift log in her notes app. The log says 18 hours, but her pay statement says 15.

Jordy works event shifts, and their deposit looks different too. Jordy's shifts fall on different dates and hours, so their pay cannot explain Gia's. Jordy asks Gia to name the line that worries her instead of posting her whole statement.

Your question: Why is Gia's deposit smaller than her own count, and what should she ask payroll?

Gia's pay statement lists her hours, her hourly rate and four tax lines. She expected the lines for Social Security and Medicare. She does not understand the line for federal income tax. Before she writes to payroll, she wants to know what her own records show.

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Gross pay Gross pay is the money you earn before any taxes or other deductions are taken out.

En español: salario bruto

In this case: Gia's statement pays 15 hours at \$17.00 an hour, so her gross pay is \$255.00.

Net pay Net pay is the money left after taxes and other deductions, often called take-home pay.

En español: salario neto

In this case: The \$220.99 that reached Gia's bank account is her net pay, not the amount she earned.

FICA FICA is the federal payroll tax that funds Social Security and Medicare.

En español: FICA (Seguro Social y Medicare)

In this case: On Gia's statement, FICA appears as two lines: Social Security tax, \$15.81, and Medicare tax, \$3.70.

Withholding Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.

En español: retención

In this case: Federal income tax withheld, \$8.40, is a separate line from FICA. The IRS says its amount depends partly on the W-4.

🔑 Answer key

Any first guess is fine. Students return to it on the My take page.

Before you look at the evidence, why do you think Gia's deposit is smaller than she expected?

➤ My first guess is that taxes explain the whole gap, because every paycheck has deductions.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Reading passage

Reading the document behind the deposit

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Gross pay:** Gross pay is the money you earn before any taxes or other deductions are taken out.
- **Net pay:** Net pay is the money left after taxes and other deductions, often called take-home pay.
- **FICA:** FICA is the federal payroll tax that funds Social Security and Medicare.
- **Withholding:** Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.

The story: Eighteen hours or fifteen

Gia works café shifts around her college classes, and like many students with jobs, she checks her pay the way most people check the weather: quickly, on her phone, expecting nothing unusual. On this Thursday, the deposit is smaller than the number in her head. She does not guess. She opens the shift log she keeps in her notes app. Five shifts, 18 hours. Then she opens her pay statement. Fifteen hours.

She posts in the group chat that her deposit is much lower than expected. Jordy, who works event shifts, notices their own deposit looks different too, and then immediately sees why that comparison is useless. Their shifts fall on different dates and hours. Two deposits cannot explain each other. Jordy's next message sets a boundary that protects them both. Gia should not post her whole statement. She should name the line that worries her. Jordy also does not want Gia mentioning their pay to her payroll office. It proves nothing about Gia's pay and puts Jordy's pay in front of Gia's payroll office.

Your role is to add up Gia's hours before she writes to payroll. That sounds simple. It is also the step most people skip.

Stop and think. Why does Jordy not want Gia to mention Jordy's pay in her message?

A statement is an argument you can check

Gia's working theory is that payroll shorted her.

⌚ Pacing

Reading: about 5 min (702 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: Eighteen hours or fifteen”:** Why does Jordy not want Gia to mention Jordy's pay in her message?
2. **After “A statement is an argument you can check”:** What is the difference between a likely answer and a confirmed one, and why does Gia still write to payroll?
3. **After “The system behind the lines”:** Why can one paycheck not show how much federal income tax a worker will owe for the year?

A statement is an argument you can check, continued

That is a **claim**, a statement that something is true that can be checked with evidence. Case 1 taught you to test a claim against the original source, and Case 4 taught you to read dollar figures carefully, as Mari did with the board's budget note. A pay statement combines both skills. It is the employer's account of how it got from your work to your deposit, and each line can be checked.

The statement covers the pay period ending Friday the 12th, paid the following Thursday. It lists 15 hours at \$17.00, for \$255.00 in **gross pay**, the money you earn before any taxes or other deductions are taken out. Gia's log explains the difference in hours. Her shifts on the 8th, 10th, 11th and 12th total 15 hours. Her 3-hour Saturday shift on the 13th fell after the period closed. The likely answer is that those hours will appear on the next statement. A likely answer is not a confirmed one, so Gia still plans to ask.

The rest of the gap is taxes. Social Security tax of \$15.81 and Medicare tax of \$3.70 together form **FICA**, the federal payroll tax that funds Social Security and Medicare. Federal income tax withheld, \$8.40, is a separate line, as is state and local income tax, \$6.10. **Withholding** is money an employer takes out of each paycheck to pay taxes or other costs for the worker. The total left, \$220.99, is Gia's **net pay**, the money left after taxes and other deductions, often called take-home pay.

 **Stop and think.** What is the difference between a likely answer and a confirmed one, and why does Gia still write to payroll?

The system behind the lines

The IRS explains that the federal taxes an employer withholds include income tax, Social Security and Medicare. It says income-tax withholding depends partly on the worker's Form W-4 (Internal Revenue Service, updated May 1, 2026). Federal income tax taken from each paycheck counts toward what a worker owes for the whole year, so one paycheck cannot show that yearly total. The IRS Tax Withholding Estimator is the official tool for checking whether withholding is on track (Internal Revenue Service, updated June 27, 2026). The IRS has also written directly to teens starting a first job, explaining withholding and the W-4 (IRS Tax Tip 2019-62, May 20, 2019).

FICA can feel abstract until you ask what it funds. The Peter G. Peterson Foundation explains where the Social Security and Medicare money taken from a paycheck goes (Peter G. Peterson Foundation, May 26, 2026). NPR's The Indicator devoted an episode to the Social Security portion and why it comes out of nearly every check (NPR, June 6, 2018).

Gross pay has its own rules. Many states set a minimum wage above the federal one, and 19 states raised theirs in January 2026 (Money, January 1, 2026). Payroll professionals hold themselves to a standard, too. The PayrollOrg code asks members "to strive for perfect compliance, accuracy, and timeliness of all payroll activities" (PayrollOrg Code of Ethics, no date listed).

This page continues page 88. The notes for both pages are on the sheet for page 88.

The system behind the lines, continued

A worker who can read the statement is the best check on that promise.

Look at the evidence

On your own Read the pay statement and the shift log, and fill in both boxes for each one. About 10 minutes.

Evidence A | Pay statement

Gia's pay statement

Pay period ending Friday the 12th, paid the following Thursday. Hours: 15.00 at \$17.00. Gross pay: \$255.00. Social Security tax: \$15.81. Medicare tax: \$3.70. Federal income tax withheld: \$8.40. State and local income tax withheld: \$6.10. Net pay: \$220.99.

Look closely: Which line shows gross pay? Which two lines together make up FICA?

What it shows

➤ $15 \times \$17.00 = \255.00 checks out. FICA is two lines, apart from income tax.

What it leaves out

➤ Any shift after the 12th, and how the \$8.40 federal line was figured.

Evidence B | Notes app

Gia's shift log for the last two weeks

Mon the 8th: 4 hrs. Wed the 10th: 4 hrs. Thu the 11th: 3 hrs. Fri the 12th: 4 hrs. Sat the 13th: 3 hrs. My total: 18 hrs.

Look closely: Which shift falls outside the pay period? Add the hours inside it.

What it shows

➤ Her log matches the statement once the 3-hour Saturday shift is set aside.

What it leaves out

➤ Whether payroll logged the Saturday hours, and which statement will pay them.

○ Whether the Saturday shift will appear on the next statement, what Gia entered on her W-4, whether any other deductions such as benefits apply to her job, and the minimum wage where she works.

Notes

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is a vertical margin line on the left side, creating a narrow left margin. The paper has rounded corners at the bottom-left and top-right. The overall appearance is that of a clean, unused piece of stationery or notebook paper.

This page continues page 91. The notes for both pages are on the sheet for page 91.

Key idea: gross pay and net pay

On your own Read the key idea and the code of ethics, then answer the question in the box. About 12 minutes.

A bank deposit shows how much money arrived, but the pay statement shows how the employer figured it. **Gross pay** is the money you earn before any taxes or other deductions are taken out. For an hourly worker, gross pay is the hours worked times the hourly rate, plus any other earnings. **Net pay** is the money left after taxes and other deductions, often called take-home pay. Gia's deposit is her net pay.

Deductions are the lines between those two totals. **FICA** is the federal payroll tax that funds Social Security and Medicare. On Gia's statement, FICA appears as two lines: Social Security tax and Medicare tax.

Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker. Federal income-tax withholding is a separate line from FICA, and the IRS says its amount depends partly on the worker's Form W-4.

A statement can also list other deductions, such as benefit contributions, so read each line's name before you decide it is income tax. The federal income tax taken from each paycheck counts toward the tax a worker owes for the whole year. One paycheck cannot show what that yearly total will be. This explanation covers employees in the United States. Self-employed workers follow a different tax process.

Practice: choose a response

On your own Choose what Gia should do first and explain why, then fix the two marked lines. About 5 minutes.

Gia's deposit is smaller than the pay she worked out. What should she do first?

- ☐ A Compare her deposit with Jordy's.
- ☒ B Check her hours and the pay period, then read each line of her statement.
- ☐ C Treat the whole gap as taxes and let it go.

Why I chose it

➤ B. Only Gia's own records can separate timing from deductions. A compares workers with different shifts, and C treats part of the gap as all of it.

Report opening: question, lens and approach

On Gia's pay statement shows four tax lines. Two of them, Social Security tax and Medicare tax, connect her café paycheck to a national system. This report asks how the United States uses payroll taxes to share the risks of old age, disability and illness, and who carries the cost. I use an economics lens. My teammates examine history, ethics and one other country's social insurance.

Takeaway for first-time workers

On your first pay statement, find the Social Security and Medicare lines. Together they are FICA. That money funds benefits for today's retirees and people with disabilities, and it helps pay for your own future benefits. Federal income tax is a separate line.

Limits of this report

This report uses one pay statement with invented amounts, so it cannot predict anyone's taxes. It covers employees in the United States, not self-employed workers. Where sources disagree about funding, I report the disagreement instead of settling it.

How your work is scored

Mark one box in each row.

Skill	Beginning	Developing	Proficient	Advanced
Evidence	☐ No specific numbers.	☐ Mentions hours but no period.	☐ Names hours, period and the line in question.	☐ Cites own records and the statement side by side.
Reasoning	☐ Assumes an error or theft.	☐ Assumes all difference is tax.	☐ Separates hours, deductions and period timing.	☐ Explains which differences are expected and which need checking.
Audience & purpose	☐ Shares private details or demands.	☐ Polite but vague.	☐ Clear question payroll can answer.	☐ Clear, private, and offers the right document.
Revision	☐ No change.	☐ Removes one issue.	☐ Adds period and line, removes private data.	☐ Explains why each change helps payroll respond.

How to assess: Reports and the presentation are scored with educator-adapted rubrics modeled on the published Performance Task 1 components; this is practice, not a submitted performance task.

Proficient looks like:

- **Evidence:** Names hours, period and the line in question.
- **Reasoning:** Separates hours, deductions and period timing.
- **Audience & purpose:** Clear question payroll can answer.
- **Revision:** Adds period and line, removes private data.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames below. About 15 minutes.

- 1 What would Gia's statement need to show for the missing hours to be a payroll mistake?

➤ It would have to pay fewer than the 15 hours worked inside the period. It pays all 15, so the open question is whether the next statement includes the 13th.

- 2 Why might a new worker think that every missing dollar went to taxes?

➤ The tax lines are real and visible, so they make an easy explanation. A worker who stops there misses the timing issue behind the three hours.

- 3 Before a first job, what would you want to know about how and when you will be paid?

➤ When each pay period ends and when it is paid, where statements are posted, and who answers payroll questions in writing.

My take

My claim: ____.

➤ My claim: pay-period timing and expected deductions explain the smaller deposit.

The best evidence is ____, because ____.

➤ The best evidence is the statement itself: $15 \times \$17.00 = \255.00 , so the hours and rate match.

⌚ Pacing

Full chapter: 15 min.

✂ Short on time: 8 min. Use question 2 only.

💬 Say this

“Answer with a line from the statement or the log, not a guess about payroll.” — Post the question numbers and hear one answer per question.

➤ Stretch

- Ask what a new worker should keep in their own records before the first payday, and why.
- Going further: What does a new worker need to know before they feel ready to ask payroll a question? Explain the gap between gross pay and net pay without making taxes the answer to every missing dollar.
- Going further: Write down your first guess about why Gia's deposit was small. Then compare it with the line-by-line explanation. What changed?
- Going further: Record a spoken walkthrough of Gia's statement, and mark up a copy of the statement. Ask someone which version answers their question better.
- Going further: Before a first job, ask how and when you will be paid and where to see your pay statement. Keep your own log of hours and shifts. Look up your state's minimum wage on its labor department website, and bring pay questions to a supervisor or payroll in writing.
- Use the IRS Tax Withholding Estimator's public page to list what information it asks for (no personal data)
- Research your state's minimum wage and pay-statement requirements

My take, continued

Someone who disagrees might say ____.

Someone who disagrees might say expected deductions can still be wrong, so Gia should check them.

The limit of the evidence is ____.

- The limit of the evidence is that no document shows Gia's W-4 or when the Saturday shift will be paid.

I would change my mind if ____.

☞ I would change my mind if payroll said the Saturday shift belonged to this pay period.

Content note

This case is about private records. No student should share their own grades, forms, records or family finances, so keep the discussion on Rafa's situation.

This case explains general rules. It is not legal advice for your situation.

Overview

Students read about Rafa, an 18-year-old in his first year of college whose family wants to help pay tuition and asks for his login. They read an access form, a college FERPA notice and summaries of federal guidance, then sort billing access from access to grades. They then write the question Rafa could send the records office and the smallest access that would help his family.

Before this case

Students should already be able to:

- write a focused research question
- evaluate a source's perspective and limits
- build an argument from several sources

Objectives

Students will be able to:

- frame a research question about family knowledge and young adult independence
- evaluate legal, cultural and personal perspectives from a stimulus packet

Objectives, continued

- write an original argument that synthesizes the sources
- acknowledge the limits of the argument

Materials

- This chapter, one copy per student
- Evidence A and B
- A stimulus packet: the FERPA FAQ, the American University guide, one article on family involvement in college and one cultural perspective on family and independence
- A perspective map and an argument outline

On your own Read What happened and underline what Rafa's dad asks for in the family chat. About 5 minutes.

Rafa and Caio sit on a sofa and look at Rafa's phone. Caio explains something with an open hand.

Your role: You're the one who reads each box on the form before Rafa signs. **New skill:** Read a form section by section before you sign.

What happened

Rafa, 18, has just started college, and his parents help pay his tuition bill. He commutes from the next block and helps at his family's shop after class. At the end of August, the college mailed Rafa a family-access form, but he has not opened the envelope yet.

On Sunday night, his parents ask about the form in the family group chat. His dad wants Rafa's login so the family can handle everything. Rafa is glad to share the bill, but he wants to read the rest of the form first.

Your question: What will this form let Rafa's parents see, and what should he ask before he signs?

Caio, an older friend who rents a room on the block, reads the form with Rafa, not for him. The form has separate sections for billing and for grades. Rafa wants to check the billing box. He wants to talk with his family before he decides about grades.

FERPA FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records.

En español: FERPA (Ley de Derechos Educativos y Privacidad de la Familia)

In this case: Rafa is 18 and in college, so under the general rule the FERPA rights to his records are his, not his parents'.

Education record An education record is a record directly about a student that a school or college keeps.

En español: expediente educativo

In this case: Rafa's grades and schedule are education records. Section 2 of his form asks whether his parents may receive information about his grades.

Consent Consent is permission a person gives for something specific, such as sharing a record with a named person.

En español: consentimiento

In this case: Rafa's form asks for consent in two separate sections, one for billing and one for grades. He can say yes to one and no to the other.

The story: Family support and a sealed envelope

Rafa, 18, is in his first weeks of college. He commutes from the next block and works at his family's shop after class. His parents help with tuition, and they want to keep helping. At the end of August, the college mailed him a parent and family access form. He has not opened it.

On Sunday night, his parents bring it up in the family group chat. His mom asks whether the tuition form arrived so they can help with the bill. His dad proposes the simplest route from a parent's point of view: send the login, and the family will take care of everything. Rafa answers that he can share the bill part and wants to read the rest first. His reply is honest and a little uncomfortable. It says yes to one kind of help and asks for time on another.

Caio, 24, the oldest in the crew, rents a room on the block and offers to sit with Rafa while he reads the form. He is careful about the limits of that help. Being the older friend does not make this his decision. When the conversation turns to exceptions in the law, Caio pushes for precision. Which exception, and does it even fit Rafa? Just saying "privacy law" will not answer his dad.

Your role in this case is to read each box on the form before Rafa signs.

- Stop and think.** Rafa says yes to one kind of help and asks for time on another. Why might that be harder than saying yes to everything?

Pacing

Reading: about 5 min (749 words). Short on time: read it aloud together, pausing at each Stop and think.

Stop and think

1. **After “The story: Family support and a sealed envelope”:** Rafa says yes to one kind of help and asks for time on another. Why might that be harder than saying yes to everything?
2. **After “A form is a set of separate decisions”:** The notice lists rights and exceptions but not which exceptions this college uses. What should Rafa ask to fill that gap?
3. **After “The federal rule and its exceptions”:** Why does Caio insist on naming the exact exception instead of saying “privacy law”?

A form is a set of separate decisions

The new skill in this case builds on Case 5. There, you read a pay statement line by line and matched each line to a record. Here, you read a form section by section and decide each part on its own. Section 1 would let a named person view account statements and make payments. Section 2 would let that person receive information about grades, enrollment and academic standing. Section 3 says the authorization lasts until Rafa changes or withdraws it in writing. The first two sections each carry a separate yes-or-no box.

The college's annual notice adds the legal frame. Students have the right to inspect their education records, to request corrections and to consent to disclosures, except where the law allows disclosure without consent. The notice does not say which exceptions this college uses, and neither document says where Rafa sends a written change.

Two earlier terms sharpen the analysis. A **decision-maker** (Case 4) is the person or group with the power to make a particular choice, and on this form that person is Rafa. A trade-off (also Case 4) exists in each section separately. Sharing billing costs little and gives his parents what they asked for. Sharing grades may strengthen family trust, or it may shift a conversation Rafa would rather have in person first. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, it is written and specifies which record, to whom and for what purpose. A shared login is the opposite of specific.

 **Stop and think.** The notice lists rights and exceptions but not which exceptions this college uses. What should Rafa ask to fill that gap?

The federal rule and its exceptions

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. An **education record** is a record directly about a student that a school or college keeps. Under the general rule, FERPA rights transfer from parents to the student at 18 or when the student enters college at any age, and the law calls that student an “eligible student” (U.S. Department of Education, Student Privacy Policy Office, no date listed). Paying tuition does not, by itself, return those rights to a parent.

The exceptions are real and narrow. A college may disclose records to parents if the student is a dependent for federal tax purposes, and it may disclose in a health or safety emergency. The Department of Education stresses that these disclosures are permitted, not required (U.S. Department of Education, Student Privacy Policy Office, no date listed). That is why the practical step is a question to the records office, not an argument from the law alone. American University's parent-access guide shows how one institution handles it, and it is one university's process, not a national rule (American University, June 30, 2025).

This page continues page 108. The notes for both pages are on the sheet for page 108.

The federal rule and its exceptions, continued

Records management is also a data security problem. A breach at PowerSchool exposed millions of student records (Education Week, January 9, 2025). The Markup has reported on how school software companies gain access to student data, and where FERPA's protections run out (The Markup, January 15, 2022). Registrars' own professional code asks them to "protect the legitimate privacy interests of all individuals" (AACRAO Ethics and Practice, 2010).

? **Stop and think.** Why does Caio insist on naming the exact exception instead of saying "privacy law"?

Key idea: education records

On your own Read the key idea and the code of ethics, then answer the question in the box. About 12 minutes.

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. It gives parents, and later students, rights over those records. An **education record** is a record directly about a student that a school or college keeps. Grades, transcripts and schedules can be education records, on paper or stored digitally. Under the general rule, the rights transfer to the student at age 18 or when the student starts college, at any age. The law calls that student an “eligible student.”

Helping pay tuition does not, by itself, give those rights back to a parent. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, consent is written and says which record, to whom and for what purpose. Rafa’s form asks about billing and about grades in separate sections. He can say yes to one section and no to the other. He can also change his choice later in writing.

FERPA also has exceptions, which are situations in which a college may share records without the student’s consent. A college may share records with parents if the student is a dependent for federal tax purposes. It may also share them in a health or safety emergency. The U.S. Department of Education says this sharing is allowed, not required, so Rafa should ask his records office what his college does.

On your own Choose who holds Rafa's rights and explain why, then fix the two marked lines. About 5 minutes.

Rafa is 18 and in college, and his parents help pay his tuition. Under the general FERPA rule, who holds the rights to his education records?

☒ A Rafa does.

☐ B His parents do, because they help pay the bill.

☐ C His parents do, until Rafa signs a form that says otherwise.

Why I chose it

→ A. Under the general rule the rights are Rafa's. B confuses paying with permission, and C reverses the rule: the form is how he shares, not how he gains rights.

Improve a draft

A student's first draft

Rafa, ① your parents are paying so they can probably see everything, that's how it works at most schools. My parents could always see my grades on the portal in high school. FERPA is a privacy law but it's mostly for kids. ② Once you're 18 it doesn't really matter anymore. If you want to keep your grades private you should just not give them your password. Honestly just ask your parents what they want to see. They're helping you a lot so it's probably fair for them to know how you're doing.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

→ Paying tuition doesn't give access to grades. That needs consent in a separate section.

Rewrite phrase 2

→ At 18 or on starting college, FERPA rights transfer to you, though some exceptions apply.

A revised version: Rafa, under the general FERPA rule, the rights to your education records are yours now, because you're 18 and in college. Paying tuition doesn't automatically give your family access to your grades. At schools like the one in the guide, parent access for paying the bill is separate from permission to see academic records. You can decide what to share. Talk with your family about what help you actually want, then ask the records office which form covers that, what it allows and how to change it later. There are exceptions, so ask them which ones your college uses.

Individual written argument on “How much should families know about a young adult’s life?”, using a stimulus packet.

Use: Stimulus: the FERPA FAQ, the university guide, one article on family involvement in college and one cultural perspective on family and independence.

You’ll make: Individual written argument, 1,200—1,500 words

Time: 250 minutes

- 1 Read the stimulus packet and annotate each source for its perspective.
- 2 Write a research question in the planner.
- 3 Fill in the perspective map: legal, cultural and personal.
- 4 Write a thesis that answers your question with a clear position.
- 5 Draft your introduction, one body paragraph and your limits in the Your draft boxes.
- 6 Write the full argument, 1,200 to 1,500 words, on lined paper or in the workspace.
- 7 Check your argument with the questions on the Check your work page.

Your draft

On your own Write your draft in the boxes, using your planner from the page before. About 130 minutes.

Introduction

👉 Rafa's parents help pay his tuition, and the family chat asks whether he has signed a form that could share his grades. His situation raises a wider question: when a family helps pay for college, how much should they know about a young adult's academic life? The law gives one answer, and families give many others. I argue that the law's default rightly leaves that choice to the student.

Body paragraph: the legal perspective

👉 The legal perspective is the clearest. Under FERPA, the rights to education records transfer to the student at 18 or on starting college. Paying tuition does not transfer them back. American University's guide applies this by separating parent billing access from permission to discuss academic records. The law does not forbid sharing. It makes sharing the student's choice, with some exceptions.

Limits of my argument

👉 This argument has limits. It relies on one federal law and one university's process, and other colleges and countries may differ. The cultural source in my packet speaks for its authors, not for every family who shares its background.

⌚ Pacing

Full chapter: 130 min.

