

Talk about this case at home

Case 2: Does the worksheet show what Dec knows?

In this case, a student can explain a light circuit out loud but gets lost on a crowded worksheet. Your student compared the worksheet's goal with notes from a study session and thought about what the worksheet really measures.

Questions to talk about

- 1 Can one test show everything a person knows? Why or why not?
- 2 What makes the directions on a worksheet or a form easy to follow?
- 3 Who at a school can students ask about help with schoolwork?

Nobody needs to share personal stories or private information to talk about this case.
