

Case 17: How should the crew give out ten free seats?

Thirty people want ten free workshop seats, and the crew must choose a fair way to decide who gets them.

On your own Read What happened and underline the sentence that tells how many people want a seat. About 5 minutes.

Duda holds up a phone and points at a blank card on a bulletin board.

Your role: You're the one who writes down the rule before the crew picks the ten names. **New skill:** Set fair criteria before choosing.

What happened

The crew has ten free seats for a workshop, and thirty people want one. The crew opened a sign-up sheet on Monday at 9 a.m. Twenty-two names were on it before 10 a.m. By Wednesday, the sheet has thirty names.

The sheet says only “How seats will be chosen: to be announced.” The crew has argued about the rule since dinner on Sunday. Gia is running the sign-up. She wants to give the seats to the first ten names, because that is simple and fast. Mateo suggests a lottery instead.

Anika, 16, is at rehearsal most days, and she checks her phone after rehearsal ends. Under first-come, she would see the message after the seats were gone. A third option on the crew’s whiteboard would give seats to people who cannot afford the paid version of the workshop. That option would ask people for personal information.

Every method seats exactly ten people. The crew has to decide which ten, and then explain the rule to all thirty.

Your question: How should the crew choose who gets the ten seats, and how should they explain the choice to all thirty people?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Criteria Criteria are the standards or reasons a group uses to make a decision.

En español: criterios

In this case: The sheet says “How seats will be chosen: to be announced.” Twenty-two names arrived before 10 a.m. Monday, before the crew stated any criteria.

Trade-off A trade-off is a choice where getting one benefit means accepting a cost or giving something up.

En español: compensación entre opciones

In this case: First-come is fast for Gia to run but favors whoever sees the message first. A lottery gives everyone the same chance but needs a sign-up window and a drawing.

Equity Equity is a way of sharing that adjusts for different needs so everyone gets a fair chance.

En español: equidad

In this case: Option C would give seats to people who cannot afford the paid version of the workshop. It would also ask applicants for personal information.

Who is involved

Gia

Running the sign-up

“First ten to reply get a seat. It’s simple, I can post it tonight, and I have a shift at seven.”

Anika

Checks her phone
after rehearsal

“By the time I see the message, ten people will have answered. I don’t even need a seat. I just want to know how you’re picking.”

Before you look at the evidence, how do you think the crew should choose who gets the ten seats?

My first guess is ____, because ____.

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Reading passage

Fair before, not fair after

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Criteria:** Criteria are the standards or reasons a group uses to make a decision.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.
- **Equity:** Equity is a way of sharing that adjusts for different needs so everyone gets a fair chance.
- **Consent:** Consent is permission a person gives for something specific, such as sharing a record with a named person.

The story: To be announced

The crew has ten free seats for a workshop and a sign-up sheet that filled faster than anyone expected. It opened Monday at 9 a.m. Twenty-two names were on it before 10. By Wednesday, there are thirty. The line at the bottom still reads, “How seats will be chosen: to be announced.” The crew has been arguing about that line since dinner on Sunday.

Gia is running the sign-up, and she wants first come, first served. It is easy to explain, she can post it tonight and she has a shift at seven. Mateo suggests a lottery. Gia points out what that costs: a sign-up window and someone to run the drawing. A third option sits on the whiteboard, a needs-based rubric that would favor people who cannot afford the paid version of the workshop.

Anika, 16, is at rehearsal most days, and her phone lives in her bag until rehearsal ends. Under first-come, she would see the message after the seats were gone. She is careful about what she is asking for. She does not need a seat. She wants to know how the crew is picking, and she wants them to be honest that someone like her would lose out.

Your role is to write down the rule before the crew picks the ten names.

❓ Stop and think. Gia’s reason for first-come is partly about her own time. Is that a fair criterion? Why or why not?

Criteria, trade-offs and equity

Criteria are the standards or reasons a group uses to make a decision. The new skill is setting fair criteria before choosing and saying honestly who each rule leaves out. The whiteboard already does part of that work. Option A, first come, first served, is fast to run and favors whoever sees it first. Option B, a lottery after a three-day sign-up, gives everyone an equal chance but needs a sign-up window and a drawing. Option C, a needs-based rubric, prioritizes people who cannot afford the paid version but needs personal information and someone to judge it.

Case 4 gave you the word **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Every option seats exactly ten people, so every option leaves twenty without a seat. The choice is which cost to accept. **Equity** is a way of sharing that adjusts for different needs so everyone gets a fair chance. Option C aims at equity, and it carries a cost Case 6 prepared you to see. **Consent** is permission a person gives for something specific. A needs-based rule asks applicants to share personal information, so the crew would need their consent and a plan for who sees it.