👁 Watch for

Misconception: Arguments summarize source after source. **Listen for:** "Source 1 says... Source 2 says..." **Then:** Ask how two sources together support one claim.

👉 Answer key

What to notice in the sample:

1. Leads from the case to the research question.
2. Signals more than one perspective.
3. Represents the law accurately, exceptions included.
4. Presents a cultural source without generalizing about a group.

How to assess: The argument is scored with an educator-adapted rubric modeled on the published Individual Written Argument expectations; it is practice, not a Performance Task 2 submission.

Proficient looks like:

- **Evidence:** Cites the transfer rule and the separate-access guide.
- **Reasoning:** Separates paying from permission correctly.
- **Audience & purpose:** Leaves the decision with Rafa and names the records office.
- **Revision:** Fixes the rule and adds a next step.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames below. About 15 minutes.

- 1 What is the smallest amount of access that would give Rafa the help he wants from his family?

➤ Section 1 alone. His family asked to help with the bill, and billing access covers that. Grades can wait until they talk.

- 2 Why might Rafa want to talk with his family before he checks the box for grades?

➤ The form separates billing from grades, but his family may not know that. Talking first lets him explain the difference before he decides.

- 3 Someone says, “Parents can never see college records.” How would you revise that claim after reading this case?

➤ Parents generally need an eligible student’s consent. The law allows, but does not require, sharing with parents of a tax dependent or in a health or safety emergency.

My take

My claim: ____.

➤ My claim: the smallest access that still helps is billing only, with grades left for a family talk.

The best evidence is ____, because ____.

➤ The best evidence is Section 3, because it lets Rafa change his choice later in writing.

⌚ Pacing

Full chapter: 15 min.

✂ Short on time: 8 min. Use question 2 only.

💬 Say this

“Answer with a detail from the form or the notice, not from your own family.” — Post the question numbers and hear one answer per question.

➤ Stretch

- Ask what Rafa could share with his family in a conversation, without signing any form.
- Going further: Compare FERPA’s general rule with American University’s parent-access process. Which parts come from the federal law, and which come from one university’s forms?
- Going further: What might a student and a family member who pays the bill each misunderstand about access? Write wording that makes the separate permissions clear without promising total secrecy.
- Going further: Draw two permission guides for a sample student: a flowchart and a short conversation. Test both with a reader who does not know this case.
- Going further: Search your school or district website for its FERPA or “student records” notice. Then write one question about who can see a record, and ask the front office or a counselor. If you are heading to college, look up its parent-access and authorization forms early.
- Find your own school’s FERPA notice and summarize what it says about directory information and opting out
- Compare FERPA with your state’s student-privacy law, if it has one

My take, continued

Someone who disagrees might say ____.

Someone who disagrees might say a paying family has a fair claim to see results.

The limit of the evidence is ____.

- The limit of the evidence is that we don't know which exceptions Rafa's college uses.

I would change my mind if ____.

☒ I would change my mind if his family claims him as a tax dependent and the college shares on that basis.

Case 7: Did one complaint get the novel banned?

Overview

Students read a short story in which a group chat claims that one parent’s complaint got a novel “banned” from Anika’s school library. They compare the claim with the district’s reconsideration notice, the committee input form and the ALA’s example procedure. They map where the novel is in the review. They then write input to the review committee that is tied to the selection criteria.

- **Selection criteria:** Selection criteria are the written standards a library uses to decide which materials to include.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Correction:** A correction is a public statement that replaces wrong information with accurate information.

The story: Two messages, two days

On Thursday night, a claim about a novel in the library at Anika's high school moves through a group chat. One parent complained, it says, so the novel has been banned and removed. Gia answers with the certainty of someone who cares about the freedom to read: "censorship, full stop." The reply fits her values. It does not fit the evidence, because there is no evidence in the chat yet.

The evidence arrives Friday, when the school library posts a notice. Mari, who works the bookshop counter, reads it against the chat. She is dyslexic and moves between print and audiobooks, and she is halfway through this novel on audio. She points out the contradiction plainly. The chat says the book is gone. The notice says it remains available during the review. Both cannot be true.

Gia deletes her first reply. She had not read the notice or the book. She is now organizing a discussion at the bookshop and wants it to be useful, which means getting people to the input form before the 15th with something to say. She also sets a boundary that many online arguments skip. Nobody goes after the parent who asked for the review, because that parent used the process too.

Your role is to read the library notice before anyone replies "banned."

? Stop and think. The chat collapsed a complaint, a temporary change and a final decision into one word. Why is that collapse so common?

⌚ Pacing

Reading: about 5 min (723 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: Two messages, two days":** The chat collapsed a complaint, a temporary change and a final decision into one word. Why is that collapse so common?
2. **After "Stages, not verdicts":** What should a careful correction leave out, given what the notice does not say?
3. **After "Professional guidance, state law and the courts":** How can someone oppose removing a book and still respect the parent who filed the challenge?

Stages, not verdicts

The new skill in this case is finding what stage a process has reached. It depends on two earlier ones. From Case 1, you go to the original source, here the library's notice. From Case 3, you know that a **correction** replaces wrong information with accurate information where people saw the mistake.

The notice describes a sequence. A request for reconsideration has been received. The title remains available during the review. A committee will read the full work and evaluate it against the district's selection criteria. Written input is due by the 15th. The committee's decision may be appealed. A **challenge** is a formal request to remove or restrict a book or other library material. It opens that sequence, but it does not end it. A **reconsideration policy** is a library's written process for reviewing a challenge to a book, and **selection criteria** are the written standards a library uses to decide which materials to include.

With the sequence in view, the chat's **claim** can be judged precisely. It collapses three different events into one: a complaint, a possible temporary change and a final decision. Only the first has happened. The notice also has gaps. It does not name the novel, list the committee members or quote the criteria, so a careful reply should not fill those in.

Mari's approach to the input form shows how to join the process rather than just comment on it. The form asks whether you have read the entire work and which criteria your input addresses, with a 300-word limit. She is finishing the book first. Her experience with books like this explains why she cares, but it is not the policy, so she plans to connect the two.

? Stop and think. What should a careful correction leave out, given what the notice does not say?

Professional guidance, state law and the courts

The American Library Association recommends that libraries adopt a formal reconsideration policy, and its model process has a committee read the whole work (American Library Association, updated January 2018). Its separate guidance on selection criteria explains how libraries evaluate resources (American Library Association, updated January 2018). That guidance is professional advice. Districts adopt their own policies, and states write their own laws. Colorado legislators advanced a bill to require clear reconsideration policies (Chalkbeat Colorado, February 10, 2025). In Tennessee, reporters found that a revised state law changed the review steps and that some books quietly left shelves (Chalkbeat Tennessee, September 17, 2024).

The constitutional question remains unsettled. A law-firm analysis explains that the Fifth Circuit treated public library book removals as government speech, creating a split with the Eighth Circuit (Cahill Gordon and Reindel, September 22, 2025). The answer to whether a removal is legal can depend on where you live.

This page continues page 128. The notes for both pages are on the sheet for page 128.

Professional guidance, state law and the courts, continued

Professional codes sit on both sides of Gia’s evolving view. The ALA code says, “We uphold the principles of intellectual freedom and resist all efforts to censor library resources” (ALA Code of Ethics, 2021). The NCA credo asks communicators to “understand and respect other communicators’ intent before evaluating and responding to their messages” (NCA Credo for Ethical Communication, 2024). Holding both is the discipline this case asks for.

? **Stop and think.** How can someone oppose removing a book and still respect the parent who filed the challenge?

Key idea: book challenges

On your own Read the key idea and the code of ethics, then answer the question in the box. About 12 minutes.

A **challenge** is a formal request to remove or restrict a book or other library material. A challenge starts a review. On its own, it does not remove a book. A complaint, a temporary change and a final decision can happen at different times. Check which stage a process has reached before you repeat a claim.

A **reconsideration policy** is a library's written process for reviewing a challenge to a book. The American Library Association (ALA) recommends that libraries adopt one, and its example has a committee read the whole work. **Selection criteria** are the written standards a library uses to decide which materials to include. ALA's guidance is a professional recommendation, not a law. Each district's adopted policy and the applicable law govern its own process.

Whether removing a book breaks the law is a harder question. Federal courts disagree about how the First Amendment applies when a library removes a book. The answer can depend on where you live. Right now, the notice at Anika's school describes a review, and the novel is still available.

ALA Code of Ethics: Principle 2 (of 9)

"We uphold the principles of intellectual freedom and resist all efforts to censor library resources."

In plain words: Library workers who follow the ALA code support people's freedom to read and oppose censorship of library materials.

Question: The district notice says the title stays available during review. Does that match the group chat's claim that it's "gone"?

Your answer

The notice says ____, so ____.

➞ The notice says "the title remains available during the review," so the chat skips from a request to a removal that has not happened.

Improve a draft

A student’s first draft

This is so messed up. One parent complains and **1** now the whole school can’t read the book?? That’s literally censorship and it’s illegal because of the First Amendment. **2** Whoever complained is a terrible person and should mind their own business. Everyone should go to the board meeting and yell at them until they put it back. Books like this are the only ones some of us actually finish. I read part of it last year and it was actually really good. I’m so done with this school honestly.

Rewrite each marked phrase so it says only what the evidence supports.

➤ Answer key

A revised version: Update on the novel: it isn’t banned. A parent filed a reconsideration request, which starts a review under the district’s policy. The book stays on the shelf while a committee reviews the whole work against the selection criteria, and there’s an appeal step after the decision. If you care about it, you can send written input to the committee by the 15th; the librarian has the form. Tie it to the criteria and your own reading, and please don’t go after the parent who asked. People are allowed to use the process too.

Other notes on the draft:

Your draft

On your own Write your draft in the boxes, using your planner from the page before. About 150 minutes.

Report opening

👉 A group chat at Anika's school said one parent's complaint got a novel banned. The library's notice described a review under district policy, with the title still available. That gap leads to our team's question: who should decide what stays in a school library, and what makes that decision legitimate? I research professional standards, and my teammates cover the other three lenses.

Lens paragraph: professional standards

👉 Librarians' professional standards point toward process. ALA's example procedure has a review committee read or view the entire work and evaluate it against the collection policy's criteria. The challenged work stays available until a formal decision, and there is an appeal route. ALA presents this as guidance for libraries to adapt, not as law.

Our model process

👉 Anyone may send written input. A committee reads the whole work against published criteria. The book stays available during review, and any decision can be appealed.

Answer key

How to assess: Reports and the presentation are scored with educator-adapted rubrics modeled on the published Performance Task 1 components; this is practice, not a submitted performance task.

Proficient looks like:

- **Evidence:** States the current stage from the policy.
- **Reasoning:** Separates complaint, review and decision.
- **Audience & purpose:** Gives a useful participation route.
- **Revision:** Corrects the stage and removes attacks.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is a vertical margin line on the left side, creating a narrow left margin. The paper appears to be from a notebook or a standard ruled document.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames below. About 15 minutes.

- 1 Whose reading experience is missing from the crew's discussion of the novel?

➤ Readers at Anika's school are missing, including the family that filed the request. Mari and Gia are discussing a book neither of them has finished.

- 2 Gia says nobody should go after the parent who asked for the review. Why might that matter for her bookshop discussion?

➤ Gia wants a discussion that helps people write input tied to the criteria. Attacking the parent adds a target but no reason the committee can weigh.

- 3 How does calling the same action a "review," a "restriction" or a "ban" change what people think happened?

➤ "Review" names a process, "restriction" a partial limit and "ban" a final removal. Only "review" matches the notice.

My take

My claim: ____.

➤ My claim: the chat skipped three stages, so a reply should name the stage and the deadline.

The best evidence is ____, because ____.

➤ The best evidence is the notice, because it describes a review, criteria, input and an appeal.

⌚ Pacing

Full chapter: 15 min.

✂ Short on time: 8 min. Use question 2 only.

💬 Say this

"Answer with a detail from the notice or the form, not a feeling about the parent." — Post the question numbers and hear one answer per question.

➤ Stretch

- Ask how Gia's bookshop invitation could name the book, the stage and the deadline without naming the parent.
- Going further: Find the institution, its written policy and the decision process before you make a claim about rights. Which of the three does the district notice tell you about?
- Going further: What problem does a proposed restriction on a book claim to solve? Which readers' experiences or other options are missing from that proposal?
- Going further: Design a library notice that explains where a book review stands, and write a short guide for interviewing a librarian. Test whether a student can name the next document to ask for.
- Going further: Ask your school librarian how book challenges are handled. Find the written policy on the district website, and learn whether students can give input during a review. If a review is happening, read the whole book before you comment.
- Find your district's reconsideration policy and summarize its stages
- Research how your state's laws about school library materials have changed recently

My take, continued

Someone who disagrees might say ____.

Someone who disagrees might say a review can discourage reading while it runs.

The limit of the evidence is ____.

- The limit of the evidence is that we don't know the criteria or what the request says.

I would change my mind if ____.

☒ I would change my mind if the district's policy allowed removal during a review.

Overview

Students read a short story in which a publisher sends Gia a free novel to review. Her video tags the publisher but never says the copy was free. They compare the publisher’s email, the video script and Caio’s edit notes with the FTC’s disclosure guidance for social media. They then rewrite the video’s opening and caption so that a viewer watching with the sound off learns about the free copy.

Before this case

Case 8: Is it a recommendation or an ad?

Gia loves a novel that a publisher sent her for free, and her video review does not mention the free copy yet.

On your own Read What happened. Underline what the publisher sent Gia and what it asked for. About 5 minutes.

Gia, Caio and Mari set up a camera in a bright studio.

Your role: You're the viewer with the sound off who checks the first three seconds. **New skill:** Spot and disclose a material connection.

What happened

At 1:30 p.m. on Saturday, Caio finishes editing Gia's short video review of a new novel. Gia made the review for BookTok, where people recommend books on TikTok. She stayed up until 2 a.m. to finish the novel, and she loves it.

Two weeks ago, the book's publisher emailed Gia. The publicity team offered her a free copy of its spring novel for review. The email said she did not have to post, but it asked for a tag if she did. In the first cut, Gia never says the book was free. The only sign of the publisher is a tag in the caption below the video.

Your question: Do Gia's viewers need to know the book was free, and how should she tell them?

Caio wants to watch the cut the way a stranger would, on a phone with the sound off. He wants to know whether the first three seconds say the book was free. Gia wants to keep her honest opinion in the video. She also wants viewers to know how she got the book.

The story: The edit that is almost done

Gia's review is sincere. She stayed up until 2 a.m. finishing the novel, and her video for BookTok, TikTok's book-recommending community, captures that. Caio, who edits video and has a habit of checking before posting anything that involves someone else, finishes the cut at 1:30 p.m. on Saturday. Gia is ready to publish.

Caio asks for one more pass, done the way most viewers would watch: once, on a phone, with the sound off. He is looking at the first three seconds. The question he wants answered is whether a stranger could tell that the book was free.

It was. Two weeks earlier, the publisher's publicity team emailed Gia to offer a free copy of its spring novel for review. The email said there was no obligation to post but asked for a tag if she did. The first cut opens with Gia saying she literally could not put the book down. There is no on-screen text, and the only trace of the publisher is "@publisher #booktok" in the caption below the video.

Gia's first defense is the tag. Caio's edit notes reply in four words: tag equals brand name, not relationship. Your role in this case is to be the viewer with the sound off who checks the first three seconds.

? Stop and think. Why does the case insist that the free copy does not make Gia's opinion false?

Pacing

Reading: about 5 min (743 words). Short on time: read it aloud together, pausing at each Stop and think.

? Stop and think

1. **After “The story: The edit that is almost done”:** Why does the case insist that the free copy does not make Gia's opinion false?
2. **After “Separating the opinion from the relationship”:** Apply the FTC's “clear and conspicuous” definition to the caption tag. Does the tag meet it?
3. **After “Rules, enforcement and evidence”:** Who should make sure disclosures are clear: creators, brands or platforms?

Separating the opinion from the relationship

Three terms keep the analysis clean. An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. Gia's review is an honest endorsement with an undisclosed material connection. The connection does not make her opinion false. It changes what a viewer needs to know to weigh it.

This is a framing problem, in the Case 1 sense of **framing**: choosing which parts of a situation a message brings forward. The first cut brings forward enthusiasm and leaves the relationship in a caption that many viewers never open. Caio's fix reorders the frame without deleting anything true. The video opens with a three-second line, "Quick heads-up, the publisher sent me this free," spoken and on screen, followed by Gia's hook.

The case also asks what a disclosure does not do. Gia had considered calling the novel the best book of the year and then asks herself, out of the ones she happened to read? She replaces the superlative with what she can support: two nights, could not put it down. A disclosure answers how she got the book. It does not make every claim in a review accurate.

Finally, the case tests the fix on an audience. Caio will show the cut to someone who did not help make it and ask whether the book was free. If they hesitate, the disclosure is not clear yet. A comment on another creator's review shows the cost of late discovery: "wait was this sponsored?? kind of feels like an ad now." The comment is about someone else, and nobody knows whether that review was sponsored, which is the point.

? **Stop and think.** Apply the FTC's "clear and conspicuous" definition to the caption tag. Does the tag meet it?

Rules, enforcement and evidence

The Federal Trade Commission's Endorsement Guides explain how federal law against deceptive practices applies to endorsements. The current text says material connections "can include monetary payment or the provision of free or discounted products ... to an endorser, regardless of whether the advertiser requires an endorsement in return" (16 CFR Part 255, as revised 2023). The same guides define "clear and conspicuous" as "difficult to miss (i.e., easily noticeable) and easily understandable by ordinary consumers." FTC staff guidance for video says the disclosure belongs in the video itself, ideally both spoken and on screen (Federal Trade Commission, updated December 3, 2024).

Enforcement has followed. In November 2023, the FTC warned two trade associations and a dozen influencers about posts promoting aspartame or sugar, stressing that disclosures belong in the video, not a caption (Federal Trade Commission, November 14, 2023).

This page continues page 148. The notes for both pages are on the sheet for page 148.

Rules, enforcement and evidence, continued

Trade coverage noted that sponsors share responsibility for clear disclosures (Food Dive, November 27, 2023).

Research on adolescents supports the rule's purpose. A study of 3,149 high school students in Taiwan found that full sponsorship disclosure helped teens recognize a post as an ad (Lin et al., PLOS One, May 27, 2026). Earlier work examined whether disclosures help younger and older teens notice when an influencer is paid (van Reijmersdal and van Dam, Journal of Youth and Adolescence, January 18, 2020).

 **Stop and think.** Who should make sure disclosures are clear: creators, brands or platforms?

Evidence A | Email

The publisher's email

"Hi Gia, we love your book reviews! We'd be glad to send you a free copy of our spring novel for review. There's no obligation to post, but if you do, we'd appreciate a tag. Best, the publicity team"

Look closely: What did the publisher give, and what did it ask for?

What it shows

➤ A free product with "no obligation to post," and a request for a tag.

What it leaves out

➤ Any other relationship between Gia and the publisher.

Evidence B | Video script and caption

Gia's first cut

Spoken: "You guys, I have to tell you about this book because I literally could not put it down!" On-screen text: none. Caption below the video: "@publisher #booktok"

Look closely: Where in this video would a viewer learn about the free copy?

What it shows

➤ A sincere endorsement. The only link to the publisher is a caption tag.

What it leaves out

➤ How many of Gia's viewers watch on mute or open the caption.

Evidence D | Viewer comment

A comment on another creator's review

Key idea: material connections

On your own Read the key idea and the FTC guide. Then answer the question in the box. About 15 minutes.

An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. Gia's video review is an endorsement, and her opinion in it is honest. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. The free copy from the publisher is a material connection. Knowing about it gives viewers context, but it does not prove that Gia's opinion is false.

The Federal Trade Commission (FTC) is a federal agency. Its Endorsement Guides explain how a federal law against deceptive practices applies to endorsements. A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. For a video, the FTC says the disclosure belongs in the video itself, ideally both spoken and on screen. A tag in the caption only names the brand, and it sits below the video.

A disclosure answers one question: how did Gia get the book? Viewers can still ask what supports her claims about the book itself. A clear disclosure does not make every claim in a review accurate. Do not accuse a real creator of hiding a sponsorship based on a guess.

Gia loves the novel the publisher sent her for free. Which change to her video makes the relationship clearest to viewers?

- ☐ A Tag the publisher in the caption.
- ☒ B Say and show at the start of the video that the publisher sent her the book for free.
- ☐ C Leave the video as it is, since the email said there was no obligation to post.

Why I chose it

➤ B. A names a brand, not a relationship, and C treats “no obligation” as no connection. Only B reaches a viewer on mute.

Introduction and lens question

🔗 Should influencer disclosure rules change? My team split the question into four lenses: consumer psychology, FTC policy, creator economics and teen media use. I studied teen media use. My question was whether disclosures help teens recognize a post as an ad. The case of Gia, a reviewer who got a free novel from a publisher, shows why this matters. Her first cut tagged the publisher in the caption but never said the book was free.

One findings paragraph

🔗 The strongest evidence comes from a 2026 study in PLOS One of 3,149 high school students in Taiwan. It found that full sponsorship disclosure helped teens recognize a post as an ad. That supports clear rules over vague ones. It does not show whether the same result holds for U.S. teens, or for a video watched on mute. A 2020 article in the Journal of Youth and Adolescence asks a related question. Do disclosures help younger and older teens notice when an influencer is being paid? Together, these sources suggest that the form of a disclosure matters, not only its presence. For a small creator like Gia, that points to a rule she can follow alone: say it and show it in the first seconds.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 15 minutes.

- 1 Would knowing the book was free change how much you trust Gia's review? Why or why not?

➤ It lowers trust only if she hides it. Said up front, the free copy is context. Found later, as in the viewer comment, it looks like concealment.

- 2 Some viewers may treat a review with a disclosure as just an ad. How could Gia keep their trust?

➤ By separating the relationship from the claim. An early disclosure plus claims she can support, like finishing it in two nights, answers both questions viewers have.

- 3 Who should make sure disclosures are clear: creators, brands or platforms?

➤ Mostly creators, because they control what viewers see first. The FTC guides apply to endorsers and advertisers, so brands share the duty.

My take

My claim: ____.

➤ Gia should disclose the free copy at 0:00, spoken and on screen, and cut claims she cannot support.

The best evidence is ____, because ____.

➤ The FTC text, because it counts a free product even when no post is required.

⌚ Pacing

✂ Short on time: 10 min. Discuss question 3 only; it leads into the recommendations.

💬 Say this

“Answer with a detail from the evidence, not with a real creator you follow.” — Post the question numbers and take one answer per question.

🔗 Stretch

- Ask what a disclosure checklist for a school media club would include, and who would check it.
- Going further: What does a viewer need to know about how Gia got the book? Plan one way to check that viewers understood the disclosure. A view count cannot tell you that.
- Going further: Design two versions of a sponsored post, with the disclosure in a different place in each. Keep the relationship equally clear in both versions.
- Going further: Find the line in the evidence that shows the book was free. Before you call any real post sponsored, look for that kind of evidence. Do not accuse a real creator based on a guess.
- Going further: The next time you see a recommendation, look for a disclosure in the video itself. Talk with a trusted adult before you accept any brand deal. If you post reviews, practice a clear spoken line, such as “They sent me this for free.”
- Analyze three real posts from brands' own accounts (not individual creators) for disclosure
- Compare FTC guidance with another country's advertising standards body

My take, continued

Someone who disagrees might say ____.

- ⦿ A disclosure makes an honest review look like an ad.

The limit of the evidence is ____.

🔑 No document shows how many of her viewers watch on mute.

I would change my mind if ____.

🔑 The publisher had not sent the book for free.

Overview

Students read a story in which Dec, who turns 18 in October, looks past the headline race on his sample ballot. He finds a school board race, a city council race and a transit bond. They compare the ballot with a creator’s voter guide that mixes facts with picks, and they read Vote.gov’s guidance for people 18 and under. They then write a personal checklist of official sources for registration, deadlines and their own sample ballot.

