Case 1: Is the screening canceled?

A cropped clip in the group chat seems to cancel the crew's screening, so you check the original documents and write an update.

On your own Read What happened. Underline the sentence that worries the crew. About 5 minutes.

Your role: You're the one who reads the full transcript before Gia posts. **New skill:** Find the original source.

Gia and Mateo read the message about tonight's screening.

What happened

It is Friday afternoon at the Common Room, a shared event space inside a bookshop in Fort Greene, Brooklyn. Mateo, 22, booked the room for tonight's 6 p.m. screening, the crew's first in the neighborhood. He has been moving tables and chairs all afternoon.

Gia, 21, is helping between her class and her shift at a café. Jordy is testing the projector and captions. Sami is on her way from the print shop.

At 4:52 p.m., someone forwards a seven-second clip to the group chat. The clip comes from a meeting about the room. Its caption asks whether the screening is canceled.

Gia wants to warn people before they leave home. Mateo hopes the post is wrong. Gia has about ten minutes before she has to leave for work.

Your question: Is the screening really canceled, and what should the crew tell people?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 5 minutes.

Claim A claim is a statement that something is true. You can check a claim with evidence.

En español: afirmación

In this case: The caption “Screening canceled?” is a claim. It ends with a question mark, and no document confirms it.

Context Context is the information around an event or a quote that you need to understand what it means.

En español: contexto

In this case: The full transcript adds the words “through that reader tonight.” Those words show that only the broken side door is closing.

Framing Framing is choosing which parts of a situation a message brings forward.

En español: encuadre

In this case: The crop and the caption choose what viewers notice: “removing access,” not “through that reader.”

Holding statement A holding statement is a short update that says what is known, what is still being checked and when people will hear more.

En español: comunicado provisional

In this case: Jordy posts: “We’re checking the original. Hold your plans for a moment.”

Words to know

- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Context:** Context is the information around an event or a quote that you need to understand what it means.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.
- **Holding statement:** A holding statement is a short update that says what is known, what is still being checked and when people will hear more.

The story: Ten minutes before Gia's shift

On Friday afternoon, the Common Room smells like coffee and cardboard. The shared event space sits inside a bookshop in Fort Greene, Brooklyn, and tonight it belongs to the crew. Mateo booked it for a 6 p.m. screening, their first in the neighborhood, and he has been dragging folding chairs into rows since lunch. Jordy is running a caption test on the projector. Gia is squeezing in an hour of help between class and a café shift. Sami is on the train from the print shop.

At 4:52 p.m., the group chat lights up. Someone has forwarded a seven-second clip from a meeting about the room. The coordinator says, “we are removing access,” and the video ends. The caption reads, “They’re removing access tonight. Screening canceled?”

The pressure arrives at once. Gia sees people asking whether to turn around, and she wants to protect them from a wasted trip. Mateo admits he wants the clip to be fake. Jordy, who spends a lot of time with edited video, notices that the clip stops in the middle of a sentence. Before anyone answers, Jordy asks for the rest of the recording.

In this case, you are the person who reads the full transcript before Gia posts. That is a small job with large effects, because every guest who sees the chat will act on what the crew says next.

? Stop and think. Gia and Mateo both have reasons to want a quick answer. How could each reason push the crew toward a mistake?

Three possible replies, one set of facts

The caption makes a **claim**, a statement that something is true. You can check a claim with evidence. The coordinator's meeting transcript from 3:30 p.m. is the original source. It says the side-door reader is broken and that access is being removed "through that reader tonight." It adds that existing room bookings remain in place and that people should use the staffed front entrance. Mateo's booking email, sent Tuesday, confirms the event for 6 to 9 p.m. It lists a step-free front entrance with staff at the desk from 5:30.

Context is the information around an event or a quote that you need to understand what it means. With context, the clip means something narrow: one door is closed. Without it, the clip seems to cancel the whole night.

Consider the three replies the crew could send. "Cancel your plans" spreads the rumor before anyone checks. "The post is fake" goes too far, because the clip is real. The problem is what it leaves out. The strongest first move is a **holding statement**, a short update that says what is known, what is still being checked and when people will hear more. Jordy posts one: "We're checking the original. Hold your plans for a moment." Then Gia corrects the claim in the same chat where it started. She gives the time and the front entrance, which Sami needs because she usually comes in the side way.

? **Stop and think.** Why is "The post is fake" a weaker reply than a holding statement, even though the screening is on?

Framing in the real world

Media researcher Robert Entman described **framing** as a process of selection and emphasis (Robert M. Entman, "Framing," 1993). Framing is choosing which parts of a situation a message brings forward. A crop is one of the simplest frames. It keeps "removing access" and drops "through that reader." You do not need to prove intent to point out a frame. You only need to show what the edit leaves out.

Real fact-checkers see the same pattern with screenshots. PolitiFact examined an image that looked like a story from The Atlantic about President Biden. It looked official, but the outlet never published it (PolitiFact, August 1, 2022). PBS NewsHour Classroom teaches students to treat a screenshot as a claim, not proof, and to trace it back to the original post (PBS NewsHour Classroom, November 17, 2022).

Professional codes say the same thing. The Society of Professional Journalists tells reporters to "verify information before releasing it" and to "use original sources whenever possible" (SPJ Code of Ethics, September 6, 2014). The crew's version of that rule is small and concrete: find the full transcript, then post. Every later case in this series builds on that first skill.

Notes

Key idea: framing

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 8 minutes.

The clip in the group chat is real, but that only tells you the video is authentic. A **claim** is a statement that something is true. You can check a claim with evidence. **Context** is the information around an event or a quote that you need to understand what it means. Here, the clip stops before the rest of the coordinator's sentence, so the clip alone cannot confirm the caption's claim.

Framing is choosing which parts of a situation a message brings forward. Media researcher Robert Entman uses this idea to study what messages select and emphasize. The crop makes "removing access" stand out and hides "through that reader," the words that limit the change to one broken side door. You do not have to prove that anyone meant to mislead people. You only need to show what the edit leaves out.

A **holding statement** is a short update that says what is known, what is still being checked and when people will hear more. It gives people a next step while the crew checks the documents. The correction that follows needs the time, the door and a contact for arrival help. People who are already traveling need those details before they arrive.

Compare two captions for the same clip, one alarming and one neutral, and argue which one a community group should model its posts on.

Use: The screenshot, the transcript and two teacher-written alternate captions.

You'll make: Comparative argument, 400—500 words

Time: 60 minutes

- 1 Copy the caption from Evidence A and Jordy's holding message into the planner.
- 2 Circle the loaded words in each caption. Write what each one makes a reader do.
- 3 Name one reader who is already traveling and what that reader needs first.
- 4 Write the strongest objection to your position and your answer to it.
- 5 Draft your opening and counterargument paragraphs on the Your draft page.
- 6 Finish the argument, 400 to 500 words, on lined paper or in the online workspace.

On your own Read What happened. Underline what Dec can do out loud and where he gets stuck. About 5 minutes.

Your role: You're the one who reads the goal line before anyone decides what Dec knows. **New skill:** Check what a task is meant to measure.

Dec points to a small light circuit on the table while Anika watches.

What happened

Anika, 16, and Dec, 17, are at the study table twenty minutes before theater rehearsal. They are building a light circuit for a school set. Dec can explain out loud how the current travels through the circuit. On the written practice sheet, he loses his place in the instructions.

The sheet has six dense paragraphs and one small diagram. Anika's first idea is to run the same timed practice sheet again. Then she draws a larger sketch, and Dec traces the whole circuit correctly.

Mari, 19, is on her break from the bookshop. She does not assume she knows why Dec is stuck. Dec wants help with this task, but he does not want a diagnosis from the group chat.

Your question: Does the practice sheet show what Dec knows, and what should Dec ask his teacher?

Words to know

- **Learning goal:** A learning goal is the knowledge or skill that a task is meant to show.
- **Evaluation:** An evaluation is a school's formal process for learning about a student's needs, using more than one measure.
- **Eligibility:** Eligibility is meeting the requirements for a particular service or program.
- **Context:** Context is the information around an event or a quote that you need to understand what it means.

The story: A cue sheet with no numbers

The study table is covered in wire, a battery pack and a drawing that is getting bigger by the minute. Anika, 16, and Dec, 17, are building a light circuit for a school set, and rehearsal starts in twenty minutes. Dec can trace the current out loud without a pause: battery, switch, LED and back. On the written practice sheet, he gets halfway through a question and loses his place. The sheet has six dense paragraphs and one small diagram. “It’s like a cue sheet with no numbers,” he says.

Anika’s first instinct is repetition. She suggests running the same timed practice sheet again. Later she admits she kept pointing at the page and saying “it’s right there” without ever looking at how the question was written. When she sketches the circuit larger, Dec traces the whole path correctly. Mari, 19, is on her break from the bookshop. She switches between print and audio in her own reading, and she does not assume she knows why Dec is stuck. She asks him to walk her through it first.

Dec is clear about one boundary. He wants help with this task, but he does not want his friends to diagnose him. Before anyone tells his teacher, Ms. R, what he needs, they have to ask him.

❓ Stop and think. Anika’s first idea was to repeat the timed sheet. What would a second try on the same sheet show, and what would it miss?

Reading the goal line

In Case 1, you found the original source before trusting a cropped clip. The original source here is the practice brief. Its goal line reads: “Explain how a simple circuit works.” The brief lists no time limit.

Reading the goal line, continued

A **learning goal** is the knowledge or skill that a task is meant to show. Once you know the goal, you can ask a sharper question. Is the sheet measuring circuit understanding, reading speed or both? Dec's study-table notes answer part of it. Out loud, with the larger sketch, he traced the whole circuit correctly. On paper, he skipped a line in the instructions and answered a different question from the one asked.

Case 1 also gave you the word **context**, the information around an event or a quote that you need to understand what it means. A single written answer is a little like a cropped clip. It is real, but it leaves out the spoken explanation that shows what Dec knows.

❓ **Stop and think.** How would you know that a new format shows Dec's learning more clearly instead of giving away the answer?

Where the crew's power ends

The crew can change a practice plan. It cannot decide what support Dec qualifies for. An **evaluation** is a school's formal process for learning about a student's needs, using more than one measure. **Eligibility** is meeting the requirements for a particular service or program. Under IDEA, a federal law, a public school must use varied tools in an evaluation, and no single measure can be the only basis for deciding eligibility (U.S. Department of Education, IDEA regulations, 34 CFR 300.304). Special educators hold themselves to a similar standard. The Council for Exceptional Children asks them to use assessments that "accurately measure what is intended to be measured" (CEC Ethical Principles and Practice Standards, no date listed).

Federal guidance on testing makes the same point from another side. Tests should measure a person's skill, not their disability (ADA.gov, U.S. Department of Justice, February 28, 2020). Reporters are still asking whether common supports, such as extended time, help students show what they know (Education Week, October 13, 2025).

So the crew does what it can. Dec tries the clearer diagram and explains his reasoning again. Anika changes the study plan. Dec decides for himself whether to ask Ms. R about more support. Your role is to read the goal line before anyone decides what Dec knows.

❓ **Stop and think.** Why does a study session fall outside the IDEA evaluation rule?

Key idea: learning goals

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 10 minutes.

Dec's written answer and his spoken explanation give the crew different information. A **learning goal** is the knowledge or skill that a task is meant to show. The practice brief names one goal: explain how a simple circuit works. It does not list speed, and it does not list reading six dense paragraphs. So the next question is what the sheet was meant to measure and what got in the way.

CAST's Universal Design for Learning Guidelines encourage giving learners more than one way to take in information and show what they know. For Dec, a larger diagram is a practice option to test. It is not a diagnosis, and it does not change an official test. Ask Dec what helped, and check that he can still explain the circuit.

An **evaluation** is a school's formal process for learning about a student's needs, using more than one measure. Under IDEA, a federal law, a public school must use varied tools in an evaluation. No single measure can be the only basis for deciding **eligibility**. Eligibility is meeting the requirements for a particular service or program. A study session is not an evaluation, so Dec decides whether to ask his school how that process starts.

A student's first draft

Hi Ms. R, Dec failed the circuit sheet again and we think the test is unfair to him. He obviously knows the material because he explained it to us perfectly. At the study table he went through the whole thing out loud with no mistakes. ① We think he might have a learning disability and should get an IEP so he can get extra time. My cousin has one and it helped her a lot. ② Can you give him an easier version? We really think this would help him pass. Thanks, Anika and Mari.

Case 2: Does the worksheet show what Dec knows?

In this case, a student can explain a light circuit out loud but gets lost on a crowded worksheet. Your student compared the worksheet's goal with notes from a study session and thought about what the worksheet really measures.

Questions to talk about

- 1 Can one test show everything a person knows? Why or why not?
- 2 What makes the directions on a worksheet or a form easy to follow?
- 3 Who at a school can students ask about help with schoolwork?

The crew's recap caption blamed younger neighbors for a late start, but the event log shows the projector failed.

On your own Read What happened. Underline the caption and the time the projector failed. About 5 minutes.

Your role: You're the one who checks the log's times before the correction goes up. **New skill:** Correct a public mistake.

Gia and Jordy sit at a table with a laptop and a printed page.

What happened

It is Sunday at the edit desk. Caio, 24, edited a short recap of Friday's screening. The crew posted it on Saturday morning. Gia's caption, "Great night, once the younger crowd finally got organized," sounded believable, because a few people did arrive late.

Then Jordy checks the setup log. The projector failed at 5:40 p.m. The replacement was not running until 6:20, twenty minutes after everyone was seated. The log also says Anika and Dec helped carry chairs before the doors opened.

Anika sends the group a voice note asking why she and Dec are the problem in the post. Gia wants to take responsibility. Her first draft of a correction is mostly about how bad she feels, and the recap caption is still up.

Your question: What should the correction say, and what will the crew do differently next time?

Key terms

Claim A claim is a statement that something is true. You can check a claim with evidence.

Accountability Accountability is owning a mistake and doing what you said you would do to fix it.

Jordy

- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Correction:** A correction is a public statement that replaces wrong information with accurate information.
- **Accountability:** Accountability is owning a mistake and doing what you said you would do to fix it.