Timing matters as much as the rule. The sign-up sheet shows most names arrived in the first hour, before any rule was posted. If the crew picks a rule now, after seeing the names, people may wonder whether it was chosen to favor someone. A rule stated clearly and early is easier to accept, even for the twenty who miss out.

Anika also suggests a better way to compare the options. Ask two questions. Which option helps the most people? And is the way we pick fair to everyone? Gia, for her part, admits she mostly wanted the job off her list. What would change her mind is learning that the people the crew most wants in the room are the ones who would see the message last.

 **Stop and think.** Option C would help people who cannot afford the paid workshop. What would applicants give up to be chosen that way?

Real rationing decisions

Santa Clara University's Markkula Center suggests looking at a decision through several ethical lenses, including consequences, rights, fairness, the common good, character and care (Markkula Center for Applied Ethics, revised November 5, 2021). The lenses can point to different answers.

Real institutions face the same choice. New York City uses random lotteries for some middle and high school seats (Chalkbeat New York, October 1, 2024). For Taylor Swift's Eras Tour, more than 3.5 million people registered for presale codes. Ticketmaster says about 1.5 million received codes, and 2 million were waitlisted (Ticketmaster, November 19, 2022).

 **Stop and think.** What would make the twenty people without seats accept the result as fair?

Look at the evidence

On your own Read each document and write what it shows and what it leaves out. About 8 minutes.

Evidence A | Sign-up sheet

The workshop sign-up sheet

“Free workshop: 10 seats. Add your name to show interest. How seats will be chosen: to be announced.” The sheet opened Monday at 9 a.m. By Wednesday it had thirty names. The first 22 names were added before 10 a.m. on Monday.

Look closely: When did most names arrive, and what rule was posted then?

What it shows

What it leaves out

Evidence B | Group-chat thread

The crew’s thread, Sunday at 8:30 p.m.

- Gia: first come is easiest to run, we just take the top ten.
- Anika: I’m at rehearsal most days, I’d see it after it’s full.
- Mateo: lottery?
- Gia: then we need a sign-up window and someone to run the drawing.

Look closely: Which cost does each person name? Which cost does nobody name?

What it shows

What it leaves out

Look at the evidence, continued

Evidence C | Whiteboard

Three options on the whiteboard

A. First come, first served: fast to run; favors whoever sees it first. B. Lottery after a three-day sign-up: equal chance for everyone; needs a sign-up window and a drawing. C. Needs-based rubric: prioritizes people who can’t afford the paid version; needs personal information and someone to judge it.

Look closely: Underline the cost the crew wrote for each option.

What it shows

What it leaves out

What is still missing from the evidence?

Notes

Key idea: fair criteria

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

Any way of giving out ten seats to thirty people leaves twenty people without one. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. First-come is fast, but it favors people who see the message first. A lottery gives everyone the same chance, but it does not consider need. A needs-based rubric aims at equity by helping people who cannot afford the paid version, but applicants must share personal information. Each option has a cost, so the crew has to choose which cost to accept.

Criteria are the standards or reasons a group uses to make a decision. When the crew states its criteria early, everyone knows the rule before anyone is chosen. Even people who do not get a seat may accept the result if the rule was clear in advance. If the crew picks a rule after seeing the names, people may wonder whether it was chosen to favor someone.

The Markkula Center for Applied Ethics at Santa Clara University suggests looking at a decision through several ethical lenses. They include consequences, rights, fairness, the common good, character and care. The lenses can point toward different options, and they do not add up to one automatic score. A strong decision explains which concern matters most in this case, who carries the cost and what could reduce it.

Professional standards

Adapted from a real source

| National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research; published by the U.S. Department of Health, Education, and Welfare

The Belmont Report: B. Basic Ethical Principles: 3. Justice

Summary: Summary, not a quotation: the report treats justice as fairness in distribution and lists five widely accepted ways to share benefits and burdens: an equal share, individual need, individual effort, societal contribution and merit.

In plain words: The Belmont Report, written for research with people, lists several fair ways to share limited benefits, such as equal shares or need.

Question: Which whiteboard option comes closest to “an equal share,” and which comes closest to “individual need”?

Professional standards, continued

Your answer

Option ___ comes closest to an equal share, and option ___ comes closest to individual need, because ____.

In the news

The Ethics Of Who Gets The COVID-19 Vaccine And When

A bioethicist explains how leaders chose who went first when there wasn’t enough for everyone.

Real source | Scientific American | September 3, 2020

How to Decide Who Should Get a COVID-19 Vaccine First

Lays out competing criteria such as risk, fairness and benefit, the same lenses the crew uses.

Notes

Sort the evidence

On your own Follow each option to its effects and write who carries the cost in each box. About 8 minutes.