Before this case

Students should already be able to:

- write a focused research question
- evaluate a source’s credibility and relevance
- work in a team with assigned roles

Objectives

Students will be able to:

- research one lens on youth turnout accurately
- compare data, legal, educational and youth perspectives
- bring the lenses together in nonpartisan recommendations

Objectives, continued

- keep every recommendation legal and feasible for students under 18

Materials

- This chapter, one copy per student
- Evidence A, B, C and D
- Educator-approved sources on youth turnout, including the In the news sources
- Lens assignments, a data tracker and a presentation storyboard

Case 9: What is on your ballot, and where do you check?

Dec turns 18 before the election on November 3, 2026, and his feed covers only one race on his ballot.

On your own Read What happened. Underline the contests Mateo finds below the big race. About 5 minutes.

Your role: You're the one who finds Dec's official sample ballot before anyone tells him how to vote.
New skill: Check an official source for your own area.

Mateo and Gia work in a notebook at a café table.

What happened

It is Sunday at the library desk. Dec turns 18 in October, before the general election on November 3, 2026. His feed is full of posts about one big race. Mateo and Gia are helping him find out what else is on his ballot.

They look at a sample ballot for the November election. The front shows the big race from Dec's feed. The second page has more: a school board race, a city council seat and Measure T, a transit bond. Mateo notices that nobody is posting about Measure T.

A creator's voter guide is also going around. It says registration closes "the 14th," but it never names a state. It also tells people how to vote on the school board race and Measure T. Gia is writing a reminder for the group chat.

Mateo has his own problem. He may still be registered at his mom's address in New Bedford, Massachusetts. Dec says he does not need anyone to pick for him. He needs to know what is on his ballot and whether he is registered in time.

Your question: What is on Dec's ballot, and where should he check his own information?

⌚ Pacing

The story: One race in the feed, five on the ballot

Dec, a high school senior who drums on weekends and helps build theater sets, turns 18 in October. The general election is November 3, 2026. His social feed treats it as a single contest, one big race covered from every angle. On Sunday, at the library desk, Mateo and Gia help him find out what the feed leaves out.

The sample ballot for November is organized by level of government. Federal: U.S. Representative. State: State Senator and a Superior Court judge up for retention. Local: two seats on the Board of Education in District 3 and a City Council seat in Ward 5. And one measure: Measure T, a transit improvements bond. Mateo notices that the lower half of the ballot has almost no online presence. Nobody is posting about Measure T.

What is circulating instead is a creator's voter guide. It promises "all you need for November," announces that registration closes "the 14th" and tells readers to vote for Candidate B for school board and "yes, obviously" on Measure T. Dec's response sets the terms for the case. He does not need anyone picking for him. He needs to know what is on his ballot and whether he is registered in time.

Mateo has a problem of his own. He moved from New Bedford, Massachusetts, for college and may still be registered at his mom's address there. Different state, different ballot, different deadline. Your role is to find Dec's official sample ballot before anyone tells him how to vote.

1. **After "The story: One race in the feed, five on the ballot":** Why does the lower half of a ballot get so little attention online?
2. **After "Separating information from advocacy":** The guide's picks are not labeled as advocacy. How would labeling them change how Dec reads the guide?
3. **After "The constitutional floor and the state rules":** Anika is 16. How can she take part in this election before she can vote?

❓ **Stop and think.** Why does the lower half of a ballot get so little attention online?

Separating information from advocacy

A **sample ballot** is a preview of the contests and measures that will appear on your ballot. A **voter guide** is a document that explains or recommends choices in an election. The distinction matters because the two serve different purposes. The sample ballot tells you what you will decide. A guide tells you what someone thinks you should decide, and sometimes also what the choices mean.

The new skill here builds on two earlier ones. From Case 1, you go to the original source and treat each statement as a **claim** that can be checked. The guide's deadline is a claim with no jurisdiction attached, so it cannot be verified and should not be repeated. From Case 8, you ask about a **material connection**, a relationship with a brand, like payment or a free product, that viewers might not expect. Here, the guide leaves out who wrote and who funds it. That missing information does not make its picks wrong. It does mean they should be read as advocacy from an unnamed source.

A **jurisdiction** is the place or area where a particular government or rule has authority. Your address determines which contests appear on your ballot, which is why Mateo cannot assume his ballot matches Dec's. Jurisdiction also shapes research. A school board and a city council have different powers, so a voter who cares about buses should learn which body runs them before comparing candidates. Mateo starts Measure T with two questions: what it would pay for, and who runs the buses.

Registration is signing up with your election office so that you are on the list of people who can vote. Because rules and deadlines vary by state, Gia's group-chat reminder deliberately contains no deadline. It sends everyone to Vote.gov for their own registration and sample ballot, and it asks people not to post their addresses.

❓ **Stop and think.** The guide's picks are not labeled as advocacy. How would labeling them change how Dec reads the guide?

The constitutional floor and the state rules

The Twenty-Sixth Amendment protects the right of citizens 18 and older to vote (National Constitution Center, no date listed). The National WWII Museum traces its origins to the wartime argument that people old enough to fight were old enough to vote (The National WWII Museum, October 27, 2020). Above that floor, states set the details. Most allow preregistration before 18, and some let 17-year-olds vote in primaries if they will be 18 by the general election (Ballotpedia News, September 26, 2025). NPR has reported on state efforts to raise youth registration, including preregistration (NPR, August 6, 2023).

Turnout data show both engagement and variation. CIRCLE estimates that about 47 percent of 18- to 29-year-olds voted in 2024, with large differences by state (CIRCLE, April 14, 2025).

This page continues page 168. The notes for both pages are on the sheet for page 168.

The constitutional floor and the state rules, continued

Journalism codes draw the same line the case draws. The SPJ code tells journalists to “label advocacy and commentary” (SPJ Code of Ethics, September 6, 2014). The RTDNA code says journalism “empowers viewers, listeners and readers to make more informed decisions for themselves; it does not tell people what to believe or how to feel” (RTDNA Code of Ethics, June 11, 2015). A nonpartisan guide for Dec should meet that second standard.

 **Stop and think.** Anika is 16. How can she take part in this election before she can vote?

Introduction and lens question

🔗 Why do young people vote less in local elections, and what would change that? My team divided the question into four lenses: turnout data, registration rules, civic education and youth-led efforts. I studied registration rules. The case of Dec shows why they matter. He turns 18 in October, and his sample ballot has a school board race and a transit measure that his feed never mentions.

One findings paragraph

🔗 Ballotpedia reported on September 26, 2025, that most states let teenagers preregister before 18 and that some let them vote in primaries. NPR reported in 2023 that some states are trying to boost youth registration. CIRCLE found that about 47% of 18- to 29-year-olds voted in 2024, with big differences by state. None of these sources measures local turnout directly, so my team cannot claim that preregistration raises local turnout. What the sources support is narrower: rules differ by state, and so does youth participation. A recommendation for student council has to fit that. It should share official, state-specific information, stay nonpartisan and never ask anyone to post an address.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 15 minutes.

- 1 Which contest on the sample ballot could affect Dec's school or his bus?

➤ The school board race and Measure T. A voter guide that covered only the big race would skip both.

- 2 Mateo may still be registered in New Bedford. Why might his ballot differ from Dec's?

➤ Jurisdiction follows the registration address. A New Bedford registration puts Mateo in a different state, with different contests and deadlines.

- 3 Anika is 16. How can she be part of this election before she can vote?

➤ Preregistration, if her state allows it, and learning what the board decides. She can also help friends find official information without sharing anyone's address.

- 4 When could a voter guide that recommends choices help a first-time voter?

➤ When it names its author and labels its picks as advocacy. Then a first-time voter can use it as one view, after checking the ballot and deadlines.

- Going further: Plan an election reminder for your own group chat. Who might a group chat miss? Link to an official source so nobody has to trust a screenshot.
- Going further: Record a one-minute audio guide that tells listeners how to find their own sample ballot. Then write the same steps as a checklist. Check that both lead to the same official page.
- Going further: With a trusted adult, go to Vote.gov and choose your state or territory. Check the registration rules for your age, then find the sample ballot for your address. Never share your address or birthdate in a group chat.
- Find your county's sample ballot for the next election
- Research the history of the Twenty-Sixth Amendment

The best evidence is ____, because ____.

👉 The creator's guide, because its one fact names no state and its picks carry no label.

Someone who disagrees might say ____.

👉 Picks help first-time voters who have no time to research.

The limit of the evidence is ____.

👉 No document tells us Dec's state, so we cannot give him a deadline.

I would change my mind if ____.

👉 Dec had asked for recommendations instead of information.

Case 10: Whose job is it to fix the blocked route?

Content note

This case involves disability access on a city route. No student should share their own disability or health information, so keep the discussion on Sami’s trip.

This case explains general rules. It is not legal advice for your situation.

Overview

Students read a story in which construction blocks the curb ramp on Sami’s route to a city workshop, and the detour points to stairs. They examine the sign, the route map and the workshop flyer. They use the Department of Justice’s Title II guide to see which part of the ADA applies. They then audit the whole trip and write a message to the city’s ADA coordinator.

Before this case

Students should already be able to:

- write a focused research question
- annotate a source for its claim, evidence and perspective
- build an argument that answers a counterargument

Objectives

Students will be able to:

- write a focused research question from a stimulus packet

Objectives, continued

- compare the perspectives of the city, residents, contractors and taxpayers
- synthesize an original argument that treats people with disabilities as decision-makers
- name the limits of the evidence and the argument

Materials

- This chapter, one copy per student
- Evidence A, B and C
- The stimulus packet: the Department of Justice Title II page, one universal-design source and one article on transit access
- A perspective map and an argument outline

The task in this edition

Try it at your school

Find your city’s ADA contact.

- With a trusted adult, search your city’s website for “ADA coordinator” or “accessibility”
- Save how to report a blocked sidewalk or curb ramp (often 311 or a public works page)

Try it at your school, continued

- If you notice a barrier, note the location, date and time
- Ask the person affected what they want before reporting on their behalf

Who to ask: City ADA coordinator, 311 or public works, school transportation office for school routes

Safety: Don’t film or post people with disabilities without clear permission. Stay out of construction zones.

Case 10: Whose job is it to fix the blocked route?

A construction detour sends Sami toward stairs on her way to a city workshop, and her bus comes in 12 minutes.

On your own Read What happened. Underline where the detour sign points. About 5 minutes.

Your role: You're the one who writes down the corner, the time and the sign before Mateo posts. **New skill:** Report a problem to the office responsible.

Sami, Jordy and Mateo plan with picture cards on a whiteboard.

What happened

It is Tuesday, 4:05 p.m., at the corner of Elm Street and 4th Avenue. Sami is on her way to a free community workshop run by the city's parks department. It starts at 5. Sami uses a manual wheelchair, and her bus comes in 12 minutes. Mateo is with her.

The curb ramp on the northeast corner is blocked by construction fencing. A sign reads "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR." Its arrow points to a path that begins with a flight of stairs. That detour does not work for Sami.

Your question: Whose job is it to fix the blocked route, and what should Sami and Mateo tell the city?

Mateo already has the sign on video, and his first idea is to post it. Sami asks whether the video gets her on the bus. It does not, so Mateo puts the camera down. He checks the other corners for a ramp while Sami looks up the next bus stop.

Later, they want to report the corner to the city. Mateo wonders whether the city is breaking the Americans with Disabilities Act (ADA). First, they need to know what one video can show and which office is responsible.

Program access Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities.

In this case: The city runs the workshop. Program access asks whether Sami can reach and join the workshop, not only whether one ramp is open.

Barrier A barrier is something that blocks or limits a person from taking part.

En español: barrera

In this case: Fencing blocks the curb ramp at Elm Street and 4th Avenue, and the detour points to stairs. The flyer gives no way to request access.

ADA coordinator An ADA coordinator is the staff member a government names to handle disability access questions and complaints.

En español: coordinador de la ADA

In this case: Mateo plans to send the city's ADA coordinator the corner, the time, the sign and one question, if Sami agrees.

The story: The next twelve minutes

Sami studies design and photographs things most people walk past. She also uses a manual wheelchair and wants access planned before an event, not offered as an apology afterward. At 4:05 p.m. on a Tuesday, at the corner of Elm Street and 4th Avenue, she is on her way to a free parks department workshop that starts at 5. Her bus comes in 12 minutes.

The northeast curb ramp is fenced off for construction. The posted detour, "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR," points to a path that begins with stairs. Sami says it without drama. The sign says detour, the detour starts with stairs, so no.

Mateo is with Sami, and his reflex is a filmmaker's. He has the sign on video before he has thought about what the video is for. When he offers to post it, Sami asks whether that gets her on the bus. It does not. Mateo puts the camera down and checks the other corners for a ramp while Sami looks up the next stop. The order of priorities is the first lesson of the case. The person facing the barrier decides what the moment needs and what gets said about her. The report can wait an hour.

Your role is to write down the corner, the time and the sign before anyone posts, so that the later report rests on a clean record.

? Stop and think. Why does the case put Sami's bus ahead of Mateo's video?

⌚ Pacing

Reading: about 6 min (769 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: The next twelve minutes":** Why does the case put Sami's bus ahead of Mateo's video?
2. **After "Evidence, barriers and program access":** Program access applies to the program as a whole. How does that change what a report should ask?
3. **After "The law's origins and its limits":** What is the difference between recording a barrier and making Sami the content?

Evidence, barriers and program access

Mateo's next question is whether the city is violating the Americans with Disabilities Act. That is a **claim**, a statement that something is true that can be checked with evidence, and Case 1 taught you to match a claim to what the evidence can support. Mateo draws the limit himself. His video shows one fenced ramp and one sign at 4:05. It cannot show whether another way around exists, so he cannot call the whole route illegal.

The route map widens the frame. Sami's trip has five stages: home to the corner, the northeast ramp, the bus stop, the ride to the parks department building and the workshop entrance and room. The last stage has not been checked. The flyer adds a different kind of gap. It invites everyone, lists a front desk number and says nothing about accessible entrances or how to request access.

A **barrier** is something that blocks or limits a person from taking part. The fenced ramp is a physical barrier. The flyer's silence may be an informational one. **Program access** is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. The standard applies to the program, not to each building separately. It generally does not require every older building to be accessible, and a city can relocate a service to an accessible place. Existing buildings and new construction have different requirements. Access still covers the whole visit: finding the information, getting there, going in, taking part and leaving.

The last question is who can fix it. Case 9's term **jurisdiction**, the place or area where a particular government or rule has authority, points to the city, which both runs the workshop and manages the street. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. Mateo's planned report is short: the corner, the time, the sign and one question. Is there an accessible detour, and how long will the ramp be blocked? It goes out only if Sami agrees.

? **Stop and think.** Program access applies to the program as a whole. How does that change what a report should ask?

The law's origins and its limits

The Justice Department's guide for cities explains that Title II of the ADA covers state and local programs, including keeping curb ramps usable during street work (U.S. Department of Justice, updated February 24, 2020). The law's history explains its focus on steps and routes. On March 12, 1990, activists climbed the Capitol steps to show what stairs do to access, and the ADA was signed that July (HISTORY, July 24, 2020). Minnesota's disability council notes that the protest involved ADAPT, which began as Americans Disabled for Accessible Public Transit (Minnesota Governor's Council on Developmental Disabilities, March 1, 2015).

This page continues page 189. The notes for both pages are on the sheet for page 189.

The law's origins and its limits, continued

Enforcement is uneven. In New York, a North Bronx subway station is set to get elevators nearly a decade after an ADA lawsuit (THE CITY, October 3, 2025). Federal auditors found gaps in checking whether paratransit services for disabled riders actually work (GAO, November 15, 2012).

Professional codes speak to both people at the corner. The ASPA code asks public servants to “respect and assist all persons in their dealings with public organizations” (ASPA Code of Ethics, 2013). The NPPA code asks visual journalists to “be complete and provide context when photographing or recording subjects” (NPPA Code of Ethics, no date listed).

 **Stop and think.** What is the difference between recording a barrier and making Sami the content?

Key idea: program access

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 12 minutes.

Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. The U.S. Department of Justice explains that Title II of the ADA covers state and local government programs and services. Program access generally does not require every older building to be accessible. For example, a city can relocate a service to an accessible place. Existing buildings and new construction have different requirements.

Access covers the whole visit: finding the information, getting there, going in, taking part and leaving. A **barrier** is something that blocks or limits a person from taking part. Sami meets one barrier at the curb ramp. The workshop flyer could be another, because it gives no way to request access. The Justice Department's guide for cities also covers curb ramps during street work.

One video of one corner cannot show whether a city is following the law. It can show what happened, where and when. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. That office can say whether an accessible detour exists. Before you report a barrier someone else faces, ask them what they want said.

Mateo wants people to know about the blocked corner. What should he do?

- ☐ A Post the video with a caption saying the city is breaking the ADA.
- ☒ B Send the ADA coordinator the corner, the time, the detour sign and one question, if Sami agrees.
- ☐ C Skip the report if Sami finds another bus stop that works today.

On Tuesday at about 4 p.m., the curb ramp on the northeast corner was blocked, and the detour sign pointed to a route with stairs. My friend, who uses a wheelchair and agreed to be mentioned, could not reach the bus stop that way. Could you tell us whether there is an accessible detour during construction, how it's marked and how long the ramp will be blocked? We'd also like to know how to report this if it happens again. Individual written argument on “Who is responsible for an accessible city?”, using a stimulus packet.

Use: Stimulus: the case, DOJ Title II page, one universal-design source and one article on transit access.

You’ll make: Individual written argument, 1,200—1,500 words

Time: 250 minutes

- 1 Annotate each stimulus source: its claim, its evidence and whose perspective it gives.
- 2 Fill in the perspective map: city, residents, contractors and taxpayers.
- 3 Write a research question about who is responsible for an accessible city.
- 4 Draft your introduction and one body section on the Your draft page.
- 5 Write your full argument of 1,200 to 1,500 words in the online workspace or on paper.
- 6 Check your argument with the questions on the Check your work page.

Prefer typing? Scan to open the online workspace.

My research question

➤ Who should be responsible for keeping a city route usable while it is under construction?

City

➤ Runs the workshop and the sidewalk. Title II requires its program as a whole to be accessible.

Your draft

On your own Write your draft in the boxes. Use your planner from the page before. About 150 minutes.

Introduction

Who should be responsible for keeping a city route usable during construction? The question sounds technical, but it decides who can reach public life. In a case, a detour sign at Elm Street and 4th Avenue pointed Sami, who uses a wheelchair, toward a flight of stairs. The curb ramp was fenced off, and her bus was 12 minutes away. The city, its contractors, taxpayers and residents like Sami each hold part of the answer. This argument claims that the city must hold final responsibility. Residents with disabilities should help set and test the standards it uses.

One body section

The legal perspective starts with the Department of Justice. Its guide explains that under Title II, a city's programs as a whole must be accessible, although not every older facility must be. The guide also covers curb ramps during street and sidewalk work. That places the duty on the city, even when a contractor does the work. A transit perspective shows what happens when a duty is enforced late. THE CITY reported in 2025 that a North Bronx subway station would get elevators nearly a decade after an ADA lawsuit. A lawsuit can force a fix, but it arrives years later. A design perspective asks whose trip a route was planned for. Sami's route map answers part of that: stage 2 was blocked, and stage 5 had never been checked.

Answer key

What to notice in the sample:

1. States an original, arguable claim.
2. Treats disabled residents as decision-makers, the route's challenge.
3. Synthesizes a source into the argument instead of summarizing it.
4. Uses the case evidence within its limits.

How to assess: The argument is scored with an educator-adapted rubric modeled on the published Individual Written Argument expectations; it is practice, not a Performance Task 2 submission.

Proficient looks like:

- **Evidence:** Specific location, time and observation.
- **Reasoning:** Separates observation from legal question.
- **Audience & purpose:** Specific, answerable request to the right office.
- **Revision:** Adds specifics and removes the legal conclusion.

Questions to discuss

On your own Write a short answer to each question. Then finish My take. About 10 minutes.

1 Which barrier on Sami's trip would a photo miss?

➤ The unchecked workshop entrance and the flyer with no access information. Both sit outside the frame, and the flyer is a barrier in information, not concrete.

2 What is the difference between recording a barrier and making Sami the content?

➤ Recording documents the barrier for the office that can act. Making Sami the content puts her in public view without consent, and she said, "Me, ask first."

3 Construction is temporary, but the detour affects people now. What should a city do to keep routes usable during repairs?

➤ Plan an accessible detour as part of the construction, mark it on the sign and post a contact. The cost is time and money at each work site.

My take

My claim: ____.

➤ The city is responsible for the route to its own program, so the report should go to its ADA coordinator.

The best evidence is ____, because ____.

➤ The route map, because it shows access as a whole trip and marks what nobody has checked.

⌚ Pacing

Full chapter: 10 min.

✂ Short on time: 5 min. Discuss question 3 only; it leads into the argument.

💬 Say this

"Answer with a detail from the evidence, not a story about someone you know." — Post the question numbers and take one answer per question.

🔗 Stretch

- With an adult, find your city's ADA coordinator page and summarize how it takes complaints.
- Going further: Write a first description of Sami's trip. Then check one stage you skipped, such as the workshop entrance. Rewrite your description and note what changed.
- Going further: Suppose someone says the fix is to install a ramp. What problem does that fix assume? List two barriers from Sami's trip that a new ramp would not remove.
- Going further: Make a route guide for Sami's trip in two forms, such as a map and a numbered list. Check that each form works without color or a picture.
- Going further: With a trusted adult, search your city's website for "ADA coordinator" or "accessibility" pages. Save how to report a blocked sidewalk or curb ramp, often through 311 or a public works page. Ask the person affected before you report for them, and stay out of construction zones.
- Find your city's ADA coordinator page and summarize its complaint process
- Research how your city communicates construction detours

My take, continued

Someone who disagrees might say ____.

- Whoever put up the fence should fix it, not the city.

The limit of the evidence is ____.

- No document shows whether an accessible detour exists.

I would change my mind if ____.

On The city showed that an accessible detour was marked and working that day.

Case 11: Why are Jordy and Gia paid different rates?

Content note

This case explains general rules. It is not legal advice for your situation.

Overview

Students read a story in which Jordy and Gia work the same Saturday event. Jordy is paid \$16.50 an hour, and Gia is paid \$18.00. They compare the pay statements and the crew schedule, which lists Gia as shift lead, with federal pages on pay discrimination and on discussing wages. They then draft Jordy's message to the supervisor asking how the rates were set.

Before this case

Students should already be able to:

- annotate a source for its argument, evidence and perspective
- compare perspectives without ranking the people who hold them
- write an argument with a clear line of reasoning

Objectives

Students will be able to:

- frame a focused argument on whether pay transparency would make workplaces fairer
- compare worker, employer and historical perspectives from the stimulus packet

Objectives, continued

- keep the 2020 ruling, the players' argument and the 2022 settlement distinct
- synthesize the sources into an original argument

Materials

- This chapter, one copy per student
- The stimulus packet: the EEOC page, an article on pay-range laws, an employer perspective and NPR's soccer reporting
- A perspective map and an argument outline

Case 11: Why are Jordy and Gia paid different rates?

Jordy and Gia worked the same Saturday event, but Gia's pay rate is \$1.50 an hour higher, and Jordy wants to know why.

On your own Read What happened. Underline the two pay rates and the job title on the schedule. About 5 minutes.

Mateo attaches an arrival notice at the Common Room entrance. Gia points to the doorway, and Jordy checks what a visitor will see.

Your role: You're the one who lines up both shifts side by side before Jordy writes to Dana. **New skill:** Compare two cases on the same terms.

What happened

Jordy and Gia work event shifts for the same company. They both worked a Saturday event from 3 to 11 p.m. Both helped with setup and closing, and Jordy also ran the caption and audio check.