The story: Sunday at the edit desk

The screening from Case 1 went ahead, and on Saturday at 11:08 a.m. the crew posted a recap. Caio, who edits the crew's videos, cut it together. Gia wrote the caption: "Great night, once the younger crowd finally got organized." It sounded right to her. A few people had come in late, and the start had slipped.

On Sunday, Jordy opens the setup log they kept on Friday. The entries are short and exact. At 5:40 p.m., a projector failure was reported. At 6:00, attendees were seated. At 6:20, the replacement projector was connected. A note at the bottom says Anika and Dec helped carry chairs before the doors opened. Jordy admits something uncomfortable in the group chat. Nobody opened the log before posting, including Jordy.

Then Anika's voice note arrives: "We were helping you set up. Why are we the problem in this post?"

Gia owns the caption, and she knows it. She has already drafted a correction, though it has not gone up. It reads, "Sorry if this came across wrong. We love our younger neighbors and would never want anyone to feel excluded." When she reads it back, she hears the problem herself. "If?" she says. It came across exactly the way she wrote it. The draft also never mentions the projector.

 **Stop and think.** Why might Gia's caption have felt true to her even though it was wrong?

Building the correction

Start with the skill from Case 1, finding the original source. The caption makes a **claim**, a statement that something is true that you can check with evidence.

Building the correction, continued

The log is the original record, and it contradicts the claim. The delay came from equipment, not from a group of people.

A **correction** is a public statement that replaces wrong information with accurate information. Placement matters. Caio insists on fixing the same post rather than burying it under a new one, because the people who saw the mistake need to see the fix. The correction should name the wrong claim, give the log's times and leave Gia's feelings for last, or out entirely.

Accountability is owning a mistake and doing what you said you would do to fix it. The crew assigns owners. Gia corrects the original post. Caio keeps a visible correction note with the edit. Jordy adds a source check before the crew publishes anything new. Anika decides for herself how she feels about the response. Jordy argues that Anika should not have to approve the correction in public. The crew can offer her a private way to answer and leave it there.

? **Stop and think.** Why does Caio want to fix the same post instead of writing a new one?

How real organizations get this right or wrong

A 2016 study of apologies found that taking responsibility and offering to repair the harm mattered most (The Ohio State University News, April 12, 2016). The peer-reviewed paper behind it identified six elements of an effective apology, including an offer of repair (Lewicki et al., Negotiation and Conflict Management Research, April 6, 2016).

Brands face the same test. In 2017, Dove expressed regret after an ad played into a racial stereotype (NPR, October 8, 2017). In 2018, H&M hired a diversity leader after outrage over a "monkey hoodie" ad (NBC News, January 17, 2018). Comparing the words of an apology with what changed afterward is exactly the move Jordy suggests. Judge a fix by what readers understand, not by how sorry it sounds.

Professional codes set the bar. The PRSA code asks practitioners to "act promptly to correct erroneous communications for which the practitioner is responsible" (PRSA Code of Ethics, October 2000). Your job is to check the log's times before the correction goes up.

? **Stop and think.** What evidence would show that the crew's repair happened, beyond a new caption?

Key idea: corrections

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 8 minutes.

Gia's caption did two jobs at once. It explained the late start, and it blamed a group of people for it. A **claim** is a statement that something is true. You can check a claim with evidence. Jordy's setup log checks the caption's claim and shows a projector failure instead.

A **correction** is a public statement that replaces wrong information with accurate information. It should appear where people saw the mistake, so the crew should edit the recap caption itself. A 2016 study of apologies found that taking responsibility and offering to repair the harm mattered most. Gia's first draft talks about loving younger neighbors, and it does neither.

Accountability is owning a mistake and doing what you said you would do to fix it. That means naming who corrects the caption, who contacts the people it blamed and who checks the next recap. Anika does not have to comfort Gia or approve the correction in public. The crew can offer her a private way to respond.

The story: A room with two kinds of value

It is the Friday after the crew's first screening, and the board meeting is coming up. The Common Room is run by a small neighborhood nonprofit alongside the bookshop, and its board is considering paid rentals on two evenings a week to help cover staffing. Nothing has been decided. Still, the group chat moves fast. Mateo announces that he already has a petition headline.

Mari slows him down. She is 19, works the bookshop counter and is the person paid to close the shop at night. She is also one of the people who use the room afterward, for zine nights with her friends. "I can't pretend either half away," she says. On rental nights, she would be staffing a stranger's event instead of making zines. Maybe that is fine, she admits, but it is still a cost, and nobody has written it down.

Sami, who works afternoons and runs a print workshop in the room in the evening, points to a different gap. The crew keeps deciding what evening users need without asking them. Moving her workshop online would not help. Her printing tools do not fit in a video call. Mateo reads the thread and concedes the point. He had a headline. He did not have the budget.

? **Stop and think.** Mari is paid to close the shop and also uses the room at night. How does that shape what she asks for?

Options, numbers and trade-offs

Start with the Case 1 skill and read the original documents. The board agenda lists three options for discussion. Option A keeps the free evenings, and the funding gap remains.

Options, numbers and trade-offs, continued

Option B replaces the Tuesday and Thursday evenings with paid rentals. Option C pilots one rental evening for six weeks while the board seeks more funding. Each is a **proposal**, a change that someone suggests and that has not been approved yet.

The weekly budget note shows \$600 in evening staffing and utilities against \$400 in grants and donations, a \$200 gap. Each rental is projected to add \$120 after its extra costs. Two would add \$240 and one would add \$120, but the note warns that demand is uncertain. The listening notes add the human side. Sami works afternoons. Dec rehearses on Thursdays. Mari closes the shop. A nearby resident worries about late noise, and the meeting time overlaps several shifts.

Every option is a **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Case 2 taught you to ask what a task is meant to measure. Ask the same of each option: what problem is it designed to solve? Case 1's idea of **framing** helps too. Option B frames the \$200 gap as the problem and the free evenings as the price. That frame leaves two questions open. Who loses those evenings, and what happens if bookings come in lower than projected? Ask the same questions about your own favorite option.

? **Stop and think.** Option B frames the \$200 gap as the problem. What does that way of stating the problem leave out?

Who decides, in the room and in the city

A **decision-maker** is the person or group with the power to make a particular choice. The nonprofit's board controls its own schedule. A city is different. When budget cuts closed New York's libraries on Sundays, Brooklyn's last Sunday of service was December 17, 2023 (NY1, November 17, 2023). The restored funding, part of a \$58.3 million investment, let the libraries resume Sunday service in July 2024 (NYC Mayor's Office, July 1, 2024). Council members credited New Yorkers who called and wrote (New York City Council, July 14, 2024).

Other communities have handed more of the choice to residents. Evanston, Illinois, let anyone 14 and older help decide how to spend \$3 million in public money (PBS, May 29, 2024). Your role in this case is to check the budget figures before the crew speaks to the board.

? **Stop and think.** If the board chooses an option the crew did not support, how should the crew tell the group what happened?

Key idea: trade-offs

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 10 minutes.

The board is weighing a **proposal** about the free evenings. A proposal is a change that someone suggests and that has not been approved yet. Option B would help close the \$200 weekly gap, but it would end the free Tuesday and Thursday evenings. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. Every option on the agenda has one, including the one you prefer.

Carol Bacchi's policy-analysis approach asks what a proposed solution assumes the problem is. Option B treats the \$200 gap as the problem and two free evenings as the price. That leaves two questions open: who loses those evenings, and what happens if bookings come in lower than projected? Ask the same questions about your own favorite option.

A **decision-maker** is the person or group with the power to make a particular choice. Here, the nonprofit's board controls its own schedule. A community board or a city agency would follow other rules. A strong comment names the proposal, explains one effect with evidence and asks for a decision the board can make. The board can still choose an option the crew did not ask for.

Practice: choose a response

On your own Choose what the crew should ask for first and explain why. Then fix the two marked lines. About 6 minutes.

What should the crew ask the board for first?

- ☐ **A** Post that the board is taking away the free nights.
- ☐ **B** Ask for the budget assumptions, who uses each evening and a way to comment without attending.
- ☐ **C** Support whichever option brings in the most money.

Why I chose it

1 The board should not take away our free nights. The Common Room is important to the community and a lot of people use it. I have been coming here for movie nights since it opened and it's one of the only places we can all hang out without paying. Renting it out just shows **2** the board cares more about money than people. Sami and Dec would lose their spot and that is not fair. Please keep it free for everyone. Thank you for listening.

Case 5: Why is my deposit smaller than what I earned?

Gia's bank deposit is smaller than the pay she worked out, so she reads her pay statement line by line before asking payroll.

On your own Read What happened and underline the two hour totals that do not match. About 5 minutes.

Gia holds a small card and talks beside a phone on a tripod. Jordy holds Voz, one of the crew's companions, on an open hand.

Your role: You're the one who adds up Gia's hours before she writes to payroll. **New skill:** Read a pay statement line by line.

What happened

It is Thursday evening, and it is payday for Gia. She works café shifts around her college classes. She checks her bank account and sees a deposit that is smaller than the pay she worked out. Gia keeps a shift log in her notes app. The log says 18 hours, but her pay statement says 15.

Jordy works event shifts, and their deposit looks different too. Jordy's shifts fall on different dates and hours, so their pay cannot explain Gia's. Jordy asks Gia to name the line that worries her instead of posting her whole statement.

Gia's pay statement lists her hours, her hourly rate and four tax lines. She expected the lines for Social Security and Medicare. She does not understand the line for federal income tax. Before she writes to payroll, she wants to know what her own records show.

Your question: Why is Gia's deposit smaller than her own count, and what should she ask payroll?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Gross pay Gross pay is the money you earn before any taxes or other deductions are taken out.

En español: salario bruto

Net pay Net pay is the money left after taxes and other deductions, often called take-home pay.

En español: salario neto

In this case: The \$220.99 that reached Gia's bank account is her net pay, not the amount she earned.

FICA FICA is the federal payroll tax that funds Social Security and Medicare.

En español: FICA (Seguro Social y Medicare)

In this case: On Gia's statement, FICA appears as two lines: Social Security tax, \$15.81, and Medicare tax, \$3.70.

Withholding Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.

En español: retención

Gross, net and the lines in between

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Gross pay:** Gross pay is the money you earn before any taxes or other deductions are taken out.
- **Net pay:** Net pay is the money left after taxes and other deductions, often called take-home pay.
- **FICA:** FICA is the federal payroll tax that funds Social Security and Medicare.
- **Withholding:** Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.

The story: A smaller deposit than expected

Payday falls on a Thursday. Gia checks her bank app between a café shift and an evening reading assignment, and the number looks wrong. By her own math, she earned more. Gia is careful about this kind of thing. She keeps a shift log in her notes app, and it lists five shifts that add up to 18 hours. Her pay statement lists 15.

Her first message goes to the group chat: “my deposit is way less than what I worked out??” Jordy, who works event shifts for a different schedule, answers quickly. Their deposit looks different too, but comparing deposits would just send everyone in circles, because the dates and hours are not the same. Then Jordy adds a second request. Please don’t post the whole statement. Just say which line.

That request sets up the whole case. Gia is not trying to prove a point to the group. She is trying to understand her own pay before she writes to payroll. You are the person beside her with a calculator. Your job is to add up her hours before she sends that message.

❓ Stop and think. Why does Jordy say that comparing deposits would send the friends in circles?

Matching the statement to the log

Gia’s suspicion, that payroll shorted her, is a **claim**.

Matching the statement to the log, continued

You met the term in Case 1: a statement that something is true that you can check with evidence. In Case 4, Mari read the budget note figure by figure. Here, you read the statement line by line.

The statement covers the pay period ending Friday the 12th, paid the following Thursday. It shows 15 hours at \$17.00, or \$255.00. **Gross pay** is the money you earn before any taxes or other deductions are taken out. For an hourly worker, it is the hours worked times the hourly rate, plus any other earnings.

The shift log explains the gap. Monday the 8th, Wednesday the 10th, Thursday the 11th and Friday the 12th add up to 15 hours. The last shift, 3 hours on Saturday the 13th, falls after the period ended. It should appear on the next statement. Gia wants payroll to confirm that, and she is right to ask.

Then there are four tax lines. Social Security tax (\$15.81) and Medicare tax (\$3.70) together make up **FICA**, the federal payroll tax that funds Social Security and Medicare. Federal income tax withheld (\$8.40) is a separate line. So is state and local income tax withheld (\$6.10). **Withholding** is money an employer takes out of each paycheck to pay taxes or other costs for the worker. Subtract all four, and \$220.99 remains. **Net pay** is the money left after taxes and other deductions, often called take-home pay.

? **Stop and think.** Walk through the math from \$255.00 to \$220.99. Which lines are FICA, and which are income tax?

Where the money goes

Rachel's question on *Friends*, "Who's FICA? Why's he getting all my money?", is funny because so many first paychecks surprise people (TBS, *Friends* clip, December 14, 2019). A PBS explainer starts in the same place, with a first paycheck that is smaller than expected (Two Cents, PBS, April 10, 2019). NPR's Planet Money team explains why the Social Security part of FICA comes out of nearly every paycheck (NPR, *The Indicator*, June 6, 2018).

The IRS says the amount of federal income tax withheld depends partly on the worker's Form W-4 (Internal Revenue Service, updated May 1, 2026). It also offers an official Tax Withholding Estimator for checking it (Internal Revenue Service, updated June 27, 2026). One more check belongs before the tax lines. States can set a higher minimum wage than the federal one, which changes gross pay (ABC News, December 29, 2025).

? **Stop and think.** What would Gia's statement need to show for the missing hours to be a payroll mistake?

Key idea: gross pay and net pay

On your own Read the key idea and the code of ethics, then answer the question in the box. About 6 minutes.

A bank deposit shows how much money arrived, but the pay statement shows how the employer figured it. **Gross pay** is the money you earn before any taxes or other deductions are taken out. For an hourly worker, gross pay is the hours worked times the hourly rate, plus any other earnings. **Net pay** is the money left after taxes and other deductions, often called take-home pay. Gia's deposit is her net pay.

Deductions are the lines between those two totals. **FICA** is the federal payroll tax that funds Social Security and Medicare. On Gia's statement, FICA appears as two lines: Social Security tax and Medicare tax.

Withholding is money an employer takes out of each paycheck to pay taxes or other costs for the worker. Federal income-tax withholding is a separate line from FICA, and the IRS says its amount depends partly on the worker's Form W-4.

