

Compare options before you choose

Use this when a group has more than one option and each has a cost.

- 1

List the options

Write each choice, including keeping the current plan.
- 2

Pick your criteria

Choose what matters most, such as cost, access and risk.
- 3

Score each option

Rate each option on each criterion. Mark any guesses.
- 4

Name who pays the cost

Say who loses something under each option.

Example from Case 4

- 1

A: keep free evenings. B: rent Tuesday and Thursday. C: pilot one rental.
- 2

Cost, evening access and how sure the numbers are.
- 3

A leaves a \$200 weekly gap, C leaves \$80, and B closes it only if both book.
- 4

Under B, Dec loses Thursday rehearsals. Under A, the funding gap stays.

 **Watch out:** Mark every projection. A rental that never books adds nothing to the budget.

Sentence frames

The options are ____.

Option ____ costs ____, but ____.

I choose ____, even though ____.