They were paid the following Friday. On Sunday afternoon, Jordy and Gia compare pay statements. Jordy's lists eight hours at \$16.50 an hour. Gia's lists \$18.00 an hour for the same event.

The crew schedule lists Gia as "shift lead," but it does not say what that job includes. That day, Gia opened up and handled one guest issue. She does not know if that explains the \$1.50 difference. Gia is fine with Jordy knowing her rate. But she does not want her statement posted.

Jordy wants to ask Dana, the supervisor, how rates are set. Jordy will not post anything before Dana answers.

The story: Two statements on a Sunday

Jordy is Black, nonbinary and hard of hearing, studies part time and works event shifts. Gia studies communication and works café shifts, and she also picks up event work for the same company as Jordy. On Saturday, they both worked a 3 to 11 p.m. event. The crew schedule shows the division of labor. Everyone did setup from 3 to 5 and closing from 10 to 11. Jordy ran the caption and audio check. Gia is listed as “shift lead,” with no description of what that means.

On Sunday, Jordy shares a pay statement with Gia: eight hours at \$16.50. Gia’s says \$18.00. Her first reaction is a guess, that the difference must be the shift lead title. Her second is honesty. She opened up and handled one guest issue, and she does not know whether that is why she is paid \$1.50 more. Gia only found out because Jordy showed her.

The friends agree on the facts and on a boundary. Gia is fine with Jordy knowing her rate but does not want her statement posted. Jordy will not post anything before asking Dana, the supervisor, how rates are set. Asked whether this is discrimination, Gia says she does not know yet. Maybe shift lead pays more. Ask Dana what it covers first.

Your role is to line up both shifts side by side before Jordy writes to Dana.

Stop and think. Gia’s first guess and her honest answer differ. Why is the honest answer more useful to Jordy?

⌚ Pacing

Reading: about 5 min (722 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: Two statements on a Sunday”:** Gia’s first guess and her honest answer differ. Why is the honest answer more useful to Jordy?
2. **After “Comparing on the same terms”:** The judge and the players disagreed about what to compare. How would each approach apply to Jordy and Gia?
3. **After “The legal frame and the soccer comparison”:** Why does the case treat Jordy’s choice to wait for Dana as belonging to Jordy alone?

Comparing on the same terms

The skill in this case is comparing two situations on the same terms before calling a difference unfair. It builds on Case 5, where you read a pay statement line by line. Jordy's statement shows 8.0 hours at \$16.50 and **gross pay** of \$132.00, the money earned before any taxes or other deductions are taken out.

A fair comparison lists every dimension the evidence covers. Hours, setup and closing are identical. Jordy had a technical duty, the caption and audio check. Gia had a title and two tasks attached to it. The documents leave three things unknown: what "shift lead" formally includes, whether it carries a set rate and how rates are set in general. **Compensation** is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can lawfully explain a difference. So can a mistake. The comparison does not reveal which.

That is why the case turns on a question rather than a verdict. Case 10's skill, reporting to the office responsible, points to Dana, who sets rates. Jordy's message can state the observation, list what Jordy knows for sure and ask what shift lead includes and how rates are set. It does not need to name Gia's rate. Jordy keeps the next decision too. If the answer does not make sense, Jordy decides what to do.

 **Stop and think.** The judge and the players disagreed about what to compare. How would each approach apply to Jordy and Gia?

The legal frame and the soccer comparison

Two federal laws limit the reasons employers can use to set pay. The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. The EEOC enforces both. Its youth pages list the kinds of compensation the laws cover and the ban on retaliation (EEOC, no date listed). The NLRB adds that most private-sector workers may discuss pay with coworkers, with or without a union (NLRB, no date listed). That right does not make Gia's statement Jordy's to share.

The U.S. women's national soccer team's case shows how much depends on the comparison. In 2020, a federal judge dismissed their equal pay claim, pointing to differences in contract structure (NPR, May 2, 2020). The players appealed, arguing that he had not compared rates of pay. In February 2022, they settled for \$24 million with a promise of equal pay rates (NPR, February 22, 2022), and the new terms were later written into signed contracts (PBS NewsHour, September 6, 2022). The settlement was an agreement between the parties, not a court finding.

Policy is moving toward more visible pay. New salary transparency laws put pay ranges in job ads, which makes differences easier to notice and ask about (NPR, January 3, 2023). HR professionals have their own standard.

Evidence A | Pay statement

Jordy's pay statement

Event crew, Saturday. Hours: 8.0 at \$16.50. Gross pay for the event: \$132.00.

Look closely: Multiply the hours by the rate. Does it match the gross pay?

What it shows

➤ Jordy's own record: 8.0 hours at \$16.50, and \$132.00 gross, which adds up.

What it leaves out

➤ The criteria behind the rate, and any comparison with other crew members.

Evidence B | Work schedule

The crew schedule

Saturday event, 3:00—11:00 p.m. Crew: Gia (shift lead), Jordy and two other crew members. Setup, 3:00—5:00: all crew. Caption and audio check: Jordy. Closing, 10:00—11:00: all crew.

Look closely: Circle "shift lead." Does the schedule say what that job includes?

What it shows

➤ A title difference (shift lead) and shared duties (setup, closing) at one event.

What it leaves out

➤ A job description for shift lead, and any written link between title and pay.

⌚ Pacing

Full chapter: 8 min.

Evidence C | Text messages

Jordy and Gia compare notes

Sunday, 1:15 p.m.

Gia: I'm fine with you knowing my rate. I just don't want my statement posted anywhere.

Jordy: Got it. Did you do anything different as shift lead?

Gia: I opened up and handled one guest issue. Honestly, I don't know if that's why. Let's ask Dana.

Look closely: What does Gia agree to share, and what does she ask Jordy not to do?

What it shows

🔍 **Consent with limits:** Jordy may know Gia's rate, but her statement stays unposted.

What it leaves out

🔍 **Whether one opening and one guest issue explain the rate, and what Dana may see.**

What is still missing from the evidence?

🔍 **What the shift-lead role officially involves and how rates are set, whether Gia's higher rate reflects experience or other criteria, how other crew members are paid, and whether the company has any written pay policy.**

Key idea: equal pay

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 12 minutes.

Before you can say why Jordy is paid less, you need to know what each job included. **Compensation** is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can explain a pay difference. So can a mistake. The pay statements show the rates, but they do not show how the rates were set.

Federal laws limit the reasons an employer can use to set pay. The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. Both laws apply to covered employers, and the Equal Employment Opportunity Commission (EEOC) enforces them. A legitimate reason, such as different job duties, can lawfully explain a pay difference.

Talking about pay is protected too. The National Labor Relations Board (NLRB) says most private-sector workers have a right to discuss pay with coworkers. That right holds with or without a union. It does not make Gia's pay statement Jordy's to share. Jordy can ask Dana how rates are set without naming Gia's rate.

Practice: choose a response

On your own Choose what Jordy should do first and explain why. Then fix the two marked lines. About 5 minutes.

Jordy's statement shows \$16.50 an hour. Gia's shows \$18.00 for the same Saturday event, and the schedule lists her as "shift lead." What should Jordy do first?

- ☐ A Tell the rest of the crew that Gia is paid more for the same work.
- ☒ B Compare what each of them did, find out what "shift lead" means and ask Dana how rates are set.
- ☐ C Let it go, because an employer can set any pay rate it chooses.

Why I chose it

➤ B. A treats an unexplained difference as a finding and exposes Gia's pay. C assumes employers face no limits, which the EEOC and NLRB pages contradict. B gathers the facts first.

Improve a draft

A student's first draft

Your task

On your own Read the steps. Fill in the planner boxes before you start your draft. About 60 minutes.

Individual written argument on “Would pay transparency make workplaces fairer?”, using a stimulus packet.

Use: Stimulus: EEOC page, one article on pay-range laws, one employer perspective and NPR’s reporting on the U.S. women’s soccer equal-pay case.

You’ll make: Individual written argument, 1,200–1,500 words

Time: 250 minutes

- 1 Annotate each stimulus source for its claim, its evidence and its perspective.
- 2 Fill in the perspective map: worker, employer and historical.
- 3 Write your research question and a one-sentence thesis in the planner.
- 4 Outline your argument, including the strongest counterargument.
- 5 Draft your introduction and one body paragraph on the Your draft page.
- 6 Write the full argument of 1,200 to 1,500 words in the online workspace or on paper.

Worker perspective

☛ Clear criteria let workers like Jordy check whether a gap reflects duties or bias.

Employer perspective

- Publishing rates costs time and can limit flexibility in setting pay.

Historical perspective

- The soccer dispute shows that what is compared, contract structure or rates of pay, can decide whether pay looks fair.

Thesis

Pay transparency makes workplaces fairer when it publishes criteria along with rates, because workers need to know what is compared.

Introduction, about 100 words

🔗 In a case, an event worker named Jordy finds a \$1.50 difference in pay for the same Saturday event. The only clue is a title on the schedule: “shift lead.” Questions like Jordy’s lead many people to ask whether pay transparency would make workplaces fairer. The EEOC explains that federal laws limit the reasons employers can use to set pay. The NLRB says most private-sector workers may discuss pay with coworkers. This argument claims that transparency makes workplaces fairer only when employers publish the criteria behind each rate.

One body paragraph, about 100 words

🔗 The U.S. women’s soccer dispute shows why criteria matter. In May 2020, a federal judge dismissed the players’ equal-pay claim, pointing to differences in how the two teams’ contracts were structured. The players appealed, arguing that he had not looked at rates of pay. In February 2022, the two sides reached a \$24 million settlement that included a promise of equal pay rates. A settlement is an agreement, not a court finding. The dispute turned on what to compare, so publishing pay alone would not have settled it.

- **Reasoning:** Asks for criteria before concluding.
- **Audience & purpose:** Specific question to the right person.
- **Revision:** Replaces conclusion with a question.

Questions to discuss

On your own Write a short answer to each question. Then complete each sentence frame below the questions. About 10 minutes.

- 1 What information could explain the \$1.50 difference, and what might challenge that explanation?

➤ Lead duties or more experience could be a legitimate factor, and a mistake is possible too. The explanation weakens if shift lead has no written duties, or if other crew earn more without the title.

- 2 Whose choice is it to make Jordy's pay public, and why?

➤ It is Jordy's choice, because the NLRB says most private-sector workers may discuss their own pay. Gia agreed to share her rate with Jordy, not to have her statement posted.

- 3 What answer from Dana would satisfy Jordy, and what answer would not?

➤ An answer that names specific criteria and applies them to both roles. An answer that cites "experience" with no detail, or refuses to explain, leaves Jordy's question open.

- 4 In the soccer case, the judge looked at contract structures, and the players wanted him to compare rates of pay. Why does that choice matter?

➤ The comparison shapes the answer. Contract structure and totals can make pay look fair while rates differ. The settlement did not decide which comparison was right.

💬 Say this

"Answer with a detail from a document, not a guess about the company." — Hear one answer per question, then ask who disagrees.

➤ Stretch

- Draft the pay-policy page the company could share: each role, its duties, its rate and how to qualify.
- Going further: Read the EEOC page on pay discrimination. Which law could apply to Jordy's question? Which facts would you need before saying the law was broken?
- Going further: What might make it hard for a worker like Jordy to ask about pay? Write one sentence that names Jordy's concern without claiming more than Jordy knows.
- Going further: Draw a timeline of the evidence, from the posted schedule to Jordy's question for Dana. Mark each open question on it. Then compare it with your message: which one makes the open questions easier to follow?
- Going further: When you start a job, ask for your pay rate and how it is set, in writing. Keep your own record of hours and duties. If something seems off, talk with a trusted adult or a school counselor.
- Find your state labor department's page on pay equity
- Research the EEOC's filing deadlines and how they vary by state

My take

My claim: ____.

👉 Jordy should ask Dana for the criteria behind both rates and keep Gia's statement out of it.

The best evidence is ____, because ____.

👉 The schedule, because it shows a title difference but no duties, so the title may or may not explain the gap.

Someone who disagrees might say ____.

👉 Asking first delays a formal complaint, and deadlines apply to formal complaints.

The limit of the evidence is ____.

👉 We have one statement and one schedule. We don't know the other crew members' rates or any pay policy.

I would change my mind if ____.

👉 Dana could not name any criteria, or a written policy showed shift lead pays the same as crew.

Content note

The news sources include 2026 student walkouts against federal immigration enforcement, which grew after federal agents fatally shot two people in Minneapolis. Preview them, and keep discussion on the legal questions in Anika’s case.

This case explains general rules. It is not legal advice for your situation.

Overview

Students read about Anika, a high school junior whose poster asks students to wear blue Thursday to keep the library open at lunch. They compare her poster, a posting policy and a group chat about a walkout with a summary of Tinker v. Des Moines (1969). They then compare the fact patterns and write two questions for a school contact about the posting policy.

Before this case

- Students should already be able to:
- write a focused research question
 - track sources and judge their credibility
 - work in a team with assigned roles

Objectives

- Students will be able to:
- frame a question about where schools should draw the line on student expression

Objectives, continued

- research one lens accurately: U.S. law, school climate, adolescent development or another country
- synthesize the team’s lenses into a model expression policy
- treat walkouts separately from quiet expression

Materials

- This chapter, one copy per student
- Tinker and Mahanoy summaries
- Educator-approved outside sources
- A lens assignment sheet, a source tracker and a policy-drafting template

The task in this edition

Task: Team inquiry: “Where should schools draw the line on student expression?” Members research one lens each (U.S. law, education research on school climate, adolescent development, one other country’s approach) and present a model expression policy.

Case 12: When can a school limit what students say?

Anika's poster asks her school to keep the library open at lunch, and now someone in her group chat suggests a walkout.

On your own Read What happened. Underline each plan: the poster, wearing blue and the walkout. About 5 minutes.

Anika records a voice memo while Mateo listens beside a phone on a small tripod.

Your role: You're the one who compares Tinker with each action before anyone says "can't touch us."

New skill: Apply a precedent by comparing fact patterns.

What happened

Anika is a junior at a public high school. She wants the school library to stay open at lunch. On Tuesday afternoon, she prints a poster that says "KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday."

Mateo did the photo and layout. He put a photo of the school's sign and logo across the top. The poster does not name Anika or any student group. The student handbook says posters need approval from the main office and the name of the student or group responsible.

Your question: How far does Tinker cover the poster, the wear-blue plan and the walkout, and what facts are missing?

On Wednesday night, someone in the group chat suggests a walkout if the school takes the poster down. The message says a 1969 Supreme Court case, *Tinker v. Des Moines*, means the school "can't touch us." Anika never suggested a walkout.

The story: Three actions, one slogan

Anika is a junior at a public high school who helps with theater sets and likes solving a problem herself before anyone jumps in. The problem she wants solved now is small and concrete. She wants the school library open at lunch. On Tuesday at 3:15 p.m., she prints a poster: “KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday.” Mateo designed it and, for visual impact, put a photo of the school’s sign and logo across the top. The poster names no student or group.

On Wednesday at 9:02 p.m., the group chat escalates. Someone writes, “If they take the poster down we walk out Thursday. Tinker says they can’t touch us.” Another person asks whether the plan is to wear blue and walk out. Anika answers that she never asked anyone to leave class.

Then both friends look at their own part. Anika checks page 14 of the handbook. Students may post on the boards outside the cafeteria and the library if the main office approves and the material shows the responsible student’s or group’s name. Her poster has no name, and she says that part is on her. Mateo realizes his photo changed the poster’s apparent author. With the school’s sign on top, it reads like an official announcement. Before reprinting, he plans to get office approval, add Anika’s name or her group’s and leave off the logo.

Your role is to compare Tinker with each action before anyone says “can’t touch us.”

Stop and think. Why does a precedent’s reach depend on how closely the facts match?

⌚ Pacing

Reading: about 5 min (744 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: Three actions, one slogan”:** Why does a precedent’s reach depend on how closely the facts match?
2. **After “From precedent to fact pattern”:** Build a fact pattern for the walkout. Which fact moves it furthest from Tinker?
3. **After “Courts, classrooms and current events”:** Mateo’s logo did not state anything false. Why can it still mislead?

From precedent to fact pattern

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. The chat's precedent is *Tinker v. Des Moines* (1969). Public-school students wore black armbands to protest the Vietnam War. They were suspended, and the Supreme Court ruled for them. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. The Court held that a mere fear of disruption was not enough.

Precedent works by analogy, so its reach depends on how closely a new situation matches. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. The skill here extends Case 11, where you compared two jobs on the same terms. Build a fact pattern for each action and set it beside *Tinker*'s. The wear-blue plan is silent, symbolic and done while attending class, which closely tracks the armbands. The walkout involves leaving class, so a separate attendance rule governs the conduct regardless of the message. The poster raises a question *Tinker* does not reach. With the school's logo and no student name, it may look like school speech, and schools have more control over speech that appears to come from the school.

Case 1's vocabulary sharpens the analysis. "*Tinker* says they can't touch us" is a **claim** that stretches a narrow holding into a blanket immunity. The logo is **framing**, choosing which parts of a situation a message brings forward, and it brings the institution forward as the speaker. Mateo's redesign corrects the frame.

 **Stop and think.** Build a fact pattern for the walkout. Which fact moves it furthest from *Tinker*?

Courts, classrooms and current events

The *Tinker* majority wrote that students do not "shed their constitutional rights to freedom of speech or expression at the schoolhouse gate" (Legal Information Institute, 1969). The federal judiciary's own teaching materials pair that holding with a walkout scenario, separating the message from the act of leaving class and noting the usual attendance consequences (U.S. Courts, no date listed).

The Court revisited student expression in *Mahanoy Area School District v. B. L.*, the case of a cheerleader's off-campus Snapchat post. The 8 to 1 decision protected the student but said schools may still regulate some off-campus speech, such as threats (Supreme Court of the United States, June 23, 2021). Analysts noted how one changed fact pattern changed the answer (EdSurge, June 23, 2021).

Recent walkouts show the attendance question in practice. In early 2026, students in Indiana and other states walked out to protest federal immigration enforcement. Some Indianapolis-area schools treated it as an unexcused absence, and one high school issued one-day suspensions (Chalkbeat Indiana, February 11, 2026). An Indiana public media guide separated speech rights, attendance rules and discipline in the same way this case does (WFYI, February 1, 2026).

Courts, classrooms and current events, continued

Designers carry a related duty. The AIGA standards ask designers to “represent messages in a clear manner” and to avoid “false, misleading and deceptive promotion” (AIGA Standards of Professional Practice, no date listed). Mateo’s logo was not a lie, but it misled about the speaker.

? Stop and think. Mateo’s logo did not state anything false. Why can it still mislead?

Evidence A | Poster

Anika's poster, first version

Printed Tuesday, 3:15 p.m. The poster reads "KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday." A photo of the school's sign and logo runs across the top. No student name or group appears anywhere on the poster.

Look closely: Cover the logo photo with your hand. Who seems to be speaking now?

What it shows

➤ A student message framed by the school's own sign and logo, with no byline.

What it leaves out

➤ Whether the office approved it, and whether anyone at school has objected.

Evidence B | Handbook policy

Student handbook, page 14

Students may post materials on the student bulletin boards outside the cafeteria and the library. Materials must be approved by the main office and must show the name of the student or group responsible.

Look closely: Underline the two requirements for every poster.

Key idea: precedent

On your own Read the key idea and the Professional standards card. Then answer the question in the box. About 12 minutes.

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. In *Tinker v. Des Moines* (1969), public-school students wore black armbands to protest the Vietnam War. The school suspended them, and the Supreme Court ruled for the students. The Court wrote that students do not “shed their constitutional rights to freedom of speech or expression at the schoolhouse gate.” It also said a mere fear of disruption was not enough to limit their expression.

A precedent guides a new case only as far as the facts match. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. Wearing blue on Thursday is quiet, like the armbands. A walkout is different, because students leave class. The school’s attendance rule covers that conduct, and *Tinker* does not settle it.

The poster raises another question. It shows the school’s sign and logo but no student name, so it may look like the school is speaking. Schools have more control over speech that looks like it comes from the school. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. Write a fact pattern for each action before you decide whether *Tinker* fits it.

Practice: choose a response

On your own Choose the best reply to the group chat and explain why. Then fix the two marked lines.
About 5 minutes.

Someone in Anika's group chat says, "Tinker means nobody can get in trouble for walking out of class." How should you respond?

- ☐ A Agree, because Tinker protected students who protested at school.
- ☐ B Disagree, because schools can make any rule they want about student speech.
- ☒ C Say that the message and leaving class are separate questions, then check the attendance rule.

Why I chose it

➤ C. A and B each turn Tinker into a slogan. C treats the message and the walkout as separate fact patterns and names the rule that governs the second one.

Improve a draft

A student's first draft

No, the school can't take it down because of Tinker v. Des Moines. In that case **1** the Supreme Court said students have free speech at school. The poster is just saying the library should stay open at lunch which is not hurting anybody. We even used a nice photo of the school sign so it looks professional. The principal would be breaking the law if he took it down. This is America and students have rights. Everyone should wear blue Thursday and **2** walk out if they try.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ Tinker protects speech unless it substantially disrupts school or invades others' rights.

Rewrite phrase 2

➤ Wear blue Thursday. A walkout is a separate question under the attendance rule.

- Read the options aloud.

🔥 Heat check

■ ■ □ **Medium.** Talk may turn to real protests at school.

Cool-down: Ask which fact in Anika's case decides it. Keep real students' names out.

➤ Answer key

A revised version: Tinker v. Des Moines (1969) says public-school students keep free-speech rights at school, unless their expression would substantially disrupt school or invade others' rights. Anika's message, keep the library open at lunch, and the plan to wear blue Thursday are quiet and look a lot like the armbands in Tinker. But two facts matter. The poster uses a school-logo photo, so it may look like an official announcement, which schools can regulate more. And walking out of class is conduct under an attendance rule, a different question. I'd remove the logo and ask the office which posting policy applies.

Findings from my lens, about 130 words

Under U.S. law, the starting point for public schools is *Tinker v. Des Moines* (1969). Students who wore black armbands to protest the Vietnam War were suspended, and the Supreme Court ruled for them. The Court said a mere fear of disruption was not enough to limit their expression. Schools have more control over speech that looks like it comes from the school. In *Mahanoy* (2021), the Court ruled 8–1 for a student’s off-campus post. It noted that schools may still act on some off-campus speech, such as threats. For our policy, the law suggests three lines: protect quiet expression, require student bylines on posters and treat leaving class as an attendance question.

Limits of my lens, about 40 words

My lens describes what public schools may do, not what they should do. It cannot tell us how a rule affects school climate. The other lenses on our team answer those questions.

How to assess: Reports and the presentation are scored with educator-adapted rubrics modeled on the published Performance Task 1 components; this is practice, not a submitted performance task.

Proficient looks like:

- **Evidence:** States Tinker's facts and substantial-disruption test.
- **Reasoning:** Compares facts and separates speech from conduct.
- **Audience & purpose:** Recommends a clear next question for the school.
- **Revision:** Adds the rule's limit and removes a legal conclusion.

One change I made after feedback

➤ I added “for public schools” to my findings, because Tinker does not bind private schools the same way.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

This page continues page 241. The notes for both pages are on the sheet for page 241.

Questions to discuss

On your own Write a short answer to each question. Then complete each sentence frame below the questions. About 15 minutes.

- 1 Which changed fact would make Tinker a weaker comparison for the wear-blue plan?

➤ A private school, since Tinker limits public schools. Or evidence of a substantial disruption, since Tinker's protection depends on its absence.

- 2 Why might it matter whether a poster looks like it comes from the school?

➤ Speech that looks school-sponsored gives the school more control (Hazelwood, 1988), so the logo could weaken Tinker's protection. It also misleads readers about who made it.

- 3 If the poster had Anika's name and no school logo, what would change?