A statement can also list other deductions, such as benefit contributions, so read each line's name before you decide it is income tax. The federal income tax taken from each paycheck counts toward the tax a worker owes for the whole year. One paycheck cannot show what that yearly total will be. This explanation covers employees in the United States. Self-employed workers follow a different tax process.

Your role: You're the one who reads each box on the form before Rafa signs. **New skill:** Read a form section by section before you sign.

What happened

Rafa, 18, has just started college, and his parents help pay his tuition bill. He commutes from the next block and helps at his family's shop after class. At the end of August, the college mailed Rafa a family-access form, but he has not opened the envelope yet.

On Sunday night, his parents ask about the form in the family group chat. His dad wants Rafa's login so the family can handle everything. Rafa is glad to share the bill, but he wants to read the rest of the form first.

Caio, an older friend who rents a room on the block, reads the form with Rafa, not for him. The form has separate sections for billing and for grades. Rafa wants to check the billing box. He wants to talk with his family before he decides about grades.

Your question: What will this form let Rafa's parents see, and what should he ask before he signs?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

FERPA FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records.

En español: FERPA (Ley de Derechos Educativos y Privacidad de la Familia)

In this case: Rafa is 18 and in college, so under the general rule the FERPA rights to his records are his, not his parents’.

Education record An education record is a record directly about a student that a school or college keeps.

En español: expediente educativo

In this case: Rafa’s grades and schedule are education records. Section 2 of his form asks whether his parents may receive information about his grades.

Consent Consent is permission a person gives for something specific, such as sharing a record with a named person.

En español: consentimiento

In this case: Rafa’s form asks for consent in two separate sections, one for billing and one for grades. He can say yes to one and no to the other.

Words to know

- **FERPA:** FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records.
- **Education record:** An education record is a record directly about a student that a school or college keeps.
- **Consent:** Consent is permission a person gives for something specific, such as sharing a record with a named person.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: A login request on Sunday night

Rafa, 18, is a few weeks into his first year of college. He commutes from the next block, helps at his family's shop after class and relies on his parents to help pay tuition. At the end of August, the college mailed him a family-access form. The envelope is still sealed.

On Sunday night, the family group chat catches up with him. His mom asks whether the tuition form came, because they want to help with the bill. His dad offers a shortcut: "Send us the login and we'll take care of everything." The offer is generous and practical, and it would hand over far more than a bill.

Rafa does not want a fight. He wants to understand what he is signing. He asks Caio, an older friend who rents a room on the block, to read the form with him. Caio is clear about his role. He will sit with Rafa while he asks questions, but being older does not make this his decision. When someone suggests sending his parents a photo of the form, Caio points out the trade-off. A photo is easier to send, and it is also easier to lose control of.

Your role is to read each box on the form before Rafa signs.

? **Stop and think.** Caio says a photo of the form is easier to send and easier to lose control of. What does he mean?

Separating the parts of the form

Case 5 taught you to read a document line by line before deciding what it means. The form rewards the same patience. Section 1 covers billing and payments: the named person could view account statements and make payments. Section 2 covers academic records: the named person could receive information about grades, enrollment and academic standing. Section 3 says the authorization stays in effect until Rafa changes or withdraws it in writing. Each of the first two sections has its own yes-or-no box.

That structure changes the decision. Rafa does not face a single choice between trusting his family and shutting them out. He faces two separate choices, and each has its own trade-off, a word you learned in Case 4. Saying yes to billing gives his parents what they asked for. Saying yes to grades may be fine too, but Rafa wants to talk with them before he decides.

Case 4 also gave you the term **decision-maker**, the person or group with the power to make a particular choice. On this form, the decision-maker is Rafa. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, consent is written and names the record, the person and the purpose.

 **Stop and think.** What is the smallest amount of access that would give Rafa the help he wants from his family?

What FERPA does and does not say

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. An **education record** is a record directly about a student that a school or college keeps, such as grades, transcripts or schedules. Under the general rule, the rights transfer from parents to the student at age 18 or when the student enters college at any age (U.S. Department of Education, Student Privacy Policy Office, no date listed). The Education Department publishes a plain guide for these “eligible students” (U.S. Department of Education, March 8, 2023).

Helping pay tuition does not, by itself, give those rights back to a parent. FERPA does have exceptions. A college may share records with parents if the student is a dependent for federal tax purposes, or in a health or safety emergency. The Education Department says this sharing is allowed, not required, so each college decides how it handles these cases.

Why do these rules matter so much? Student records now live in large software systems. A breach at the company PowerSchool exposed millions of student records (Education Week, January 9, 2025). Knowing which record, which permission and which office to ask is how Rafa keeps family support from turning into giving away every login.

Key idea: education records

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

FERPA, the Family Educational Rights and Privacy Act, is a federal law about who can see student education records. It gives parents, and later students, rights over those records. An **education record** is a record directly about a student that a school or college keeps. Grades, transcripts and schedules can be education records, on paper or stored digitally. Under the general rule, the rights transfer to the student at age 18 or when the student starts college, at any age. The law calls that student an “eligible student.”

Helping pay tuition does not, by itself, give those rights back to a parent. **Consent** is permission a person gives for something specific, such as sharing a record with a named person. For college records, consent is written and says which record, to whom and for what purpose. Rafa’s form asks about billing and about grades in separate sections. He can say yes to one section and no to the other. He can also change his choice later in writing.

FERPA also has exceptions, which are situations in which a college may share records without the student’s consent. A college may share records with parents if the student is a dependent for federal tax purposes. It may also share them in a health or safety emergency. The U.S. Department of Education says this sharing is allowed, not required, so Rafa should ask his records office what his college does.

Rafa, **①** your parents are paying so they can probably see everything, that's how it works at most schools. My parents could always see my grades on the portal in high school. FERPA is a privacy law but it's mostly for kids. **②** Once you're 18 it doesn't really matter anymore. If you want to keep your grades private you should just not give them your password. Honestly just ask your parents what they want to see. They're helping you a lot so it's probably fair for them to know how you're doing.

Your role: You're the one who reads the library notice before anyone replies "banned." **New skill:** Find what stage a process has reached.

Gia, Mari and Sami talk around a table on a rooftop terrace at sunset.

What happened

On Thursday night, a message about a novel in the library at Anika's high school appears in a group chat. The message says one parent complained, so the novel is now banned and gone from the library. Gia replies that this is censorship.

On Friday, the school library posts a notice about the novel. Mari reads it and compares it with the group chat. Gia deletes her first reply, because she had not read the notice or the novel.

Mari works the counter at the neighborhood bookshop. She switches between print and audio, and she is halfway through the novel on audio. Gia is planning a discussion at the bookshop. First, both of them want to know what stage the library's process has reached.

Your question: Is the novel really banned, and what can people who care about it do next?

Challenge A challenge is a formal request to remove or restrict a book or other library material.

The story: Censorship, full stop?

The message appears late on Thursday. A novel in the library at Anika's high school is gone, it says, because one parent complained. The word it uses is "banned." Gia, who has strong feelings about who gets to decide what people read, replies within minutes: "censorship, full stop." It feels like the right side to be on.

On Friday, the school library posts a notice. Mari works the counter at the neighborhood bookshop, and she has been listening to the novel on audio. She switches between print and audio, and she is about halfway through. She reads the notice twice and then compares it with the chat. The chat says the book is gone from the library. The notice says it stays available during the review. Those cannot both be true.

Gia deletes her first reply. She had not read the notice, and she had not read the book. Now she is planning a discussion at the bookshop, which means she has to get the facts right. Your role in this case is to read the library notice before anyone replies "banned."

? Stop and think. Why was "censorship, full stop" an easy reply to send on Thursday night?

Reading the notice as a process map

Case 1's skill, finding the original source, leads straight to the notice. It says a request for reconsideration has been received for one title. Under district policy, the title remains available during the review. A committee will read the full work and evaluate it against the district's selection criteria. Written input may be submitted by the 15th, and the committee's decision may be appealed.

Read that way, the notice is a map with a "you are here" marker. A **challenge** is a formal request to remove or restrict a book or other library material. It starts a review, but on its own it does not remove a book. A **reconsideration policy** is a library's written process for reviewing a challenge to a book. **Selection criteria** are the written standards a library uses to decide which materials to include. The process has reached the review stage. Nothing has been removed, and nothing has been decided.

That makes the chat's **claim** wrong about the present, even if people are right to care about the future. Case 3 showed you that a **correction** replaces wrong information with accurate information, where people saw the mistake. The reply the chat needs is short: the book is under review, it is still available and input is due on the 15th.

The input form shapes what useful input looks like. It asks for your name and role, whether you read the entire work and which selection criteria your comment addresses. Comments are limited to 300 words. Mari decides to finish the book before she writes. Her own experience with books like this is why she cares, she says, but it is not the policy. She plans to include both.

❓ **Stop and think.** The input form asks whether you read the whole book. Why might a committee care?

Why the stage matters in real disputes

The American Library Association recommends that libraries adopt a formal reconsideration process, with a committee that reads the whole work (American Library Association, updated January 2018). ALA's guidance is a professional recommendation, not a law, and states have taken different paths. Colorado lawmakers debated a bill requiring clear reconsideration policies (Chalkbeat Colorado, February 10, 2025). In Tennessee, a stricter law changed the review steps, and some books quietly disappeared (Chalkbeat Tennessee, September 17, 2024).

The legal question is harder still. Federal courts disagree about how the First Amendment applies when a public library removes a book (Cahill Gordon and Reindel, September 22, 2025). The answer can depend on where you live. Gia puts it plainly. Right now it is a review, and she is not calling it before it is done.

❓ **Stop and think.** How does calling the same action a "review," a "restriction" or a "ban" change what people think happened?

Key idea: book challenges

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

A **challenge** is a formal request to remove or restrict a book or other library material. A challenge starts a review. On its own, it does not remove a book. A complaint, a temporary change and a final decision can happen at different times. Check which stage a process has reached before you repeat a claim.

A **reconsideration policy** is a library's written process for reviewing a challenge to a book. The American Library Association (ALA) recommends that libraries adopt one, and its example has a committee read the whole work. **Selection criteria** are the written standards a library uses to decide which materials to include. ALA's guidance is a professional recommendation, not a law. Each district's adopted policy and the applicable law govern its own process.

Whether removing a book breaks the law is a harder question. Federal courts disagree about how the First Amendment applies when a library removes a book. The answer can depend on where you live. Right now, the notice at Anika's school describes a review, and the novel is still available.

Your role: You're the viewer with the sound off who checks the first three seconds. **New skill:** Spot and disclose a material connection.

What happened

At 1:30 p.m. on Saturday, Caio finishes editing Gia's short video review of a new novel. Gia made the review for BookTok, where people recommend books on TikTok. She stayed up until 2 a.m. to finish the novel, and she loves it.

Two weeks ago, the book's publisher emailed Gia. The publicity team offered her a free copy of its spring novel for review. The email said she did not have to post, but it asked for a tag if she did. In the first cut, Gia never says the book was free. The only sign of the publisher is a tag in the caption below the video.

Caio wants to watch the cut the way a stranger would, on a phone with the sound off. He wants to know whether the first three seconds say the book was free. Gia wants to keep her honest opinion in the video. She also wants viewers to know how she got the book.

The story: Watching on mute

Gia stayed up until 2 a.m. finishing a new novel, and the next day she filmed a review for BookTok, the part of TikTok where people recommend books. Her enthusiasm is real. On Saturday at 1:30 p.m., Caio finishes the edit and sends it back. Gia is ready to post.

Caio is not. He wants to watch the cut once the way a stranger would, on a phone with the sound off. His question is specific. In the first three seconds, where does it say the book was free?

The book was free. Two weeks earlier, the publisher's publicity team emailed Gia: "We'd be glad to send you a free copy of our spring novel for review. There's no obligation to post, but if you do, we'd appreciate a tag." The first cut opens with Gia saying, "You guys, I have to tell you about this book because I literally could not put it down!" There is no on-screen text. The caption reads "@publisher #booktok."

Gia points to the tag. Caio's edit notes answer her. A tag is a brand name, not a relationship. The caption also sits below the video, where most people will not open it. In this case, you are the viewer with the sound off who checks those first three seconds.

❓ Stop and think. Caio says a tag is a brand name, not a relationship. What is the difference?

Opinion, relationship and disclosure

An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. Gia's review is one, and her opinion is honest. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. The free copy is a material connection. Knowing about it gives viewers context. It does not prove that Gia's opinion is false.

A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. Case 1 gave you the idea of **framing**, choosing which parts of a situation a message brings forward. The first cut frames the review around Gia's excitement and leaves the relationship out of view. Caio proposes a three-second fix: "Quick heads-up, the publisher sent me this free." It is spoken and shown on screen, then followed by her hook.

Gia makes a second change that viewers might never notice. She had thought about calling it the best book of the year. Out of the ones she happened to read? She decides to say only what she can support: two nights, and she could not put it down. A disclosure answers one question, which is how she got the book. Viewers can still ask what supports her claims about the book itself.

Caio's test is simple. Someone who has not seen the video watches once, on mute. Then he asks, "Was the book free?" If they have to think about it, the edit is not done. A comment on another creator's review shows the risk of skipping this step: "wait was this sponsored?? kind of feels like an ad now."

 **Stop and think.** Why does Gia cut "best book of the year" even though she loves the book?

What the FTC and researchers say

The Federal Trade Commission's guidance for influencers says a video disclosure belongs in the video itself, ideally both spoken and on screen (Federal Trade Commission, updated December 3, 2024). In November 2023, the FTC warned two trade associations and a dozen influencers about posts promoting aspartame or sugar. The agency said disclosures must be in the video, not buried in a caption (Federal Trade Commission, November 14, 2023).

Research suggests disclosure helps young viewers. A study of 3,149 high school students in Taiwan found that full sponsorship disclosure helped teens recognize a post as an ad (Lin et al., PLOS One, May 27, 2026).

 **Stop and think.** Some viewers may treat a disclosed review as just an ad. How could Gia keep their trust?

Key idea: material connections

On your own Read the key idea and the FTC guide. Then answer the question in the box. About 8 minutes.