Follow each method to its consequences. Who carries the cost under each one, and what makes the chosen process legitimate to the twenty who lose?

First come, first served

The ten fastest responders get seats; people at rehearsal or work see the sign-up late

Who is affected

Lottery after a three-day sign-up

Each of the thirty has the same chance, and need is not considered

Who is affected

Needs-based rubric

Those with the greatest need are prioritized; applicants must share personal information

Who is affected

Whose perspective is missing?

Whose view is missing from these documents? What would you ask them?

The view that is missing is _____. I would ask _____.

Practice: choose a response

On your own Choose the note you would send, explain why and fix the two marked phrases. About 6 minutes.

Gia is drafting a note to the thirty people on the sign-up sheet. Which sentence could the crew defend?

- ☐ A “We picked the fairest method, so nobody loses out.”
- ☐ B “We’re holding a lottery so everyone has the same chance. A lottery doesn’t favor people with the most need, so we’re looking into a second session.”
- ☐ C “Seats go to the first ten names on the sheet, because those people wanted it most.”

Why I chose it

Improve a draft

A student’s first draft

We should do first come first served because ① it’s the most fair. Everyone has the same chance to sign up and if you really want it you’ll sign up fast. It’s simple and ② nobody can complain because they had the same opportunity as everyone else. Also it’s way less work for us than reading thirty applications or doing some random drawing. The people who don’t get in can just come to the next workshop whenever we have one. This is obviously the best way.

Rewrite each marked phrase so it says only what the evidence supports.

Rewrite phrase 1

Rewrite phrase 2

Grades 9—10

Your task

On your own Read the steps and fill in the planner boxes before you start your draft. About 8 minutes.

Write a 150-word decision note defending one option, its strongest objection and one revision.

Use: Case options and the Markkula Center framework summary.

You'll make: Decision note, 150 words

Time: 50 minutes

- 1

Reread the three options in Evidence C.
- 2

List who gains and who carries the cost under two options in the planner.
- 3

Apply two lenses to your choice, including one that challenges it.
- 4

Write a decision note of about 150 words on the Your draft page.
- 5

Put your choice and your reason in the first two sentences.
- 6

Name the strongest objection and one revision that reduces its cost.
- 7

Check your note with the questions on the Check your work page.

Prefer typing? Scan to open the online workspace.

Option 1: who gains, who carries the cost

Option 2: who gains, who carries the cost

A lens that supports my choice

[illegible]

On your own Write your draft in the boxes, using your planner from the page before. About 20 minutes.

[illegible]

Check your work

On your own Answer the Check your work questions, mark your level in each rubric row and write one change you made. About 8 minutes.

Does your note state a choice and a reason in the first two sentences?

☐ Yes☐ No

Does it name the strongest objection?

☐ Yes☐ No

Does it use two lenses, including one that challenges your choice?

☐ Yes☐ No

Does it offer a revision that reduces the cost?

☐ Yes☐ No

How your work is scored

Mark one box in each row.

Skill	Beginning	Developing	Proficient	Advanced
Evidence	☐ No reference to who is affected.	☐ Mentions people vaguely.	☐ Names specific people and effects from the case.	☐ Uses case facts to show who gains and who pays.
Reasoning	☐ Claims an option is obviously best.	☐ Gives one reason only.	☐ Uses a lens and names the strongest objection.	☐ Uses two lenses and proposes a revision tied to the objection.
Audience & purpose	☐ Ignores the twenty who miss out.	☐ Mentions them briefly.	☐ Explains the process to all applicants.	☐ Builds legitimacy by publishing criteria and a remedy.
Revision	☐ No change.	☐ Wording only.	☐ Adds a named cost and revision.	☐ Explains how the revision addresses the objection.

One change I made after feedback

This image shows a single page of white paper with horizontal blue lines, resembling notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Questions to discuss

On your own Write a short answer to each question, then complete the sentence frames. About 12 minutes.

1 Whose view would most challenge the option you prefer?

2 Anika says she does not need a seat. What is she asking the crew for?

3 Option C would help people who cannot afford the paid workshop. What would applicants give up to be chosen that way?

My take

My claim: ____.

The best evidence is ____, because ____.

My take, continued

Someone who disagrees might say ____.

I would change my mind if ____.

Notes

Talk about this case at home

Case 17: How should the crew give out ten free seats?

In this case, a group of friends has ten free workshop seats and thirty people who want one. Your student compared three ways to choose and wrote a note that explains the choice and who carries its cost.

Questions to talk about

- 1 When something is limited, like tickets or seats, what makes a way of choosing feel fair?
- 2 Why might it help to announce a rule before anyone signs up?
- 3 What is one kind way to tell people they were not picked?

Nobody needs to share personal stories or private information to talk about this case.

See the case online.