➤ The poster would read as Anika's own expression, closer to Tinker than to school-sponsored speech. It would still need office approval, and the walkout question would not change.

My take

My claim: ____.

➤ Tinker fits the wear-blue plan, the poster needs a byline, and the walkout is a separate conduct question.

The best evidence is ____, because ____.

➤ Tinker's rule, because it protects expression unless it would substantially disrupt school.

- Rewrite the walkout message so it says only what the chat knows for sure.
- Going further: Read the U.S. Courts summary of Tinker. List two facts from Tinker and two facts from Anika's situation. Which difference matters most, and why?
- Going further: Write two headlines about the same walkout, one using the words "a protest" and one using "leaving class" instead. What does each headline make readers think the dispute is about?
- Going further: Write a short dialogue in which Anika explains to a friend why Tinker fits the wear-blue plan better than the walkout. Ask a reader to explain the difference back to you.
- Going further: Find the section of your student handbook on posting, dress or expression. Write down which spaces allow student posters and whether you need approval. Bring questions to a student council advisor before you plan any action.
- Read about Bethel v. Fraser (1986) and Morse v. Frederick (2007) and add them to the comparison
- Find your district's student expression or posting policy and compare it with Tinker

My take, continued

Someone who disagrees might say ____.

🔑 The logo makes the poster school speech, so the school can remove it.

The limit of the evidence is ____.

☛ We don't know the attendance policy or whether the school has objected to the poster yet.

I would change my mind if ____.

✶ The school removed the wear-blue poster because of its message, not the posting rule.

Case 13: Can the crew cut waste before it reaches the bin?

Overview

Students read a story in which Dec’s box of replacement parts arrives half full of packaging. The crew’s “recyclable” cups turn out to be on the city’s not-accepted list. They place items from the supply list on EPA’s waste hierarchy and check them against the city’s accepted-materials list. They then fill in an event materials sheet and propose one change with a way to measure it.

Before this case

Students should already be able to:

- annotate a source for its argument and perspective
- compare environmental, economic and equity perspectives
- write an argument with a clear line of reasoning

Objectives

Students will be able to:

- frame a focused argument on charging households by the amount of trash
- compare environmental, economic and equity perspectives from the stimulus packet
- address effects on lower-income households
- synthesize the sources into an original argument

Materials

- This chapter, one copy per student
- The stimulus packet: the EPA hierarchy, a pay-as-you-throw study, an equity critique and one city’s program description
- A perspective map and an argument outline

The task in this edition

Try it at your school

Change one thing before the next event.

- Pick one repeated item at a school event: cups, flyers, plates
- Count how many were used last time
- Check your city's recycling list and propose one reduction or reuse option
- Count again after the event and share results with the organizers

Who to ask: Student council, custodial or facilities staff, a science teacher, your city's sanitation or recycling office

Safety: Don't sort through trash with your hands; unsafe items can be hidden. Make sure changes don't leave out people who need disposable items.

Case 13: Can the crew cut waste before it reaches the bin?

The last Common Room screening used about 120 cups the city won't recycle, and a box of parts arrived half full of packaging.

On your own Read What happened. Underline the number of cups and what the city list says about them. About 5 minutes.

Anika, Dec and Sami react to a round of their tabletop game.

Your role: You're the one who counts the cups before and after the change. **New skill:** Count a starting point before you claim a change works.

What happened

It is Tuesday in the theater shop. Dec opens a box of replacement parts. Three separate orders of small LED connectors and switches, placed over one week, arrived together. About half of the box is plastic air pillows and foam.

The supply list from last Friday's screening at the Common Room shows a second problem. The crew used about 120 single-use cups. The cups are plastic-lined paper and labeled "recyclable." But the city's recycling list does not take plastic-lined paper cups.

Your question: What could the crew change before the next screening, and how would they know it worked?

Dec wants to fix how they order parts before anyone redoes the recycling sign. Anika tracks the parts and the budget. She agrees with Dec, but she wants numbers before anyone says a change saves money. Some people need a disposable cup or a straw, so any plan has to work for them too.

The story: Following waste upstream

Dec is a high school senior who drums, builds sets and is considering an electrical apprenticeship. He tends to follow a problem into the small places where it starts. On Tuesday, that place is the theater shop. Three orders of LED connectors and switches, placed separately over one week, have arrived together in one box. About half the box is plastic air pillows and foam.

Anika, a junior who tracks the crew's parts and budget, brings the second data point. The supply list from last Friday's screening at the Common Room shows about 120 single-use cups, plastic-lined paper and labeled "recyclable." The same list includes 80 paper plates, 150 printed flyers and 40 paper straws given out on request. The crew's first instinct might be a better recycling sign. Dec wants to start earlier, at the order form. Order parts together rather than each time one breaks, and ask the supplier about packaging.

Anika agrees and sets a standard. Nobody gets to say a change saves money without numbers, and right now the evidence is one box and a guess. She also sets a boundary. Some people need a disposable cup or a straw, so a plan that works only for most people does not work.

Your role is to count the cups before and after the change.

- Stop and think.** Why is a claim about one counted screening more trustworthy than a claim about "saving money"?

⌚ Pacing

Reading: about 5 min (717 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: Following waste upstream":** Why is a claim about one counted screening more trustworthy than a claim about "saving money"?
2. **After "Hierarchy, labels and baselines":** How does the Green Guides standard apply to the crew's cups?
3. **After "Evidence from agencies, reporters and schools":** How does "add more bins" define the problem differently from "order less packaging"?

Hierarchy, labels and baselines

Source reduction is preventing waste before it is created, for example by buying less packaging. **Reuse** is using an item again instead of throwing it away after one use. Both sit upstream of the bin. Dec's combined orders are source reduction, and borrowing the bookshop's washable cups is reuse.

The cup label raises a verification problem that Case 9 prepared you for. There, you learned to check the official source for your own area rather than a general claim. Here, the official source is the city's recycling list. It accepts metal cans, glass bottles and jars, rigid plastic bottles and containers and flattened cardboard. It excludes plastic-lined paper cups, plastic bags and film, foam and items labeled compostable. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. By that standard, the crew's "recyclable" cups are trash, and a switch to compostable cups would be too.

The new skill is counting a starting point before claiming a change works. The baseline is about 120 cups from one screening. The intervention is washable cups at the next one. The measurement includes cups used and left over, plus the costs reuse adds, water and someone's washing time. Case 4 supplies the frame for presenting the result. The plan is a **proposal**, a change that someone suggests and that has not been approved yet, and every option is a **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Anika's rule keeps the eventual claim honest. Whatever the crew reports should be as small as one counted screening.

 **Stop and think.** How does the Green Guides standard apply to the crew's cups?

Evidence from agencies, reporters and schools

The EPA's materials management hierarchy ranks source reduction and reuse first, followed by recycling and composting, energy recovery, and treatment and disposal. It also notes that no single approach suits every material or situation (EPA, updated December 19, 2025). For food, the EPA's Wasted Food Scale likewise ranks prevention above composting or recycling (EPA, updated September 16, 2026). An NPR investigation reported that less than 10 percent of plastic has ever been recycled (NPR, September 11, 2020).

Labels are regulated for a reason. The FTC's Green Guides say a product or package "should not be marketed as recyclable unless it can be collected, separated, or otherwise recovered from the waste stream through an established recycling program" (16 CFR Part 260, 2012).

Access belongs in the same analysis. When Starbucks announced its straw phase-out in 2018, it said a sippable lid could mean a billion fewer straws a year (NPR, July 9, 2018). Two days later, NPR reported that some people with disabilities need flexible plastic straws and that advocates saw little awareness of the exemption in Seattle's ban (NPR, July 11, 2018). Schools offer models that measure first.

This page continues page 249. The notes for both pages are on the sheet for page 249.

Evidence from agencies, reporters and schools, continued

New Jersey schools have used waste audits, share tables and reusable trays to cut waste before it reaches the bin (New Jersey School Boards Association, October 15, 2025). Each of those programs starts the way Anika does, by counting what is thrown away now.

? Stop and think. How does “add more bins” define the problem differently from “order less packaging”?

Evidence A | Supply list

Screening supply list, last Friday

Single-use cups (plastic-lined paper, labeled “recyclable”): about 120. Paper plates: 80. Printed flyers: 150. Paper straws, on request: 40. Folding chairs: borrowed from the bookshop.

Look closely: Which item did the crew use the most? Could it be reused?

What it shows

Evidence B | Delivery

The parts order

Delivered Tuesday to the theater shop. Three separate orders of small LED connectors and switches, placed over one week, arrived together. They came in one full box, about half of it plastic air pillows and foam around tiny parts.

Look closely: How many orders came in this one box? Why does that matter?

What it shows

➤ Waste made upstream: three orders in a week, one box, about half air pillows and foam.

What it leaves out

Key idea: source reduction

On your own Read the key idea and the Professional standards card. Then answer the question in the box. About 12 minutes.

Source reduction is preventing waste before it is created, for example by buying less packaging. The Environmental Protection Agency (EPA) ranks ways to handle waste. Source reduction and reuse come first. Recycling and composting come next, then energy recovery, then treatment and disposal. The EPA also notes that no single approach fits every item or situation.

Reuse is using an item again instead of throwing it away after one use. Borrowing washable cups from the bookshop is one example. Reuse has costs too. Washing takes water and someone's time, so a fair comparison counts those costs along with the cups.

A “recyclable” label does not tell you where an item will go. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. The crew's cups say “recyclable,” but their city's list does not take plastic-lined paper cups. The list does not take items labeled compostable either. So the crew has to check the list before choosing any new cup.

FTC Green Guides (16 CFR Part 260): § 260.12 Recyclable claims

“A product or package should not be marketed as recyclable unless it can be collected, separated, or otherwise recovered from the waste stream through an established recycling program”

In plain words: FTC guidance says a company should call a product recyclable only when recycling programs can collect and process it.

Question: The crew's city rejects plastic-lined paper cups. What else must you know before saying the “recyclable” label breaks the guide?

Your answer

I would need to know ____, because the guide ____.

➤ I would need to know whether established programs collect these cups and who put the label on them, because the guide is written for marketers.

Practice: choose a response

On your own Choose the plan the crew should try and explain why. Then fix the two marked lines. About 5 minutes.

The last screening used about 120 single-use cups, and the city's recycling list does not take that type. Which plan should the crew try for the next screening?

☒ **A** Compare a washable-cup option, washing time, cost, access and the city list, then test one change.

☐ **B** Buy a different cup labeled "recyclable" and put up a clearer recycling sign.

☐ **C** Stop offering disposable cups and straws, and ask everyone to bring their own.

Why I chose it

➤ **A. B trusts a label the city list already contradicts, and C turns one goal into a rule that ignores access. A weighs those limits before testing one change.**

Improve a draft

A student's first draft

We should make the screening zero waste. Everyone should bring their own cup and we'll **1** ban all plastic. We can also put up posters that say "save the planet" so people remember to recycle. Recycling is the best thing you can do for the environment. This will be easy and **2** it will save money too. Last screening there were cups everywhere and the bins were overflowing by the end of the night. People will love it once they get used to it. Let's start next week!

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ **We will test washable cups and keep single-use cups and flexible straws on request.**

Rewrite phrase 2

➤ **We will compare cup counts and washing costs after the event before we claim any savings.**

➤ Answer key

A revised version: For the next screening, we propose one change: cups. Last time we used about 120 single-use cups, and our city's recycling list doesn't accept that type. We'll borrow 60 washable cups from the bookshop, keep 40 compostable cups for anyone who needs one, and ask Rafa and Jordy to run a quick wash station. Flexible straws and single-use cups stay available on request. We'll count cups used and leftover supplies after the event and compare with last time before deciding whether to keep the change. We're not claiming it saves money yet.

Introduction, about 100 words

➤ Cities spend public money collecting and managing waste, and the costs of landfills and pollution do not land evenly on every neighborhood. One proposed answer is to charge each household by how much trash it throws out. Supporters argue that a visible fee pushes people to reduce waste before it reaches the curb. Critics argue that the fee falls hardest on households with the least room to change. This argument claims that cities should charge by volume only when the program protects lower-income households.

One body paragraph, about 90 words

➤ The equity objection is the strongest challenge to volume-based fees. Larger or lower-income households may produce more trash and have less money to absorb a new charge. A fee that cuts total waste could still shift costs onto those households. There is also a measurement problem. Less trash at the curb could mean less waste, or it could mean trash moved elsewhere through illegal dumping. A city that adopts the fee should track both outcomes, so it can tell reduced waste from displaced waste.

Misconception: Arguments summarize the stimulus in order. **Listen for:** “Source 1 says... Source 2 says...” **Then:** Organize by claim, not by source. Each paragraph answers one part of the question.

📄 Support

- The overprinted sample holds the introduction and one body paragraph. Full arguments run 1,200 to 1,500 words.

➤ Answer key

What to notice in the sample:

1. Opens with the equity stakes.
2. States an original, qualified claim.
3. Synthesizes the equity and measurement concerns.

How to assess: The argument is scored with an educator-adapted rubric modeled on the published Individual Written Argument expectations; it is practice, not a Performance Task 2 submission.

Proficient looks like:

- **Evidence:** Uses quantities and local rules.
- **Reasoning:** Applies the hierarchy and names a trade-off.
- **Audience & purpose:** Specific change organizers can do.
- **Revision:** Narrows to a measurable change.

Questions to discuss

On your own Write a short answer to each question. Then complete each sentence frame below the questions. About 10 minutes.

- 1 Could a change that reduces waste create an access problem for someone, and how would you find out?

➤ Yes. The straw stories show that a waste rule can leave out people with disabilities, and that an exemption helps only if people know about it. The crew could offer items on request and say so.

- 2 How does “add more bins” define the problem differently from “order less packaging”?

➤ More bins assume the waste is unavoidable and needs better sorting, but the city would still reject the cups. Less packaging places the problem at the order form, where source reduction happens.

- 3 What would the crew need to count before saying a change saves money?

➤ A before-and-after count of cups, the cost of borrowing and washing, and a stated boundary. Without a boundary, a savings claim can hide costs nobody counted.

My take

My claim: ____.

➤ The crew should try one reuse change, keep disposables on request and report only what it counted.

The best evidence is ____, because ____.

➤ The city list, because it shows a label cannot tell you what the local program accepts.

💬 Say this

“Use a number or a document in every answer.” — Hear one answer per question, then ask for a different view.

🔗 Stretch

- Design the count sheet for the next screening: items, numbers before and after, and new costs.
- Going further: Compare two plans for the theater shop: order all the parts at once, or keep ordering when a part breaks. What problem does each plan solve? What new problem could each one create?
- Going further: List who would have to change a routine if the crew switched to washable cups. Write a two-sentence note to them. Say what the crew will count to show whether the change worked.
- Going further: Write two event plans for the next screening and a small test for each. After the tests, explain which plan you would improve and which you would drop.
- Going further: Pick one item that appears at many school events, such as cups, flyers or plates. Count how many were used last time, and check your city’s recycling list. Do not sort through trash with your hands.
- Find your city’s recycling rules and compare with a neighboring city
- Research where your area’s trash goes after pickup

My take, continued

Someone who disagrees might say ____.

Combining parts orders would cut more waste than changing cups.

The limit of the evidence is ____.

☛ We have one supply list and one box. We don't know washing costs or where the city's trash goes.

I would change my mind if ____.

☐ A count showed that washable cups added more cost than the cups they replaced.

Content note

This case explains general rules. It is not legal advice for your situation.

Overview

Students read a story in which Caio’s film recap uses a sampled track and a six-second TikTok clip. Mateo wants to post it tonight with a credit in the caption. They separate attribution, permission and fair use, then apply the U.S. Copyright Office’s four fair-use factors to the crew’s planned use. They then complete a rights log and propose a licensed or original alternative.

Before this case

Students should already be able to:

- write a focused research question
- evaluate a source’s credibility
- work in a team with assigned roles

Objectives

Students will be able to:

- research one lens on copyright and young creators
- represent artists’ and remixers’ perspectives fairly
- synthesize U.S.-specific guidance for student filmmakers
- state the limits of that guidance without promising legal outcomes

Materials

- This chapter, one copy per student
- Educator-approved sources for each lens

Start a rights log for your next project.

- List every outside clip, image, sound and quote before you edit
- Record the source and the license or permission for each
- Use your school’s licensed media or openly licensed libraries when you can
- Ask your media teacher or librarian about uses you’re unsure of

Who to ask: School librarian or media specialist, a media or film teacher, a college library’s copyright help page

Safety: Don’t share other people’s creative work as your own. If you get a takedown notice, talk with a trusted adult before responding.

Case 14: Does giving credit let the crew use the song?

Mateo wants to post the crew's film tonight and credit the song's artist, but Caio wants to check the license first.

On your own Read What happened and underline the two pieces of the film that the crew did not make. About 5 minutes.

Caio, Mateo and Rafa laugh as they look at photos on a small digital camera.

Your role: You're the one who fills in the rights log before the film goes up. **New skill:** Check permission, not just credit.

What happened

It is Friday night, and Caio, 24, is editing the crew's festival film. The film is a short recap made from crew footage and interviews. At 9:40 p.m., he saves a rough cut. For 20 seconds, a released song plays under the setup montage. Caio pitched the song up slightly, and the song sets the mood for the whole scene.

The cut borrows one more piece. From 1:40 to 1:46, it shows a six-second clip downloaded from a TikTok post. That post used Stitch, TikTok's remix tool. The crew did not make the song or the clip.

At 10:02 p.m., Mateo texts the crew chat: "We'll credit them in the caption. Post tonight?" He wants the film online tonight. Caio asks what the credit gets them, and Mateo does not have an answer. Caio wants to check the license before they post.

Your question: Does a credit give the crew permission to use the song, and what should they do before they post?

Attribution Attribution is naming the person who made a work, such as a song, a photo or a video.

En español: atribución

In this case: Mateo's plan, "We'll credit them in the caption," would name the artist. It answers who made the song, not whether the crew may use it.

License A license is permission from a rights holder to use a work under specific terms.

En español: licencia

In this case: The rights log says "permission unknown" for both borrowed pieces. A license from each owner would fill in that column.

Fair use Fair use is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors.

En español: uso justo

In this case: The crew would weigh the four factors for 20 seconds of a released song used as background mood. No number of seconds settles it.

🔑 Answer key

Any first guess is fine. Students return to it on the My take page.

Before you look at the evidence, do you think a credit in the caption lets the crew use the song?

➤ My first guess is that it depends on the license, because naming an artist does not show that the owner agreed.

The story: Post tonight, or check first?

At 9:40 on a Friday night, Caio, 24, saves a rough cut of the crew's festival film. The recap mixes crew footage and interviews, and one choice makes it work. From 0:18 to 0:38, a released song, pitched up slightly, plays under the setup montage. A second borrowed element sits later in the timeline. From 1:40 to 1:46, the cut includes six seconds downloaded from a TikTok post that used Stitch, the app's remix tool. Neither piece belongs to the crew.

Mateo, who likes turning "we should" into a plan, wants the film online that night. At 10:02 p.m., he proposes a solution that feels responsible: credit the artists in the caption and post. Caio's answer is a single question. What does the credit get them? Mateo admits he does not know.

By the next day, Mateo has worked out why his instinct was wrong. He remembers when Universal Music Group's deal with TikTok ran out and videos went silent. Nobody had forgotten to credit Taylor Swift. He also rethinks the clip. He had figured Stitch covered it, but Stitch is for TikTok, and this is a festival film.

Your role is to fill in the rights log before the film goes up.

Stop and think. Mateo's first plan felt responsible. What did it get right, and what did it miss?

⌚ Pacing

Reading: about 5 min (705 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: Post tonight, or check first?":** Mateo's first plan felt responsible. What did it get right, and what did it miss?
2. **After "Separating attribution, license and fair use":** Apply the four fair-use factors to the six-second TikTok clip. Which factor is hardest to judge?
3. **After "Licensing, courts and professional norms":** Why might a platform's license for a clip not follow the clip to a festival screening?

Separating attribution, license and fair use

Attribution is naming the person who made a work, such as a song, a photo or a video. A **license** is permission from a rights holder to use a work under specific terms. The two answer different questions, “Who made this?” and “Did the owner say yes to this use?” A caption credit supplies the first and not the second. Case 8’s **disclosure**, a clear statement that tells people about a relationship or fact they would want to know, is a useful comparison. Like attribution, disclosure makes a post more honest. Neither one grants rights.

The rights log applies the Case 1 skill of tracing material to its source. For each element, it records who made it, where it came from, the permission or license and the date. Both current rows read “permission unknown.” The log also shows what the crew does not yet know, including what the TikTok creator agreed to when posting.

Without a license, the remaining path is **fair use**, a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The factors are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market. The analysis resembles Case 12’s reasoning from precedent: you set the facts of your use against a standard and weigh each factor, rather than looking for a single rule. For the song, the purpose is setting a mood in a recap, the original is a released creative recording, the amount is 20 seconds and the effect on the market is uncertain. Caio’s pitch change does not transform the purpose. No duration is automatically safe, and a short excerpt can weigh heavily if it is the most recognizable part.

Caio’s backup plans take the question off the table: a library track with clear terms, or a drum loop that Dec records and the crew owns. The film goes up Sunday instead of Friday.

 **Stop and think.** Apply the four fair-use factors to the six-second TikTok clip. Which factor is hardest to judge?

Licensing, courts and professional norms

The UMG and TikTok dispute showed how platform licenses work. When the deal expired in February 2024, videos using UMG artists’ songs went silent (NPR, February 1, 2024). Researchers later studied what the roughly three-month blackout meant for creators, artists and the platform (Harvard Business School Working Knowledge, March 5, 2025).

The Supreme Court’s 2023 decision in the Warhol case shows how the purpose factor works. The Court ruled against the Andy Warhol Foundation, finding that Warhol’s version of a photograph was not fair use when it served the same purpose as the original (NPR, May 18, 2023). The Copyright Office publishes a one-page summary of the facts and holding (U.S. Copyright Office, 2023). Its Fair Use Index stresses that fair use is decided case by case and that a use for education is not automatically fair (U.S. Copyright Office, updated July 2026).

This page continues page 270. The notes for both pages are on the sheet for page 270.

Licensing, courts and professional norms, continued

News organizations treat the issue as an ethical one too. The RTDNA code states, “Using someone else’s work without attribution or permission is plagiarism” (RTDNA Code of Ethics, June 11, 2015).

? Stop and think. Why might a platform’s license for a clip not follow the clip to a festival screening?

Key idea: fair use

On your own Read the key idea and the code of ethics, then answer the question in the box. About 15 minutes.

Credit and permission answer different questions. **Attribution** is naming the person who made a work, such as a song, a photo or a video. It answers the question “Who made this?” A **license** is permission from a rights holder to use a work under specific terms. It answers another question: “Did the owner say yes to this use?” Mateo’s caption would give attribution. It would not give the crew a license.

Without a license, the crew could ask whether the use is fair use. **Fair use** is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The U.S. Copyright Office names the four factors. They are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market. No number of seconds is automatically safe. Even a short part can count against fair use if it is the most recognizable part of the song.

Platform tools come with their own limits. Stitch lets people remix another person’s video inside TikTok. That permission does not automatically cover a downloaded clip in a film shown somewhere else. Using music the crew records, or a track with a clear license, can avoid the fair-use question. Caio’s two backup plans follow this idea: a library track with clear terms, or a drum loop that Dec records.

Practice: choose a response

On your own Choose the plan you would pick and explain why, then fix the two marked lines. About 8 minutes.

Caio's cut uses about 20 seconds of a released song as background mood for the crew's festival film. Mateo texts, "We'll credit them in the caption. Post tonight?" Which plan should the crew choose?

- ☐ A Credit the artist in the caption and post tonight.
- ☒ B Pause the upload. Check the track's license, and swap in licensed or original music if the license does not cover this use.
- ☐ C Cut the song to ten seconds, since short clips are fair use.