An **endorsement** is a message that shares someone's opinion or experience of a product to promote it. Gia's video review is an endorsement, and her opinion in it is honest. A **material connection** is a relationship with a brand, like payment or a free product, that viewers might not expect. The free copy from the publisher is a material connection. Knowing about it gives viewers context, but it does not prove that Gia's opinion is false.

The Federal Trade Commission (FTC) is a federal agency. Its Endorsement Guides explain how a federal law against deceptive practices applies to endorsements. A **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. For a video, the FTC says the disclosure belongs in the video itself, ideally both spoken and on screen. A tag in the caption only names the brand, and it sits below the video.

A disclosure answers one question: how did Gia get the book? Viewers can still ask what supports her claims about the book itself. A clear disclosure does not make every claim in a review accurate. Do not accuse a real creator of hiding a sponsorship based on a guess.

In plain words: The FTC says a free product can be a connection that reviewers must clearly disclose, even if the brand asked for nothing in return.

Your role: You're the one who finds Dec's official sample ballot before anyone tells him how to vote.

New skill: Check an official source for your own area.

Mateo and Gia work in a notebook at a café table.

What happened

It is Sunday at the library desk. Dec turns 18 in October, before the general election on November 3, 2026. His feed is full of posts about one big race. Mateo and Gia are helping him find out what else is on his ballot.

They look at a sample ballot for the November election. The front shows the big race from Dec's feed. The second page has more: a school board race, a city council seat and Measure T, a transit bond. Mateo notices that nobody is posting about Measure T.

A creator's voter guide is also going around. It says registration closes "the 14th," but it never names a state. It also tells people how to vote on the school board race and Measure T. Gia is writing a reminder for the group chat.

Mateo has his own problem. He may still be registered at his mom's address in New Bedford, Massachusetts. Dec says he does not need anyone to pick for him. He needs to know what is on his ballot and whether he is registered in time.

Your question: What is on Dec's ballot, and where should he check his own information?

The story: The second page

Dec turns 18 in October, a few weeks before the general election on November 3, 2026. If his feed is any guide, only one race matters. Every post is about the same big contest. On Sunday at the library desk, Mateo and Gia help him look past it.

They pull up a sample ballot for the November election. The front page matches the feed. The second page does not. It lists a school board race, a city council seat and Measure T, a transit bond. Mateo says what everyone is thinking: nobody is posting about Measure T.

A creator's voter guide is circulating in their group chat: "All you need for November!! Registration closes the 14th. School board: vote Candidate B, the only one who cares about students. Measure T: yes, obviously." Dec reads it and says he does not need anyone picking for him. He has two questions. What is on his ballot, and is he registered in time?

Gia is writing a reminder for the chat, and Mateo has an uncomfortable realization. He moved from New Bedford for college, and he may still be registered at his mom's address in Massachusetts. Your role in this case is to find Dec's official sample ballot before anyone tells him how to vote.

❓ **Stop and think.** Why does the guide's deadline fail as a fact even if it happens to be right somewhere?

Sorting what can be checked

A **sample ballot** is a preview of the contests and measures that will appear on your ballot. A **voter guide** is a document that explains or recommends choices in an election. The sample ballot is the original source, the Case 1 skill, and the guide is someone's reading of it. Case 1 also taught you that a **claim** is a statement that can be checked with evidence. The guide contains one checkable claim, the registration deadline, and it cannot be checked because it never names a state. Gia's question is exact: whose 14th?

Case 8 gave you another question to ask, about a **material connection**, a relationship with a brand, like payment or a free product, that viewers might not expect. The guide does not say who wrote it or who funds it. That does not make its picks wrong. It does mean Dec should treat them as opinions from an unknown source.

The ballot also teaches something about power. A **jurisdiction** is the place or area where a particular government or rule has authority. Your address decides which contests appear on your ballot, and a friend two districts over may see different local races. A school board and a city council have different jobs. Before researching candidates, Dec can ask which office has power over the issue he cares about, such as his school or his bus.

Registration is signing up with your election office so that you are on the list of people who can vote. Deadlines vary by state, so Gia leaves the date out of her reminder. Her message is short: check your registration and your own sample ballot at Vote.gov, deadlines depend on your state, and please don't post your address.

❓ **Stop and think.** Which contest on the sample ballot could affect Dec's school or his bus?

Young voters and the rules

The Twenty-Sixth Amendment protects the right to vote for citizens 18 and older (National Constitution Center, no date listed). Its roots go back to World War II and the slogan "old enough to fight, old enough to vote" (The National WWII Museum, October 27, 2020). Most states now allow teens to preregister before 18, and some let 17-year-olds vote in primaries (Ballotpedia News, September 26, 2025).

Young people do vote. About 47 percent of 18- to 29-year-olds voted in 2024, with big differences by state (CIRCLE, April 14, 2025). Anika, who is 16, is checking whether she can preregister. She can also learn what the school board decides before she can vote on it.

❓ **Stop and think.** When could a voter guide that recommends choices help a first-time voter?

Key idea: sample ballots

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 8 minutes.

A **sample ballot** is a preview of the contests and measures that will appear on your ballot. A measure is a question that voters decide directly, such as Measure T. A **voter guide** is a document that explains or recommends choices in an election. The two have different purposes. Start with the ballot for your address, and then check a guide's facts apart from its picks.

Your address decides which contests appear on your ballot. A **jurisdiction** is the place or area where a particular government or rule has authority. A friend two districts over may see different local races. A school board and a city council have different jobs, so each one makes different decisions. Before you research candidates, find out which office has power over the issue you care about.

Registration is signing up with your election office so that you are on the list of people who can vote. Rules and deadlines vary by state, so do not copy a friend's deadline. The Twenty-Sixth Amendment protects the right to vote for citizens 18 and older. Most states let people preregister before they turn 18. Several states let 17-year-olds vote in a primary if they will be 18 by the general election.

Case 10: Whose job is it to fix the blocked route?

A construction detour sends Sami toward stairs on her way to a city workshop, and her bus comes in 12 minutes.

On your own Read What happened. Underline where the detour sign points. About 4 minutes.

Your role: You're the one who writes down the corner, the time and the sign before Mateo posts. **New skill:** Report a problem to the office responsible.

Sami, Jordy and Mateo plan with picture cards on a whiteboard.

What happened

It is Tuesday, 4:05 p.m., at the corner of Elm Street and 4th Avenue. Sami is on her way to a free community workshop run by the city's parks department. It starts at 5. Sami uses a manual wheelchair, and her bus comes in 12 minutes. Mateo is with her.

The curb ramp on the northeast corner is blocked by construction fencing. A sign reads "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR." Its arrow points to a path that begins with a flight of stairs. That detour does not work for Sami.

Mateo already has the sign on video, and his first idea is to post it. Sami asks whether the video gets her on the bus. It does not, so Mateo puts the camera down. He checks the other corners for a ramp while Sami looks up the next bus stop.

Later, they want to report the corner to the city. Mateo wonders whether the city is breaking the Americans with Disabilities Act (ADA). First, they need to know what one video can show and which office is responsible.

Your question: Whose job is it to fix the blocked route, and what should Sami and Mateo tell the city?

Key terms

On your own Read each key term and its example. Then write your first guess in the box. About 4 minutes.

Program access Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities.

En español: acceso a los programas

In this case: The city runs the workshop. Program access asks whether Sami can reach and join the workshop, not only whether one ramp is open.

Barrier A barrier is something that blocks or limits a person from taking part.

En español: barrera

In this case: Fencing blocks the curb ramp at Elm Street and 4th Avenue, and the detour points to stairs. The flyer gives no way to request access.

ADA coordinator An ADA coordinator is the staff member a government names to handle disability access questions and complaints.

En español: coordinador de la ADA

In this case: Mateo plans to send the city's ADA coordinator the corner, the time, the sign and one question, if Sami agrees.

Who is involved

Sami

The story: The camera goes down

At 4:05 p.m. on a Tuesday, Sami and Mateo reach the corner of Elm Street and 4th Avenue. She is on her way to a free community workshop run by the city's parks department, starting at 5. She uses a manual wheelchair. Her bus arrives in 12 minutes.

The northeast curb ramp is behind construction fencing. A sign reads "SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR," and its arrow points to a path that begins with a flight of stairs. Sami's summary is four short sentences in the group chat: the ramp is fenced off, the detour sign points to stairs, so no, bus in 12.

Mateo had the sign on video before he even thought about it. He asks whether she wants him to post it. Sami answers with a question: does that get her on the bus? He admits it does not. He puts the camera down and checks the other corners for a ramp while she looks up the next stop. Sami also sets a rule for the future. He can film the ramp and the sign. If he wants to film her, he asks first, and ideally not while she is busy missing a bus.

In this case, your role is to write down the corner, the time and the sign before anyone posts. The report comes later, once Sami is on her way.

? Stop and think. Sami decides what the next 12 minutes need. Why should that decision be hers?

Sizing the claim to the evidence

Mateo's next thought is legal: is the city breaking the Americans with Disabilities Act? That is a **claim**, the Case 1 term for a statement that something is true that you can check with evidence. The evidence is narrow. The sign went up Monday. Mateo recorded it Tuesday at 4:05 p.m. The route map shows five stages: home to the corner, the blocked northeast ramp, the bus stop, the bus to the parks department building and the workshop entrance and room. Nobody has checked that last stage yet. One corner and one sign cannot show whether another accessible route exists or whether the whole city is out of compliance.

A **barrier** is something that blocks or limits a person from taking part. Sami meets one at the ramp. The workshop flyer could be a second one. It says "All welcome!" and "Call the front desk," but it gives no information about accessible entrances or how to request access.

Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. Access covers the whole visit: finding the information, getting there, going in, taking part and leaving. That is why a good report looks at all five stages, not just the corner.

Case 9 introduced **jurisdiction**, the place or area where a particular government or rule has authority. Here it answers "whose job is it?" The city runs the workshop and manages the street. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. Mateo puts it simply. The report goes to the city's ADA coordinator, not his followers. It lists the corner, the time, the sign and one question: is there an accessible detour, and how long will this stay blocked? He sends it only if Sami says yes.

❓ **Stop and think.** Which barrier on Sami's trip would a photo miss?

What the law and history add

The Justice Department explains that Title II of the ADA covers state and local government programs and services. Its guide for cities also covers keeping curb ramps usable during street work (U.S. Department of Justice, updated February 24, 2020).

The ADA itself came from protest. On March 12, 1990, activists climbed the Capitol steps to show what stairs do to access, and the law was signed that July (HISTORY, July 24, 2020). Thirty-five years later, NPR looked at what the law changed and what barriers people still report (NPR, July 22, 2025).

❓ **Stop and think.** Why is "the city is breaking the ADA" a weaker report than a specific question?

On your own Read each document. For each one, write what it shows and what it leaves out. About 8 minutes.

Evidence A | Construction sign

The detour sign

The sign reads “SIDEWALK CLOSED AHEAD. PEDESTRIAN DETOUR.” Its arrow points to a path that begins with a flight of stairs. The sign went up on Monday. Mateo recorded it on Tuesday at 4:05 p.m.

Notes

Key idea: program access

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 8 minutes.

Program access is an ADA rule that a city's services, taken as a whole, must be usable by people with disabilities. The U.S. Department of Justice explains that Title II of the ADA covers state and local government programs and services. Program access generally does not require every older building to be accessible. For example, a city can relocate a service to an accessible place. Existing buildings and new construction have different requirements.

Access covers the whole visit: finding the information, getting there, going in, taking part and leaving. A **barrier** is something that blocks or limits a person from taking part. Sami meets one barrier at the curb ramp. The workshop flyer could be another, because it gives no way to request access. The Justice Department's guide for cities also covers curb ramps during street work.

One video of one corner cannot show whether a city is following the law. It can show what happened, where and when. An **ADA coordinator** is the staff member a government names to handle disability access questions and complaints. That office can say whether an accessible detour exists. Before you report a barrier someone else faces, ask them what they want said.

Case 11: Why are Jordy and Gia paid different rates?

Jordy and Gia worked the same Saturday event, but Gia's pay rate is \$1.50 an hour higher, and Jordy wants to know why.

On your own Read What happened. Underline the two pay rates and the job title on the schedule. About 4 minutes.

Mateo attaches an arrival notice at the Common Room entrance. Gia points to the doorway, and Jordy checks what a visitor will see.

Your role: You're the one who lines up both shifts side by side before Jordy writes to Dana. **New skill:** Compare two cases on the same terms.

What happened

Jordy and Gia work event shifts for the same company. They both worked a Saturday event from 3 to 11 p.m. Both helped with setup and closing, and Jordy also ran the caption and audio check.

They were paid the following Friday. On Sunday afternoon, Jordy and Gia compare pay statements. Jordy's lists eight hours at \$16.50 an hour. Gia's lists \$18.00 an hour for the same event.

The crew schedule lists Gia as "shift lead," but it does not say what that job includes. That day, Gia opened up and handled one guest issue. She does not know if that explains the \$1.50 difference. Gia is fine with Jordy knowing her rate. But she does not want her statement posted.

Jordy wants to ask Dana, the supervisor, how rates are set. Jordy will not post anything before Dana answers.

Your question: Why is Gia paid more than Jordy for the same event, and how should Jordy ask about it?

Key terms

On your own Read each key term and its example. Then write your first guess about the pay difference. About 4 minutes.

Compensation Compensation is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime.

En español: compensación

In this case: Jordy's statement shows eight hours at \$16.50 an hour, and Gia's shows \$18.00. The statements show the rates but not how they were set.

Equal Pay Act The Equal Pay Act is a federal law from 1963 that requires equal pay for men and women who do equal work.

En español: Ley de Igualdad Salarial

In this case: The Equal Pay Act covers pay differences based on sex, not every difference. Different job duties, such as a real shift-lead role, can be a lawful reason.

Title VII Title VII is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin.

En español: Título VII

In this case: Title VII covers pay decisions based on race, color, religion, sex or national origin. No document shows how Jordy's rate was set.

Who is involved

Jordy

Worked setup through close

"Three to eleven, setup to close, and I ran the caption and audio check. \$16.50 an hour. Gia's says \$18.00."

Gia

Listed as shift lead

"I only found out I make more because Jordy showed me theirs. The schedule calls me shift lead. Nobody told me what that pays for."

Before you look at the evidence, why do you think Gia is paid more than Jordy?

This image shows a single sheet of white paper with horizontal blue lines, resembling notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Reading passage

What does shift lead pay for?

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Compensation:** Compensation is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime.
- **Equal Pay Act:** The Equal Pay Act is a federal law from 1963 that requires equal pay for men and women who do equal work.
- **Title VII:** Title VII is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin.
- **Gross pay:** Gross pay is the money you earn before any taxes or other deductions are taken out.

The story: A \$1.50 surprise

Jordy and Gia work event shifts for the same company. On Saturday, they worked the same event, 3 to 11 p.m. Both did setup and closing. Jordy also ran the caption and audio check, a job Jordy takes seriously because Jordy is hard of hearing and knows when captions miss a line. They were paid the following Friday.

On Sunday afternoon, Jordy sends Gia a screenshot: \$16.50 an hour. Gia's reply comes fast. Hers says \$18.00. Then she asks the question neither of them can answer: is it because she is shift lead?

The crew schedule lists Gia as "shift lead" and says nothing else about it. Gia remembers opening up and handling one guest issue. Gia only learned she makes more because Jordy showed her their statement. Nobody ever told her what the title pays for.

Jordy's next message sets the course. Same event, same hours, and Jordy is asking Dana, the supervisor, before this goes anywhere. Your role in this case is to line up both shifts side by side before Jordy writes to Dana.

? **Stop and think.** List the facts that are the same for both jobs and the facts that differ. Which difference matters most?

Comparing like with like

Case 5 gave you the habit of reading a pay statement line by line. Jordy's shows 8.0 hours at \$16.50, for **gross pay** of \$132.00. Gross pay is the money you earn before any taxes or other deductions are taken out. At \$18.00, the same eight hours would come to \$144.00.

The new skill is comparing two cases on the same terms. Line up every fact the documents give you. Hours: the same. Setup from 3 to 5: all crew. Closing from 10 to 11: all crew. Caption and audio check: Jordy. Title: Gia is shift lead. Lead duties, according to Gia: opening up and one guest issue. What the title pays: unknown.

Compensation is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can explain a pay difference. So can a mistake. The comparison narrows the question without answering it. If shift lead carries real extra duties and a set rate, the title may explain the \$1.50. If it does not, Jordy has a specific question to ask.

Case 10 taught you to bring a question to the office responsible. Dana sets rates, so Dana gets the message. It should state what Jordy knows for sure: the hours, the duties and Jordy's own rate. It should ask one clear question: what does "shift lead" include, and how are rates set? It does not need Gia's statement. Gia is fine with Jordy knowing her rate, but she does not want her statement posted anywhere. Jordy, for their part, will decide what to do if Dana's answer does not make sense. It is Jordy's paycheck.

? **Stop and think.** What answer from Dana would satisfy Jordy, and what answer would not?

The law, and a comparison that shaped a lawsuit

The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. Talking about pay is protected too. The National Labor Relations Board says most private-sector workers have a right to discuss pay with coworkers, with or without a union (NLRB, no date listed).

The U.S. women's national soccer team shows why the comparison matters. In 2020, a federal judge dismissed their equal pay claim, pointing to differences in how the teams' contracts were structured (NPR, May 2, 2020). The players appealed, saying he had not looked at rates of pay. In 2022, they reached a \$24 million settlement with a promise of equal pay rates (NPR, February 22, 2022). A settlement is an agreement, not a court finding, and it decides nothing about Jordy's employer.

? **Stop and think.** Why might it matter that the judge compared contract structures while the players wanted him to compare rates?

Key idea: equal pay

On your own Read the key idea and the code of ethics. Then answer the question in the box. About 12 minutes.

Before you can say why Jordy is paid less, you need to know what each job included. **Compensation** is all the pay and benefits a worker receives, including hourly rates, bonuses and overtime. A job title, extra duties or more experience can explain a pay difference. So can a mistake. The pay statements show the rates, but they do not show how the rates were set.

Federal laws limit the reasons an employer can use to set pay. The **Equal Pay Act** is a federal law from 1963 that requires equal pay for men and women who do equal work. **Title VII** is part of the Civil Rights Act of 1964. It bans job discrimination based on race, color, religion, sex or national origin. Both laws apply to covered employers, and the Equal Employment Opportunity Commission (EEOC) enforces them. A legitimate reason, such as different job duties, can lawfully explain a pay difference.

Talking about pay is protected too. The National Labor Relations Board (NLRB) says most private-sector workers have a right to discuss pay with coworkers. That right holds with or without a union. It does not make Gia's pay statement Jordy's to share. Jordy can ask Dana how rates are set without naming Gia's rate.

New skill: Apply a precedent by comparing fact patterns.

What happened

Anika is a junior at a public high school. She wants the school library to stay open at lunch. On Tuesday afternoon, she prints a poster that says "KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday."

Mateo did the photo and layout. He put a photo of the school's sign and logo across the top. The poster does not name Anika or any student group. The student handbook says posters need approval from the main office and the name of the student or group responsible.

On Wednesday night, someone in the group chat suggests a walkout if the school takes the poster down. The message says a 1969 Supreme Court case, *Tinker v. Des Moines*, means the school "can't touch us." Anika never suggested a walkout.

Words to know

- **Precedent:** A precedent is an earlier court decision that judges use as a guide in similar later cases.
- **Fact pattern:** A fact pattern is the specific set of facts in a situation that a rule is applied to.
- **Substantial disruption:** Substantial disruption is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities.
- **Claim:** A claim is a statement that something is true. You can check a claim with evidence.
- **Framing:** Framing is choosing which parts of a situation a message brings forward.

The story: A poster grows a plan

Anika, a junior at a public high school, wants the library to stay open at lunch. On Tuesday at 3:15 p.m., she prints a poster: “KEEP OUR LIBRARY OPEN AT LUNCH. Wear blue Thursday.” Mateo did the photo and layout. Because it looked good, he ran a photo of the school’s sign and logo across the top. No student name or group appears anywhere on the poster.

By Wednesday at 9:02 p.m., the idea has grown in the group chat. “If they take the poster down we walk out Thursday. Tinker says they can’t touch us.” The next reply shows the confusion: “Wait, wear blue AND walk out??”

Anika never proposed a walkout, and she says so. She also checks the student handbook. Page 14 allows posters on the boards outside the cafeteria and the library, but only with office approval and the name of the student or group responsible. Her poster has neither. Mateo sees his own problem. The school sign makes it look like the school is announcing the plan, and it is not. He decides to redo the photo.

Your role is to compare Tinker with each action before anyone says “can’t touch us.”

❓ Stop and think. Anika separates her poster from the walkout. Why is that separation important?

Precedent and fact patterns

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. *Tinker v. Des Moines* (1969) is the precedent the chat invokes. Public-school students wore black armbands to protest the Vietnam War, the school suspended them, and the Supreme Court ruled for the students. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. The Court also said a mere fear of disruption was not enough.

A precedent guides a new case only as far as the facts match. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. The new skill builds on Case 11, where you compared two jobs on the same terms. Here you compare Tinker's facts with three actions. Wearing blue is quiet and stays in class, like the armbands. A walkout means leaving class, which falls under the attendance rule, and Tinker does not settle that. The poster raises a separate question. It shows the school's logo and no student name, so it may look like the school is speaking. Schools have more control over speech that looks like it comes from the school.

Two Case 1 terms fit here. "Tinker says they can't touch us" is a **claim** that goes far beyond the precedent. And the logo is a form of **framing**, choosing which parts of a situation a message brings forward. It brings the school forward as the apparent speaker.

❓ **Stop and think.** Which changed fact would make Tinker a weaker comparison for the wear-blue plan?

What courts and schools have done since

The Tinker opinion says students do not "shed their constitutional rights to freedom of speech or expression at the schoolhouse gate" (Legal Information Institute, 1969). The federal courts publish a teaching exercise about a walkout scenario that separates the message from the act of leaving class and describes the usual attendance consequences (U.S. Courts, no date listed).

The Supreme Court returned to student speech in 2021. In the case of a cheerleader's Snapchat post, it ruled 8 to 1 for the student but said schools may still act on some off-campus speech, such as threats (PBS NewsHour, June 23, 2021). In early 2026, students in Indiana and other states walked out of class to protest federal immigration enforcement. Schools responded differently. Some counted it as an unexcused absence, and one high school gave one-day suspensions (Chalkbeat Indiana, February 11, 2026).

Key idea: precedent

On your own Read the key idea and the Professional standards card. Then answer the question in the box. About 8 minutes.

A **precedent** is an earlier court decision that judges use as a guide in similar later cases. In *Tinker v. Des Moines* (1969), public-school students wore black armbands to protest the Vietnam War. The school suspended them, and the Supreme Court ruled for the students. The Court wrote that students do not “shed their constitutional rights to freedom of speech or expression at the schoolhouse gate.” It also said a mere fear of disruption was not enough to limit their expression.

A precedent guides a new case only as far as the facts match. **Substantial disruption** is the standard from *Tinker v. Des Moines*: a public school may limit speech that would seriously disrupt school activities. Wearing blue on Thursday is quiet, like the armbands. A walkout is different, because students leave class. The school’s attendance rule covers that conduct, and *Tinker* does not settle it.

The poster raises another question. It shows the school’s sign and logo but no student name, so it may look like the school is speaking. Schools have more control over speech that looks like it comes from the school. A **fact pattern** is the specific set of facts in a situation that a rule is applied to. Write a fact pattern for each action before you decide whether *Tinker* fits it.

Anika, Dec and Sami react to a round of their tabletop game.

Your role: You're the one who counts the cups before and after the change. **New skill:** Count a starting point before you claim a change works.

What happened

It is Tuesday in the theater shop. Dec opens a box of replacement parts. Three separate orders of small LED connectors and switches, placed over one week, arrived together. About half of the box is plastic air pillows and foam.

The supply list from last Friday's screening at the Common Room shows a second problem. The crew used about 120 single-use cups. The cups are plastic-lined paper and labeled "recyclable." But the city's recycling list does not take plastic-lined paper cups.

Dec wants to fix how they order parts before anyone redoes the recycling sign. Anika tracks the parts and the budget. She agrees with Dec, but she wants numbers before anyone says a change saves money. Some people need a disposable cup or a straw, so any plan has to work for them too.

Your question: What could the crew change before the next screening, and how would they know it worked?

- **Local acceptance:** Local acceptance is the list of materials that your own city's recycling or compost program actually takes.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.

The story: The box and the supply list

Dec opens the box in the theater shop on Tuesday and laughs, a little. Over one week, the crew placed three separate orders for small LED connectors and switches. All three arrived together in one full box, and about half of it is plastic air pillows and foam wrapped around parts the size of a fingernail.

Anika tracks the parts and the budget, so she has the other half of the picture. The supply list from last Friday's screening at the Common Room shows about 120 single-use cups, plastic-lined paper and labeled "recyclable." It also lists 80 paper plates, 150 printed flyers and 40 paper straws handed out on request. The folding chairs were borrowed from the bookshop.

Dec, who is thinking about an electrical apprenticeship and likes following a problem to where it starts, wants to fix the ordering before anyone redoes the recycling sign. Anika is on board, with a condition. If anyone says a change saves money, she wants the numbers. Right now, she says, they have one box and a guess.

Your role in this case is to count the cups before and after the change.

❓ Stop and think. Why does Dec start with the order form instead of the recycling bins?

Upstream and downstream

Source reduction is preventing waste before it is created, for example by buying less packaging. **Reuse** is using an item again instead of throwing it away after one use. Dec's ordering fix is source reduction. Borrowing the bookshop's washable cups is reuse.

The cups show why checking matters. They are labeled "recyclable," but the city's recycling list accepts metal cans, glass, rigid plastic bottles and containers and flattened cardboard. It does not accept plastic-lined paper cups, plastic bags and film, foam or items labeled compostable. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. Case 9 taught you to go to the official source for your own area, and this is the recycling version of that skill. Anika adds a warning. Compostable cups are not on the list either, so switching to them would not solve anything by itself.

The new skill is counting a starting point before you claim a change works. The baseline is about 120 cups. The test is one screening with washable cups. The count covers cups used and cups left, plus the new costs of water and washing time. Case 4 gives you the words for the result. It is a **proposal**, a change that someone suggests and that has not been approved yet. It is also a **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Anika also rejects a total ban on disposables. Some people need a disposable cup or a straw, so the plan keeps some on request.

❓ **Stop and think.** What does the baseline of 120 cups let the crew claim later, and what does it not?

What the EPA and the straw debate show

The Environmental Protection Agency ranks ways to handle waste. Source reduction and reuse come first. Recycling and composting come next, then energy recovery, then treatment and disposal. The EPA also notes that no single approach fits every item (EPA, updated December 19, 2025). An NPR investigation found that less than 10 percent of plastic has ever been recycled, which is one reason reduction comes first (NPR, September 11, 2020).

In 2018, Starbucks announced it would phase out plastic straws by 2020 using a sippable lid (NPR, July 9, 2018). Two days later, NPR reported that some people with disabilities need flexible plastic straws, and advocates said few people seemed to know about the exemption in Seattle's straw ban (NPR, July 11, 2018).

❓ **Stop and think.** How could a change that reduces waste create an access problem, and how would you find out?

Source reduction is preventing waste before it is created, for example by buying less packaging. The Environmental Protection Agency (EPA) ranks ways to handle waste. Source reduction and reuse come first. Recycling and composting come next, then energy recovery, then treatment and disposal. The EPA also notes that no single approach fits every item or situation.

Reuse is using an item again instead of throwing it away after one use. Borrowing washable cups from the bookshop is one example. Reuse has costs too. Washing takes water and someone's time, so a fair comparison counts those costs along with the cups.

A “recyclable” label does not tell you where an item will go. **Local acceptance** is the list of materials that your own city's recycling or compost program actually takes. The crew's cups say “recyclable,” but their city's list does not take plastic-lined paper cups. The list does not take items labeled compostable either. So the crew has to check the list before choosing any new cup.

Talk about this case at home

Case 13: Can the crew cut waste before it reaches the bin?

In this case, a group of friends learns that the cups from their movie night can't be recycled in their city. Your student planned one change to cut waste before the next event and a way to count whether it worked.