Why I chose it

➡ B. A answers only who made the song, and C rests on a myth about seconds. B checks the license and plans licensed or original music if it fails.

Improve a draft

A student's first draft

We're good to post! ① We only used like 20 seconds of the song and we're putting the artist's name in the caption so they get credit. Plus it's not like we're making money off it, it's just for our page. ② Everyone uses songs like this on TikTok anyway so it's fine. We even changed the pitch a little so it's basically our own version now, and the whole cut is under two minutes. If they don't like it they can just ask us to take it down.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

✎ We used 20 seconds for mood, with no commentary. Length alone does not decide fair use.

Rewrite phrase 2

✎ In-app licenses cover in-app sounds, not a downloaded track at a festival.

Notes

This page continues page 278.

✎ Answer key

A revised version: Plan: we're pausing the upload tonight. We used about 20 seconds of the song as background mood, which isn't commentary on the song, and crediting the artist doesn't give us permission. We'll try two options. First, Caio will check whether the track has a license that covers this use. If not, we'll swap in a track from a library with a clear license, or Dec will record a short drum loop we own. We'll keep a rights log with the source, license and date for every clip and sound, then post by Sunday.

Other notes on the draft:

- “putting the artist’s name in the caption” Good practice, but credit isn’t permission.
- “it’s not like we’re making money off it” Noncommercial use is one consideration, not an automatic yes.
- “they can just ask us to take it down” That puts the risk on the artist. Check first.

First draft: your report's opening

Young creators build on songs, clips and images every day. Many believe that credit or a short clip makes any use fine. My lens is platform licensing. In February 2024, Universal Music Group's licensing deal with TikTok expired, and videos using its artists' songs went silent. That event shows that permission inside an app depends on a license the creator does not control. This report asks how platform licenses shape what young creators can post.

First draft: one guidance point for student filmmakers

Guidance point: treat in-app permission as staying in the app. A Stitch that works inside TikTok may not cover the same clip in a film shown elsewhere. Before a festival screening, record each borrowed piece in a rights log with its source and license. If a piece has no license for the new use, replace it with licensed or original material. Questions to discuss

On your own Write a short answer to each question, then complete each sentence frame. About 15 minutes.

- 1** Caio pitched the song up slightly. Does changing a song make it a new work? Why or why not?

✎ Not by itself. The pitch-shifted song stays recognizable and does the same job, setting a mood. The crew adds no commentary on the song.

- 2** Mateo says the TikTok clip goes in the rights log as “unknown.” What would the crew need to find out to fill in that row?

✎ The creator, the terms the clip was posted under and whether those terms reach a festival screening. If not, they need written permission or a new clip.

- 3** Suppose a student used the same song in a video for class. What changes if that video becomes a public post?

✎ The audience and the market change. A public post can replace a license the artist might sell, and the platform’s terms start to apply.

My take

My claim: ____.

✎ The crew should hold the film until each borrowed piece has a license or is replaced.

The best evidence is ____, because ____.

✎ The rights log, because it records two borrowed pieces and no permission for either.

- Going further: Sketch two short storyboards of the setup montage: one with the sampled song and one with licensed or original music. Compare what each version makes viewers feel and what each one needs before it can be posted.
- Going further: Choose a sound or clip you have seen reused in several online videos. Trace it back to the earliest post you can find. Write a credit line for it, and note whether that post says anything about permission.
- Going further: Before you edit your next video or slideshow, list every outside clip, image, sound and quote. Record the source and the license or permission for each one. Ask your school librarian or media teacher about any use you are unsure of.

Your role: You're the one who checks each factor of the test before Rafa says yes. **New skill:** Apply a legal test factor by factor.

What happened

Rafa, 18, is a first-year college student who commutes to class and helps at his family's shop. In April, a studio posted a listing on the campus job board for a "Summer Editing Intern." The internship is unpaid. The listing says the intern will run the customer inbox all summer. Rafa reads it twice, looking for the editing.

On Tuesday at 11:20 a.m., the studio answers Rafa's message. The email says college credit makes it "totally legal" not to pay him. It also asks him to start right after finals.

At lunch, Rafa talks it over with Gia, who fits café shifts around her classes. Gia asks whether the studio paid someone to run the inbox last year. Rafa says the studio's assistant ran it. Taking the internship would also cost Rafa paid shifts at the shop. He has not said yes yet.

The story: Totally legal?

Rafa is 18, a first-year college student who commutes and helps at his family's shop. In April, a studio lists a "Summer Editing Intern (unpaid)" position on the campus job board. The copy is upbeat: a fast-paced studio, great exposure to the industry, college credit available. The duties are narrower. The intern will run the customer inbox all summer and help with client files. Rafa reads the listing twice, looking for the editing, and does not find it.

When he writes to ask, the studio's reply on Tuesday at 11:20 a.m. offers a legal conclusion. Since interns get college credit, it says, it is "totally legal" not to pay him. It also asks him to start right after finals.

Rafa does what the crew has learned to do. He checks. On the train, he finds that college credit is one factor among seven. At lunch with Gia, the facts get sharper. Gia asks whether the studio paid someone to do the inbox last year, and Rafa confirms that its assistant did. Gia counts the cost: shifts at the shop, the commute and a summer without pay. She also catches herself. She almost told him to take it because it would look good, and she realizes that is easy to say when she is not the one giving up the summer. When Rafa asks whether she can tell him it is illegal, she says no. She does not know that. She can tell him which questions the studio has not answered yet.

Your role is to check each factor of the test before Rafa says yes.

Pacing

Reading: about 6 min (752 words). Short on time: read it aloud together, pausing at each Stop and think.

Stop and think

1. **After "The story: Totally legal?":** Gia says she cannot tell Rafa the internship is illegal. Why is that the more accurate answer?
2. **After "Reasoning with a multi-factor test":** Which factor has the strongest evidence, and which has none? What does that imbalance mean?
3. **After "The courts, the data and the profession":** If Rafa's school grants credit, does that settle whether the studio should pay him? Why or why not?

❓ **Stop and think.** Gia says she cannot tell Rafa the internship is illegal. Why is that the more accurate answer?

Reasoning with a multi-factor test

The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. An intern who is an employee must be paid under the **Fair Labor Standards Act**, a federal law that sets minimum wage and overtime rules for most workers. The seven factors include training, links to coursework or **academic credit**, the academic calendar and the length of the learning period. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor is whether the intern's work complements paid employees' work or displaces it.

The new skill is applying a legal test factor by factor. It extends Case 12, where you compared fact patterns to a precedent, and Case 11, where you compared two situations on the same terms. Gia's question about last year is a Case 11 comparison. The inbox used to be a paid job. That fact bears directly on displacement.

Laid out factor by factor, the evidence is uneven. Displacement: a paid assistant did this work last year. Academic credit: listed as available, but Rafa's school has not confirmed it. Training and supervision: no information. Calendar and duration: the studio wants him to start after finals and stay all summer, but gives no hours. A careful reader concludes that the studio's claim is unsupported, not that the internship is illegal. The test is flexible, no single factor decides it and the facts that would decide it are missing. The test also has limits. It applies to for-profit employers, and state rules may differ.

Case 11's term **compensation**, all the pay and benefits a worker receives, completes the picture. The offer pays nothing and costs Rafa paid shifts. His email will ask for the missing facts in writing, politely: who trains him, what a normal week looks like, the weekly hours and whether this is the assistant's old job.

❓ **Stop and think.** Which factor has the strongest evidence, and which has none? What does that imbalance mean?

The courts, the data and the profession

The primary beneficiary test grew out of litigation. Two unpaid interns on the 2010 film *Black Swan* sued Fox Searchlight. The appeals court opinion lists their tasks, which included answering phones, taking lunch orders, making coffee, photocopying and filing (U.S. Court of Appeals for the Second Circuit, 2016). In 2015, the court held that the question is who is the primary beneficiary, and that is the test the Labor Department uses now (LAist, July 2, 2015; U.S.

This page continues page 291. The notes for both pages are on the sheet for page 291.

The courts, the data and the profession, continued

Department of Labor, Fact Sheet #71, updated January 2018).

The stakes are about access as well as law. PBS NewsHour reported that nearly half of U.S. interns were unpaid in 2022 (PBS NewsHour, August 26, 2023). NACE survey data show inequity in who gets paid internships (National Association of Colleges and Employers, August 8, 2023). NACE's own ethics principles ask members to comply with "local, state, and federal" laws (NACE Principles for Ethical Professional Practice, 2025).

? Stop and think. If Rafa's school grants credit, does that settle whether the studio should pay him? Why or why not?

Evidence A | Job listing

Studio listing on the campus job board, April

"Summer Editing Intern (unpaid). Join our fast-paced studio! You'll run the customer inbox all summer, help with client files and get great exposure to the industry. College credit available."

Look closely: Which words describe learning? Which words describe work?

What it shows

➤ An "editing" title over a duty list led by the inbox, plus credit and "exposure."

What it leaves out

➤ Training, supervision, hours and what editing, if any, the intern would do.

Evidence B | Email

Studio reply to Rafa, Tuesday, 11:20 a.m.

"Thanks for your interest, Rafa! Since interns get college credit, it's totally legal for us not to pay. We'd love for you to start right after finals."

Look closely: Is credit one factor or the whole test? What does the email skip?

What it shows

➤ The studio treats one factor, credit, as if it settles the whole test.

What it leaves out

➤ The other factors, and whether Rafa's school would grant credit at all.

Evidence C | Chat

Gia and Rafa, Tuesday lunch

Gia: Didn't they pay someone to do the inbox last year?

Rafa: Yeah, their assistant.

Gia: And it's your summer, not theirs. What about your shifts at the shop?

Look closely: Who ran the customer inbox last year? Was that person paid?

What it shows

➤ The intern would do work a paid assistant did last year: the displacement factor.

What it leaves out

➤ The size of Rafa's cost: how many paid shop shifts he would lose.

What is still missing from the evidence?

➤ What training and supervision the studio actually provides, how many hours a week the role takes, whether Rafa's school will grant credit, and how many paid shifts at the family shop Rafa would give up.

Key idea: the primary beneficiary test

On your own Read the key idea and the code of ethics, then answer the question in the box. About 12 minutes.

A job title does not show how the work is arranged. The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. An intern who counts as an employee must be paid under the **Fair Labor Standards Act**. The Fair Labor Standards Act is a federal law that sets minimum wage and overtime rules for most workers.

The Department of Labor's Fact Sheet #71 lists seven factors. They include training, links to coursework or **academic credit**, the school calendar and how long the learning lasts. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor is whether the intern's work adds to paid employees' work or replaces it. The test is flexible, and no single factor decides it.

So the studio's email does not settle the question. Calling a job an internship does not decide it. Neither does college credit, or an intern agreeing to work for no pay. The test also has limits. It applies to for-profit employers, and state rules may differ. To apply the test, you need facts about the duties, training, supervision and hours.

The studio's unpaid internship has Rafa running its customer inbox all summer, the job a paid assistant did last year. The studio says college credit makes it legal. What should Rafa do next?

- ☐ A Accept the studio's answer, since college credit settles the question.
- ☒ B Ask for the learning plan, supervision, schedule and how the role relates to paid employees' work.
- ☐ C Tell the studio that unpaid internships are against the law.

Why I chose it

A strong response:

- Clear question
- Multiple perspectives
- Original synthesis
- Limits acknowledged

Your draft

On your own Write your first draft in the boxes, using your planner from the page before. About 100 minutes.

First draft: your introduction

👉 Rafa, a first-year student who commutes to class and helps at his family's shop, was offered an unpaid summer internship. The studio said college credit made it legal not to pay him. His choice raises a larger question: do unpaid internships widen inequality? PBS NewsHour reported that nearly half of U.S. interns were unpaid in 2022. When a role is unpaid, only students who can afford a summer without income can say yes. I argue that unpaid internships widen inequality when they replace paid work, because they turn access into a question of money.

First draft: one body paragraph

👉 The career-services perspective offers a practical defense. It tells students to ask for duties, hours, supervision and pay in writing before accepting. That advice protects a student like Rafa from an inbox job labeled as training. It does not solve the deeper problem. Rafa could get honest answers and still be unable to give up his shifts at the shop. NACE reported in 2016 that paid interns saw greater offer rates than their unpaid classmates. If paid roles lead to more offers, students who must decline unpaid roles fall further behind.

Questions to discuss

On your own Write a short answer to each question, then complete each sentence frame. About 15 minutes.

- 1 What would count as evidence that the promised training is happening?

➤ A learning plan tied to coursework, a supervisor's name and a weekly schedule that shows learning time beside inbox work.

- 2 Unpaid summers are easier for people who do not need a paycheck. Who might an unpaid internship leave out?

➤ People who need income, work for family or pay to commute. PBS NewsHour reported that nearly half of U.S. interns were unpaid in 2022.

- 3 If Rafa's school grants credit, does that settle whether the studio should pay him? Why or why not?

➤ No. The test is flexible, and credit is one factor among seven. The displacement evidence still weighs toward a job, and the training is unknown.

My take

My claim: ____.

➤ Rafa should hold off on a start date until the studio answers questions tied to the factors.

The best evidence is ____, because ____.

➤ The listing, because its main duty is the inbox a paid assistant ran last year.

🔗 Stretch

- Compare what the offer costs Rafa with what it would cost a student who does not need summer pay.
- Going further: Read Fact Sheet #71 from the Department of Labor. For each of the seven factors, mark whether Rafa's offer points toward training, toward a job or is still unknown.
- Going further: Suppose the studio answers, "We'll give college credit." What problem does that solve for the studio? What problem does it leave for Rafa?
- Going further: Make a two-column worksheet that compares what the listing promises with a normal week of duties. Ask a classmate to fill it in, and see which gaps they find.
- Going further: Before you accept any internship, ask for the duties, hours, supervision and pay in writing. Take the offer to your school counselor or college career center. If you are under 18, involve a trusted adult before you agree to any work.
- Look up whether your state has its own internship or minimum-wage rules
- Compare the for-profit test with guidance for volunteering at nonprofits

My take, continued

Someone who disagrees might say ____.

- An unpaid role could still open doors that a paid job would not.

The limit of the evidence is ____.

⦿ No document shows the training, the hours or whether the school grants credit.

I would change my mind if ____.

- The studio shared a learning plan tied to his coursework and a named supervisor.

Content note

This case involves disability access and a request for an exception to a building rule. No student should share their own disability, health information or housing situation, so keep the discussion on Sami's building.

This case explains general rules. It is not legal advice for your situation.

Overview

Students read a short story in which an unsigned notice says a building's rear door will be locked at 8 p.m. That step-free door is the only one Sami can use. Students compare the notice with last year's house rules and the entrance plan, and they map how the rule affects different residents. They read HUD's Fair Housing Act overview as a source of questions, then rewrite the notice or write Sami's question to the building manager.

Case 16: Who wrote the new building rule?

An unsigned notice says the building's only step-free door locks at 8 p.m., and Sami's workshop runs later.

On your own Read What happened and underline the two changes the notice announces. About 5 minutes.

Mari hands a yellow sheet to Sami across a white table while Caio listens. This scene comes from Case 4.

Your role: You're the one who photographs the notice and writes down when and where it was found.

New skill: Find who has the authority to make a rule.

What happened

It is Monday morning in Sami's apartment building. A new notice is posted beside the common-room door. It says the rear door will be locked at 8:00 p.m. every night. It also says the common room is "for resident social use only," with "NO BUSINESS USE" in capital letters. The notice has no name, no date and no contact.

That rear door matters to Sami, who lives in apartment 3B and uses a manual wheelchair. It is the building's only step-free entrance. The front entrance has four steps and no ramp. Sami also runs a workshop in the common room, and it goes past 8 p.m.

Your question: Who has the authority behind this notice, and what should Sami ask the building manager?

Caio reads last year's house rules beside the notice. Those rules let residents reserve the common room for classes and resident-run workshops. The new notice does not say whether it replaces them. Before anyone starts arguing, Sami photographs the notice and writes down when and where she found it.

The story: An anonymous notice

Sami, 23, lives in apartment 3B, studies design and uses a manual wheelchair. On Monday morning, she finds a new notice beside her building's common-room door. It announces two changes "effective immediately." The rear door will be locked at 8:00 p.m. nightly, and the common room is for resident social use only, with "NO BUSINESS USE" in capitals. The notice carries no name, no date and no contact.

Each change touches her directly. The building's entrance plan lists a front entrance with four steps and no ramp, a side door for service use only and a rear door that is step-free and opens to the elevator hallway. After 8 p.m., the notice would lock the only door she can use. It would also cloud the future of the workshop she runs in the common room, which goes past 8.

Sami does not start with outrage. She photographs the notice and writes down when and where she found it, before anybody starts arguing about what it said. Caio, the oldest in the crew, brings last year's house rules, handed out at lease signing. He reads the notice the way an editor reads copy. All caps, bold, no name, no date. Somebody made it look official, and he still does not know who.

Your role is to help Sami keep a clean record of the notice before anyone starts arguing.

Stop and think. Why does formatting signal authority without proving it?

❓ Stop and think

1. **After "The story: An anonymous notice":** Why does formatting signal authority without proving it?
2. **After "Authority, sources and missing definitions":** How does the undefined phrase "business use" change what Sami can conclude?
3. **After "The law, the process and a Brooklyn example":** Why might the Atlantic Plaza Towers example not apply directly to Sami's building?

Authority, sources and missing definitions

Authority is the power a person or group has to make or change a particular rule or decision. The case separates the look of authority from its substance. Formatting signals power but does not prove it. An unsigned notice is not automatically invalid, but its force depends on who issued it and what it claims to change.

The new skill is finding who has the authority to make a rule. It draws on three earlier skills. From Case 1, you compare the notice with an original document, last year's house rules, which let residents reserve the room for "gatherings, classes and resident-run workshops" through the building office. From Case 7, you ask what stage the rule is at. From Case 10, you take the question to the office that can answer it, here the building manager. Case 4's **decision-maker**, the person or group with the power to make a particular choice, names what Sami is looking for.

Caio's comparison finds a definitional gap. The old rules explicitly allow resident-run workshops. The new notice bans "business use" without defining it, so nobody can yet say whether Sami's workshop is affected. The notice also does not say whether it replaces the old rules or adds to them.

Case 10's **barrier**, something that blocks or limits a person from taking part, describes the locked rear door. A **reasonable accommodation** is a change to a rule or practice that gives a person with a disability equal use of a place, such as a key fob for the rear door. **Documentation** is a record, such as a photo, a note or an email, that shows what was said or done and when. Sami's photo and note will matter if the facts are disputed later. She keeps her two questions apart: who has the authority, and how she gets in after 8. Neither friend calls the notice illegal, because they do not yet know who wrote it or how the building handles access requests.

 **Stop and think.** How does the undefined phrase "business use" change what Sami can conclude?

The law, the process and a Brooklyn example

A landlord's policy and the law are different sources of rules. HUD says the Fair Housing Act bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability, and covers most housing with some exceptions (HUD, no date listed). Guidance can change even when the law does not. In 2025, HUD withdrew several fair housing guidance documents, but the Act itself stayed the same (National Association of Realtors, October 7, 2025). Enforcement continues. In 2026, the Justice Department announced a \$750,000 settlement with a property management company in a disability discrimination case (U.S. Department of Justice, April 30, 2026).

Process can give tenants leverage. At Atlantic Plaza Towers in Brownsville, Brooklyn, the landlord applied to install a facial-recognition entry system. Tenants say they learned about it from the state housing agency, not the landlord.

This page continues page 311. The notes for both pages are on the sheet for page 311.

The law, the process and a Brooklyn example, continued

Because the change needed that agency's permission, they filed opposition (Legal Services NYC, May 1, 2019), and in November 2019 the landlord withdrew the application (Gothamist, November 21, 2019). That case turned on New York's rent-stabilization rules, which may not apply to Sami's building.

The NCA credo describes the posture Sami takes: "We strive to understand and respect other communicators' intent before evaluating and responding to their messages" (NCA Credo for Ethical Communication, 2024).

? **Stop and think.** Why might the Atlantic Plaza Towers example not apply directly to Sami's building?

Evidence A | Posted notice

Unsigned notice by the common-room door, found Monday morning

NOTICE TO ALL RESIDENTS. Effective immediately, the rear door will be locked at 8:00 p.m. nightly. The common room is for resident social use only. NO BUSINESS USE.

Look closely: Which features give the notice an official look? What is missing?

What it shows

Two changes stated as commands: a nightly 8:00 p.m. lock and a ban on business use.

What it leaves out

An issuer, a date, a contact and any definition of “business use.”

Evidence B | House rules (excerpt)

Last year’s house rules, given out at lease signing

“Residents may reserve the common room for gatherings, classes and resident-run workshops. Reservations are made through the building office.”

Look closely: What did last year’s rules allow in the common room?

Key idea: authority

On your own Read the key idea and the code of ethics, then answer the question in the box. About 12 minutes.

A building rule should name who made it, give a date and list a contact. This notice has none of them.

Authority is the power a person or group has to make or change a particular rule or decision. Bold type and capital letters do not show who has that power. An unsigned notice is not automatically invalid, either. Sami has to find out who issued it and which document it claims to change.

A landlord's policy and the law are different sources of rules. The Fair Housing Act is a federal law. HUD, the federal housing department, says it bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability. It covers most housing, with some exceptions. Under the Act, a person with a disability can ask a building for a **reasonable accommodation**. A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place. For Sami, that could be a key fob for the rear door.

Sami cannot yet say the notice breaks the law. She does not know who wrote it, whether it replaces the house rules or how the building handles access requests. Whether a building grants an accommodation also depends on the facts. **Documentation** helps her keep those facts straight. Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when. Her photo of the notice, with the date and place she found it, is documentation.

Your draft

On your own Write your first draft in the boxes, using your planner from the page before. About 100 minutes.

First draft: your introduction

Most people rent or buy housing in a market, but they also need it to live. Stable, safe housing affects health, school and work, which is why governments make rules about it. A single door can show how the two ideas meet. In Sami's building, an unsigned notice says the only step-free entrance will be locked at 8 p.m. Owners set building rules, and the Fair Housing Act limits those rules for residents with disabilities. I argue that housing is both a market good and a right, and that the right should decide questions of access.

First draft: one body paragraph

The legal perspective shows the right at work. HUD's overview says housing discrimination is illegal in nearly all housing, including private housing. That likely reaches Sami's building, though the law has some exceptions. Under the law, Sami can ask for a reasonable accommodation, such as a key fob for the rear door. The market perspective still matters. A building may lock a door for security, and a fob system costs money. The harder question is whether a rule may shut a resident out of her own home.

Questions to discuss

On your own Write a short answer to each question, then complete each sentence frame. About 15 minutes.

- 1 Which missing fact would most change how you see the notice?

➤ The issuer. A notice from the owner carries different weight than one from a neighbor, and knowing the issuer tells Sami where to send her questions.

- 2 The notice bans “business use” without saying what that means. What would you need to know to decide whether Sami’s workshop counts?

➤ A written definition from whoever issued the notice, the facts of Sami’s workshop and which document governs: the notice or last year’s house rules.

- 3 A building may want a door locked at night. How could it keep that door secure and still let Sami in?

➤ A fob reader keeps the rear door locked to outsiders and open to residents who need step-free entry. The policy should name whom to contact.

Case 17: How should the crew give out ten free seats?

Overview

Students read a short story in which the crew has ten free workshop seats and thirty people who want one. They compare three options, first come, a lottery and a needs-based rubric, and apply two ethical lenses from the Markkula Center framework. They then write a note that explains one method to the people affected, names its strongest objection and revises it.