Questions to talk about

- 1 How could someone find out what their city or town recycles?
- 2 What is one item people often throw away after a party or event?
- 3 Why might a rule to cut waste need an exception for some people?

Nobody needs to share personal stories or private information to talk about this case.

See the case online.

Case 14: Does giving credit let the crew use the song?

Mateo wants to post the crew's film tonight and credit the song's artist, but Caio wants to check the license first.

On your own Read What happened and underline the two pieces of the film that the crew did not make. About 5 minutes.

Caio, Mateo and Rafa laugh as they look at photos on a small digital camera.

Your role: You're the one who fills in the rights log before the film goes up. **New skill:** Check permission, not just credit.

What happened

It is Friday night, and Caio, 24, is editing the crew's festival film. The film is a short recap made from crew footage and interviews. At 9:40 p.m., he saves a rough cut. For 20 seconds, a released song plays under the setup montage. Caio pitched the song up slightly, and the song sets the mood for the whole scene.

The cut borrows one more piece. From 1:40 to 1:46, it shows a six-second clip downloaded from a TikTok post. That post used Stitch, TikTok's remix tool. The crew did not make the song or the clip.

At 10:02 p.m., Mateo texts the crew chat: "We'll credit them in the caption. Post tonight?" He wants the film online tonight. Caio asks what the credit gets them, and Mateo does not have an answer. Caio wants to check the license before they post.

Your question: Does a credit give the crew permission to use the song, and what should they do before they post?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Attribution Attribution is naming the person who made a work, such as a song, a photo or a video.

En español: atribución

In this case: Mateo's plan, "We'll credit them in the caption," would name the artist. It answers who made the song, not whether the crew may use it.

License A license is permission from a rights holder to use a work under specific terms.

En español: licencia

In this case: The rights log says "permission unknown" for both borrowed pieces. A license from each owner would fill in that column.

Fair use Fair use is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors.

En español: uso justo

In this case: The crew would weigh the four factors for 20 seconds of a released song used as background mood. No number of seconds settles it.

The story: Rough cut, 9:40 p.m.

Caio edits freelance projects and runs film nights at the bookshop, so he knows what a song can do to a scene. On Friday night, he is cutting the crew's festival film, a short recap built from crew footage and interviews. His rough cut, saved at 9:40 p.m., has a problem he likes too much. From 0:18 to 0:38, a released song plays under the setup montage, pitched up slightly, and it carries the whole sequence. From 1:40 to 1:46, the cut also uses a six-second clip downloaded from a TikTok post made with Stitch, TikTok's remix tool.

At 10:02 p.m., Mateo texts the crew chat: "We'll credit them in the caption. Post tonight?" Mateo wants the film online tonight. Caio replies with a question: credit gets them what, exactly? Mateo admits he does not have an answer.

Caio's reasoning is simple. Twenty seconds of the song carries the montage, and that is exactly why he cannot just borrow it and hope. He wants to check the license before anyone posts. Your role is to fill in the rights log before the film goes up.

? Stop and think. Why does Caio say the song carrying the montage is a reason not to borrow it?

Credit, permission and the rights log

Attribution is naming the person who made a work, such as a song, a photo or a video. It answers "Who made this?" A **license** is permission from a rights holder to use a work under specific terms.

Credit, permission and the rights log, continued

It answers “Did the owner say yes to this use?” Mateo’s caption answers the first question and says nothing about the second.

Case 8 taught you that a **disclosure** is a clear statement that tells people about a relationship or fact they would want to know. Attribution is honest in the same way. It tells viewers where something came from. But honesty about the source is not permission to use it. Changing the pitch does not change ownership either. As Caio puts it, the song is still theirs, just a little higher.

Case 1 taught you to trace a clip to its original source. The rights log does that for every borrowed piece. It has columns for the element, who made it, where it came from, the permission or license and the date. Row 1 is the setup-montage music from a streaming download, permission unknown. Row 2 is the six-second clip from a TikTok creator, permission unknown. Mateo assumed Stitch covered the clip. Stitch permission works inside TikTok, and the festival film is not on TikTok, so the row stays “unknown” until the crew finds out.

Fair use is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The factors are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market (U.S. Copyright Office, updated July 2026). Case 12 taught you to compare facts against a legal standard, and fair use works the same way. No number of seconds is automatically safe. A short clip can count against fair use if it is the most recognizable part of a song.

Caio’s plan avoids the question entirely if the license falls through. The crew can use a library track with clear terms, or Dec can record a drum loop the crew owns. The film goes up Sunday.

? **Stop and think.** Mateo marks the TikTok clip “unknown.” What would the crew need to find out to fill in that row?

When platforms and courts decide

When Universal Music Group’s licensing deal with TikTok expired in February 2024, videos using its artists’ songs, from Taylor Swift to Olivia Rodrigo, went silent (NPR, February 1, 2024). Credit was never the issue.

The Supreme Court tested fair use in 2023. It ruled against the Andy Warhol Foundation, finding that Warhol’s new version of a photograph was not fair use when it served the same purpose as the original (NPR, May 18, 2023).

? **Stop and think.** Caio pitched the song up. Does changing a song make it a new work? Why or why not?

Notes

Key idea: fair use

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

Credit and permission answer different questions. **Attribution** is naming the person who made a work, such as a song, a photo or a video. It answers the question “Who made this?” A **license** is permission from a rights holder to use a work under specific terms. It answers another question: “Did the owner say yes to this use?” Mateo’s caption would give attribution. It would not give the crew a license.

Without a license, the crew could ask whether the use is fair use. **Fair use** is a part of U.S. copyright law that allows some uses without permission, judged case by case with four factors. The U.S. Copyright Office names the four factors. They are the purpose of the use, the nature of the original work, the amount used and the effect on the original’s market. No number of seconds is automatically safe. Even a short part can count against fair use if it is the most recognizable part of the song.

Platform tools come with their own limits. Stitch lets people remix another person’s video inside TikTok. That permission does not automatically cover a downloaded clip in a film shown somewhere else. Using music the crew records, or a track with a clear license, can avoid the fair-use question. Caio’s two backup plans follow this idea: a library track with clear terms, or a drum loop that Dec records.

We're good to post! ① We only used like 20 seconds of the song and we're putting the artist's name in the caption so they get credit. Plus it's not like we're making money off it, it's just for our page. ② Everyone uses songs like this on TikTok anyway so it's fine. We even changed the pitch a little so it's basically our own version now, and the whole cut is under two minutes. If they don't like it they can just ask us to take it down.

Your role: You're the one who checks each factor of the test before Rafa says yes. **New skill:** Apply a legal test factor by factor.

What happened

Rafa, 18, is a first-year college student who commutes to class and helps at his family's shop. In April, a studio posted a listing on the campus job board for a "Summer Editing Intern." The internship is unpaid. The listing says the intern will run the customer inbox all summer. Rafa reads it twice, looking for the editing.

On Tuesday at 11:20 a.m., the studio answers Rafa's message. The email says college credit makes it "totally legal" not to pay him. It also asks him to start right after finals.

At lunch, Rafa talks it over with Gia, who fits café shifts around her classes. Gia asks whether the studio paid someone to run the inbox last year. Rafa says the studio's assistant ran it. Taking the internship would also cost Rafa paid shifts at the shop. He has not said yes yet.

Your question: Is the internship mainly training for Rafa or unpaid work for the studio, and what should he ask before he decides?

The story: The work behind the title

Rafa, 18, is a first-year commuter who helps at his family's shop after class. In April, a listing goes up on the campus job board: "Summer Editing Intern (unpaid). Join our fast-paced studio! You'll run the customer inbox all summer, help with client files and get great exposure to the industry. College credit available." Rafa reads it twice. The title says editing. The duties say inbox.

He writes to the studio. On Tuesday at 11:20 a.m., the reply arrives: "Since interns get college credit, it's totally legal for us not to pay. We'd love for you to start right after finals." Rafa pastes it into the group chat. Gia asks whether that is how it works. Rafa says he does not know yet and starts looking it up on the train.

At lunch, Gia, who fits café shifts around her own classes, asks the question that changes the conversation. Didn't the studio pay someone to run the inbox last year? Rafa says their assistant did it. Gia also counts what the summer would cost him: shifts at the shop, the commute and a whole summer with no pay. "Exposure," she points out, does not cover the train fare.

Your role is to check each factor of the test before Rafa says yes.

 **Stop and think.** What does the gap between the job title and the duties tell Rafa?

Applying a test factor by factor

The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. If the intern is really an employee, the **Fair Labor Standards Act** applies. That is a federal law that sets minimum wage and overtime rules for most workers.

The Labor Department lists seven factors. They include training, links to coursework or **academic credit**, the school calendar and how long the learning lasts. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor asks whether the intern's work adds to paid employees' work or replaces it. The test is flexible, and no single factor decides it. Calling a position an internship does not decide it. Neither does college credit, or an intern agreeing to no pay.

The new skill is applying a written test one factor at a time. It builds on Case 12, where you set fact patterns beside a precedent. Match each factor to a fact, and mark what is missing. On replacing paid work, the evidence is strong: a paid assistant ran the inbox last year. On academic credit, the listing says credit is "available," but nobody knows yet whether Rafa's school will grant it. On training and supervision, there are no facts at all. Rafa's own summary is exact: credit is one factor out of seven, so what about the other six?

Case 11 gave you the word **compensation**, all the pay and benefits a worker receives. Here, the compensation is zero, and the cost to Rafa is real. His email to the studio can ask for the missing facts in writing: who trains him, what a normal week looks like, how many hours and whether this is the job the assistant did last year.

? **Stop and think.** Which factor does the paid assistant's job speak to, and which way does it point?

The case that set the test

Two unpaid interns on the 2010 film *Black Swan* sued Fox Searchlight, arguing that they should have been paid as employees. In 2015, a federal appeals court adopted the question of who is the primary beneficiary (LAist, July 2, 2015). The Department of Labor's Fact Sheet #71 now lists the seven factors (U.S. Department of Labor, updated January 2018).

Unpaid internships are still common. PBS NewsHour reported that nearly half of U.S. interns were unpaid in 2022 and asked who can afford to take those jobs (PBS NewsHour, August 26, 2023).

? **Stop and think.** Unpaid summers are easier for people who do not need a paycheck. Who might an unpaid internship leave out?

Notes

Key idea: the primary beneficiary test

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

A job title does not show how the work is arranged. The **primary beneficiary test** is how the U.S. Department of Labor decides whether an intern at a for-profit company is an employee. It asks whether the intern or the employer mainly benefits from an unpaid internship. An intern who counts as an employee must be paid under the **Fair Labor Standards Act**. The Fair Labor Standards Act is a federal law that sets minimum wage and overtime rules for most workers.

The Department of Labor's Fact Sheet #71 lists seven factors. They include training, links to coursework or **academic credit**, the school calendar and how long the learning lasts. Academic credit is credit toward a degree that a school gives for approved work, such as an internship. Another factor is whether the intern's work adds to paid employees' work or replaces it. The test is flexible, and no single factor decides it.

So the studio's email does not settle the question. Calling a job an internship does not decide it. Neither does college credit, or an intern agreeing to work for no pay. The test also has limits. It applies to for-profit employers, and state rules may differ. To apply the test, you need facts about the duties, training, supervision and hours.

Case 16: Who wrote the new building rule?

On your own Read What happened and underline the two changes the notice announces. About 5 minutes.

Mari hands a yellow sheet to Sami across a white table while Caio listens. This scene comes from Case 4.

Your role: You're the one who photographs the notice and writes down when and where it was found.
New skill: Find who has the authority to make a rule.

What happened

It is Monday morning in Sami's apartment building. A new notice is posted beside the common-room door. It says the rear door will be locked at 8:00 p.m. every night. It also says the common room is "for resident social use only," with "NO BUSINESS USE" in capital letters. The notice has no name, no date and no contact.

That rear door matters to Sami, who lives in apartment 3B and uses a manual wheelchair. It is the building's only step-free entrance. The front entrance has four steps and no ramp. Sami also runs a workshop in the common room, and it goes past 8 p.m.

Caio reads last year's house rules beside the notice. Those rules let residents reserve the common room for classes and resident-run workshops. The new notice does not say whether it replaces them. Before anyone starts arguing, Sami photographs the notice and writes down when and where she found it.

Your question: Who has the authority behind this notice, and what should Sami ask the building manager?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 5 minutes.

Authority Authority is the power a person or group has to make or change a particular rule or decision.

In this case: The notice uses bold type and capital letters but names no issuer. Sami has to find out who has the power to make this rule.

Reasonable accommodation A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place.

En español: acomodo razonable

In this case: Sami could ask the building for a key fob for the rear door, so she can get in after 8 p.m.

Documentation Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when.

- **Authority:** Authority is the power a person or group has to make or change a particular rule or decision.
- **Reasonable accommodation:** A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place.
- **Documentation:** Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.
- **Barrier:** A barrier is something that blocks or limits a person from taking part.

The story: Monday morning, 3B

On Monday morning, a new notice is posted beside the common-room door in Sami's apartment building. "NOTICE TO ALL RESIDENTS. Effective immediately, the rear door will be locked at 8:00 p.m. nightly. The common room is for resident social use only. NO BUSINESS USE." There is no name at the bottom, no date and no phone number or email.

Sami reads it twice. She lives in apartment 3B and uses a manual wheelchair. The entrance plan in the lobby directory tells the rest. The front entrance has four steps and no ramp, and the side door is for service use only. The rear door is the only step-free way in. She also runs a workshop in the common room that goes past 8 p.m. "So, questions," she tells Caio. "Plural."

Her first move is not an argument. She takes a photo of the notice and writes down when and where she found it. Caio, who rents a room on the block, brings last year's house rules, the ones residents got at lease signing, so they can read the two side by side.

Your role is to help Sami keep a clean record of the notice before anyone starts arguing about what it said.

? Stop and think. Sami's first move is a photo, not an argument. Why?

Finding the source of a rule

Authority is the power a person or group has to make or change a particular rule or decision. The notice uses every visual sign of authority, including capital letters, bold type and “effective immediately.” It gives no evidence of who holds that authority. An unsigned notice is not automatically invalid, either. Sami has to find out who issued it and which document it claims to change.