Before this case

Students should already be able to:

- write a research question
- evaluate a source's credibility and relevance
- work in a team with assigned roles

Objectives

Students will be able to:

- research how real programs use lotteries, need, merit and first-come rules
- compare several allocation methods from assigned lenses
- synthesize a recommendation for the crew that addresses the people left out
- present and defend the recommendation as a team

Materials

- This chapter, one copy per student

Materials, continued

- Educator-approved sources on allocation methods, including the case's In the news list
- Lens assignments, a comparison matrix and a presentation storyboard

Case 17: How should the crew give out ten free seats?

Thirty people want ten free workshop seats, and the crew must choose a fair way to decide who gets them.

On your own Read What happened and underline the sentence that tells how many people want a seat. About 5 minutes.

Duda holds up a phone and points at a blank card on a bulletin board.

Your role: You're the one who writes down the rule before the crew picks the ten names. **New skill:** Set fair criteria before choosing.

What happened

The crew has ten free seats for a workshop, and thirty people want one. The crew opened a sign-up sheet on Monday at 9 a.m. Twenty-two names were on it before 10 a.m. By Wednesday, the sheet has thirty names.

The sheet says only “How seats will be chosen: to be announced.” The crew has argued about the rule since dinner on Sunday. Gia is running the sign-up. She wants to give the seats to the first ten names, because that is simple and fast. Mateo suggests a lottery instead.

Your question: How should the crew choose who gets the ten seats, and how should they explain the choice to all thirty people?

Anika, 16, is at rehearsal most days, and she checks her phone after rehearsal ends. Under first-come, she would see the message after the seats were gone. A third option on the crew's whiteboard would give seats to people who cannot afford the paid version of the workshop. That option would ask people for personal information.

Every method seats exactly ten people. The crew has to decide which ten, and then explain the rule to all thirty.

🔑 Answer key

Any first guess is fine. Students return to it on the My take page.

Before you look at the evidence, how do you think the crew should choose who gets the ten seats?

➤ My first guess is a lottery, because it treats all thirty names the same, even though it ignores need.

- **Equity:** Equity is a way of sharing that adjusts for different needs so everyone gets a fair chance.
- **Consent:** Consent is permission a person gives for something specific, such as sharing a record with a named person.

The story: Thirty names, no rule

Ten free workshop seats should be good news. For the crew, it is a problem. The sign-up sheet opened Monday at 9 a.m., and 22 names arrived before 10. By Wednesday, 30 people have signed up, and the sheet still says the selection method is “to be announced.” The crew has argued since Sunday dinner.

Gia is running the sign-up, and her preference is practical. First ten to reply get a seat. It is simple, she can post it tonight and she has a shift at seven. Mateo proposes a lottery, and Gia counts its costs: a sign-up window and someone to run the drawing. The whiteboard lists a third choice, a needs-based rubric for people who cannot afford the paid workshop. It would require personal information and someone to judge it.

Anika, 16, is at rehearsal most days and checks her phone only afterward. Under first-come, she would find out after the seats were gone. Her request is precise. She does not need a seat. She wants the crew to say how it is picking, and not to pretend nobody loses out, because she would. When someone asks whether she wants the plan to revolve around her, she says no. Admit the cost, and then maybe they can fix that part.

Gia's honesty moves the conversation too. She admits she mostly wanted the task off her list. What would change her mind is evidence that the people the crew most wants in the room are the ones who would see the message last. She would rather ask them than guess.

Your role is to write down the rule before the crew picks the ten names.

⌚ Pacing

Reading: about 5 min (732 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After “The story: Thirty names, no rule”:** Anika and Gia each admit something about their own position. How does that honesty change the decision?
2. **After “Criteria first, then choice”:** Which of Belmont's five principles does each whiteboard option rely on?
3. **After “Lenses and real allocation debates”:** Why does choosing a rule after seeing the names damage trust even if the rule is reasonable?

❓ **Stop and think.** Anika and Gia each admit something about their own position. How does that honesty change the decision?

Criteria first, then choice

Criteria are the standards or reasons a group uses to make a decision. The new skill is setting fair criteria before choosing and stating who each rule leaves out. It builds on Case 4, where you learned that a **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Here every option seats ten and excludes twenty, so the real decision is which cost the crew is willing to defend.

Each option distributes that cost differently. First-come rewards attention and availability, which disadvantages people with rehearsals, shifts or less phone time. A lottery gives equal odds but ignores need. A needs-based rubric pursues **equity**, a way of sharing that adjusts for different needs so everyone gets a fair chance. It also imposes an entry cost. Applicants must disclose personal information, and Case 6's concept of **consent**, permission a person gives for something specific, applies. The crew would need to ask for only what it needs, get clear consent and decide who sees the answers.

Timing is itself an ethical variable. The sheet shows most sign-ups arrived before any rule existed. Choosing a rule after seeing the names invites suspicion that the rule was picked to favor someone. A rule announced in advance can earn acceptance even from those who lose. That is why the crew's decision note should state the method, its main objection and one change that reduces the cost for people who miss out.

Anika offers a structure for comparing options, and it maps onto two classic ethical approaches. One asks which option helps the most people, a consequences question. The other asks whether the way of choosing is fair to everyone, a fairness question.

❓ **Stop and think.** Which of Belmont's five principles does each whiteboard option rely on?

Lenses and real allocation debates

The Markkula Center's framework offers several lenses: consequences, rights, fairness, the common good, character and care. These lenses can reveal different concerns rather than producing an automatic score (Markkula Center for Applied Ethics, revised November 5, 2021). The Belmont Report, a foundational federal statement on research ethics, lists five widely accepted ways to share benefits and burdens: an equal share, individual need, individual effort, societal contribution and merit (Belmont Report, April 18, 1979).

Scarcity decisions happen at every scale. During the COVID-19 pandemic, a bioethicist explained how leaders chose who received vaccines first (NPR, December 20, 2020).

This page continues page 332. The notes for both pages are on the sheet for page 332.

Lenses and real allocation debates, continued

Medical experts argued against first-come, first-served for scarce resources and proposed explicit criteria instead (Emanuel et al., New England Journal of Medicine, May 21, 2020). In New York City, families disagree over lotteries versus grades for high school admissions (Chalkbeat New York, August 9, 2023). In each debate, people agree that there is not enough to go around. They disagree about which rule should decide who gets a share, and that is the crew's question too.

? **Stop and think.** Why does choosing a rule after seeing the names damage trust even if the rule is reasonable?

Key idea: fair criteria

On your own Read the key idea and the code of ethics, then answer the question in the box. About 15 minutes.

Any way of giving out ten seats to thirty people leaves twenty people without one. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. First-come is fast, but it favors people who see the message first. A lottery gives everyone the same chance, but it does not consider need. A needs-based rubric aims at equity by helping people who cannot afford the paid version, but applicants must share personal information. Each option has a cost, so the crew has to choose which cost to accept.

Criteria are the standards or reasons a group uses to make a decision. When the crew states its criteria early, everyone knows the rule before anyone is chosen. Even people who do not get a seat may accept the result if the rule was clear in advance. If the crew picks a rule after seeing the names, people may wonder whether it was chosen to favor someone.

The Markkula Center for Applied Ethics at Santa Clara University suggests looking at a decision through several ethical lenses. They include consequences, rights, fairness, the common good, character and care. The lenses can point toward different options, and they do not add up to one automatic score. A strong decision explains which concern matters most in this case, who carries the cost and what could reduce it.

Gia is drafting a note to the thirty people on the sign-up sheet. Which sentence could the crew defend?

- ☐ A “We picked the fairest method, so nobody loses out.”
- ☒ B “We’re holding a lottery so everyone has the same chance. A lottery doesn’t favor people with the most need, so we’re looking into a second session.”
- ☐ C “Seats go to the first ten names on the sheet, because those people wanted it most.”

Why I chose it

➤ B is the only note that admits a real cost and commits to a remedy. A denies the cost, and C mistakes seeing the sheet first for wanting a seat most.

Improve a draft

A student’s first draft

We should do first come first served because ① it’s the most fair. Everyone has the same chance to sign up and if you really want it you’ll sign up fast. It’s simple and ② nobody can complain because they had the same opportunity as everyone else. Also it’s way less work for us than reading thirty applications or doing some random drawing. The people who don’t get in can just come to the next workshop whenever we have one. This is obviously the best way.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ First-come is fast and predictable, which suits a crew with little time.

Rewrite phrase 2

➤ People who see messages late, like Anika, carry the cost of that speed.

➤ Answer key

A revised version: We recommend a lottery after a three-day sign-up period. A lottery gives each of the thirty people an equal chance, while first-come, first-served favors whoever sees the message first, which leaves out people like Anika who check their phones after rehearsal. The cost is that a lottery doesn’t prioritize people with the greatest need. To reduce that, we’ll announce the sign-up in the group chat, at the bookshop counter and on paper, and we’ll run a second session for the twenty people who don’t get seats. We’d reconsider if the second session can’t happen.

Recommendation section of your report

🔗 We recommend that the crew use a lottery after a three-day sign-up, with the rule posted before the draw. Our research on four methods shows that each one serves a different value. A lottery gives every applicant the same chance, as in New York City's school admissions lotteries. A needs-based rule sends help where it is needed most, but it asks applicants for personal information. Merit rewards preparation, and first-come rewards timing. The crew's own sign-up sheet shows the cost of first-come: 22 of the thirty names arrived before 10 a.m. on Monday. No method helps the twenty people left out, so our recommendation adds two steps. The crew should tell all thirty people the rule and the result at the same time. It should also look into a second session and give the twenty first notice of it. We would revisit this recommendation if most applicants could not afford the paid version.

How to assess: Reports and the presentation are scored with educator-adapted rubrics modeled on the published Performance Task 1 components; this is practice, not a submitted performance task.

Proficient looks like:

- **Evidence:** Names specific people and effects from the case.
- **Reasoning:** Uses a lens and names the strongest objection.
- **Audience & purpose:** Explains the process to all applicants.
- **Revision:** Adds a named cost and revision.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames. About 15 minutes.

1 Whose view would most challenge the option you prefer?

➤ I prefer a lottery, so the strongest challenge comes from applicants with the greatest need. Equal chance treats unequal starting points the same.

2 Anika says she does not need a seat. What is she asking the crew for?

➤ She asks for a clear rule and an honest count of who loses. Her request is about the process, so it holds even if she never applies.

3 Option C would help people who cannot afford the paid workshop. What would applicants give up to be chosen that way?

➤ They would give up privacy and control over their information. They would also accept that another person judges their need.

4 What would make the twenty people without seats accept the result as fair?

➤ A rule published before anyone is chosen, the same rule for everyone and a stated remedy, such as a second session if one is possible.

My take

My claim: ____.

➤ The crew should publish its criteria, then hold a lottery with a plan for the twenty left out.

⌚ Pacing

Full chapter: 15 min.

✂ Short on time: 15 min.

💬 Say this

“Answer with a detail from the evidence, such as a time on the sheet or a line on the whiteboard.” — Ask for one answer per question.

➤ Stretch

- Find out how your school fills one limited spot, such as a trip or a club seat, and whether the rule is published first.
- Going further: Each method treats a different problem as the main one. For each of the three options, write the problem it tries to solve and one problem it leaves unsolved.
- Going further: Write down the option you picked first. Then find one person in the case that option treats unfairly. Decide whether you would change your criteria or explain them more carefully.
- Going further: Write two short sign-up announcements, each using a different method. Ask a friend to read both. Check whether they can tell who each plan leaves out and how to ask a question about it.
- Going further: Pick one limited spot at school, such as a class, a trip or a club seat. Find out how people are chosen and whether the rule is published. Ask who the rule helps and who it might leave out. Never ask classmates to share financial or personal information.
- Research how a real program uses a lottery and what critics say
- Design a hybrid method and test it against all three lenses

My take, continued

The best evidence is ____, because ____.

☞ The whiteboard, because it lists a cost for every option, so no choice is free.

Someone who disagrees might say ____.

☞ Need matters more than equal chance when some applicants cannot afford the paid workshop.

The limit of the evidence is ____.

☞ No document says how many applicants have the greatest need.

I would change my mind if ____.

☞ Most of the thirty applicants could not afford the paid version.

Case 18: Why is the theater curtain still falling apart?

Overview

Students read a short story in which the theater curtain at Dec and Anika’s school will not close. Meanwhile, a social post points to the district’s \$48 million budget. Students label a proposed-budget excerpt by year, stage and units, explain why the post compares a total with a per-pupil figure and map who decides. They then write a budget question and a 60-second comment for the school board.

Before this case

Students should already be able to:

- write a research question
- evaluate a source’s credibility and relevance
- work in a team with assigned roles

Objectives

Students will be able to:

- research equity and adequacy, capital planning, student voice and one district’s process
- synthesize the lenses into criteria a board could use
- test the criteria on the curtain request
- present the criteria and their trade-offs to a mock school board

Materials

- This chapter, one copy per student

Materials, continued

- Educator-approved outside sources, such as those in the case’s In the news list
- Lens assignments, a source tracker and the board presentation template

Case 18: Why is the theater curtain still falling apart?

The district's proposed budget is \$48 million, the school theater curtain won't close, and Dec wants to ask the school board about it.

On your own Read What happened and underline the three dollar amounts. About 5 minutes.

Anika, Dec and Mari test a small light circuit in a theater workshop, with Pauta beside them.

Your role: You're the one who works out the per-student number before anyone repeats the post. **New skill:** Compare numbers on the same scale.

What happened

The curtain in the school theater is torn, and it no longer closes all the way. Dec, 17, pulls that curtain at every show. He and Anika, 16, are on the theater crew. The facilities office gave the theater advisor a quote to replace the curtain: \$6,800.

Mari, 19, is helping them prepare a question for the school board. They find the district's proposed budget for next school year. The total is \$48 million for a projected 3,200 students. One line sets aside \$310,000 for building repairs at all schools. A note says the figures may change before the board adopts the budget.

Your question: What can the \$48 million total tell Dec about the curtain, and what should he ask the school board?

On Tuesday at 6:10 p.m., a post starts going around. It compares the district's \$48 million with another district, Westbrook, at \$21,000 per student. "And they can't fix ONE curtain??" it asks. Dec has a photo of the torn curtain. He wants to be the one who asks the board about it.

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Revenue Revenue is money that comes into a government or an organization, such as taxes and grants.

En español: ingresos

In this case: NCES reports that public schools get revenue from federal, state and local sources. That national data cannot show what Dec's district spends on a curtain.

Expenditure An expenditure is money that a government or an organization spends.

En español: gasto

In this case: The \$48 million is a proposed plan for next school year. It lists planned expenditures, but none of that money has been spent yet.

Per-pupil amount A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.

En español: monto por estudiante

In this case: $\$48,000,000 \div 3,200 \text{ students} = \$15,000 \text{ per student}$. Westbrook's \$21,000 is already per student, but its year and stage are unknown.

Words to know

- **Revenue:** Revenue is money that comes into a government or an organization, such as taxes and grants.
- **Expenditure:** An expenditure is money that a government or an organization spends.
- **Per-pupil amount:** A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: Where is the money going?

Dec, 17, a senior on the theater crew, pulls the stage curtain at every show. It is torn and no longer closes all the way. The facilities office has already priced a flame-retardant replacement, removal and installation included, at \$6,800. Dec has a photo of the tear. He wants to take the problem to the school board, and he wants to be the one who asks.

Mari, 19, is helping him and Anika, 16, prepare. The district's proposed budget for next school year is posted online. The headline figure is \$48,000,000, with projected enrollment of 3,200 students. A facilities line provides \$310,000 for building repairs across all schools. A note warns that the figures are proposed and may change before adoption.

On Tuesday at 6:10 p.m., a post begins circulating. It sets the district's \$48 million beside Westbrook's \$21,000 per student and asks why the district cannot fix one curtain. The post has the emotional logic of a good question. It also has the arithmetic of a bad one. Mari's instinct is to ask where the numbers are from.

Your role is to work out the per-student number before anyone repeats the post.

Stop and think. The post "has the emotional logic of a good question." What makes it feel convincing?

⌚ Pacing

Reading: about 5 min (706 words). Short on time: read it aloud together, pausing at each Stop and think.

❓ Stop and think

1. **After "The story: Where is the money going?":** The post "has the emotional logic of a good question." What makes it feel convincing?
2. **After "Putting numbers on the same scale":** Why can't a per-pupil figure show whether a district has enough money?
3. **After "Funding, spending and outcomes":** What would Dec need to know to show that the curtain belongs in the building repairs line?

Putting numbers on the same scale

Budget numbers carry three labels that must match before a comparison means anything: year, stage and unit. The post mismatches all three. It pairs a proposed district total for next year with a per-student figure of unknown year and stage.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. The new skill in this case is comparing numbers on the same scale. It extends Case 11's habit of comparing like with like. Dividing \$48,000,000 by 3,200 gives \$15,000 per student. The recalculation changes the post's implied story, but it does not settle it. Westbrook's year and stage are still unknown, and a per-pupil figure cannot show whether either district's funding matches its students' needs.

The vocabulary of public finance keeps other distinctions straight. **Revenue** is money that comes into a government or an organization, such as taxes and grants. An **expenditure** is money that a government or an organization spends. This document is a **proposal**, the Case 4 term for a change that someone suggests and that has not been approved yet. A proposed budget, the adopted budget and actual spending are three different records.

The crew's method draws on earlier cases. Mari reads the budget line by line, the skill from Case 5, looking for the line that could plausibly cover a stage curtain. She is not sure a curtain counts as a building repair, and she wants to find out. Dec follows Case 13's rule of keeping a claim as small as the evidence. His photo proves the tear and nothing about where money went, so he brings the photo, the quote and a question rather than an accusation. Case 4's **decision-maker**, the person or group with the power to make a particular choice, points to the school board, which adopts the budget within state and federal rules. His question should name one budget line, one need and the board's next chance to hear requests.

? **Stop and think.** Why can't a per-pupil figure show whether a district has enough money?

Funding, spending and outcomes

National data give context but not local answers. NCES reports that public-school revenue comes from federal, state and local sources, with a mix that varies by state (NCES, May 2024). Its state-by-state table for 2022–23 includes per-pupil amounts (NCES Digest table 235.20, March 2026). Reliance on local property taxes produces large differences between districts (NPR, April 18, 2016).

Budgets also change over time. When temporary federal pandemic relief ran out, districts faced what reporters called a funding cliff (Chalkbeat, September 13, 2023). In 2026, many districts made cuts and layoffs tied to inflation and enrollment declines (Chalkbeat, May 28, 2026). Spending levels matter for students.

This page continues page 352. The notes for both pages are on the sheet for page 352.

Funding, spending and outcomes, continued

A major study of school finance reforms found that more per-pupil spending raised graduation rates and adult earnings, especially for low-income students (Jackson, Johnson and Persico, Quarterly Journal of Economics, October 1, 2015).

The SPJ code offers a rule for anyone writing about budgets: “Provide context. Take special care not to misrepresent or oversimplify in promoting, previewing or summarizing a story” (SPJ Code of Ethics, September 6, 2014). The viral post fails that test, and Dec’s question passes it.

? **Stop and think.** What would Dec need to know to show that the curtain belongs in the building repairs line?

Key idea: per-pupil amounts

On your own Read the key idea and the code of ethics, then answer the question in the box. About 15 minutes.

Before you compare two budget numbers, check three labels: the year, the stage and the unit. An **expenditure** is money that a government or an organization spends. A proposed budget is a plan for expenditures. An adopted budget is the plan the board approves. Actual spending is what the district really spent. The \$48 million is a proposed total for the whole district. The Westbrook figure is an amount per student.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. Dec's district proposes \$48,000,000 for a projected 3,200 students. That works out to \$15,000 per student. The comparison is still not complete, because Westbrook's budget year and stage are unknown. A per-pupil figure also cannot show whether either district has enough for its students' needs.

Revenue is money that comes into a government or an organization, such as taxes and grants. The National Center for Education Statistics (NCES) reports that public schools get revenue from federal, state and local sources. The mix differs from state to state. National data like this gives context, but it cannot say what one district spends on a curtain. In most states, an elected local school board adopts the budget within state and federal rules. That is why Dec's question should name one budget line, one need and the board's next chance to hear requests.

Practice: choose a response

On your own Choose what the crew should do first, explain why and fix the two marked phrases. About 5 minutes.

A post compares the district's \$48 million total with Westbrook's \$21,000 per student. Someone reposts it and adds "we get way less." What should the crew do first?

- ☐ A Share it. Both figures are in dollars, and the curtain really is torn.
- ☒ B Check that both figures use the same year, budget stage and units before comparing them.
- ☐ C Divide \$48 million by 3,200 students, and post that the district is underfunded.

Why I chose it

➤ B. A repeats a unit mismatch. C corrects the units but jumps to underfunding, and Westbrook's year and stage are unknown. B makes a fair comparison possible.

Improve a draft

A student's first draft

Our district has a **1** \$48 million budget but our theater curtain is ripped and gross. That's so much money and they can't even fix one curtain? It has been like this since before any of us joined the crew and it keeps getting worse every show. Where is all the money going? Other districts get way more. I saw a post that said so. We deserve better and **2** the board needs to explain themselves. We are honestly tired of waiting for this.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ The \$48 million is next year's proposed budget, not this year's spending.

➤ Answer key

A revised version: Our question is about next year's proposed budget. The theater curtain is torn at the seam and no longer closes fully; we have a photo and a \$6,800 replacement quote from the facilities office. The proposed budget lists \$310,000 for building repairs across the district. We'd like to know whether stage equipment is covered by that line or a different one, how repair requests are ranked, and when the board considers them. Could a student from the theater crew submit a written request before the budget is adopted? Thank you for considering it.

Team inquiry: “How should school facility needs be prioritized fairly?” Members research equity vs. adequacy, capital planning, student voice and one district’s process, then present to a mock school board.

Use: Case plus teacher-approved outside sources.

You’ll make: Individual research report (800–1,000 words) plus 8-minute team presentation

Time: 300 minutes

- 1 Write a team research question about ranking school facility needs fairly.
- 2 Choose one lens: equity and adequacy, capital planning, student voice or one district’s process.
- 3 Research your lens. Log each source in the tracker.
- 4 Draft the criteria section of your report on the Your draft page.
- 5 Finish the individual report, 800 to 1,000 words, on lined paper or in the online workspace.
- 6 Test the team’s criteria on the \$6,800 curtain request.
- 7 Present to a mock school board for 8 minutes.

Criteria section of your report

Our team recommends three published criteria for ranking facility requests. They are safety, how many students use the space and cost against the remaining repair line. Each lens shaped one criterion. The equity and adequacy lens showed us that a fair share can still be too small. So the board should say when the repair line runs short. The capital planning lens led us to safety and use as the first tests. The student voice lens led us to ask students to report needs in the spaces they use every day. We tested the criteria on the theater curtain. The replacement costs \$6,800, from a proposed line of \$310,000 for building repairs at all schools. The curtain is used at every show, and no document shows a safety risk. Under our criteria, it ranks in the middle. The trade-off is that arts spaces with no safety risk may wait behind other repairs year after year.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames. About 15 minutes.

1 What could make spending rise without the service getting better?

➤ Rising costs, such as higher prices for the same work, or more students to serve. Spending can grow while each student gets the same or less.

2 Dec wants to ask the board himself. Why might it matter who brings the question?

➤ A student who uses the curtain brings firsthand evidence and shows the board who is affected. It also gives students practice in a process that affects them.

3 What else would you want to know before saying one district gets less than another?

➤ Westbrook's year, stage and categories, and what each district's students need. A per-student figure alone cannot show need.

My take

My claim: ____.

➤ Dec should ask which line covers stage equipment, how repairs are ranked and when the board hears requests.

The best evidence is ____, because ____.

➤ The budget excerpt, because its labels show a proposed plan, not spending.

- Going further: Write two headlines about the same budget: one with the \$48 million total and one with \$15,000 per student. Compare the story each headline tells. Then name one group that uses the theater but is missing from this discussion.
- Going further: Some people say every school should get the same amount. What problem does that plan assume it is solving? Name one need it might miss.
- Going further: Make a chart of the proposed budget that shows the total, the per-student amount and the building-repairs line. Label the year, the stage and the units. Ask a reader to explain what the chart cannot show.
- Going further: With a teacher or advisor, find your district's budget on its website. Label its year and stage. Find one line for something you use, such as facilities, arts or technology. Ask your student council how students can send a budget question. Get permission before you photograph spaces or people at school.
- Find your own district's adopted budget and locate the facilities or capital line
- Compare two years of the same line and explain what might explain a change

My take, continued

Someone who disagrees might say ____.

- The \$48 million total proves there is money for a \$6,800 curtain.

The story: The first time at the microphone

Gia, 21, has spent her life in Fort Greene, and the park is part of her week. On Tuesday, the parks committee meets at 6 p.m. Item 4 on its agenda proposes turning off the court lights and closing the lighted courts at 8 p.m., citing complaints about evening noise from nearby residents. The agenda lists the action as a committee recommendation to the full council. Gia wants to speak against it. She has never spoken at a public meeting before.

The rules give her two minutes. Speakers sign up by 5 p.m., written comments may be submitted in advance and comments and names become part of the public record. At 5:40, Gia reads her draft aloud on a bench while Mateo, 22, times her. The draft runs three pages, and page one alone takes two minutes and forty seconds. It also contains a friend's private situation and a page about the bus.

Mateo's feedback is precise without being a rewrite. He followed every word and still cannot say what she wants the committee to do. His question is the most useful editing tool in the case. If the committee remembers one sentence, what is it? That sentence goes first.

Your role is to hold the timer and listen for the request.

Stop and think. Why does Mateo's one-sentence question work better than line edits?

Pacing

Reading: about 5 min (706 words). Short on time: read it aloud together, pausing at each Stop and think.

Stop and think

1. **After “The story: The first time at the microphone”:** Why does Mateo's one-sentence question work better than line edits?
2. **After “Matching a request to a body”:** How does asking for 9 p.m. instead of no change affect the committee's choices?
3. **After “Research and real practice”:** The research shows commenters often do not reflect the whole community. What does that suggest about who should speak?

Matching a request to a body

An **agenda item** is one topic listed on a meeting's official schedule of business. A **remit** is the set of matters that a committee or other body is responsible for and can act on. The two concepts define what Gia can usefully ask. Item 4 concerns lighting and closing time. The committee's remit includes recommending court hours. It does not include buses. Her draft's central plea, "Please don't close the park," misstates the item, since no one has proposed closing the park.

The new skill is fitting a request to the body's remit and time limit, and it assembles earlier skills. Case 4 introduced the **proposal**, a change that someone suggests and that has not been approved yet, and the **decision-maker**, the person or group with the power to make a particular choice. Here the chain has two links. The committee recommends, and the full council decides. Case 10 taught you to route a problem to the office responsible, which is why the bus page belongs with a transit office rather than this committee.

A strong two-minute comment does four jobs. It names the agenda item, reports an observation, explains why it matters and makes one request. Gia's revised comment does exactly that. It names item 4. It reports that she counted twenty or thirty people on the courts between 8 and 9. It notes that many of them work late. And it asks for lights until 9 on weekdays this summer. The request also engages the resident who wrote that late noise carries into their apartment and that their kids have school in the morning. Asking for 9 rather than no change gives the committee a middle path that answers both concerns in part.

The final cut is ethical. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. Everything Gia says will be attached to her name and kept. Her friend's situation belongs to her friend, so it comes out.

? **Stop and think.** How does asking for 9 p.m. instead of no change affect the committee's choices?

Research and real practice

Rules differ by body. Seattle City Council accepts spoken comment in person or by phone and written comment by email, with up to two minutes per speaker (Seattle City Council, no date listed). That is one city's process, not a rule for every council. Research raises a harder question about who shows up. A study of meeting minutes found that local commenters often do not reflect the whole community (Einstein, Palmer and Glick, Perspectives on Politics, October 14, 2018). Other peer-reviewed work examines whether and how public comment connects to policy outcomes (Sahn, American Journal of Political Science, August 31, 2024).

Young people are using the process well. Philadelphia students testified at board meetings about school closures, drawing on district data (Chalkbeat Philadelphia, April 3, 2026).

This page continues page 372. The notes for both pages are on the sheet for page 372.

Research and real practice, continued

Journalists hold a related privacy standard. The SPJ code says “private people have a greater right to control information about themselves than public figures” (SPJ Code of Ethics, September 6, 2014). Gia applies that principle to her friend.

? **Stop and think.** The research shows commenters often do not reflect the whole community. What does that suggest about who should speak?

Look at the evidence

On your own Read each document and write what it shows and what it leaves out. About 10 minutes.

Evidence A | Meeting agenda

Item 4 on the parks committee agenda

Item 4. Evening court hours. Proposal to turn off the court lights and close the lighted courts at 8:00 p.m. Background: complaints about evening noise from nearby residents. Action: committee recommendation to the full council.

Look closely: Circle the item number, the proposed time and the action.

What it shows

➤ A proposal about lights and hours only. The committee recommends; the council decides.

What it leaves out

➤ How many complaints there were, when the noise happens and any other hours considered.

Evidence B | Comment rules

How to comment at the meeting

Sign up to speak by 5:00 p.m. on the day of the meeting. Each speaker has 2 minutes. Written comments may be submitted before the meeting. Comments and speakers' names become part of the public record.

Look closely: Underline the deadline, the time limit and what becomes public.

What it shows

➤ A deadline, a time limit, a written route and a public record for every comment.

What it leaves out

➤ How the full council usually treats committee recommendations.

⌚ Pacing

Full chapter: 10 min.

✂ Short on time: 10 min.

💬 Say this

“Find three facts in the comment rules: the deadline, the time limit and what becomes public.” — List them on the board: 5:00 p.m., 2 minutes, comments and names.

Evidence C | Draft

Gia's three-page draft (excerpt)

"The park is really important to everyone and closing it is a terrible idea. I go there all the time with my friends... You guys never listen to young people. Please don't close the park."

Look closely: Find the request. Does it match what item 4 proposes?

What it shows

➤ Strong feeling and a request, "Please don't close the park," that misstates item 4.

What it leaves out

➤ The item, the lights and the 8 p.m. time, and any observation the committee can use.

Evidence D | Written comment

A comment from a nearby resident

The courts are good for the neighborhood, but the noise late in the evening carries into our apartment. We have kids with school in the morning.

Look closely: What does this resident like, and what is the problem?

What it shows

➤ A family that values the courts but hears late-evening noise, with kids who have school.

What it leaves out

➤ When the noise starts to bother them, which matters for any middle-ground hours.

What is still missing from the evidence?

➤ The number of complaints and when the noise occurs. Whether compromise hours were considered, how the full council treats committee recommendations, and what absent court users think.

Key idea: remit

On your own Read the key idea and the code of ethics, then answer the question in the box. About 15 minutes.

A **remit** is the set of matters that a committee or other body is responsible for and can act on. The parks committee can make a recommendation about court hours. It cannot change bus routes. That is why Gia's comment should ask for something the parks committee can do.

An **agenda item** is one topic listed on a meeting's official schedule of business. Each committee, council or board sets its own rules for who can speak, when and for how long. Seattle City Council is one real example. Its public comment page describes speaking in person or by phone and signing up before the meeting. Each speaker gets up to two minutes, and written comments can be sent by email.

A short comment can do four jobs. It names the agenda item, shares something the speaker observed, says why it matters and ends with a clear request. Before adding personal details, check whether comments become public. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. At Gia's meeting, comments and speakers' names become part of the public record.

Professional standards

Real source | American Society for Public Administration (ASPA)

ASPA Code of Ethics: 3. Promote democratic participation

"Inform the public and encourage active engagement in governance. Be open, transparent and responsive, and respect and assist all persons in their dealings with public organizations."

In plain words: ASPA's code asks people in public service to make it easy for every affected person to take part in decisions.

Question: The instructions allow written comments in advance. How does that help court users who cannot come at 6 p.m.?

Your answer

Written comments ____, but ____.

➡ Written comments open the process to people who work at 6 p.m., but they only help people who know about item 4 before the meeting.

On your own Choose the best opening sentence, explain why and fix the two marked phrases. About 10 minutes.

Gia has two minutes on item 4. Which opening sentence gives the committee the most to work with?

- ☐ A “The park is really important to everyone, and closing it is a terrible idea.”
- ☒ B “Good evening. I’m Gia, and I’m commenting on item 4, the proposal to turn off the court lights at 8 p.m.”
- ☐ C “You guys never listen to young people, so I hope tonight is different.”

Why I chose it

➤ B. A misstates item 4, which can make listeners doubt the rest. C may feel true but gives the committee nothing to act on.

Improve a draft

A student’s first draft

Hi, my name is Gia and I have lived in this neighborhood my whole life. The park is really important to everyone and closing it is a terrible idea. I go there all the time with my friends and it’s one of the only free things to do around here. My friend works late and this is the only time she can play and **1** she’s been going through a lot at home. You guys never listen to young people. **2** Please don’t close the park.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

➤ Cut the private detail. Keep the public point: many of us work until evening.

Rewrite phrase 2

➤ Answer key

A revised version: Good evening. I’m Gia Brooks-Romano, and I live two blocks from the park. I’m commenting on item 4, the proposal to turn off the court lights at 8 p.m. I play there after café shifts, and on weekday evenings I’ve counted twenty to thirty people using the courts between 8 and 9. Many of us work until evening. I understand the concern about noise from nearby residents. I’m asking the committee to keep the lights on until 9 p.m. on weekdays through the summer and to review noise complaints before making a permanent change. Thank you.

On your own Read the steps and fill in the planner boxes before you start your draft. About 100 minutes.

Team multimedia presentation to a mock parks committee on the court-lights proposal, built from interviews with park users (with consent) and research on park use and noise.

Use: The agenda item, teacher-approved sources on park use, and consented interview notes.

You'll make: 8-minute team presentation plus individual oral defense

Time: 300 minutes

- 1 Write a team research question about the court-lights proposal.
- 2 Interview park users or neighbors, with consent. Log each interview.
- 3 Research park use and noise in teacher-approved sources. Log each source.
- 4 Draft a proposal the parks committee can recommend. Test it against both groups' needs.
- 5 Draft your section of the presentation script on the Your draft page.
- 6 Present to a mock parks committee for 8 minutes as a team.
- 7 Answer oral-defense questions about your sources on your own.

- Defends sources under questioning

Your draft

On your own Write your draft in the boxes, using your planner from the page before. About 120 minutes.

My section of the script: the proposal

Our proposal answers both groups named in the agenda item. Item 4 would turn off the court lights at 8 p.m., because nearby residents complained about evening noise. That concern is serious. One resident wrote that late noise carries into an apartment where kids have school in the morning. The case also gives us a count from a court user. On weekday evenings, Gia counted twenty to thirty people on the courts between 8 and 9. Many of them work until evening. We recommend that the committee keep the lights on until 9 p.m. on weekdays through the summer. We also recommend a review of the noise complaints, including the times they describe, before any permanent change. This is within the committee's remit, because it can recommend court hours to the full council. It does not solve every problem, since buses and late shifts are outside this room. It protects an hour of play and gives residents a set end time.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames. About 15 minutes.

- 1 The parks committee cannot fix the bus problem. Who should get that question instead?

➤ The body with bus routes in its remit. Gia should find its agenda and rules and keep the bus out of her parks comment.

- 2 How could Gia's comment respond to the resident's concern about noise?

➤ She could name the concern in one sentence, then ask for 9 p.m. on weekdays and a review of when the noise happens.

- 3 What does Gia get from speaking, even if the committee recommends turning off the lights?

➤ Her count goes on the public record, she can follow the item to the full council, and she learns how the process works.

- 4 Court users who work late may miss a 6 p.m. meeting. How could their views reach the committee?

➤ Through written comments before the meeting. The committee could make that option easier to find, since commenters often do not reflect the whole community.

My take

My claim: ____.

➤ Gia should name item 4, give one observation, acknowledge the noise concern and make one request.

- Compare Evidence B with Seattle City Council's public comment page. Which rules match, and which would you check locally?
- Going further: Write Gia's request as one sentence a listener could repeat. Then reread your comment. Does it speak for anyone who has not asked you to?
- Going further: Compare the comment rules in Evidence B with Seattle City Council's public comment page. Which rules match? Which would you need to check for your own city or school board?
- Going further: Record your comment as audio, then turn it into a written comment. Keep the same point in both. Ask a listener which version made the request clearer.
- Going further: With a trusted adult, find the website for your city council, school board or parks board. Open the next meeting agenda and find one item that affects you. Read the comment rules: the sign-up, the time limit and the written option. Leave addresses, phone numbers and other people's private stories out of anything you submit.
- Compare comment rules for two different local bodies
- Track a real agenda item from discussion to vote

My take, continued

The best evidence is ____, because ____.

👉 The agenda, because its action line shows the committee recommends and the full council decides.

Someone who disagrees might say ____.

👉 Gia should skip the meeting and write to the full council, which makes the final decision.

The limit of the evidence is ____.

👉 No document says how many residents complained or when the noise happens.

I would change my mind if ____.

👉 The complaints showed that the noise starts before 9 p.m. on weekdays.

Overview

Students read a short story in which a realistic image captioned “Courtyard flooded today, stay away” spreads through a campus group chat. They compare the image, Sami’s zoom-in, a secondhand reply, a detector score and the campus alerts page with NIST’s overview of detection. They then write the verification note Jordy posts instead of the image.

Case 20: Can the crew post this image as true?

A realistic image says the campus courtyard flooded today, and Jordy must decide what the six o'clock recap can say about it.

On your own Read What happened and underline the caption's claim. About 5 minutes.

Lupa holds a cropped photo of a courtyard next to the full photo pinned on a board. The full photo also shows a blue doorway.

Your role: You're the one who writes the verification note Jordy posts at six. **New skill:** Confirm an image with independent sources.

What happened

It is Wednesday, 3:10 p.m. For twenty minutes, an image has been going around the group chat. It looks like a photo of the campus courtyard, with water over the paving and benches. The caption says, "Courtyard flooded today, stay away." It showed up at 2:48 p.m. with no link, no date and no name.

Jordy is putting together the crew's recap, which goes out at six. Sami has zoomed in on a hand in the picture, and the fingers seem to merge at the knuckles. Someone ran the image through a free online detector. It reported "12% likely AI-generated."

A reply in the chat says the writer's roommate's friend saw water near the library. Jordy checks the campus facilities alerts page. It shows no active alerts, but its last update was Monday morning.

Provenance Provenance is information about where an image or a document came from and how it has been handled.

Corroboration Corroboration is support for a claim from an independent source.

En español: corroboración

In this case: A campus alert or someone's dated photo of the courtyard could corroborate the flood. A roommate's friend's report of water near the library cannot.

Verification note A verification note is a short record of what you checked, what you found and what is still unknown.

The story: A deadline and a picture

The crew's casebook began with a seven-second clip in a group chat. It ends with a single image. At 2:48 p.m. on a Wednesday, a photo-like picture of the campus courtyard appears in the chat, showing water over the paving and benches. Its caption reads, "Courtyard flooded today, stay away." It arrives with no link, no date on the image and no original poster named. A person in the foreground holds up a phone.

Jordy, who edits the crew's films and checks every cut before calling it finished, is assembling the six o'clock recap. Within twenty minutes, four pieces of evidence have arrived, and each points somewhere different. Sami posts a zoomed screenshot at 3:02 showing a foreground hand whose fingers seem to merge at the knuckles. A free online detector reports "12% likely AI-generated." A reply relays that the writer's roommate's friend saw water near the library. And at 3:10, Jordy checks the campus facilities alerts page: "No active alerts. Last update: Monday, 9:15 a.m."

Sami, a design student who notices details for a living, is the first to step back from them. The hand is weird, she agrees, but the more important question is who posted the image first, and when. Jordy states the dilemma plainly. They wanted a clean yes or no, and they do not have one.

Your role is to write the verification note Jordy posts at six.

❓ Stop and think

1. **After "The story: A deadline and a picture":** Why can a detector score answer the wrong question even if it is accurate?
2. **After "Weighing evidence without overclaiming":** Why does a question mark fail to stop an image from misleading people?
3. **After "Detection, provenance and professional standards":** Who could be harmed if the crew called a real photo fake?

? **Stop and think.** Why can a detector score answer the wrong question even if it is accurate?

Weighing evidence without overclaiming

Provenance is information about where an image or a document came from and how it has been handled. Checking provenance first is the Case 1 skill, finding the original source, applied to images. This image has none, so every other clue has to be weighed without an anchor.

Each clue has a specific weakness. The caption is a **claim**, a statement that something is true that can be checked with evidence. The hand is an anomaly, which justifies closer scrutiny and proves nothing, since generated images can look natural and real photos can look strange. The detector score is uninterpretable without knowing the tool's error rates. Sami's question, twelve percent of what, gets at that. It also answers a different question from the one that matters. Even a perfect detector could not say whether the courtyard flooded today. The secondhand report fails on two counts: it is not firsthand, and it concerns the library, not the courtyard.

Corroboration is support for a claim from an independent source. Case 9's skill, checking the official source for your area, points to the alerts page, but its last update on Monday limits what its silence can mean. A dated photo from someone at the courtyard would be stronger.

The new skill is confirming an image with independent sources, and publishing only what was checked. Jordy rejects the middle path of posting the image with a question mark, because the image travels regardless of the punctuation. The recap instead carries a **verification note**, a short record of what you checked, what you found and what is still unknown. It is a descendant of Case 1's **holding statement**, which says what is known, what is still being checked and when people will hear more. It also sets up Case 3's obligation. If new evidence arrives, a **correction** or update appears where the note did. "Unverified" is sometimes the most accurate conclusion available.

? **Stop and think.** Why does a question mark fail to stop an image from misleading people?

Detection, provenance and professional standards

NIST's overview of synthetic content describes provenance data, labeling, watermarking and detection, and it explains the technical limits of each (NIST, November 20, 2024). Real incidents show why no single signal suffices. The Hurricane Helene image of a crying girl with a puppy had no traceable photographer or outlet, and forensics researcher Hany Farid identified internal inconsistencies (UC Berkeley School of Information, October 4, 2024). The News Literacy Project's RumorGuard check on that image models a verification note, setting out what is known, what is not and why (RumorGuard, no date listed). In 2023, fake images of a Pentagon explosion were shared by verified accounts, showing that a trusted-looking sharer is not provenance (CNN, May 22, 2023).

This page continues page 392. The notes for both pages are on the sheet for page 392.

Detection, provenance and professional standards, continued

Human perception is not a reliable safeguard. In a PNAS study, people could not reliably distinguish AI-synthesized faces from real ones (Nightingale and Farid, February 14, 2022).

Journalism codes frame Jordy's choice as a duty. The RTDNA code says journalism "verifies, provides relevant context, tells the rest of the story and acknowledges the absence of important additional information" (RTDNA Code of Ethics, June 11, 2015). The SPJ code asks journalists to "identify sources clearly" (SPJ Code of Ethics, September 6, 2014).

Key idea: provenance

On your own Read the key idea and the code of ethics, then answer the question in the box. About 15 minutes.

Provenance is information about where an image or a document came from and how it has been handled. Check it first when an image claims to show a news event. An image can look polished and still be generated, edited, old or shared with the wrong caption. The courtyard image arrived with no link, no date and no named poster, so its provenance is unknown.

A detail or a tool can give a clue, but it cannot settle the question. An odd-looking hand is a reason to look closer. A natural-looking hand does not prove that an image is real, either. The National Institute of Standards and Technology (NIST) describes several ways to track, label, watermark and detect synthetic content, such as AI-generated images. NIST explains that each approach has technical limits.

For a claim about a real event, look for the earliest post, its date and place, and corroboration.

Corroboration is support for a claim from an independent source. Here, that could be a campus alert or someone's dated photo of the courtyard. If you cannot confirm the claim, write a verification note. A **verification note** is a short record of what you checked, what you found and what is still unknown.

- ☐ A Post the image with a question: “Is the courtyard flooded?”
- ☐ B Say the image is fake, because the hand looks wrong.
- ☒ C Leave the image out, report what the crew checked and say the flood is not confirmed.

Why I chose it

The section that proposes your norm

🔗 I propose one verification norm for a student media team. No image goes out as news until it has a traced first post and one independent confirmation. The three perspectives in the stimulus explain why. The technical sources show that tools cannot carry this job alone. NIST describes provenance data, labels, watermarks and detection, and it says each has technical limits. The psychological evidence shows that our eyes cannot carry it either. Nightingale and Farid found that people could not reliably tell synthesized faces from real ones. Journalism supplies the habit that fills the gap. The RTDNA code says journalism verifies and acknowledges when important information is missing. Tested on the courtyard image, the norm works. The image had no traced first post, and the alerts page, last updated Monday, could not confirm a flood. Under the norm, the crew posts a verification note instead of the image. The cost is speed. A real flood warning could reach followers later. So the norm allows a note that says what is known and when the next update will come.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames. About 10 minutes.

1 What would you need beyond the image to support the caption's claim?

➤ The earliest post, its date and place, and an independent record, such as an alert or a dated firsthand photo.

2 Do you agree with Jordy's choice to leave the image out of the recap, and why?

➤ Yes. The image would do the persuading, whatever the caption says. A note can report the checks without spreading the claim.

3 Who could be harmed if the crew called a real photo fake?

➤ The photographer, whose honest photo is called a lie, and people who skip a real warning. The crew's credibility also suffers.

4 The alerts page shows nothing new since Monday. Does that prove the courtyard did not flood?

➤ No. Silence from a page last updated Monday morning cannot rule out a Wednesday flood. It only means no alert was posted.

My take

My claim: ____.

➤ The crew should post a verification note that keeps the flood claim open and leaves the image out.

- Going further: List every place the crew could look for the first post of the courtyard image. For each one, write what it could prove and what it could not.
- Going further: Write two captions that say the flood is not confirmed. Which one makes the image feel more trustworthy than it is? Name who could be hurt if the crew gets this wrong.
- Going further: Write two short notices that tell followers the flood is not confirmed. Ask two readers what each notice lets them conclude. Rewrite any line that made them more certain than the evidence allows.
- Going further: Before you repost an image as news, find where it first appeared. Check an official or independent source for the event. If you cannot confirm it, say so or do not share it. If you help run a club account, suggest a "check before posting" rule.
- Compare how two news organizations describe their image-verification process

🔗 The missing provenance, because with no first post or date, the image cannot show today's courtyard.

Someone who disagrees might say ____.

🔗 The low detector score means the image is real, so the crew should warn people.

The limit of the evidence is ____.

Case 20: Can the crew post this image as true?

In this case, a realistic image in a group chat claims that a campus courtyard flooded today. Your student checked where the image came from and wrote a short note that says what is known and what is not.

Questions to talk about

- 1 What would you check before you share a picture of breaking news?
- 2 Where does your town or school post official alerts?
- 3 Why can saying you are not sure yet be better than guessing?

Nobody needs to share personal stories or private information to talk about this case.

Track the work across the year

Each case has the same four rubric rows, so growth is easy to see. Mark the level each student or group reached, case by case.

Case	Evidence	Reasoning	Audience	Revision	Took a civic step
1 Is the screening canceled?					
2 Does the worksheet show what Dec knows?					
3 What should a group do after a public mistake?					
4 Who gets a say when a shared room changes?					
5 Why is my deposit smaller than what I earned?					
6 What can your family see in your college records?					
7 Did one complaint get the novel banned?					
8 Is it a recommendation or an ad?					
9 What is on your ballot, and where do you check?					
10 Whose job is it to fix the blocked route?					
11 Why are Jordy and Gia paid different rates?					
12 When can a school limit what students say?					
13 Can the crew cut waste before it reaches the bin?					
14 Does giving credit let the crew use the song?					
15 Is Rafa’s unpaid internship really a job?