Earlier cases prepared this skill. Case 1 sent you to the original source, and last year’s house rules are one. They say residents may reserve the common room for “gatherings, classes and resident-run workshops” through the building office. Case 4 gave you the **decision-maker**, the person or group with the power to make a particular choice. Case 7 taught you to ask what stage a process has reached. Is this notice final, a draft or a mistake? Nobody knows.

Caio spots the gap in the wording. Last year’s rules allow resident-run workshops. The notice bans “business use” without defining it. Is Sami’s workshop business? The notice never says.

Case 10’s term **barrier**, something that blocks or limits a person from taking part, describes what a locked rear door would mean for Sami after 8. A **reasonable accommodation** is a change to a rule or practice that gives a person with a disability equal use of a place. For Sami, a key fob for the rear door would work. **Documentation** is a record, such as a photo, a note or an email, that shows what was said or done and when. Her photo and note are documentation.

Her message to the building manager will ask three things: who issued the notice, whether it replaces last year’s rules and how she gets in after 8. Neither she nor Caio calls it illegal yet.

 **Stop and think.** What would you need to know to decide whether Sami’s workshop counts as business use?

What the law says and what tenants have done

The Fair Housing Act is a federal law. HUD, the federal housing department, says it bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability, and it covers most housing, with some exceptions (HUD, no date listed). HUD has also explained how a person with a disability can ask for an exception to a building rule (HUD, January 31, 2014).

Tenants have used process before. At a Brooklyn complex, a landlord applied to install a facial-recognition entry system. Because the change needed a state agency’s permission, tenants could object, and in November 2019 the landlord withdrew the plan (Gothamist, November 21, 2019).

 **Stop and think.** A building may want a door locked at night. How could it keep that door secure and still let Sami in?

Notes

Key idea: authority

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

A building rule should name who made it, give a date and list a contact. This notice has none of them.

Authority is the power a person or group has to make or change a particular rule or decision. Bold type and capital letters do not show who has that power. An unsigned notice is not automatically invalid, either. Sami has to find out who issued it and which document it claims to change.

A landlord's policy and the law are different sources of rules. The Fair Housing Act is a federal law. HUD, the federal housing department, says it bars housing discrimination based on race, color, religion, sex, national origin, familial status or disability. It covers most housing, with some exceptions. Under the Act, a person with a disability can ask a building for a **reasonable accommodation**. A reasonable accommodation is a change to a rule or practice that gives a person with a disability equal use of a place. For Sami, that could be a key fob for the rear door.

Sami cannot yet say the notice breaks the law. She does not know who wrote it, whether it replaces the house rules or how the building handles access requests. Whether a building grants an accommodation also depends on the facts. **Documentation** helps her keep those facts straight. Documentation is a record, such as a photo, a note or an email, that shows what was said or done and when. Her photo of the notice, with the date and place she found it, is documentation.

A student's first draft

Hi, I saw the notice about the common room and rear door. **1** This is illegal and discriminatory against disabled people like me. You can't just make rules like this without asking. Nobody signed it and nobody told us it was coming, so I don't even know if it's real. I'm going to keep using the room for my workshop because the old rules said I could. Your role: You're the one who writes down the rule before the crew picks the ten names. **New skill:** Set fair criteria before choosing.

What happened

The crew has ten free seats for a workshop, and thirty people want one. The crew opened a sign-up sheet on Monday at 9 a.m. Twenty-two names were on it before 10 a.m. By Wednesday, the sheet has thirty names.

The sheet says only “How seats will be chosen: to be announced.” The crew has argued about the rule since dinner on Sunday. Gia is running the sign-up. She wants to give the seats to the first ten names, because that is simple and fast. Mateo suggests a lottery instead.

Anika, 16, is at rehearsal most days, and she checks her phone after rehearsal ends. Under first-come, she would see the message after the seats were gone. A third option on the crew's whiteboard would give seats to people who cannot afford the paid version of the workshop. That option would ask people for personal information.

Every method seats exactly ten people. The crew has to decide which ten, and then explain the rule to all thirty.

Words to know

- **Criteria:** Criteria are the standards or reasons a group uses to make a decision.
- **Trade-off:** A trade-off is a choice where getting one benefit means accepting a cost or giving something up.
- **Equity:** Equity is a way of sharing that adjusts for different needs so everyone gets a fair chance.
- **Consent:** Consent is permission a person gives for something specific, such as sharing a record with a named person.

The story: To be announced

The crew has ten free seats for a workshop and a sign-up sheet that filled faster than anyone expected. It opened Monday at 9 a.m. Twenty-two names were on it before 10. By Wednesday, there are thirty. The line at the bottom still reads, “How seats will be chosen: to be announced.” The crew has been arguing about that line since dinner on Sunday.

Gia is running the sign-up, and she wants first come, first served. It is easy to explain, she can post it tonight and she has a shift at seven. Mateo suggests a lottery. Gia points out what that costs: a sign-up window and someone to run the drawing. A third option sits on the whiteboard, a needs-based rubric that would favor people who cannot afford the paid version of the workshop.

Anika, 16, is at rehearsal most days, and her phone lives in her bag until rehearsal ends. Under first-come, she would see the message after the seats were gone. She is careful about what she is asking for. She does not need a seat. She wants to know how the crew is picking, and she wants them to be honest that someone like her would lose out.

Your role is to write down the rule before the crew picks the ten names.

❓ Stop and think. Gia’s reason for first-come is partly about her own time. Is that a fair criterion? Why or why not?

Criteria, trade-offs and equity

Criteria are the standards or reasons a group uses to make a decision. The new skill is setting fair criteria before choosing and saying honestly who each rule leaves out. The whiteboard already does part of that work. Option A, first come, first served, is fast to run and favors whoever sees it first. Option B, a lottery after a three-day sign-up, gives everyone an equal chance but needs a sign-up window and a drawing. Option C, a needs-based rubric, prioritizes people who cannot afford the paid version but needs personal information and someone to judge it.

Case 4 gave you the word **trade-off**, a choice where getting one benefit means accepting a cost or giving something up. Every option seats exactly ten people, so every option leaves twenty without a seat. The choice is which cost to accept. **Equity** is a way of sharing that adjusts for different needs so everyone gets a fair chance. Option C aims at equity, and it carries a cost Case 6 prepared you to see. **Consent** is permission a person gives for something specific. A needs-based rule asks applicants to share personal information, so the crew would need their consent and a plan for who sees it.

Timing matters as much as the rule. The sign-up sheet shows most names arrived in the first hour, before any rule was posted. If the crew picks a rule now, after seeing the names, people may wonder whether it was chosen to favor someone. A rule stated clearly and early is easier to accept, even for the twenty who miss out.

Anika also suggests a better way to compare the options. Ask two questions. Which option helps the most people? And is the way we pick fair to everyone? Gia, for her part, admits she mostly wanted the job off her list. What would change her mind is learning that the people the crew most wants in the room are the ones who would see the message last.

 **Stop and think.** Option C would help people who cannot afford the paid workshop. What would applicants give up to be chosen that way?

Real rationing decisions

Santa Clara University's Markkula Center suggests looking at a decision through several ethical lenses, including consequences, rights, fairness, the common good, character and care (Markkula Center for Applied Ethics, revised November 5, 2021). The lenses can point to different answers.

Real institutions face the same choice. New York City uses random lotteries for some middle and high school seats (Chalkbeat New York, October 1, 2024). For Taylor Swift's Eras Tour, more than 3.5 million people registered for presale codes. Ticketmaster says about 1.5 million received codes, and 2 million were waitlisted (Ticketmaster, November 19, 2022).

 **Stop and think.** What would make the twenty people without seats accept the result as fair?

Notes

Key idea: fair criteria

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

Any way of giving out ten seats to thirty people leaves twenty people without one. A **trade-off** is a choice where getting one benefit means accepting a cost or giving something up. First-come is fast, but it favors people who see the message first. A lottery gives everyone the same chance, but it does not consider need. A needs-based rubric aims at equity by helping people who cannot afford the paid version, but applicants must share personal information. Each option has a cost, so the crew has to choose which cost to accept.

Criteria are the standards or reasons a group uses to make a decision. When the crew states its criteria early, everyone knows the rule before anyone is chosen. Even people who do not get a seat may accept the result if the rule was clear in advance. If the crew picks a rule after seeing the names, people may wonder whether it was chosen to favor someone.

The Markkula Center for Applied Ethics at Santa Clara University suggests looking at a decision through several ethical lenses. They include consequences, rights, fairness, the common good, character and care. The lenses can point toward different options, and they do not add up to one automatic score. A strong decision explains which concern matters most in this case, who carries the cost and what could reduce it.

How to Decide Who Should Get a COVID-19 Vaccine First

Lays out competing criteria such as risk, fairness and benefit, the same lenses the crew uses.

Notes

Sort the evidence

On your own Follow each option to its effects and write who carries the cost in each box. About 6 minutes.

Follow each method to its consequences. Who carries the cost under each one, and what makes the chosen process legitimate to the twenty who lose?

First come, first served

The ten fastest responders get seats; people at rehearsal or work see the sign-up late

Who is affected

Lottery after a three-day sign-up

Each of the thirty has the same chance, and need is not considered

Who is affected

Needs-based rubric

Those with the greatest need are prioritized; applicants must share personal information

Who is affected

Whose perspective is missing?

Whose view is missing from these documents? What would you ask them?

The view that is missing is _____. I would ask _____.

Practice: choose a response

On your own Choose the note you would send, explain why and fix the two marked phrases. About 4 minutes.

Gia is drafting a note to the thirty people on the sign-up sheet. Which sentence could the crew defend?

- ☐ A “We picked the fairest method, so nobody loses out.”
- ☐ B “We’re holding a lottery so everyone has the same chance. A lottery doesn’t favor people with the most need, so we’re looking into a second session.”
- ☐ C “Seats go to the first ten names on the sheet, because those people wanted it most.”

Why I chose it

Improve a draft

A student’s first draft

We should do first come first served because ① it’s the most fair. Everyone has the same chance to sign up and if you really want it you’ll sign up fast. It’s simple and ② nobody can complain because they had the same opportunity as everyone else. Also it’s way less work for us than reading thirty applications or doing some random drawing. The people who don’t get in can just come to the next workshop whenever we have one. This is obviously the best way.

Rewrite each marked phrase so it says only what the evidence supports.

Argue whether equal chance or greatest need should guide how public programs with limited seats choose participants.

Use: Case materials plus one teacher-selected example (a charter-school lottery or a summer-jobs program).

You'll make: Argument, 600—700 words

Time: 60 minutes

- 1 Reread Evidence C. Mark the option that gives equal chance and the one that targets need.
- 2 Read the public program example your teacher gives you.
- 3 Fill in the claim and counterclaim chart for both principles.
- 4 Name two ways the club case differs from the public program.
- 5 Write a thesis that names one principle and one limit.
- 6 Draft your introduction and counterargument paragraph on the Your draft page.
- 7 Finish the argument, 600 to 700 words, on lined paper or in the online workspace.

Case 17: How should the crew give out ten free seats?

In this case, a group of friends has ten free workshop seats and thirty people who want one. Your student compared three ways to choose and wrote a note that explains the choice and who carries its cost.

Questions to talk about

- 1 When something is limited, like tickets or seats, what makes a way of choosing feel fair?
- 2 Why might it help to announce a rule before anyone signs up?
- 3 What is one kind way to tell people they were not picked?

Case 18: Why is the theater curtain still falling apart?

The district's proposed budget is \$48 million, the school theater curtain won't close, and Dec wants to ask the school board about it.

On your own Read What happened and underline the three dollar amounts. About 4 minutes.

Anika, Dec and Mari test a small light circuit in a theater workshop, with Pauta beside them.

Your role: You're the one who works out the per-student number before anyone repeats the post. **New skill:** Compare numbers on the same scale.

What happened

The curtain in the school theater is torn, and it no longer closes all the way. Dec, 17, pulls that curtain at every show. He and Anika, 16, are on the theater crew. The facilities office gave the theater advisor a quote to replace the curtain: \$6,800.

Mari, 19, is helping them prepare a question for the school board. They find the district's proposed budget for next school year. The total is \$48 million for a projected 3,200 students. One line sets aside \$310,000 for building repairs at all schools. A note says the figures may change before the board adopts the budget.

On Tuesday at 6:10 p.m., a post starts going around. It compares the district's \$48 million with another district, Westbrook, at \$21,000 per student. "And they can't fix ONE curtain??" it asks. Dec has a photo of the torn curtain. He wants to be the one who asks the board about it.

Your question: What can the \$48 million total tell Dec about the curtain, and what should he ask the school board?

Key terms

On your own Read each key term and its example, then write your first guess in the box. About 4 minutes.

Revenue Revenue is money that comes into a government or an organization, such as taxes and grants.

En español: ingresos

In this case: NCES reports that public schools get revenue from federal, state and local sources. That national data cannot show what Dec's district spends on a curtain.

Expenditure An expenditure is money that a government or an organization spends.

En español: gasto

In this case: The \$48 million is a proposed plan for next school year. It lists planned expenditures, but none of that money has been spent yet.

Per-pupil amount A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.

En español: monto por estudiante

In this case: $\$48,000,000 \div 3,200 \text{ students} = \$15,000 \text{ per student}$. Westbrook's \$21,000 is already per student, but its year and stage are unknown.

Who is involved

Mari

Helping the theater crew with a budget question

"Forty-eight million dollars, and the curtain still won't close. Ay, bendito. Before we get mad at the big number, which line is supposed to fix it?"

Dec

Pulls the curtain at every show

"I pull that curtain every show. It doesn't close all the way anymore. That part I can show you."

Before you look at the evidence, why do you think the theater curtain is still not fixed?

This image shows a single sheet of white paper with horizontal blue lines, resembling notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Reading passage

A total is not a per-student number

On your own Read the passage. At each Stop and think box, pause and answer the question in your head or with a partner. About 5 minutes.

Words to know

- **Revenue:** Revenue is money that comes into a government or an organization, such as taxes and grants.
- **Expenditure:** An expenditure is money that a government or an organization spends.
- **Per-pupil amount:** A per-pupil amount is a total divided by the number of students, so that districts of different sizes can be compared.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: A curtain and a viral post

Dec pulls the stage curtain at every show. The fabric is torn, and the curtain no longer closes all the way. Dec, 17, and Anika, 16, are on the theater crew, and the facilities office has already given the theater advisor a quote to replace it: \$6,800.

Mari, 19, is helping them prepare a question for the school board. Together they find the district's proposed budget for next school year. The top line is \$48 million for a projected 3,200 students. One line reads "Facilities, building repairs (all schools): \$310,000." A note at the bottom says the figures are proposed and may change before the board adopts the budget.

Then, on Tuesday at 6:10 p.m., a post starts circulating: "Our district: \$48 MILLION. Westbrook: \$21,000 per student. And they can't fix ONE curtain?? Where is the money going?" Anika sends it to the chat. Dec admits the curtain part is true. Mari asks where the numbers come from.

Your role is to work out the per-student number before anyone repeats the post.

? **Stop and think.** What three labels should you check before comparing budget numbers?

Year, stage and unit

Before comparing two budget numbers, check three labels: the year, the stage and the unit. The post skips all three. Its \$48 million is a proposed total for a whole district next year.

Year, stage and unit, continued

Its Westbrook figure is a per-student amount from an unknown year and stage.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. The new skill is comparing numbers on the same scale, and it builds on Case 11, where you compared two jobs on the same terms. Divide \$48,000,000 by 3,200 students, and the district's proposed amount is \$15,000 per student. The post's comparison now looks different. It is still incomplete, because Westbrook's budget year and stage are unknown. A per-pupil figure also cannot say whether either district has enough for its students' needs.

Revenue is money that comes into a government or an organization, such as taxes and grants. An **expenditure** is money that a government or an organization spends. The budget is a plan for expenditures, and it is a **proposal**, the Case 4 term for a change that someone suggests and that has not been approved yet. A proposed budget, an adopted budget and actual spending are three different documents.

Case 5 taught you to read a document line by line. Mari applies that to the budget. She reads the labels before reacting to the big number, and she looks for the line that could cover a curtain. Case 13 taught you to keep a claim as small as your evidence. Dec does that. His photo shows the tear, and that is all it shows. He brings the photo, the \$6,800 quote and a question.

The Case 4 **decision-maker**, the person or group with the power to make a particular choice, is the school board, which adopts the budget. Dec's question should name one line, one need and the board's next chance to hear requests. He also wants to ask it himself, because it is his crew's curtain.

 **Stop and think.** After you work out \$15,000 per student, what is still missing from the comparison?

Real budgets, real limits

The National Center for Education Statistics reports that public schools get revenue from federal, state and local sources, and the mix differs by state (NCES, May 2024). NPR has explained how local property taxes make school budgets very different from one district to the next (NPR, April 18, 2016). Many large districts are now making cuts because of inflation and enrollment declines, which shows how a large budget can leave little room for extras (Chalkbeat, May 28, 2026).

 **Stop and think.** Dec wants to ask the board himself. Why might it matter who brings the question?

Notes

Key idea: per-pupil amounts

On your own Read the key idea and the code of ethics, then answer the question in the box. About 10 minutes.

Before you compare two budget numbers, check three labels: the year, the stage and the unit. An **expenditure** is money that a government or an organization spends. A proposed budget is a plan for expenditures. An adopted budget is the plan the board approves. Actual spending is what the district really spent. The \$48 million is a proposed total for the whole district. The Westbrook figure is an amount per student.

A **per-pupil amount** is a total divided by the number of students, so that districts of different sizes can be compared. Dec's district proposes \$48,000,000 for a projected 3,200 students. That works out to \$15,000 per student. The comparison is still not complete, because Westbrook's budget year and stage are unknown. A per-pupil figure also cannot show whether either district has enough for its students' needs.

Revenue is money that comes into a government or an organization, such as taxes and grants. The National Center for Education Statistics (NCES) reports that public schools get revenue from federal, state and local sources. The mix differs from state to state. National data like this gives context, but it cannot say what one district spends on a curtain. In most states, an elected local school board adopts the budget within state and federal rules. That is why Dec's question should name one budget line, one need and the board's next chance to hear requests.

What happened

It is Tuesday, 5:40 p.m. The parks committee meets at 6. Item 4 on its agenda is a proposal to turn off the park's court lights at 8 p.m. The reason given is complaints about evening noise from nearby residents.

Gia, 21, wants to speak against item 4. It is her first time speaking at a public meeting. Each speaker gets two minutes. On Monday night, Gia wrote a three-page draft. When she reads page one out loud, it takes two minutes and forty seconds.

Mateo, 22, is timing her from a bench. He follows every word, but he cannot tell what she wants the committee to do. The draft also mentions a friend's private situation, and page two is about the bus. Everything Gia says will become part of the public record, along with her name.

- **Agenda item:** An agenda item is one topic listed on a meeting's official schedule of business.
- **Remit:** A remit is the set of matters that a committee or other body is responsible for and can act on.
- **Public record:** A public record is information a government keeps that anyone can ask to see, such as meeting comments.
- **Proposal:** A proposal is a change that someone suggests and that has not been approved yet.
- **Decision-maker:** A decision-maker is the person or group with the power to make a particular choice.

The story: A practice run on a bench

At 5:40 p.m. on a Tuesday, twenty minutes before the parks committee meets, Gia is reading her public comment out loud to Mateo. Item 4 on the agenda proposes turning off the park's court lights and closing the lighted courts at 8 p.m., because nearby residents have complained about evening noise. Gia, who grew up in Fort Greene, wants to speak against it. It is her first time at a public meeting.

The rules are simple. Sign up by 5 p.m., speak for two minutes, and know that comments and speakers' names become part of the public record. Written comments may be sent in before the meeting too. Gia's problem is length. On Monday night, she wrote three pages. Page one alone takes two minutes and forty seconds.

Mateo is timing Gia from a bench, and he listens the way a committee member might. He follows all of it. He still could not tell anyone what she wants the committee to do. Instead of rewriting her draft, he asks one question. If they only remember one sentence, what is it? Whatever she answers, he says, that sentence goes first.

Your role is to hold the timer and listen for the request.

❓ Stop and think. Mateo asks what one sentence the committee should remember. Why is that more helpful than rewriting Gia's draft?

Cutting to the remit

An **agenda item** is one topic listed on a meeting's official schedule of business. Item 4 is narrow: court lights and a closing time. Gia's draft asks the committee not to close the park, which nobody has proposed. A **remit** is the set of matters that a committee or other body is responsible for and can act on. Page two, about the bus, is a real problem outside the parks committee's remit. Case 10 taught you to send a problem to the office responsible, so the bus goes to a different office on a different day.

The new skill is fitting a request to the body's remit and time limit. It builds on Case 4. There, the crew prepared a comment for a nonprofit board, and you learned that a **proposal** is a change that someone suggests and that has not been approved yet. You also learned that a **decision-maker** is the person or group with the power to make a particular choice. The agenda shows the chain. The committee makes a recommendation, and the full council decides.

Gia's answer to Mateo's question becomes the spine of the comment. Name item 4. Share what she counted: twenty or thirty people on the courts between 8 and 9. Explain why it matters: a lot of them work late. End with one request the committee can act on: keep the lights on until 9 on weekdays this summer.

The comment should also acknowledge the other side. A nearby resident wrote that the courts are good for the neighborhood but that late noise carries into their apartment, and they have kids with school in the morning. A request for 9 p.m. instead of 8 p.m. gives the committee a middle option.

Finally, Gia cuts her friend's private situation. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. The story is her friend's, not hers.

 **Stop and think.** How could Gia's comment respond to the resident's concern about noise?

How public comment works in real places

Every body sets its own rules. Seattle City Council, for example, takes spoken comments in person or by phone and written comments by email, and each speaker gets up to two minutes (Seattle City Council, no date listed). A Philadelphia guide walks residents through signing up, finding the agenda item and fitting a point into the time limit (The Philadelphia Citizen, March 10, 2025). Students have used this process too. In Newark, a student coalition brought its own research and specific requests to the school board (Chalkbeat Newark, November 26, 2025).

 **Stop and think.** Court users who work late may miss a 6 p.m. meeting. How could their views reach the committee?

Key idea: remit

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

A **remit** is the set of matters that a committee or other body is responsible for and can act on. The parks committee can make a recommendation about court hours. It cannot change bus routes. That is why Gia's comment should ask for something the parks committee can do.

An **agenda item** is one topic listed on a meeting's official schedule of business. Each committee, council or board sets its own rules for who can speak, when and for how long. Seattle City Council is one real example. Its public comment page describes speaking in person or by phone and signing up before the meeting. Each speaker gets up to two minutes, and written comments can be sent by email.

A short comment can do four jobs. It names the agenda item, shares something the speaker observed, says why it matters and ends with a clear request. Before adding personal details, check whether comments become public. A **public record** is information a government keeps that anyone can ask to see, such as meeting comments. At Gia's meeting, comments and speakers' names become part of the public record.

Gia has two minutes on item 4. Which opening sentence gives the committee the most to work with?

- ☐ A “The park is really important to everyone, and closing it is a terrible idea.”
- ☐ B “Good evening. I’m Gia, and I’m commenting on item 4, the proposal to turn off the court lights at 8 p.m.”

Case 20: Can the crew post this image as true?

A realistic image says the campus courtyard flooded today, and Jordy must decide what the six o'clock recap can say about it.

On your own Read What happened and underline the caption's claim. About 3 minutes.

Lupa holds a cropped photo of a courtyard next to the full photo pinned on a board. The full photo also shows a blue doorway.

Your role: You're the one who writes the verification note Jordy posts at six. **New skill:** Confirm an image with independent sources.

What happened

It is Wednesday, 3:10 p.m. For twenty minutes, an image has been going around the group chat. It looks like a photo of the campus courtyard, with water over the paving and benches. The caption says, "Courtyard flooded today, stay away." It showed up at 2:48 p.m. with no link, no date and no name.

Jordy is putting together the crew's recap, which goes out at six. Sami has zoomed in on a hand in the picture, and the fingers seem to merge at the knuckles. Someone ran the image through a free online detector. It reported "12% likely AI-generated."

A reply in the chat says the writer's roommate's friend saw water near the library. Jordy checks the campus facilities alerts page. It shows no active alerts, but its last update was Monday morning.

Your question: Did the courtyard flood today, and what should the recap say about the image?

The story: An image with no when or where

At 2:48 p.m. on a Wednesday, an image lands in the group chat with no link, no date and no name attached. It looks like a photo of the campus courtyard, with water covering the paving and the benches. The caption is urgent: “Courtyard flooded today, stay away.” By 3:10, it has been circulating for twenty minutes.

Jordy has a deadline. The crew’s recap goes out at six, and the first question in the chat is whether the courtyard picture goes in. The evidence piles up quickly, and none of it settles anything. Sami, who studies design and photographs things most people walk past, zooms in on a hand in the foreground. The fingers seem to merge at the knuckles. Someone runs the image through a free detector and gets “12% likely AI-generated.” A reply says the writer’s roommate’s friend saw water near the library. Jordy checks the campus facilities alerts page. It lists no active alerts, but it has not been updated since Monday at 9:15 a.m.

Sami redirects the conversation. Everyone is zooming in on the hand, and she did too. But she still does not know who posted the image. When she takes a photo, it has a when and a where. This one has neither.

Your role is to write the verification note Jordy posts at six. It is the final skill in the casebook, and it combines many of the others.

❓ **Stop and think.** Sami shifts the question from how the image looks to where it came from. Why is that the stronger question?

From clues to a verification note

Start where Case 1 started, with the original source. **Provenance** is information about where an image or a document came from and how it has been handled. This image arrived without any, so its provenance is unknown.

The caption makes a **claim**, the Case 1 term for a statement that something is true that you can check with evidence. Look at each clue honestly. The hand is a reason to look closer, not proof of anything. A natural-looking hand would not prove an image is real, either. The detector score is a number without context. Sami asks, twelve percent of what? These tools can be wrong in both directions, and none of them can say whether the courtyard flooded today. The secondhand report fails as a source twice. It is a roommate's friend, and it is about the library, not the courtyard. Jordy would welcome it if that person had a photo with a time on it.

Corroboration is support for a claim from an independent source. The best candidates are an official alert or a dated photo from someone on site. Case 9 taught you to check the official source for your area, and the alerts page is that source. Its silence is weak evidence, because it has not been updated since Monday.

Jordy considers posting the image with a question mark and rejects it, because a question mark still spreads the picture. Instead, the recap will carry a **verification note**, a short record of what you checked, what you found and what is still unknown. It shares its logic with Case 1's **holding statement**, which says what is known, what is still being checked and when people will hear more. Case 3 adds the last piece. If new evidence changes the answer, a **correction** goes where people saw the original note.

❓ **Stop and think.** The alerts page shows nothing new since Monday. Does that prove the courtyard did not flood?

How real newsrooms handle it

After Hurricane Helene in October 2024, an image of a crying girl clutching a puppy in a rescue boat spread widely. Fact-checkers found no original photographer or news source. Digital-forensics researcher Hany Farid pointed to details that did not hold together, like a boat floor with impossible perspective (UC Berkeley School of Information, October 4, 2024). In 2023, fake images of an explosion near the Pentagon spread quickly and briefly moved markets before officials confirmed nothing had happened (NPR, May 22, 2023).

Looking closely is not enough. Research found that people could not reliably tell AI-generated faces from real ones (Nightingale and Farid, PNAS, February 14, 2022).

Key idea: provenance

On your own Read the key idea and the code of ethics, then answer the question in the box. About 8 minutes.

Provenance is information about where an image or a document came from and how it has been handled. Check it first when an image claims to show a news event. An image can look polished and still be generated, edited, old or shared with the wrong caption. The courtyard image arrived with no link, no date and no named poster, so its provenance is unknown.

A detail or a tool can give a clue, but it cannot settle the question. An odd-looking hand is a reason to look closer. A natural-looking hand does not prove that an image is real, either. The National Institute of Standards and Technology (NIST) describes several ways to track, label, watermark and detect synthetic content, such as AI-generated images. NIST explains that each approach has technical limits.

For a claim about a real event, look for the earliest post, its date and place, and corroboration.

Corroboration is support for a claim from an independent source. Here, that could be a campus alert or someone's dated photo of the courtyard. If you cannot confirm the claim, write a verification note. A **verification note** is a short record of what you checked, what you found and what is still unknown.
